1. **INTRODUCTION**

1.1 **Background**

This Stakeholder Engagement Plan (SEP) has been prepared for Phase 1 of the Kampala-Jinja Expressway (KJE) Public-Private Partnership (PPP) Project to be implemented by the Uganda National Roads Authority (UNRA) in line with Ugandan laws and international standards. Phase 1 consists of the 34 km Kampala-Namataba section (also referred as KJE Phase 1) and the complete 18 km of the Kampala Southern Bypass (also referred as KSB).

Scoping for Environment and Social Impact Assessment (ESIA) was undertaken in 2011 for the KJE and KSB components of the Project as two separate projects and approved by National Environment Management Authority (NEMA). In 2014 and 2015, ESIA and resettlement action planning work was carried out, however before these were approved, a decision was made by UNRA to merge the two projects into one. An Environment and Social Working Group for the KJE PPP Project has been set up to monitor the ESIA Update and development of a Resettlement and Livelihood Restoration Plan (RLRP) that is underway to align with international standards and reflect updates to the expressway alignment. This SEP is a part of the update of the ESIA and resettlement action planning studies previously prepared for the Project to help inform future engagement activities.

Consultations with Project stakeholders were commenced by UNRA in 2011 and have continued through the ESIA and RLRP Update process up to 2018.

1.2 **Purpose and Scope**

1.2.1 **Objectives**

As per the IFC Sustainability Framework (2012) and AfDB Integrated Safeguards Systems (2013), the purpose of this SEP is to establish and maintain positive relationships with stakeholders (i.e. individuals, communities, local government authorities, and other interested/affected parties) over the life of the Project. In addition, the SEP identifies the different stakeholders to be consulted as part of the ESIA/RLRP processes underway for the Project.

In addition to fulfilling legislative obligations, the objectives of this SEP are to:

1. Build two-way communications between UNRA, the affected communities and other Project stakeholders for the ESIA/RLRP processes;
2. Ensure that Project affected communities and other stakeholders are well informed of the Project, potential associated environmental and social impacts, and proposed management measures;
3. Collect relevant information on the Project area from key stakeholders for use in the ESIA/RLRP and associated management plans as well as development of the Project;
4. Ensure stakeholder feedback on the Project and its impacts is gained through simple and effective communication processes;
5. Promote inclusive and informed decision-making on the development and management of the Project; and
6. Ensure community views, concerns and suggestions are considered in the development of the Project and inform mitigation measures where practical (restricted to preferred route).
The following principles will guide stakeholder consultation (IFC, 2007):

- Targeted at those most likely to be affected by the Project;
- Early enough to scope key issues and influence the project decisions to which they relate;
- Informative, as a result of relevant information being disseminated in advance;
- Meaningful to those consulted because the content is presented in a readily understandable format and the techniques used are culturally appropriate;
- Two-way, so that both sides have the opportunity to exchange views and information, to listen, and to have their issues addressed;
- Gender-inclusive through awareness that men and women often have differing views and needs;
- Localised to reflect appropriate timeframes, context, and local languages;
- Free from manipulation or coercion;
- Documented to keep track of who has been consulted and the key issues raised;
- Reported back in a timely way to those consulted, with clarification of next steps; and
- Ongoing as required during the life of the Project.

1.2.2 Scope of the Plan

This SEP will apply to Phase 1 of the KJE Project for its ESIA and RLRP processes. The SEP builds off previous consultations undertaken by UNRA for the Project from 2011 to 2015 to avoid consultation fatigue. Stakeholder consultation should be ongoing for the life of the Project. To ensure engagement activities are consistent throughout the life of the project, periodic updates to this Plan should be undertaken to reflect any changes in Project activities, legislation or stakeholders as well as reflect stakeholder needs based on past consultations.

The SEP is structured as follows:

- Chapter 1 – Introduction;
- Chapter 2 – Project overview and significant aspects;
- Chapter 3 – Legislative requirements, guidelines and commitments;
- Chapter 4 – Stakeholder identification;
- Chapter 5 – Engagement activities completed to date;
- Chapter 6 – Ongoing stakeholder engagement program;
- Chapter 7 – Resources and responsibilities; and
- Chapter 8 – Grievance mechanism.

1.2.3 Linkage with Other Project Documentation

This SEP supports management of the environmental and social aspects of the Project and draws on information from key studies undertaken to date including feasibility, ESIs and Resettlement Action Plans (RAPs) for the KJE Project. The SEP will guide stakeholder engagement activities during the ESIA and RLRP update and future Project activities.
2. PROJECT OVERVIEW AND SIGNIFICANT ASPECTS

2.1 Project Overview

UNRA is proposing to construct a limited access toll expressway between Kampala and Jinja to relieve the current congestion on the existing Kampala to Jinja highway and to cater for future growth. The KJE PPP will be complemented by the Kampala Southern Bypass (KSB). Together they will form part of an international highway connecting Uganda to the port of Mombasa on the Kenyan coast and serving as a primary transportation corridor of imports from Kenya and Uganda to the rest of the East African community.

The KJE Project is planned to be undertaken in two phases:

► **Phase 1** includes the Kampala-Namagunga (33.6 km) section of the KJE, expected to be completed by 2021, and the Kampala Southern Bypass (18 km) which is expected to be completed by 2023; and

► **Phase 2** includes the Namagunga–Njeru (43.4 km) section of the KJE. Works for this second phase are anticipated to be completed by 2030.

The KJE Project is currently planned for a 30-year term, inclusive of the construction period, after which Project facilities will be transferred to UNRA. The KJE Project is expected to generate up to 1,500 jobs during construction and 250 jobs during operations, most of which will be taken up by Ugandans. Once operational, the expressway is expected to save up to 70 minutes of journey time between Kampala and Jinja.

Phase 1 of the KJE Project traverses four administrative districts: Kampala, Wakiso, Mukono and Buikwe. A Project Footprint has been established of 60 m width along the road alignment.

Key design features of the KJE and KSB sections are shown in Table 2-1. The KJE and KSB, in conjunction with the forthcoming Kampala – Entebbe Expressway, will provide a complete bypass of the southern zone of Kampala city.

**Table 2-1: Key design features of the Kampala-Jinja Expressway and Kampala Southern Bypass**

2.2 Project Proponent

UNRA, established under the UNRA Act, No. 15 of 2006 and operational since 2008, is the Project Sponsor. As an independent corporate body, UNRA’s mandate is to develop and manage the national road network in an efficient and sustainable manner and advise the Government on general road policy (UNRA, 2016).

2.3 Socio-Economic Setting

A brief overview of the socio-economic context and social aspects of Phase 1 of the KJE Project which are relevant at the time of preparation of the SEP is described below.

2.3.1 KJE Mainline between Kampala and Namagunga

Phase 1 of the KJE Project passes through urban (close to Kampala and parts of Mukono) through to peri – urban and semi-rural agricultural lands. Most of the route deviates from the existing Kampala – Jinja road and crosses the Uganda Rail Corporation rail line. The lands traversed are largely classified as Mailo or freehold land, with most impacted people being Bibanja holders.

The majority of the population along this alignment is found in the Kampala and Wakiso Districts. There are several informal settlements and areas where encroachment has taken place. One of the largest informal settlements is Kasokoso within the Kinawataka wetland in the Kireka area of Kampala, which has been densely settled with squatters and encroachers, some of whom are already undergoing eviction independent of the KJE project. There is also an ongoing legal dispute between the National Housing and Construction Company Limited (NHCCL) and Kireka Estates over land ownership in the area. The issues of Kasokoso and the process of eviction have the potential to delay the timetable for the construction of the KJE. In 2015, Kasokoso residents asked UNRA to increase the amount of compensation due to them losing land to the construction of the KJE. The affected residents want UNRA to revalue their land and make a compensation offer that reflects the appreciation in the value of their land since the initial valuation (more than a year before).

Other informal settlements, small industry, businesses and agriculture also occur in wetlands along the route. The NEMA has begun a nationwide restoration of wetlands and is currently expelling housing and agriculture developments from the encroached wetlands.

Businesses potentially affected by the route include fuel stations, car showrooms, shops, the National Sports Stadium, and the proposed Namanve Industrial Park which supports a Strategic Economic Zone. Several schools (primary and secondary), Nakawa market as well as local roads, railway, and public utilities (power, telecommunication, sewage) will be affected by the route. Disturbance to a traditional cultural site is also expected.

Proposed major infrastructure and industrial areas along the KJE route include the Malaba-Kampala Standard Gauge Railway (SGR) project, Industrial Business Park located on the eastern periphery of Kampala, and the potential future Kampala city airport. These planned developments have the potential to bring cumulative impacts to residents living in the area.
2.3.2 Kampala Southern Bypass

The KSB passes through southern Kampala from Butabika Interchange of the proposed KJE to intersect with the Munyonyo Spur road of Kampala – Entebbe Expressway. The KSB runs mostly through Kampala Capital City Authority (KCCA) areas covering the divisions of Nakawa and Makindye, after which it enters areas part of Wakiso District (Kira Division) for approximately 1.8 km before joining the KJE.

The KSB crosses heavily settled areas between the Butabika interchange and the Nakivubo wetland near the Project Footprint. Towards Makindye, the population density generally decreases. Nakawa, Mutungo, Mbuya, Muyenga (Bukasa) and Makindye hills are built up with a mixture of high value settlements and have numerous access roads that may be disrupted. The population of the Nakawa informal settlement area is mostly unemployed and can pose a challenge to the Project. Women are expected to be more affected compared to men. The majority of surveyed people are within the working age groups. Health, wealth and education conditions are expected to be consistent with those communities found along the KJE alignment, particularly for the informal settlement areas.

The land found along the KSB is dominated by settlement and commercial land uses. Agro-pastoral land use is also present throughout the Nakivubo and Kasanga wetland areas. Some of this land use is undertaken on a small-scale to supplement income and livelihoods while other operations are of commercial scale. Fishing and aquaculture is also found along these sections. Businesses present along the KSB range from small vendors, street hawking and trade to larger retail shops and industry (i.e. tomato factory).

Several schools, churches, religious structures, prayer places, health centres and other community infrastructure are likely to be disrupted as well as disturbance to some burial grounds and traditional cultural shrines (e.g. between Ggaba Road and Salama Road). Water springs directly along the alignment also serve local communities for both their domestic and production needs, therefore access to water will be critical for these communities.

Significant developments planned in vicinity of the KSB include the Kampala-Entebbe Expressway, Bukasa Inland Dry Port, and Luzira Industrial Park Project.

2.3.3 Socio-economic impacts

The proposed alignment has been selected to minimise impact on cultivated land and settlement areas to the extent possible, however these areas are not entirely avoidable. As a result, the key potential socio-economic impacts of the Project are as follows:

- Temporary or permanent disruption and loss of access to properties, social and commercial services, facilities and natural resources along the alignment;
- Improvements in regional accessibility, connectivity and travelling times, facilitating regional economic development;
- Displacement of residents and loss of their land, assets and livelihoods. In particular, the Kasokoso wetland area, which has been densely settled with squatters and encroachers, some of whom are already undergoing eviction independent of the KJE project;
- Loss of revenue, assets, structures, land and employee incomes for businesses from small kiosks to industrial establishments. Small or informal businesses which are not registered or have secure land tenure are particularly vulnerable;
- Provision of employment to local communities in the construction phase and, to a lesser extent, in the operation phase;
Risks associated with labour influx during construction, including potential violence or harassment of women and children (as experienced and documented for the Uganda Transport Sector Development Project);

Potential change of land use patterns throughout the area with associated livelihood and business impacts (e.g. loss of cultivated and grazing land) for large to small-scale farmers; and

Impacts to utilities (e.g. power and water distribution services) and community property (e.g. worship sites, recreational facilities, local markets, cemeteries and schools).

Initial scoping studies have indicated the entire KJE Project is estimated to displace up to 10,362 Affected Persons and 40 large businesses/institutions across 110 communities due to land acquisition requirements (particularly in Phase 1) (UNRA, 2017a). Land-take in most areas for the Project Footprint will be 60 m width. Further details and extent of Affected Persons is provided in the ESIA / RLRP Update.

### 2.4 Key Issues and Risks for Stakeholder Engagement

The work conducted for Phase 1 of the KJE Project identified several key issues and risks important for ongoing stakeholder engagement activities described in Table 2-2. A key strategy to address these is ensuring a clear and accurate understanding of the entire KJE Project, which considers previous expectations and commitments made related to Project design, timeline, resettlement process, and entitlements.

**Table 2-2: Summary of Key Issues and Risks for Stakeholder Engagement of ESIA and RLRP for Phase 1**

<table>
<thead>
<tr>
<th>Stakeholder Engagement</th>
<th>Key Risk or Issue</th>
</tr>
</thead>
</table>
| **ESIA stakeholder engagement** | - Ambiguity about the proposed Phase 1 activities, expected environmental and social impacts, cumulative impacts, and proposed mitigation and management (including previous ESIA commitments)  
- Incomplete list of stakeholders identified for the ESIA process  
- Stakeholder consultation fatigue  
- Management of community and business impacts, including aspects regarding displacement, accessibility, community health and safety, and vulnerable groups  
- Engagement for the relocation of cultural heritage sites, burial grounds, and churches within or adjacent to the Project Footprint  
- Opposition due to the perception that Phase 1 works may impact on high conservation wetland areas and fragile aquatic and terrestrial ecosystems  
- Delays in starting Phase 1 works due to project grievances (see below for further details) |
| **RLRP stakeholder engagement** | - Incomplete list of Affected Persons, vulnerable groups, and other stakeholders (e.g. host communities) identified for the RLRP process  
- Stakeholder consultation fatigue  
- Mistrust in the resettlement and compensation process  
- Deviation from past ESIA and RLRP results and expectations regarding commitments that have been delayed or not carried through (e.g. extent of impact and associated mitigation, project timeline, Affected Persons registration and entitlement, etc.)  
- Land tenure and relocation of informal settlements  
- Community accessibility and severance impacts  
- Disagreement regarding ‘rightful’ Affected Persons for the KJE Project due to encroachment, in-migration of new settlers, and opportunistic entitlement seekers  
- Adequate compensation and restoration, particularly informal small business owners who may not be legally registered or have tenure for their business operations  
- Tension and discontent resulting from the independent Kasokoso land ownership dispute between Kireka Estates and the National Housing and Construction Company Limited as well as NEMA’s eviction process of illegal settlements in wetlands  
- Changes to laws governing land acquisition and expropriation |
3. LEGISLATIVE REQUIREMENTS, GUIDELINES AND COMMITMENTS

3.1 Ugandan Legislative Framework

Public consultation and information disclosure are core requirements of the ESIA process in Uganda. Pursuant to the Environment Impact Assessment (EIA) Regulation, S.I. No. 13/1998, stakeholders must be consulted as part of the ESIA process, with the objective of improving project design and incorporating the views of the stakeholders in all project activities where possible. Regulation 12 of the EIA Regulations requires the developer to take "all measures necessary to seek the views of the people in the communities which may be affected by the project". Regulation 14 includes stakeholder consultation as a key aspect to be addressed in the scoping study and ESIA for a proposed development.

The Ugandan EIA Guidelines (NEMA, 1997) and EIA Guidelines for Road projects (NEMA, 2004) also require extensive consultation for the ESIA process. The latter stipulates participation by stakeholders in the EIA process, and specific guidance for public consultation and public disclosure is provided in Section 7. The SEP has been prepared in accordance with these requirements. The Ugandan EIA Guidelines are detailed in Chapter 2 of the ESIA Report (Volume B).

3.2 International Standards and Guidelines

International Standards for stakeholder engagement and information disclosure relevant to this Project include:

- International Financial Corporation (IFC) – Policy on Environmental and Social Sustainability and associated IFC Performance Standards (2012), specifically Performance Standards 1 and 5 below;
- IFC Stakeholder Engagement: A good practice handbook for companies doing business in emerging markets (2007);
- IFC: Addressing Grievances from Project-Affected Communities (2009);
- IFC: Guidance Note F: Guidance for Preparation of a Public Consultation and Disclosure Plan (1998); and

Specific requirements from the above standards have been considered in relevant sections of this framework.

3.2.1 World Bank / IFC Guidelines and Performance Standards

UNRA is committed to aligning the Project with international best practice. The IFC is the private lending arm of the World Bank Group and the largest multilateral source of loan and equity financing for private sector projects in developing nations. The environmental and social policies and procedures of the World Bank are widely regarded as de facto international standards for the environmental and social management of resource development projects in countries with developing or absent regulatory frameworks.

The Sustainability Framework developed by the IFC outlines its strategic commitment to sustainable development and is an integral part of its approach to risk management. The framework consists of the revised 2012 Performance Standards as well as a revised IFC Policy on Environmental and Social Sustainability and a newly introduced Access to Information Policy.

The IFC Performance Standards were introduced to provide guidance for project proponents to manage and improve their environmental and social performance through a risk and outcomes based approach. Direction on
the application of the Performance Standards is provided in the IFC Guidance Notes, a companion document to the Policy on Environmental and Social Sustainability. Public consultation requirements of relevant performance standards to the Project is provided in Table 3-1.

Table 3-1: Stakeholder engagement requirements of relevant IFC Performance Standards (2012)

<table>
<thead>
<tr>
<th>Performance Standard</th>
<th>Summary of consultation and disclosure requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Performance Standard 1: Assessment and Management of Environmental and Social Risks and Impacts</td>
<td>Performance Standard 1 underscores the importance of managing social and environmental performance throughout the life of a project (any business activity that is subject to assessment and management). Objectives relating to consultation and disclosure include ensuring that affected communities are appropriately engaged on issues that could potentially affect them. Specific items include:</td>
</tr>
<tr>
<td>- The client will provide Affected Communities with access to relevant information on: (i) the purpose, nature, and scale of the project; (ii) the duration of proposed project activities; (iii) any risks to and potential impacts on such communities and relevant mitigation measures; (iv) the envisaged stakeholder engagement process; and (v) the grievance mechanism.</td>
<td></td>
</tr>
<tr>
<td>- When Affected Communities are subject to identified risks and adverse impacts from a project, the client will undertake a process of consultation in a manner that provides the Affected Communities with opportunities to express their views on project risks, impacts and mitigation measures, and allows the client to consider and respond to them. The extent and degree of engagement required by the consultation process should be commensurate with the project's risks and adverse impacts and with the concerns raised by the Affected Communities.</td>
<td></td>
</tr>
<tr>
<td>- The client will tailor its consultation process to the language preferences of the Affected Communities, their decision-making process, and the needs of disadvantaged or vulnerable groups. If clients have already engaged in such a process, they will provide adequate documented evidence of such engagement.</td>
<td></td>
</tr>
<tr>
<td>- For projects with potentially significant adverse impacts on Affected Communities, the client will conduct an Informed Consultation and Participation (ICP) process. ICP involves a more in-depth exchange of views and information, and an organized and iterative consultation, leading to the client's incorporating into their decision-making process the views of the Affected Communities on matters that affect them directly, such as the proposed mitigation measures, the sharing of development benefits and opportunities, and implementation issues.</td>
<td></td>
</tr>
<tr>
<td>- The consultation process should (i) capture both men's and women's views, if necessary through separate forums or engagements, and (ii) reflect men's and women's different concerns and priorities about impacts, mitigation mechanisms, and benefits, where appropriate.</td>
<td></td>
</tr>
<tr>
<td>- The client will document the process, in particular the measures taken to avoid or minimize risks to and adverse impacts on the Affected Communities, and will inform those affected about how their concerns have been considered.</td>
<td></td>
</tr>
<tr>
<td>- For projects with adverse impacts to Indigenous Peoples, the client is required to engage them in a process of ICP and in certain circumstances the client is required to obtain their Free, Prior, and Informed Consent (FPIC). The requirements related to Indigenous Peoples and the definition of the special circumstances requiring FPIC are described in Performance Standard 7.</td>
<td></td>
</tr>
<tr>
<td>- Where stakeholder engagement is the responsibility of the host government, the client will collaborate with the responsible government agency, to the extent permitted by the agency, to achieve outcomes that are consistent with the objectives of this Performance Standard. In addition, where government capacity is limited, the client will play an active role during the stakeholder engagement planning, implementation, and monitoring. If the process conducted by the government does not meet the relevant requirements of this Performance Standard, the client will conduct a complementary process and, where appropriate, identify supplemental actions.</td>
<td></td>
</tr>
<tr>
<td>- Clients will implement and maintain a procedure for external communications that includes methods to (i) receive and register external communications from the public; (ii) screen and assess the issues raised and determine how to address them; (iii) provide, track, and document responses, if any; and (iv) adjust the management program, as appropriate. In addition, clients are encouraged to make publicly available periodic reports on their environmental and social sustainability.</td>
<td></td>
</tr>
<tr>
<td>- Where there are Affected Communities, the client will establish a grievance mechanism to receive and facilitate resolution of Affected Communities' concerns and grievances about the client's environmental and social performance. The grievance mechanism should be scaled to the risks and adverse impacts of the project and have affected communities as its primary user. It should seek to resolve concerns promptly, using an understandable and transparent consultative process that is culturally appropriate and readily accessible, and at no cost and without retribution to the party that originated the issue or concern. The mechanism should not impede access to judicial or administrative remedies. The client will inform the Affected Communities about the mechanism in the course of the stakeholder engagement process.</td>
<td></td>
</tr>
</tbody>
</table>

Performance Standard 5: Land Acquisition and Involuntary Resettlement | Performance Standard 5 applies wherever land, housing or other resources are taken involuntarily from people. It requires the consideration of feasible alternative project designs to avoid or minimise physical or economic displacement while balancing environmental, social and financial costs and benefits. In relation to consultation, one |

---
of its objectives is to ensure that resettlement activities are implemented with appropriate disclosure of information, consultation, and the informed participation of those affected. Specific requirements include:

- The client will engage with Affected Communities, including host communities, through the process of stakeholder engagement described in Performance Standard 1. Decision-making processes related to resettlement and livelihood restoration should include options and alternatives, where applicable. Disclosure of relevant information and participation of Affected Communities and persons will continue during the planning, implementation, monitoring, and evaluation of compensation payments, livelihood restoration activities, and resettlement to achieve outcomes that are consistent with the objectives of this Performance Standard.

- The client will establish a grievance mechanism consistent with Performance Standard 1 as early as possible in the project development phase. This will allow the client to receive and address specific concerns about compensation and relocation raised by displaced persons or members of host communities in a timely fashion, including a recourse mechanism designed to resolve disputes in an impartial manner.

### 3.2.2 AfDB Integrated Safeguards System

The African Development Bank Group (AfDB) has implemented an integrated safeguards system as a cornerstone of its strategy to promote growth that is socially inclusive and environmentally sustainable. The system consists of four interrelated components:

- Integrated Safeguards Policy Statement;
- Operational Safeguards;
  - Operational Safeguard 1: Environmental and Social Assessment
  - Operational Safeguard 2: Involuntary Resettlement Land Acquisition, Population Displacement and Compensation
  - Operational Safeguard 3: Biodiversity and ecosystem services
  - Operational Safeguard 4: Pollution prevention and control, hazardous materials and resource efficiency
  - Operational Safeguard 5: Labour conditions, health and safety
- Environmental and Social Assessment Procedures (ESAPs); and

Of relevance to the KJE Project is the ESAPs and IESIA Guidance Notes providing technical guidance on standards regarding roads and highways, and the Operational Safeguards.

AfDB emphasises the importance of consultation to build strong relationships which seek to facilitate a responsiveness to the concerns of all, prioritize equity and inclusivity, and which are essential for the successful management of a project’s environmental and social risks and impacts. In particular:

- Operational Safeguard 1 states that the borrower or client will be responsible for conducting and providing evidence of meaningful consultation (i.e. consultation that is free, prior and informed) with communities likely to be affected by environmental and social impacts, and with other local stakeholders.

- The key focus of meaningful consultation is equity and inclusivity; namely, the approach taken needs to ensure that all groups (including those that are disadvantaged or vulnerable) are embraced within the consultation process on equal terms, and that all groups are given the capacity to express their views with the knowledge that these views will be properly considered.

- The Bank requires that consultation will start at the project identification stage, or at least at an early stage during project preparation, that it will continue throughout, and that it will be based upon a stakeholder analysis. It shall also be conducted in a timely manner in the context of key project-preparation steps, in an
appropriate language, and in a manner, that is accessible and fully informed as a result of prior disclosure of project information.

- Consultation also allows affected communities / other stakeholders the opportunity to share their knowledge, insights and understanding of the local context, and enables them to recommend modifications or changes to the project with an informed view.

Consultation prior to and during the development of the KJE Project will apply the principle of free, prior and informed as per AfDB’s definition:

- Free: consultation will be free of external manipulation, interference, intimidation or coercion.
- Prior: consultation will be timely in relation to the assessment process, allowing sufficient time to access and understand the information and prepare appropriate responses.
- Informed: consultation will be grounded in the provision of relevant, understandable and accessible information, in the appropriate language, and in advance.

In addition, consultation will be accessible, transparent, sensitive, inclusive and fair.

### 3.3 UNRA Policies and Commitments

#### 3.3.1 Environmental and Social Commitments

In line with legal obligations, UNRA is committed to stakeholder engagement and disclosure of information through its Environment and Social Safeguards Policy. This Policy specifies core commitments for environmental and social protection for all its activities and projects, including for stakeholder engagement, disclosure of information, and grievance redress mechanism. The Policy describes the overarching policy commitments, goals and objectives, and thematic policy statements in place as well as procedures for implementation.

The Environment and Social Safeguards Policy provides the basis of UNRA’s Environment and Social Management System (ESMS). It requires that all employees, contractors, consultants and sub-contractors comply with the Policy while undertaking work for UNRA.

#### 3.3.2 Stakeholder Data Management Systems

UNRA uses its Land Acquisition Management System (LAMS) and ROWMIS data management systems for recording and managing important stakeholder information to support the Project implementation.

The LAMS system provides guidance on the management of land acquisitions, including:

- A review of the legal and institutional framework, community consultations and surveys required, and compensation strategy as well as actual compensation estimates;
- Survey and valuation details, including how to define compensation principles and rates; and
- Compensation and expropriation, including necessary approvals, payment of compensation to Affected Persons and transferring of land titles together with deed plans to UNRA.

This system applies to all aspects of the acquisition process associated with road reserves, and defines the roles and responsibilities of all parties involved in the implementation process.

In support to this, ROWMIS is a tool that has capabilities for maintaining linked records of Affected Persons and aggrieved parties regarding information on their affected land / assets, compensation and entitlements (including delivery dates), stakeholder communications and notices, logged grievances, and any supporting
documentation. It is the main tool for registering grievances for the Project and is linked to UNRA’s public online Grievance Web Portal.

3.3.3 Broad Stakeholder Engagement Strategy

UNRA has outlined a broad stakeholder engagement strategy for the KJE PPP Project in the following documents:

► KJE Project Broad Stakeholder Engagement Plan (UNRA, version unspecified);
► Affected Persons Verification and Compensation Disclosure Plan (UNRA, February 2017b);
► Disclosure and Verification Report for KSB Vol 1 Compensation (UNRA, March 2017c); and
► Grievance Redress Mechanism (Annex A).

The above documents have been considered in this SEP, where applicable.
4. STAKEHOLDER IDENTIFICATION

4.1 Identification of Key Stakeholders

Identifying key stakeholders and understanding their specific needs and expectations of the Project is critical for an effective consultation and engagement strategy. This information can then be used to tailor engagement to each type of stakeholder. As part of this, it is important to identify individuals and groups who may find it more difficult to participate, as well as those who may be differently or disproportionately affected by the Project because of their marginalised or vulnerable status.

Key stakeholder groups for the Project can be broadly categorised as per Table 4-1.

Table 4-1: Categories of key stakeholders

<table>
<thead>
<tr>
<th>Category</th>
<th>Group</th>
<th>Type of Stakeholders</th>
</tr>
</thead>
</table>
| Communities                                   | Affected communities / persons     | Affected communities: Defined as towns, villages, and wards affected by loss of land/assets (or access to land/assets), noise and dust impacts; surrounding villages; host communities for Project resettlement.  
Affected Persons: Consists of persons who would be affected by loss of land/assets/livelihoods (or access to land/assets/livelihoods) due to the Project. This includes displaced residents that will need to be relocated.  
Villages or groups of households losing joint / community assets: This consists of groups or individuals in villages with communal land affected by the Project. Examples of community assets expected to be disturbed by the Project include worship sites, burial sites, cemetery, etc.  
Vulnerable groups (as per AfDB definition): This consists of vulnerable people potentially disadvantaged by the Project, including minority groups, the landless, those living below the poverty line, sickly or handicapped, the elderly, female headed households, disadvantaged children (i.e. orphans, homeless), marginalised social groups, etc. |
| Host and surrounding communities              |                                    | Surrounding towns, settlements and villages that may host relocated Affected Persons or have some interest or influence on the Project.                                                                                           |
| Businesses, community facilities and utility/infrastructure owners | Affected businesses | Small, medium or large businesses that will have an indirect or direct loss of land / assets or income due to the Project.                                                                                                     |
|                                               | Affected community infrastructure owners | Owners of community buildings or facilities including schools, churches, medical facilities, markets and recreational facilities which may be directly or indirectly affected by the Project.                                 |
|                                               | Affected utility/infrastructure owners | Government-owned or private utility/infrastructure owners directly or indirectly affected by the Project, including for railways, telecommunications, electricity and water distribution, power transmission, local roads, flyovers, and sewerage facilities. |
|                                               | Nearby development proponents/owners | Includes significant development proponents and operators in vicinity of the Project that may affect or be affected by the Project.                                                                                             |
| Government                                    | Local Level Governments            | Relevant government officials from affected districts (Kampala, Wakiso, Mukono and Buikwe) as well as the Kampala Capital City Authority (KCCA).                                                                                |
|                                               | Lower Local Governments            | Sub counties, Divisions, Wards, Cells and Parishes.                                                                                                                                                                  |
|                                               | Regulatory Authorities             | Regulatory authorities responsible for overseeing coordination and management of potentially affected utilities and infrastructure including railway, power transmission and distribution, and water supply and distribution, etc. |
|                                               | National Government                | Relevant national government authorities including lead agencies such as the National Environment Management Authority (NEMA) of Ministry of Water and Environment as well as other important/advisory agencies.  
The Buganda Land Board is also a professional body set up by His Majesty the Kabaka of Buganda to manage land and properties returned under the Restitution of Assets and Properties Act of 1993. |

4.3 Stakeholder Mapping

For developing a targeted consultation approach, various Project stakeholders identified in the section above should be managed through a tiered approach based on their level of interaction and influence with the Project:

► **First Tier Stakeholders:** are stakeholders that UNRA has a high and frequent level of interaction with. These stakeholders tend to be more affected by the Project and have a significant influence on Project activities and decision-making processes. Examples of first tier stakeholders include displaced residents, directly and indirectly Affected Persons and businesses, governments (at local and national levels) and community or local authorities; as well as Project owner, employees, and contractors. UNRA should cooperate with these stakeholders and manage them closely.

► **Second Tier Stakeholders:** are stakeholders that UNRA has a semi-frequent level of interaction with. Examples of second tier stakeholders include local businesses and service providers, surrounding communities, NGOs, nearby development proponents/owners, support services (fire, ambulance), and other stakeholders. UNRA should keep these stakeholders well informed and seek partnerships where mutually beneficial.

► **Third Tier Stakeholders:** are stakeholders that have a high influence but infrequent level of interaction with the Project. These include potential investors and financiers, interested international organisations and development partners, and mass organisations. UNRA should keep these stakeholders satisfied.

► **Fourth Tier Stakeholders:** are stakeholders that have a low influence and low level of interest with the Project, including the general public and research groups. These stakeholders are considered the least important.

A visual representation of key stakeholder mapping for Phase 1 of the KJE Project is shown in Figure 4-1. The relevancy of each stakeholder group is outlined in the diagram according to their potential level of interest and influence in the ESIA and RLRP processes.

UNRA will identify stakeholders on a continuing basis by reviewing stakeholder groups who may be affected by or be interested in the Project. The process of identifying key individuals and organisations for each of the stakeholder groups needs to consider:

► Contacts that have already been made between UNRA and communities, government departments and other organisations as part of its public consultation, disclosure and government relations activities;

► Consideration of the area of influence of the Project insofar as it has been defined during the ESIA process; and

► Contacts with UNRA related to the expressway project made by outside organisations expressing an interest in the Project.
Figure 4-1: Key stakeholder mapping for the Phase 1 ESIA / RLRP processes.
5. ENGAGEMENT ACTIVITIES COMPLETED TO DATE

5.1 ESIA Consultations and Disclosure

Informal and formal consultations have been undertaken with relevant Government authorities, local community and stakeholders dating back to the 2011 feasibility and preliminary environmental and social investigations. These were undertaken in accordance with NEMA EIA Guidelines (1997, 2004) for seeking opinions and views on social and environmental aspects relating to the Project. The overall stakeholder consultation and engagement process focussed on:

1. Identifying and notifying stakeholders of the proposed project activities and the ESIA;
2. Establishing dialogue between the Project and stakeholders;
3. Collecting perceptions, concerns, and proposals from stakeholders relating to concerns with the development of the Project; and
4. Making provisions for incorporating stakeholder feedback into the planning and design of the Project.

Different stakeholders were identified based on whether they would be impacted or have an active/passive interest in the Project. A stakeholder was identified and categorised as an individual, group, or institution with a vested interest in the natural or productive resources of the Project area and/or who will potentially be affected by Project activities and have something to gain or lose if conditions change or stay the same. An attempt was made to identify all the primary and secondary stakeholders who have a vested interest in the KJE Project.

The scoping stage identified various stakeholders that were then consulted and engaged. Stakeholder consultations occurred in the affected districts of Kampala, Wakiso, Buikwe and Mukono; where engagements and consultations were conducted with Government (at national and local levels) and Local Council officials; religious, civil society and cultural leaders; potentially affected residents and businesses; and institutions.

The main purpose of these engagements was to identify and update concerns from earlier stakeholder engagements conducted, and to inform relevant stakeholders of the progress of the Project. The main method for consultations was consultation meetings and workshops as well as focus group discussions with major stakeholders along the proposed alignment (institutions/ manufacturers and selected individuals). Most of the Affected Persons along the Project Footprint were given targeted questionnaires. Other methods included face-to-face and phone interviews.

In some instances, invited stakeholders declined participation in consultations. Efforts will be made to encourage important stakeholders to attend, including facilitation with transportation and meals. For institutions, some individuals raised concerns on an individual basis and not as the official stance of their institutions.

Table 5-1 summarises the main consultations undertaken for Phase 1 of the KJE Project with Government, private sector, affected communities and other stakeholders. Earlier consultations conducted by UNRA between 2011 and 2014 are described in Table 5-2. Full records of the consultations are provided in in the ‘Consultation Records’ technical appendix (Volume C).

Consultative meetings with the various stakeholder groups across the KJE Project alignments are shown in Photos 5-1 to 5-6.

### Stakeholder Consultation Workshop with Civil Society Organisations and NGOs

Civil Society Organisations included: Safe Way Right Way, Uganda Road Accident Reduction Network Organisation, UPHSA / Uganda Medical Association, Balfour Beauty, Uganda Road Sector Support Initiative, Human Rights Network Uganda, TASO Uganda, Wildlife Conservation Society (WCS), Busoga Kingdom, Uganda Law Society, UIPE, UWASNET, International Accountability project, Safeway consulting, FIDA-U (Uganda Association of Women Lawyers), Uganda Land Alliance (ULA), Uganda Women's Network (UWONET), National Association of Professional Environmentalists (NAPE), CONDON, KLA, Uganda Association for Impact Assessment (UAIA), MK Advocates, Advocates Coalition for Development and Environment (ACODE), UWR, ICPA, etc.

Invited, but absent:
- Inter-Religious Council of Uganda (IRCU)
- Uganda Road Sector Support Initiative (URSSI)
- SGS Uganda Limited | SGS Automotive Uganda Limited
- Uganda Youth Network (UYONET)
- National Youth Council
- Action for Youth with Disabilities Uganda (AYDU),
- Uganda Network of AIDS Service Organisations (UNASO)
- Uganda AIDS Commission Secretariat,
- Greenwatch Uganda
- Uganda Child Rights NGO Network
- Land and Equity Movement of Uganda (LEMU)
- Nature Uganda
- IUCN, Uganda Country Office
- Institution of Surveyors of Uganda
- Uganda Society of Architects
- Engineers' Registration Board (ERB)
- Uganda Association for Impact Assessment
- Minister for culture, heritage, Royal tombs and tourism
- National Association of Women Organisations in Uganda (NAWOU)

Jun 2017

Inform stakeholder institutions about the project. Understand their perception of the project and main concerns / views. Seek their input on key aspects that the ESIA and RLRP should focus on.

### Stakeholder Consultation Workshop with District Technical Planning Committees

Wakiso District Technical Leadership
- Mukono District Technical Leadership
- Kampala Capital City Technical Leadership

Jun 2017

Inform stakeholder institutions about the project. Understand their perception of the project and main concerns / views. Seek their input on key aspects that the ESIA and RLRP should focus on.

### Stakeholder Consultation Workshop with the Private Sector

Jun 2017-March 2018

Inform stakeholder institutions about the project. Understand their perception of the project and main concerns / views. Seek their input on key aspects that the ESIA and RLRP should focus on.

</thead>
</table>
| **Meeting with Sector Agencies** | Wetlands Management Department staff
Department of Museums and Monuments staff
National Forestry Authority (NFA)
Directorate of Water Resources Management (DWRM)
ICS Design team
UNRA staff | 2013 | Inform stakeholder institutions about the project and seek their input on key aspects that the ESIA should focus on. Through this meeting, a number of issues were discussed covering sectoral aspects such as wetlands, compensation framework, need to control community access to wetlands once the road is constructed, ensuring water flow in wetlands is guaranteed during and after road construction, management of cut to spoil which is sometimes indirectly used by the communities to reclaim wetlands amongst other considerations. |
| **Preliminary sensitisation meeting during scoping stage** | National Forestry Authority (NFA)
Ministry of Water and Environment (MWE)
Ministry of Gender Labour and Social Development
Department of Museum and Antiquities
Ministry of Tourism, Trade and Industry (MTTI)
National Environment Management Authority (NEMA)
Wetland Management Department, MWE
Kampala Capital City Authority (KCCA) Headquarters
Nakawa Division Headquarters (Mayor and Technical people)
Makindye Division Headquarters (Mayor and Technical people)
Director Environment Affairs, Directorate of Environment – Ministry of Water and Environment
Kira Division Headquarters (Mayor and Technical people)
Project Consultant team | Feb-Apr 2013 | Obtain information related to Kampala Southern Bypass
Inform stakeholder institutions about the project
Seek their input on key aspects that the ESIA should focus on. |
| **Government consultations** | Nakawa Division, Makindye Division and Kira Division (Wakiso District, Sabagabo) | Jul 2015 | Sensitisation meetings |

### 5.1.1 Information disclosure

UNRA has disclosed project information as part of formal and informal consultations with potentially affected communities, businesses and other stakeholders to assist them in understanding the Project before providing their inputs and feedback. This included providing information on: (i) the purpose, nature, and scale of the project; (ii) the duration of project activities; (iii) any risks to and potential impacts on concerned communities and proposed mitigation measures; (iv) the stakeholder engagement process in place; and (v) the grievance mechanism.
Methods for engaging stakeholders prior to the ESIA Update and which will continue include:

► Workshops
► Meetings with local leadership
► Community meetings
► Media sessions (e.g. radio, television)
► Billboards
► Posters, brochures and other information materials.

5.1.2 Outcome of ESIA consultations

Key issues and concerns raised by the local community, private sector, governments (local and national), civil society organisations and institutions during ESIA consultations are discussed in the below sections. Full records of the consultations are presented in the ‘Consultation Records’ technical appendix (Volume C).

5.1.2.1 Community Views and Concerns for the Project

The main concerns raised by affected communities during the most recent consultations during 2016 and 2017 are summarised in Table 5-3. The response provided at the time of consultation is also described. The respondents generally welcomed the Project and supported it. Both the local community and local leaders had expectations for employment opportunities during the construction phase. However, many expressed concerns at ongoing delays and other issues associated with the compensation and resettlement process. These were considered and incorporated into the ESIA and Project design to the extent possible. In addition, requests and issues typically raised by local communities and stakeholders from experience on other comparable road projects were also considered.

<tr>
<td>Kigago Zone community members</td>
<td>Compensation</td>
<td>Will compensation be provided to persons indirectly affected by the Project?</td>
<td>Direct, indirect and cumulative impacts will be assessed and mitigated in the ESIA. Where unexpected issues arise, they will be identified during monitoring activities and the grievance mechanism. UNRA has established a team of sociologists and environmentalists to undertake monitoring for the project.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>Will there be compensation provided for the lost time and revenue on land where development has been stopped or delayed indefinitely due to the Project?</td>
<td>Yes, this will be compensated by revaluing the land and the current value of the land will be considered.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>How will property which was previously valued but no longer exists be addressed? Please consider the first evaluation of the land/property even if people changed their property after evaluation.</td>
<td>The first evaluation forms will be considered and compared with the new evaluations to be conducted.</td>
<td>RLRP Chapter 5</td>

<tr>
<td>Commercial land</td>
<td>Is there a special approach on how to deal with commercial land given its importance?</td>
<td>A procedure will be developed and implemented on how to handle commercial land.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation/Livelihood Restoration</td>
<td>How can the entire family benefit from the project rather than the family heads only?</td>
<td>All members of affected families will be involved. During the signing of the valuation forms, women will be required to sign and open joint bank accounts to ensure there is consent from the account holders.</td>
<td>RLRP Chapter 5 and 9</td>
<td></td>
</tr>
<tr>
<td>Consultation</td>
<td>So many people are affected by the project but few people are aware of these meetings.</td>
<td>All affected persons will be regularly engaged during this continuous process through formal processes and getting information from neighbours and media. During the socio-economic census survey and the cadastral and asset survey, Affected Persons will be interviewed. Information will be passed on between neighbours and via community radio announcements.</td>
<td>SEP (this document)</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>How are you going to ensure that all Affected Persons are compensated?</td>
<td>All Affected Persons within the project area of influence will be identified and their details registered during the cadastral and assets survey and socio-economic survey so that they will be compensated appropriately.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Conflict Resolution and Grievances</td>
<td>What can be done if an Affected Person does not agree with the valuation of the assessor?</td>
<td>Compensation will be fair and adequate but you can also opt for an independent assessor to confirm what has been reported.</td>
<td>RLRP Chapter 12</td>
<td></td>
</tr>
<tr>
<td>Masaja Kibira B community members</td>
<td>How will compensation be handled for those who have not yet paid the Kabaka’s land?</td>
<td>We shall have a discussion meeting with the Kingdom of Buganda to agree on a common ground for this issue.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>How will people staying in wetlands be handled?</td>
<td>Land titles made after 1995 and are in wetlands will not be considered but these people will be compensated for their property on the land.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>Will compensation consider the lost time from the previous valuation visit telling us to stop adding new developments to our land and the incurred losses?</td>
<td>The property values will be updated to incorporate changes on the land and payments adjusted. Loss of business aspects will be incorporated and people will be expected to justify this loss so that they can be compensated. A 15% disturbance value will be added to your total compensation as disturbance payment</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>Some speculators are acquiring land by exploiting the Wetland Protection Law. Also, is this project approved by the Ministry of Finance yet.</td>
<td>UNRA is trying as much as possible to deal with rightful land owners and a legal due diligence will be done by the lawyer to confirm the ownership of the affected person before compensation. This project was approved by the government.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>What amount of money will remain if NEMA takes part of it and Buganda Land Board also takes a percentage of it?</td>
<td>Buganda Land Board will not get a share of your payment. It will be paid separately and NEMA will not be paid because it is part of government. Payment will be made according to market value of land.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Mutungo Zone 1 and Zone III Compensation (Schedule)</td>
<td>What month and date can we expect compensation because we have waited for over 2 years.</td>

<tr>
<td>community members</td>
<td>Compensation</td>
<td>Some structures have deteriorated in the period after valuation. How will this property be revalued now?</td>
<td>We shall only compensate property which still exists on the land and which was included in the previous valuation.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>Will UNRA look into Affected Persons who have loans and payment that would be affected by the resettlement process?</td>
<td>This can be considered if proof is provided for the loan. Values will be derived on how much you are affected.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>There is concern of land grabbing. How sure is the land destined for road construction and not for opportunistic purposes?</td>
<td>We have been here before addressing issues particularly about the Kampala Jinja Expressway project and land to be acquired will be for the project only.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>How will the issue of land which is left after valuation but is no longer of use to the land owner be handled?</td>
<td>We shall pay for the whole land in case the remaining part is no longer of use to the land owner.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>We used our land titles and agreements to get loans from the bank. How will you deal with this?</td>
<td>Please inform the valuers about this issue and specify which bank so that we can discuss it internally and address the issue.</td>
<td>NA</td>
</tr>
<tr>
<td>Mutungo Zone II and Zone VIII community members</td>
<td>Access</td>
<td>Will access to our homes be maintained during construction? For those who are not directly affected, we can end up being affected from encroachment on our land. How will this be addressed?</td>
<td>Other access routes shall be established for people to use. The ESIA will consider such issues and provide solutions to mitigate the potential impact.</td>
<td>ESIA Report Chapter 8</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>Some of us were not around during valuation and yet the land is family land. Will we also be included in the valuation document?</td>
<td>We shall come back to revalue the land and determine who the actual owner is for the land. In case of conflict, your money will be put aside and given to the rightful person after the conflict has been resolved. For family land, you will be asked to have representatives of the family to sign on all documents required.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Compensation / Accessibility</td>
<td>The valuation process is not clear about housing aspects considered. Will the material used to construct the compound be considered and if access roads will be blocked by the project?</td>
<td>Discuss with the valuers these aspects so that they can include on the valuation form.</td>
<td>RLRP Chapter 5 / ESIA Report Chapter 8</td>
</tr>
<tr>
<td></td>
<td>Conflict Resolution and Grievances</td>
<td>How will land ownerships disputes be addressed if there are conflicting claims? Which offices can we go to handle land ownership issues and conflicts to resolve them?</td>
<td>The absentees such as land lords will be valued when they are present and grievance committees will be set up comprising of legal people, local leaders and a team of UNRA representative in order to handle these issues.</td>
<td>RLRP Chapter 12</td>
</tr>
<tr>
<td>Nakisungu Sub-county Local Leadership</td>
<td>Water Supply</td>
<td>How will the issue of existing water sources affected by the project be handled?</td>
<td>Water points will be established to replace the ones which will be inaccessible after the project has been set up. For the naturally existing water sources, realignments will be made to avoid them.</td>
<td>ESIA Report Chapter 15 / Water Management Plan</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>Is there a faster mechanism to handle private land titles because for the case of Katosi</td>
<td>From the lessons learnt from other projects, we acquire land titles for all the acquired land and</td>

<td>road, we gave them our land titles and they were never returned?</td>
<td>adjust this on your land title. This process is what makes the land title process delayed.</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>If a family head who was valued dies and the heir receives compensation but excludes other household members (e.g. vulnerable widow), how will this be handled?</td>
<td>We expect the sub county leaders to assist UNRA to resolve some of these issues locally. We also require people to have letters of administration. We should determine and include the next of kin on the valuation forms who will be given the payment.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>How will payment be made when I do not have a land title for my existing land which will be taken? How will you handle our gardens which will be affected by the project as this land will be taken for road construction?</td>
<td>70% of the payment will be given to you and 30% will be given to the original land owner. All the affected crops and land will be compensated.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>General consultation</td>
<td>We request a calm approach to engage with people so that they are more willing to resolve their concerns/ issues with you.</td>
<td>UNRA has restructured to include sociologists who are qualified to handle disputes amicably. Any issues can also be addressed through the CLOs who can resolve some issues or flag those they cannot handle on their own. A toll-free number is also available through which issues can be addressed.</td>
<td>SEP (this document)</td>
<td></td>
</tr>
<tr>
<td>Training</td>
<td>We request training programs for the local people by the contractor so that we can transfer skills to our Ugandan youth.</td>
<td>This aspect has been included in the contract document so contractors are mandated to transfer skills to the local people.</td>
<td>ESIA Report Chapter 19</td>
<td></td>
</tr>
<tr>
<td>Conflict Resolution and Grievances</td>
<td>How will you handle issues of conflict among neighbouring land owners?</td>
<td>The valuations will be done but the payments will be put aside until conflicts have been resolved and payment given to the rightful owner.</td>
<td>RLRP Chapter 12</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>Some land is owned by more than one person. How will you pay for everyone?</td>
<td>A joint account will be required for compensation of families.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>Why is the land owner given only 30% of the land compensation and the Kibanja land owner given 70%? This is not fair.</td>
<td>This is because the Kibanja owner is affected by the resettlement process more and he needs to restore his livelihood.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>The money provided will not be enough to sustain for food in the given time.</td>
<td>Affected crops will be compensated for replacement. Compensation will be fair and adequate. People will also be allowed to harvest their crops to avoid food insecurity.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Water Supply / Compensation</td>
<td>Will you replace our borehole from which the whole village has been getting drinking water but the land belongs to me?</td>
<td>Yes, community assets will be replaced and in case the land belongs to an individual, they will also be compensated.</td>
<td>ESIA Report Chapter 15 / RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>Will you compensate people using the wetlands?</td>
<td>Wetland users will not be compensated because they are considered government property unless that individual has a land title for it, property on it, or licence to work in the wetland.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Theme</td>
<td>Main concern</td>
<td>Response</td>
<td>Where addressed in ESIA documents</td>
</tr>
<tr>
<td>-------------</td>

<td>----------</td>
<td>-----------------------------------</td>
</tr>
<tr>
<td>Kasenge A and Kasenge B community members</td>
<td>Compensation (Schedule)</td>
<td>You have adversely affected our work due to delays. What is the timeframe for payment?</td>
<td>We cannot specify the time and date when you will be compensated. The plan is that by end of 2018 all Affected Persons will be compensated and all the land acquired.</td>
<td>RLRP Chapter 10</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>What will be done for the small land remaining after taking the bigger part for the project?</td>
<td>Priority land acquisition is the right of way land but these factors will also be considered after acquiring the right of way land.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Consultation</td>
<td>Why does the chairman not inform us when the cadastral and valuers are coming?</td>
<td>It is the responsibility of the LC chairpersons to mobilise people and inform them of ongoing activities. Next time we shall make sure that all people are informed in time.</td>
<td>SEP (this document)</td>
</tr>
<tr>
<td></td>
<td>Conflict Resolution and Grievances</td>
<td>How shall we bring together couples who are in disagreement to open a joint account under circumstances where they own the land together?</td>
<td>The valuers have expertise on how to handle property owned by more than one person. The probation officer will also sit down with these couples and come to a mutual agreement on the property.</td>
<td>RLRP Chapter 12</td>
</tr>
<tr>
<td></td>
<td>Traffic</td>
<td>You said there will be no bodaboda on the road and the car speed will be 120km/hr. How shall local people use the road for transport?</td>
<td>The road is going to be covered so there will be no bodaboda nor pedestrians allowed to use the road. Access points for local people will be created.</td>
<td>ESIA Report Chapter 8</td>
</tr>
<tr>
<td></td>
<td>Compensation</td>
<td>I am worried there is no land owner with a full acre of land. Most people have smaller plots of land. Will this affect the payment amounts to be paid to the plot owners?</td>
<td>Research will be made to determine the average rates for the land / property in the district and this will be the final payment.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td>Consultation</td>
<td>What can be done for illiterate people who cannot easily access the office of the administrator general?</td>
<td>Engage local people/ leaders who are in a position to help you. A toll-free number is also available through which you can address issues.</td>
<td>RLRP Chapter 7</td>
</tr>
<tr>
<td></td>
<td>Consultation</td>
<td>Request use of the community radio stations to inform us of ongoing activities.</td>
<td>We shall inform local leaders to use these means when trying to communicate meetings for the project. Other methods of communication will be used such as regular consultation meetings.</td>
<td>RLRP Chapter 7</td>
</tr>
<tr>
<td></td>
<td>Employment</td>
<td>Please make sure contractors also hire Ugandan personnel to carry out activities for the project.</td>
<td>UNRA is committed to ensuring local people are employed in various aspects of the project to maximise project benefits. During our inspections, we will ensure this is addressed. It is also a mandatory requirement stated in all contractor contracts.</td>
<td>ESIA Report Chapter 19</td>
</tr>
<tr>
<td></td>
<td>Conflict Resolution and Grievances</td>
<td>Foreign contractors hired in the past have treated us unfairly on our own land. We request access to an office and representatives that can handle issues associated with contractors.</td>
<td>UNRA will have community liaison officers in different communities which will be able to handle such issues.</td>
<td>RLRP Chapter 12</td>
</tr>
<tr>
<td>Mukono Central Division Local Leadership</td>
<td>Employment</td>
<td>How will Contractor compliance to corporate social responsibility be verified? Request that local government leaders be involved to ensure this is met.</td>
<td>UNRA plays the role of supervising contractor works to ensure that all contractor roles and responsibilities are fulfilled, including environmental and social commitments.</td>
<td>N/A</td>

<td>ESIA Report Chapter 2</td>
<td></td>
</tr>
<tr>
<td>Cumulative Impacts</td>
<td>Upcoming projects along the KJE such as the Bukasa port, and the Standard Gauge Railway are with the Ministry of Works and Transport. Why was a Strategic Environmental Assessment (SEA) not undertaken?</td>
<td>Ideally a SEA would be undertaken before the project specific ESIs. However, the concept of SEA is new to Uganda. NEMA is still drafting guidelines for SEAs. Once the SEA guidelines are finalised, a SEA will be required for major developments and master plans.</td>
<td>ESIA Report Chapter 21</td>
<td></td>
</tr>
<tr>
<td>Ministry of Works and Transport</td>
<td>During the presentation under IFC PS3, a comment was made about resource efficiency and pollution prevention. Also, a number of wetlands and settlement patterns will be impacted along the KJE route. In regard to hydrological system management, has road water harvesting been considered? Will you devise mitigation measures to avoid flooding of settlements near the route? Also, siltation is likely to be a big challenge since the wetlands will be impacted by the project.</td>
<td>Resource efficiency is one of the aspects that will inform the Bids that will come through. This considers inputs to be used, whether they can be sourced or made locally and what transportation costs might be involved. The input and output system also includes energy, water use efficiency and whether water used on site will be recycled, the labour force and aspects related to its sourcing. UNRA has designed drainage along the Project Footprint. Impacts related to soil erosion and flooding will be assessed in the ESIA and appropriate mitigation measures provided.</td>
<td>ESIA Report Chapter 15 / Water Management Plan</td>
<td></td>
</tr>
<tr>
<td>Visual amenity</td>
<td>In regard to the aesthetic appeal of the road, will trees be planted along the road? Is it feasible?</td>
<td>UNRA is running a green roads campaign and there will be planting of trees along the road. A beautification campaign will be included in the contractor’s terms.</td>
<td>ESIA Report Chapter 13</td>
<td></td>
</tr>
<tr>
<td>Design</td>
<td>Long-distance drivers will most likely use the expressway as an integral part of the northern corridor. Have you thought of engaging private partners since it is a PPP to set up places of convenience, rest centres for long distance truck drivers and petrol stations? Where might these be located?</td>
<td>The Ministry is designing rest centres for all major roads. For the KJE, these centres may be placed at the end of the expressway given journeys on this road will be short. The expressway will have several entry and exit points, and will also be considered for locating centres for resting, petrol stations, restaurants and other facilities to attract users. Discussions with Total and Shell</td>

<tr>
<td><strong>Cumulative Impacts</strong></td>
<td>Standard Gauge Railway</td>
<td>There are other planned projects along the KJE such as the Bukasa Port and the Standard Gauge Railway. Have you ensured people being resettled by one project will not end up being displaced by another?</td>
<td>There are a lot of interactions and engagements between KJE and other development proponents. A Cumulative Impact Assessment will also be undertaken in the ESIA.</td>
<td>ESIA Report Chapter 21</td>
</tr>
<tr>
<td><strong>Legislation / standards</strong></td>
<td>Consultation</td>
<td>Conflicts in legal provisions between Ugandan legal framework and international standards are inevitable. How will you handle these differences to deliver the project in the required time?</td>
<td>The Project will be in line with IFC performance standards and AfDB Integrated Safeguards Systems. A gap analysis between Ugandan laws and international standards was undertaken for the ESIA and strategies were identified to address the gaps.</td>
<td>ESIA Report Chapter 2</td>
</tr>
<tr>
<td><strong>Consultation</strong></td>
<td>National Water and Sewerage Corporation (NWSC)</td>
<td>NWSC was invited for this stakeholder engagement however they did not turn up. Information material will be sent to all the invited stakeholders to enable them to electronically provide their input for the Project.</td>
<td>Stakeholder engagement shall be undertaken throughout the life of the Project. The Environmental and Social Management Plan will include environmental audits where stakeholders will need to be consulted.</td>
<td>SEP (this report)</td>
</tr>
<tr>
<td><strong>Consultation</strong></td>
<td>UETCL</td>
<td>Will there be engagements planned for during and after the Project is implemented? There are stakeholders that need to be engaged after the road is implemented.</td>
<td>Cutoff dates will be adopted to be in alignment with international standards. A legal team will manage land ownership issues to ensure adequate compensation is provided to the rightful property owners.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td><strong>Compensation Strategy</strong></td>
<td>Kampala Capital City Technical Planning Committee</td>
<td>What are the strategies within the RLRP to curb speculation. The RLRP should look at strategies for land acquisition and land access thereafter.</td>
<td>There are interchanges at Spear Motors and UMA and a reduction of speed to 100km/hr. Regarding the Drainage Master plan, we shall advocate for harmonization of plans to reduce potential cumulative impacts.</td>
<td>ESIA Report Chapter 3</td>
</tr>
<tr>
<td><strong>Cumulative Impacts</strong></td>
<td>Wakiso District Technical Planning Committee</td>
<td>Some sections of KJE are also affected by the SGR project. These areas need to be harmonized to avoid affected persons being compensated twice.</td>
<td>RLRP studies shall be shared to help in managing cumulative impacts and compensation of Affected Persons.</td>
<td>ESIA Report Chapter 21</td>
</tr>
<tr>
<td><strong>Design / Waste / Soil management</strong></td>
<td>Consultation / Socioeconomic baseline</td>
<td>What is the timeframe for collecting baseline information on people affected by the Project? What measures are in place to mitigate speculation and potential delays of the project.</td>
<td>For the collection of baseline information, about 70 villages have been engaged by UNRA. With the recent change in alignment, additional engagements will be done for new villages that have been identified. UNRA will use technology (e.g. satellite imagery) and clear guidelines to determine eligible Affected Persons with genuine claims for loss of land and property.</td>
<td>ESIA Report Chapters 5 and 19</td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Theme</td>
<td>Main concern</td>
<td>Response</td>
<td>Where addressed in ESIA documents</td>
</tr>
<tr>
<td>-------------</td>
<td>-------</td>
<td>--------------</td>
<td>----------</td>
<td>-----------------------------------</td>
</tr>
<tr>
<td>Consultation</td>
<td>No site meeting has been conducted for this Project. Please hold regular site meetings to discuss emerging and ongoing issues during the construction phase of the Project.</td>
<td>According to the UNRA arrangement, site meetings will be routine. UNRA is working on improving its collaboration with local Governments regarding site inspections for this Project.</td>
<td>SEP (this report)</td>
<td></td>
</tr>
<tr>
<td>Compensation</td>
<td>Who will handle the issue of compensation? Often people will seek information about compensation from district officials yet we are not sufficiently knowledgeable with some of these projects.</td>
<td>The Government is mandated to compensate people affected by infrastructure projects. UNRA works closely with the CGV Department for administering compensation. A valuation on 2.9 km road section has been completed and payments will start soon.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Wetlands / Biodiversity</td>
<td>Considering the KJE Project will traverse wetland areas, what design plans are considered to ensure wetlands are not impacted by the Project.</td>
<td>From a biodiversity point of view, the road will be suspended by viaducts in wetlands to avoid fragmentation. This will be proposed in areas where it is assessed that suspension of the road is required.</td>
<td>ESIA Report Chapter 16 / Biodiversity Management Plan</td>
<td></td>
</tr>
<tr>
<td>Consultation</td>
<td>Kiira as a municipality should be engaged as a stakeholder considering much of the Project Footprint is within Kiira.</td>
<td>The Kiira Municipality will be fully engaged.</td>
<td>SEP (this report)</td>
<td></td>
</tr>
<tr>
<td>Legislation / Planning</td>
<td>The district is developing a physical development plan in sync with National plans. The road design should integrate local concerns as well as national interests.</td>
<td>This is the stage at which the district should provide local input to the design. UNRA has provided the proposed alignment to stakeholders for input. There is still room to influence the designs in this stage.</td>
<td>ESIA Report Chapter 2</td>
<td></td>
</tr>
<tr>
<td>Resettlement</td>
<td>Mismanaged resettlement and compensation is partly responsible for irregular developments and encroachment into wetlands. Vulnerable groups usually seek for cheap land once projects have negatively impacted on them. Collection of baseline information is key and social data should be correlated with the land database. The RLRP should ensure affected persons are moved or resettled appropriately.</td>
<td>The verification exercise will be robust and comprehensive. IFC is providing technical support to ensure affected persons are compensated appropriately. The legal team will also provide a due diligence of the process.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Compensation / Grievances</td>
<td>How are you handling post-construction compensation issues and impacts? Some people may be affected post construction phase. Who will address this?</td>
<td>Monitoring will ensure unforeseen negative impacts will be managed. UNRA has a team of sociologists and environmental scientists to monitor the Project. UNRA has also set up community liaison offices for people to report grievances related to the Project.</td>
<td>RLRP Chapters 5 and 12</td>
<td></td>
</tr>
<tr>
<td>Compensation Strategy</td>
<td>Delayed compensation usually exposes affected persons to inflation. Compensation should consider this.</td>

<td>----------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td>Design</td>
<td>The road width in some sections has been reduced to limit compensation costs. Will this affect the road functionality?</td>
<td>The design team has taken this into consideration and the road functionality will not be compromised.</td>
<td>ESIA Report Chapter 3</td>
<td></td>
</tr>
<tr>
<td>Compensation Strategy</td>
<td>Is there a special plan for ‘volatile areas’ such as Kasokoso and Bukasa?</td>
<td>To the extent possible, the ESIA will utilise technology to minimise potential on-the-ground risks there.</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Ongoing Consultation</td>
<td>There is a need for UNRA to establish a liaison office since most questions are directed to the District Lands Office which is not well equipped to handle them</td>
<td>We will set up contact centres in different areas. Other avenues for airing grievances to UNRA also exist, including a toll-free phone line and online platforms.</td>
<td>SEP Chapter 6 (this report)</td>
<td></td>
</tr>
<tr>
<td>Ongoing Consultation</td>
<td>The district team should be involved in the compensation process. Often the land office is required to append signatures to verification forms for projects that we do not know about.</td>
<td>Best practice requires the district land office to be involved early in the project development. There has been a gap and this will be addressed going forward.</td>
<td>SEP Chapter 6 (this report)</td>
<td></td>
</tr>
<tr>
<td>Health</td>
<td>Have gender and HIV issues been considered?</td>
<td>These issues have been considered in the ESIA with measures proposed for mitigation.</td>
<td>ESIA Report Chapters 19 and 20</td>
<td></td>
</tr>
<tr>
<td>Water Supply</td>
<td>Some of the road construction activities may damage or reduce access to community water sources. The mitigation of such impacts should be considered.</td>
<td>These aspects have been considered in the ESIA and RLRP.</td>
<td>ESIA Report Chapter 15 / Water Management Plan</td>
<td></td>
</tr>
<tr>
<td>Cumulative Impacts</td>
<td>The issues of areas traversed by several projects such as Kasokoso, which will host the KJE, KSB, SGR and National Housing projects, should be addressed holistically.</td>
<td>We have adopted this approach at the start of community engagements. However, we have been halted by a court directive. We are awaiting for guidance from Government in this matter. We have started engagement with SGR and potentially affected persons.</td>
<td>ESIA Report Chapter 21</td>
<td></td>
</tr>
<tr>
<td>Ongoing Consultation</td>
<td>What are some of the communication strategies going to be used to address the issues of Affected Persons?</td>
<td>The Project has a communication strategy which includes open community dialogue, TV and radio talk shows, toll-free phone line and online platforms.</td>
<td>SEP Chapter 6 (this report)</td>
<td></td>
</tr>
<tr>
<td>Lessons from other projects</td>
<td>There are lessons to be learnt from the oil and gas projects in the Bunyoro region relating to environment and social impacts.</td>
<td>Currently we are doing work in the Bunyoro region and lessons learnt from previous resettlement and compensation activities will be considered during the planning and implementation of the KJE.</td>
<td>All aspects of ESIA</td>
<td></td>
</tr>
<tr>
<td>Mukono District Technical Planning Committee</td>
<td>There are a number of large projects including the KJE Project, Standard Gauge Railway, Mukono Katosi road, an oil pipeline project, and Katosi water mega project which is likely to be one of the largest projects in East Africa. What is proposed to ensure these projects are</td>

<td></td>
</tr>
<tr>
<td>Environmental Protection</td>
<td>Consultant asked NWSC how it deals with sensitive ecosystems like wetlands during project implementation? Do you put in place mitigation measures?</td>
<td>We always carry out EIA/ESIAs prior to these projects. Our mitigation measures are usually based on what the consultants recommend after their assessment.</td>
<td>N/A</td>
<td></td>
</tr>
</tbody>
</table>

- **Land titles**: In Kasokoso, some of the land lies in the NEMA corridor, so when it came to compensation, we only compensated the PAPs for their crops/structures/development on the land but not for the land. This was based on the legal guidance offered by the solicitor general from their interpretation of the law.
- **Leadership**: Please keep in mind that Kasokoso has many informal settlements with self-proclaimed Local councils that the government doesn’t officially recognize. So be aware and endeavor to run official business through the official local councils.
- **Grievances**: I would also like to let you know that the process has very many complaints and it is vital to keep deadlines in mind such that the project doesn’t extend into overtime.
- **Project harmonization**: During our planning and designing of the pipeline, we put into consideration the upcoming infrastructure projects such as KJE, SGR and KCCA drainage corridor.
- **Compensation**: The area has so many speculators and that you will not have to re-compensate persons that are affected by the KJE project if they have already been compensated by our project. See alignment map.

</tr>
<tr>
<td></td>
<td></td>
<td>How will the palace be affected? If not affected, how far is the road from the King’s palace? The serenity of the king’s residence is important to the kingdom. The road design within the vicinity of the Kabaka’s residence’s should ensure it has no black spot because culturally the king (Kabaka) does not see a corpse.</td>
<td>Different cultural sites in Buganda have been identified and mapped out and this includes the Kabaka’s palaces in Banda and Kireka.</td>
<td>ESIA Chapter 18</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Are there any plans to follow up on the PAPs after compensation to ensure their livelihoods are maintained as indicated in the presentation?</td>
<td>UNRA has developed a Monitoring and Evaluation framework where they will have two components that is a rapid assessment and a detailed assessment.</td>
<td>RLRP Chapter 9</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Request for Buganda Kingdom to assist in differentiating between genuine site and those that are not</td>
<td>The consultants and UNRA should liaise with Buganda Heritage and Tourism board and the Ministry of culture of Buganda to get information regarding the different cultural sites and also to help the assessors identify the genuine sites and also identify those that could have been left out by the assessment process.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td></td>
<td></td>
<td>As big land owners, we would like to get the project strip maps to allow us determine how much of Buganda land is being affected along the entire stretch.</td>
<td>Yes, strip maps will be shared as part of the disclosure process</td>
<td>RLRP Chapter 3</td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Theme</td>
<td>Main concern</td>
<td>Response</td>
<td>Where addressed in ESIA documents</td>
</tr>
<tr>
<td>-------------</td>
<td>-------</td>
<td>--------------</td>
<td>----------</td>
<td>-----------------------------------</td>
</tr>
<tr>
<td>Resettlement</td>
<td>BLB would like to embrace the Land for Land compensation and resettlement of PAPs and would like to participate in the process. What will be the requirements?</td>
<td>Regarding resettlement is being given to vulnerable groups that have to be resettled such as those in Kasokoso. Consultations are ongoing with key stakeholders such as National Housing which is looking at low cost housing for the affected people. BLB should also come on board as a key stake holder and be a partner</td>
<td>RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Land issues</td>
<td>It should also be noted that some of the issues related to land are political a case in point is Kasokoso area where you may find some obstacles. This is where public relations is very important and the kingdom would help since the kingdom owns some land in this area and people listen us, however we can only get involved if there is a good strategy for the affected people. We wouldn't want to taint our image.</td>
<td>Among the contested areas is Kasokoso and with this UNRA is having ongoing discussions with National Housing to construct cheap housing in house for house compensation for those interested. Land for Land is being done for the PAPs that are interested in this form of compensation</td>
<td>ESIA Chapter 7 and RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>Land Issues</td>
<td>A lot of public land in Buganda has been under government for a long time, and therefore the verification process must have captured it as public land yet this land has since been transferred back to Buganda. The consultants should provide us with strip maps as earlier requested and our team of surveyors can ascertain which formerly regarded as public land has since been returned to BLB.</td>
<td>This is key to note and as consultants we will need to liaise with BLB surveyors to check in the inventory and know which land has since been transferred back to Buganda and therefore is not public land.</td>
<td>ESIA Chapter 7</td>
<td></td>
</tr>
<tr>
<td>Land agreements in wetlands</td>
<td>There are a number of people who have land agreements in wetlands. How are you going to handle these?</td>
<td>UNRA is working in tripartite form together with Atacama and Earth Systems and challenges of the Ghost PAPs will be dealt with.</td>
<td>ESIA Report Chapter 16 / Biodiversity Action Plan</td>
<td></td>
</tr>
<tr>
<td>Land ownership conflicts</td>
<td>How are you handling the Mutungo issue? There is an ongoing court suit between the royal family and Kasaasa challenging the registration process of the Land title under Kasaasa (Landowner). The land titles may look genuine but once the court case regarding the ownership of master land title is decided, this will affect all other land titles under these subdivisions.</td>
<td>UNRA has met the conflicting parties and is hopeful that something will be agreed upon. UNRA had also started the compensation process for the people with legitimate milo titles as it awaits the court verdict. However, following this advice I will meet with our technical team and make a decision on the matter</td>
<td>RLRP Chapter 7</td>
<td></td>
</tr>
<tr>
<td>Ministry of Defence and Veteran Affairs</td>
<td>The livelihood restoration aspect of the KJE Project ties in well with what the Ministry of Defence and veteran affairs is doing for army veterans. The ministry is looking at restoration of livelihoods of veterans by capacity building to include skills transfer, starting cooperatives to ensure that they become self-reliant and to create financial inclusion. The Ministry could support the project in this area.</td>
<td>Noted</td>
<td>RLRP Chapter 9</td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Theme</td>
<td>Main concern</td>
<td>Response</td>
<td>Where addressed in ESIA documents</td>
</tr>
<tr>
<td>-------------</td>
<td>-------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>For the aspect of relocation, are you looking at cash compensation or locating a suitable piece of land to resettle those that will be displaced by the project?</td>
<td>Government, in looking at cost saving would buy the idea of locating available land, where say the veterans can be resettled. It would be better if cash compensation is channelled to the ministry of Defence to put up low cost residences for the veterans. This would come after UNRA and the ministry of Defence engage the veterans and sell the idea to them. Putting up the housing units can co-opt labour services of the project-affected veterans. Cities alliance has also come on board with ideas that can be taken up in this regard</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td>Compensation Strategy</td>
<td></td>
<td>Resettlement in the army entails psychological rehabilitation of former soldiers to cope with civilian life in the community outside the army. Other aspects of resettlement at the ministry involve; • Skilling soldiers to enable them eke out a living through vocational training. • Rehabilitation of wounded soldiers that have been laid off to enable them engage in activities that economically empower them. Veterans have to be handled well because they are militarily trained and yet have diverse challenges and could pose a risk to security if they are ignored.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Livelihood Restoration</td>
<td></td>
<td>It is good that the veterans have been engaged in the execution of this project however, more sensitization is still needed and the ministry can use its political leverage to assist in popularizing this project. The veterans could also be enlisted to be part of the construction work that does not require specialized skills.</td>
<td>RLRP Chapter 9</td>
<td></td>
</tr>
<tr>
<td>Jobs</td>
<td></td>
<td>The option of acquiring an alternative piece of land and building low cost housing units to resettle the veterans would be a good option. What does this entail?</td>
<td>During the census survey, respondents were asked whether they would prefer cash compensation or physical relocation. Most of them preferred cash compensation. The challenge with this in wetland areas like Kasokoso, is that compensation cannot be made for a wetland. This project conforms to international standards hence if this group of veterans can be classified as vulnerable people they would need to be resettled. However, a suitable piece of land in a close radius to the city would have to be sought given that these</td>

### 5.1.2.4 Civil Society Organisation Views and Concerns for the Project

Table 5-6 summarises the key issues and concerns from civil society organisations consulted in 2017.

**Table 5-6: Key issues and concerns from civil society organisations**

- **Compensation strategy**
  - **Main concern**: In physically resettling project affected people out of the project area, do you only construct a house for them? Do you cater for their lost sources of income and livelihood?
  - **Response**: The livelihood component is key in this project. The areas to be selected for resettlement will be assessed for linkages that ensure that project affected people do not lose out on sources of income and livelihood.
  - **ESIA addressed in RLRP Chapter 5**

- **Livelihood Restoration**
  - **Main concern**: The idea of asking project communities to identify priority livelihood projects that could be taken on for funding by donors is an innovative one. However, for our case, it is vital that the number of veterans that will be affected by the KJE project is ascertained and where they will be resettled so that their terminal benefits once processed, will find them in a better state. In this way, they will cooperate with the project.
  - **Response**: The challenges of finding terminal benefits for the veterans notwithstanding, there are programs that can come in now to make sure that the veterans can be engaged in income generating ventures as they wait for terminal benefits to come through. The road project will need labour and as such, the skilling programs by the Ministry of Defence should go on. Financial literacy campaigns should be conducted to enable veterans manage their compensation and terminal benefits.
  - **ESIA addressed in RLRP Chapter 9**

- **Livelihood Restoration**
  - **Main concern**: Livelihood restoration is what touches core in veteran affairs. The issue is how to uplift the livelihoods/living standards of the veterans and hence the livelihood component of the KJE Project speaks well to this aspiration.
  - **Response**: Noted
  - **ESIA addressed in RLRP Chapter 9**
<table>

<tbody>
<tr>
<td>Network Organisation</td>
<td>Interested groups are involved in reducing road accidents?</td>
<td>accidents have on roads, we have incorporated measures to design safe roads; such as wider roads, additional lanes at trading centres, two lanes for road traffic, and an additional lane for parking and local traffic. For long distances, climbing lanes are used. We are also looking at dual carriage way road designs to eliminate accidents from overtaking and head-on collisions.</td>
<td></td>
</tr>
<tr>
<td>Uganda Road Sector Support Initiative</td>
<td>Conflict Resolution and Grievances</td>
<td>Elaborate about the grievance mechanism and its structure.</td>
<td>The grievance system is established by UNRA to track and manage grievances concerning it projects. For the KJE, there will be a grievance management plan implemented taking into account the socio-economic setting of the areas.</td>
</tr>
<tr>
<td>Ongoing Consultation</td>
<td>Is there a gender desk specifically for children and women?</td>
<td>UNRA will set up community liaison offices in the Project area with staff trained to be culturally appropriate and gender sensitive.</td>
<td></td>
</tr>
<tr>
<td>TASO Uganda</td>
<td>Community health and safety</td>
<td>Provide further details about health aspects regarding HIV in relation to the Project.</td>
<td>Community health and safety is an important aspect for the ESIA, including HIV and other health issues. The ESIA and ESMMP will outline strict requirements to ensure the Project is constructed and operated in a manner that ensures community health and safety in line with Ugandan law and IFC Standards/ AfDB Integrated Safeguards Systems.</td>
</tr>
<tr>
<td>Wildlife Conservation Society (WCS)</td>
<td>Design / Wetlands / Biodiversity</td>
<td>The Project travers through wetlands which are considered as free land. What mechanisms are in place to protect them? For example, Lubigi Wetland is being depleted by a road blocking important waterways and communities encroaching into the swamp. Who is responsible for ensuring communities do not destroy remaining wetlands? How does NEMA and UNRA work to protect the remaining wetland?</td>
<td>The issue of wetland destruction is one that needs to be solved broadly across Government departments. This project needs to avoid exacerbating the issue through careful management and good thinking around the offsets. The wetlands can be assessed to identify core areas to conserve and fringe areas that can be used for other purposes. The option of viaducts will be considered to avoid the road blocking flows within the swamps.</td>
</tr>
<tr>
<td>Busoga Kingdom</td>
<td>Community health and safety</td>
<td>During the construction phase, truck drivers are can be dangerous to other road users. Efforts should be made to reduce road incidents caused by trucks.</td>
<td>The concessionaire will be required in the ESIA to implement a truck management plan. UNRA will also monitor and engage with the local community about road safety aspects.</td>
</tr>
<tr>
<td>Ecosystem Services</td>
<td>We have a process in Busoga of documenting and preserving traditional medicines. Does the Project have plans of helping to preserve, protect and plant some of the vegetation that will be removed?</td>
<td>In road projects like the KJE, best practice is to re-vegetate and to make sure the amenity of the expressway is good. Landscaping can be creative to include biodiversity benefits, be of traditional medicinal use, and help shield visual impacts.</td>
<td></td>
</tr>
<tr>
<td>Uganda Law Society</td>
<td>Legislation</td>
<td>Will the legal advisory team be to IFC, UNRA or to the Consultants? At what level will the legal advisory team be involved?</td>
<td>Understanding Ugandan law is essential. UNRA will have a legal team. IFC as the financial advisers will have their legal team. The Atacama team has a legal specialist. From an ESIA point of view, the</td>

<tr>
<td>UIPE</td>
<td>Cumulative impacts / Socioeconomic impacts</td>
<td>Have you explored the wider impacts of the road? Considering the economic activities including roadside vending in Mabira, the expressway is likely to impact on these businesses.</td>
<td>There will be impacts to be assessed however these are not significant for businesses along the existing Kampala-Jinja road. In the feasibility studies, there was an option to develop the current Kampala-Jinja Road. However, the impacts would have been far greater on existing businesses, which is why the KJE project was adopted.</td>
<td>ESIA Report Chapters 19 and 21</td>
</tr>
<tr>
<td>Design</td>
<td>How will potential encroachment from factories along the proposed Project Footprint be managed? These usually crowd along the road and cause flooding issues by blocking waterways and drainage. This happened in Kyambogo.</td>
<td>The Project Footprint will be fenced off to avoid encroachment. There is a proposal in the Road Bill that roads of this type will have a wider Project Footprint of up to 80 m. Once approved, activities in the Project Footprint will be regulated to manage encroachment and the effects of flooding.</td>
<td>ESIA Report Chapter 3</td>
<td></td>
</tr>
<tr>
<td>UWASNET</td>
<td>Resettlement Strategy</td>
<td>For Affected Persons that are not willing to move or be resettled, what is the plan?</td>
<td>The Constitution allows Government to expropriate land involuntarily for public infrastructure projects. Most projects try as much as possible to avoid this scenario.</td>
<td>RLRP Chapter 5</td>
</tr>
<tr>
<td>Uganda Road Sector Support Initiative</td>
<td>Cumulative impacts</td>
<td>There are several planned projects nearby including the SGR and other expressways. Why cannot a shared corridor be secured and these projects be co-located to cut costs of compensation and EIAs.</td>
<td>This would be ideal and the most desired scenario. However, the challenge is that planning for these developments are not always in sync and most of the development is demand driven. The KJE project must proceed even if other plans are not forthcoming. Over time, there will be streamlining and corridors will be demarcated. We are thinking of a corridor to the oil region that will cater for the pipeline roads as well as the northern corridor from Malaba to the border with Rwanda.</td>
<td>ESIA Report Chapter 21</td>
</tr>
<tr>
<td>Socioeconomic impacts</td>
<td>What plans are there to protect children who are a vulnerable group, including when they go to school during construction?</td>
<td>Children will be considered in the ESIA and RLRP as vulnerable groups, including families headed by children.</td>
<td>ESIA Report Chapter 19 and RLRP Chapter 5</td>
<td></td>
</tr>
<tr>
<td>International Accountability project</td>
<td>Resettlement</td>
<td>Can the resettlement be considered as its own project considering the scale of resettlement between Shoprite and Kyambogo?</td>
<td>Resettlement will be a major component that is part of the KJE Project to ensure a consistent and holistic approach.</td>
<td>RLRP</td>
</tr>
<tr>
<td>Safeway Consulting</td>
<td>Design / Climate Change</td>
<td>Has the National Adaptation Plan been considered to ensure climate change and its impacts will not affect the Project and its long-term sustainability?</td>
<td>Climate change aspects are addressed in the design as mitigation and adaptation. The key issue is the impact of rainfall resulting in increased runoff and water flows. The road drainage design will manage this taking into account climate</td>
<td>ESIA Report Chapters 3 and 12</td>
</tr>
</tbody>
</table>
5.1.2.5 Earlier Consultation Engagements

**KJE Component**

During earlier consultation engagements during 2014 and 2015 for the KJE Component, the main concerns and requests raised by the local community and other respondents, included:

- Risk of being sidelined when it came to allocating jobs during the construction and operation of the road project.
- Heavy construction and operational traffic could be a danger to ordinary road users including school children, smaller cars and nearby structures.
- Potential loss of jobs due to widening of the road especially in the area from UMA showgrounds to the Kyambogo Junction (in the first 2.3 km section).
- Mabira Forest being impacted (note the KJE route now avoids the Mabira Forest completely).
- Many casual workers in the informal sector (shoe sellers, mechanics and pump operators) will lose their livelihoods due to loss of business space.
- Loss of markets and Car Bonds. At Nakawa Market up to 150 vendors could be impacted.
- Requests to provide consideration for disabled people on the proposed road as all current roads do not. As a result, such people have endured great difficulty in crossing/using the roads.
- Requests that other road users have special consideration, particularly for pedestrians.
- Requests for adequate road infrastructure on the roads as there is hardly any at present.
- Requests for prompt and timely compensation as most of the Affected Persons also own the land.
- Requests for the KSB project to be abandoned because of its potential cumulative impacts, including possible secondary development along the new road which could endanger sensitive ecosystems such as Mabira and the wetlands along Lake Victoria.
- Request that it is important to compensate people now and acquire the entire road reserve as soon as possible. In the future, the road can always be upgraded when there is enough money.
- It is necessary to learn from the mistakes of the Kampala Northern Bypass to reduce congestion along Kampala - Jinja road.
- There is a need to alleviate all the roads to reduce the rate of traffic accidents that occur especially at night. Street lighting at black spots will assist in ensuring road safety at night.
- Telecommunication service providers (e.g. MTN) potentially affected by the Project requested for early compensation so they can relocate their telecommunication infrastructure before road construction.

</tbody>
</table>
KSB component

The main concerns raised by earlier consultations for the KSB component during the 2013 and 2015 consultations related to the road’s potential impact on surrounding wetlands and Lake Victoria as well as socio-economic impacts such as compensation and relocation. Many were also concerned if the proposed tunnels would negatively impact access to those living above them and access to safe drinking water.

Table 5-7 summarises the concerns and mitigation measures proposed by stakeholders for consideration in the design and construction of KSB.

**Table 5-7: Summary of key stakeholder concerns and possible mitigation**

<table>
<thead>
<tr>
<th>Stakeholder concern</th>
<th>Proposed action or mitigation measure by the stakeholder</th>
</tr>
</thead>
<tbody>
<tr>
<td>The KSB would pass through densely populated areas and could affect some community services like schools, which may likely affect many communities. There is a lot of settlement within the wetlands. How would such people be compensated?</td>
<td>It was proposed the road alignment should pass through the least populated areas, and where possible, avoid important sites (e.g. churches and mosques) and populated areas. Uganda laws require people who are affected by a project receive resettlement and compensation packages and be assisted to resettle.</td>
</tr>
<tr>
<td>All the hills through which the tunnels may pass though are important water sources for the communities (near the base). Communities are concerned about effects of tunnelling on their water sources.</td>
<td>Detailed assessments and investigations should be conducted to establish ways this concern can be mitigated.</td>
</tr>
<tr>
<td>There are developments including agricultural crops (yams, maize, sugar cane, banana, beans) along sections of the alignment. Other economic activities included brick making, clay mining and light factories that could be affected. What plans are there to address such concerns?</td>
<td>Time would need to be given for seasonal crops to be harvested while perennial crops will be compensated as well as other developments in the alignment.</td>
</tr>
<tr>
<td>The KSB is likely to cross many community access routes, thereby blocking access to land and properties. What will happen to those affected by this?</td>
<td>Discussions with the design team suggested that grade separated structures (underpasses) incorporating pedestrian walkways could be provided for major routes through the area. This should be under consideration.</td>
</tr>
<tr>
<td>There were concerns that utility infrastructure in the area (e.g. overhead power lines, water mains, sewerage lines, telecommunication services) would be disrupted by the Project.</td>
<td>The design team and contractor should work closely with Utility Providers to minimise disruption of services through concerted planning and execution of works.</td>
</tr>
<tr>
<td>Due to the proposed tunnelling, there may be a lot of cut/spoil materials that will be generated. How will such material be disposed and where will it be dumped, especially if it could occur in wetlands?</td>
<td>There are several options on how the material can be used, including for brick-making. Some materials can also be used as fill. Private developers could use the material in their construction work sites. A number of persons suggested cut/spoil material should be stockpiled on a site that the contractor should acquire.</td>
</tr>
<tr>
<td>Local leaders were anxious and requested they should walk through the route to advise their subjects better.</td>
<td>It was proposed that the project should take the leaders through the route after the alignment is confirmed.</td>
</tr>
<tr>
<td>There were concerns that those compensated could reoccupy the land or encroach on forest reserves as is currently the case with Bukasa.</td>
<td>UNRA should put preventive measures to avoid this risk and ensure land ownership issues for displaced people, where possible.</td>
</tr>
<tr>
<td>Some local leaders were anxious about employment for the local communities after observing contractors use their own workers.</td>
<td>It was proposed that the study should recommend contractors to employ local people to the extent possible.</td>
</tr>
<tr>
<td>Many people were anxious about the modes of compensation and whether those adversely impacted would be compensated fairly?</td>
<td>The compensation process for Affected Persons should be appropriate, fair and not be further delayed. It was suggested that the compensation process should be in line with international best practice.</td>
</tr>
<tr>
<td>Some sections of the communities are hostile and there are fears they can be a hindrance to project schedules especially in the areas of Kasokoso and other informal settlement areas.</td>
<td>It was proposed that the ESIA and design team should work through these areas with councillors before engaging the communities as this gives confidence to them about the project.</td>
</tr>
<tr>
<td>Most of the people met in Nakawa division were worried about the poor experience associated with the Kampala Northern Bypass. The communities feel that the design teams for KSB need to visit the Kampala Northern Bypass and learn from the mistakes there.</td>
<td>It was proposed the KSB should be a dual carriage type road development taking into account: (i) need to minimise disruption of social life. Tunnelling would be preferable (ii) need for walkways on either side should be provided for the local communities; and (iii) landscaping needs to be done.</td>
</tr>
</tbody>
</table>
The issue of impacts to wetland came up several times given its importance to the livelihood of local communities. There is concern that the road would degrade the wetlands. The project should provide adequate and feasible mitigation measures to reduce loss and degradation of wetlands. Works should be restricted to the edges of wetlands, and avoid impacting streams, to reduce impact on their hydrology and functions.

There was concern there could be negative impacts on cultural sites and artefacts. It was noted there are some recent discoveries around Butabika/Luzira area, including cultural artefacts belonging to the Nonge Clan dating back to the 13th Century in the areas of Luwafu. Even if the artefacts are not found through the studies, there is the likelihood of encountering some accidentally. In such case, the contractor should use Chance Find Procedures to preserve such resources and work closely with the Department of Museums.

**Table 5-8 summarises the key issues and concerns from public and non-governmental institutions consulted during 2013 to 2015 for the entire KJE Project.**

**Table 5-8: Key issues and concerns from consulted public and non-governmental institutions**

<table>
<thead>
<tr>
<th>Stakeholder category</th>
<th>Main concerns</th>
</tr>
</thead>
</table>
| **District local government officials (Mukono, Kampala, Wakiso)** | KJE Phase 1 related concerns  
- How is UNRA going to manage the various issues arising from the compensation process and how are expectations going to be managed, including i) some persons are affected by more than one infrastructure development; ii) ghost compensations; iii) when children refuse to vacate the place because they do not know if their deceased parent was compensated?  
- How will the Project manage contractors to avoid dust pollution, illegal rubbish dumping, etc.  
- Require clarification of the road design and linkage to social amenities such as rest centres, washing bay, petrol stations  
- Require clarification of the road design for potential access issues. Will the express highway have access points where drivers can join or leave the roads?  
- Design process issues where UNRA did not adequately consult local governments for their input, particularly for other roads that may be affected  
- Inadequate participation of UNRA in identifying disposal areas for cut/spoil materials, particularly within environmentally sensitive areas (e.g. wetlands)  
- Concern regarding UNRA’s approach towards the mode of compensation for the loss of incomes and delayed development given the time lag between the first land evaluation and the update process  
- How will UNRA deal with the issue of disruption or loss of business during road construction?  
Other concerns  
- Any existing plans for improving the road network in the greater Kampala area  
- Updates on how UNRA is trying to change its negative image in the public eye  
- How are gender issues in relation to the project going to be managed to avoid women affected by the project becoming vulnerable?  
- Social disruption issues still exist on Katoti-Mukono road where trenches drain water into surrounding homes and floods pose a danger to residents. |
| **Kampala Capital City Authority (KCCA)** | - KSB design should cater for future growth; recommend 6 lanes instead of 4 lanes.  
- Need clarification of the location of the road tolls along the road. |
| **Divisions and Municipalities (Kira Municipality, Makindye Division)** | - What is the Project’s expected contribution in terms of corporate social responsibility?  
- Rationale and approach for planning other large projects in the vicinity, including the Standard Gauge Railway and Port facility.  
- KCCA plans for some developments in the KJE road corridor. How will this be integrated? |
| **Non-Governmental Organisations (Wakiso district)** | KJE Phase 1 related concerns  
- Religious leaders are willing to tell people about the project but are also worried about the delayed compensations which might affect their efforts  
- Mode of payment for Affected Persons and sensitisation process on use of the funds given there is a risk for many to misuse the funds  
- Actual date when the project will be implemented  
- If the government is mandated to construct roads, why does it want to construct a road and make the public pay for it? |
### Stakeholder Engagement Plan

#### Stakeholder category

<table>
<thead>
<tr>

### 5.2 RLRP Consultations and Disclosure

Comprehensive stakeholder engagement with Affected Persons is a key element of the land acquisition and resettlement process and to ensure that UNRA, Government authorities, the private sector, civil society organisations and the affected population interact during all stages of the project implementation. The main objective of stakeholder participation is to inform Affected Persons about the Project, its impacts and mitigation,
and the compensation, resettlement and livelihood restoration process in addition to seeking their feedback on the following:

- Entitlement matrix;
- Valuation and rates of assets and property;
- Proposed dates for compensation and resettlement;
- Approach to compensation; and
- Other assistance available to maintain or improve their standard of living, including re-establishing or starting new livelihood restoration activities.

Consultations and disclosure has been conducted during socio-economic surveys, baseline census and inventory of loss, and will continue during RLRP disclosure, implementation, monitoring and evaluation, and into operations once the expressway is commissioned. All stakeholder consultations follow the principle of free, prior and informed consent to achieve bottom-up participation and support of affected communities.

For the RLRP, primary stakeholders have been identified to include:

- Individuals and groups that are directly affected by the Project due to partial or complete loss of assets, land and livelihood activities;
- Community and public institutions affected by land acquisition;
- All settlement areas traversed by the alignment;
- Parties that have “interests” in the Project; and
- Have the potential to influence project outcomes or company operations.

A number of secondary stakeholders have also been identified and include indirect beneficiaries such as firms and companies which will benefit from the procurement process (e.g. services and materials suppliers).

Stakeholder engagement and consultations completed to date have involved the following:

- Consultations with Government officials at the division, district and Parish/Zone levels (as appropriate), as well as KCCA and local leaders.
- Consultations and workshops with the private sector, civil society organisations, NGOs.
- Structured questionnaires used to interview Affected Persons and collect information on their livelihood status and other socio-economic aspects of the local community. Both men and women participated in the questionnaires. Questionnaires aimed to identify vulnerable persons in each household surveyed;
- Focus group discussions and key information interviews with local communities, with specific attention paid to vulnerable groups to ensure they actively participate in engagement activities. Information collected was used to develop specific interventions to be employed for vulnerable groups.
- Baseline census of Affected Persons conducted by field teams of specialists comprised of a social team, surveying team and valuation team. The surveying team identified potentially affected people first and marked out the road corridor as well as any affected land and assets. The valuation team then counted and valued all the affected land and assets as per the established RLRP methodology. Lastly, the social team conducted surveys to collect socio-economic baseline data.
- Vulnerable groups participated through public consultations meetings, representation in workshops, Focus Group Discussions, and via a tailored identification exercise carried out to reach them in person. Information was collected to develop specific interventions to be employed for vulnerable groups.
Consultation workshops focused on particular issues such as Livelihood Restoration, within which focus groups were established to determine specific issues related to women, youth, and vulnerable groups.

Public sensitisation and hearing meetings were held with local communities through the help of Local Council leadership. The Consultation Team relied on Local Councillors to mobilise in areas where the local administration structures were not fully functional. UNRA introduced the field teams using an introductory letter to the Local Leadership and local council authorities. The local communities were notified about the public meetings through the Local Council leadership.

The venue, time and schedule of each meeting was publicised with a 1-week notice by the local councillor or the Local Council 1 Chairperson (in a few cases the sub County chief). The Local Council 1 Chairperson passes on the information to the area Local Council 1 executive to ensure the Local Council can prepare for the meeting. UNRA also sent out notices / announcements including newspaper advertisements to mobilise potentially Affected Persons for meetings and the census exercise.

In general, one to two meetings were held per day. There was a special case in Kasokoso where the safety of surveying and consultation teams was at risk from confrontations with the local community so armed security were on standby to intervene. This was in line with national laws and consistent with IFC Performance Standard 4: Community Health, Safety, and Security and good international practice. No security interventions occurred.

Local leaders / representatives were essential as an interface between the local community and the Project to address any community complaints and issues. The consultation / sensitisation meetings were chaired by one of the local leaders, who was tasked to introduce the teams and community members present.

The structure of the meetings involved: (i) a summary about the proposed activities and previous consultations occurring at the leadership level; (ii) introduction of the field teams; (iii) brief the community about key project information; and (iv) open session where the local community could ask for clarifications and provide comments. Affected Persons were encouraged to contribute, raise concerns and where appropriate give their own input into the project planning. Local languages including English, Luganda and Runyakitara were used to ensure all present understood what was being discussed. The team members also explained their roles and tasks as well as the formal cut-off dates and grievance mechanism in place to the participants. Lastly, the social field team interviewed Affected Persons with a questionnaire to assess their livelihood status and other socio-economic aspects of the local community. Both men and women participated in the questionnaires in person. All the sensitisation meetings except one were recorded. A summary of the RLRP consultation outcomes is discussed below with details of the consultation meetings provided in the ‘Consultation Records' technical appendix (Volume C).

### 5.2.1 Information disclosure

Early RLRP consultations and disclosure conducted during 2013 to 2015 are as follows:

- **For Phase 1 KJE component** - Consultative meetings commenced in mid-December 2013 with an initial meeting with the Consultant Team at ICS Consultants’ headquarters. Timetables / schedules for meetings were delivered to the Chairpersons and Councillors of the respective local governments beginning with the deputy Chief Administrative Officer (CAO) for Buikwe District on the 3rd January 2014. For Mukono District, the sensitisation occurred on 15th, 16th and 17th January 2014. The Kampala District (Nakawa Zone) was the last to be sensitised on 22nd July and 27th July 2014.

- **For KSB component** - Consultative meetings commenced in early 2015 with the Consultant Team at ICS headquarters as well as with key UNRA officials and other stakeholders at both UNRA and the World Bank Offices (Rwenzori Courts). Timetables / schedules for meetings were delivered to the Chairpersons and Councillors of the respective Divisions, and the sensitisation meetings started over the period of 6-15 July from Nakawa Division and progressed to Makindye Division and part of Kira Division (Wakiso district, Sabagabo).
Since 2015, UNRA has completed additional disclosure, stakeholder engagement meetings, property valuation and socio-economic baseline surveys in the areas of Bukasa, Kibiri A, Kireka D Kiganga, Kwafu, Heritage, Kosovo, Kyamula, lower Konge, upper Konge, Kyamula, Mutungo zones 1 and 9-12, Lukuli zone 5, Nakinyuguzi and Kigaga in Makindye division.

During 2016 and 2018, the range of disclosure and consultation meetings conducted for the preparation of the ESIA and RLRP Update are as follows:

- Kigaga Zone community members on 21/11/2016;
- Masaja Kibira B Zone community members on 23/11/2016;
- Mutungo Zone I and Zone III community members on 24/11/2016;
- Mutungo Zone II and Zone VIII community members on 24/11/2016;
- Mukono Central Division Local Leadership on 21/12/2016;
- Kasenge A and Kasenge B community members on 29/12/2016;
- Nakaseeta Nagogye Sub-county Local Leadership on 29/12/2016;
- Coh Nakisungu Sub-county Local Leadership on 29/12/2016;
- Government Ministries, Departments and Agencies on 18/05/2017;
- Civil society organisations on 8/06/2017;
- Wakiso District Technical Planning Committee on 14/06/2017;
- Mukono District Technical Planning Committee on 15/06/2017;
- Private Sector on 21/06/2017; and
- Kampala Capital City Technical Planning Committee on 22/06/2017;
- Slum Dwellers International and Cities Alliance on 15/03/2018
- Cities Alliance Meeting on 16/03/2018
- Mwayanjiri, Naluvule and Wankoba Livelihood Restoration Plan on 26/03/2018
- Kinawataka Livelihood Restoration Plan on 27/03/2018
- Kasenge A & B Livelihood Restoration Plan on 27/03/ 2018
- Kito B, C and Taxi Zone Livelihood Restoration Plan on 04/04/2018
- Namataba Livelihood Restoration Plan on 04/04/ 2018
- Banda 2 and 3 Livelihood Restoration Plan on 04/04/ 2018
- Busiba and Lukonge Villages Livelihood Restoration Plan on 04/04/ 2018
- Mbuwa 1 and 2 Livelihood Restoration Plan on 04/04/ 2018
- Mutungo 1 and 2 Livelihood Restoration Plan on 05/04/ 2018
- Mutungo 9 and 10 Livelihood Restoration Plan on 05/04/2018
- Butabika Livelihood Restoration Plan on 05/04/ 2018
- Danddiira and Rweza Livelihood Restoration Plan on 05/04/ 2018
- Kyungu Livelihood Restoration Plan on 05/04/ 2018
- Mutungo 11 and 12 Livelihood Restoration Plan on 05/04/2018
► Nsube A Livelihood Restoration Plan on 06/04/2018
► Lufunve Livelihood Restoration Plan on 06/04/2018
► Nsimbe Kassi Livelihood Restoration Plan on 06/04/2018
► Galabi Livelihood Restoration Plan on 09/04/2018
► Kyawambogo Livelihood Restoration Plan on 09/04/2018
► Nangwa Livelihood Restoration Plan on 10/04/2018
► Nakawa Market Livelihood Restoration Plan on 11/04/2018
► Cities Alliance, National Housing Construction Company on 13/04/2018;
► Bukasa Livelihood Restoration Plan on 05/04/2018
► Namboole Farmers Livelihood Restoration Plan on 19/04/2018
► Banda 1 Livelihood Restoration Plan on 19/04/2018
► Mutungo 7 and 8 Livelihood Restoration Plan on 05/04/2018
► Kyambogo K5, k6, K7 and K8 Livelihood Restoration Plan on 04/04/2018
► Katongole, Tibaleka, mugalu, Kijjwa and Bukasa Livelihood Restoration Plan on 06/04/2018.

Affected Persons were briefed during the sensitisation meetings on the proposed activities for the construction and operation of the Project, and how it would affect them in terms of potential loss (or loss of access) of land, buildings, structures and crops. They were also briefed on the formal compensation framework and RLRP methodology established, and the grievance mechanisms in place. Affected Persons were given a chance to ask questions which were answered to the extent possible by the Project field teams and UNRA.

In 2015, a public notice for the compensation process and official cut-off dates was issued in local newspapers (see in the ‘Consultation Records’ technical appendix (Volume C). However, teams on the ground found the official cut-off dates were not well known. A revised approach has since been adopted for the RLRP consisting of cut-off dates established as of the date the census and inventory of loss is conducted, resulting in numerous cut-off dates for the Project. This has been communicated in the latest round of consultations for the ESIA and RLRP Update.

Plate 5-6: Consultation with local leaders at boundary of Makindye and Nakawa Divisions along rail crossing of the KSB road project
5.2.2 Outcomes of Earlier RLRP Consultations (2013-2015)

Overall, the Project has had strong support and cooperation from the local leadership apart from the onset apart from Kasokoso, an informal settlement in the Wakiso District, Kira Division. The community was initially resistant due to an ongoing legal housing action, which has since improved. In general, most stakeholder concerns related to ensuring Affected Persons are adequately and promptly compensated. The KSB had experienced a few issues related to administrative conflicts among the local leadership, which were resolved through discussions and in-depth sensitisation.

The RLRP consultations were recorded in minutes of the meetings presented in the ‘Consultation Records’ technical appendix (Volume C). Concerns and comments were considered into the development of the RLRP as appropriate. Key concerns voiced during the preparation of the previous Resettlement Action Plans for the KJE and KSB components (2015 and 2016) include:

- Varying values for land of similar size along the Project and lack of input from Affected People on the valuation of assets.
- Entitlement criteria and whether structures would be compensated at full replacement costs.
- Potential for property damage outside of the Project Footprint during construction after compensation has been paid and eligibility for additional compensation.
- Compensation for squatters and illegal settlers.
- Delayed or slow delivery of entitlements.
- Questions related to grievance options and process.

Key concerns and questions raised by stakeholders on the final Project alignment are summarised below.

Government agencies, utilities and public entities:

- Approach to resettlement and compensation differs between the national regulatory framework and practice, and international standards (e.g. the practice of involuntary resettlement, compensation of illegal settlers in wetlands).
- Greater emphasis needs to be placed on engagement activities at the start and during the ESIA and resettlement planning, and when the expressway is in operations.
- Public hearings have not been adequately advertised and engagement activities are deemed insufficient in the history of the Project.
- A National Physical Development Plan is in advanced stages of preparation and needs to be considered for resettlement planning.
- Potential for cumulative impacts from other infrastructure projects (e.g. SGR and Bukasa Port) needs to be considered to avoid impacting the same people cumulatively and avoid additional displacement from future development of other planned projects.
- Better planning and collaboration between different projects may reduce project costs by compensating Affected Persons for loss of property accounts for losses due to all planned projects that impact the same person(s) and asset(s).
- Project benefits need to be maximised to the extent possible, which can be done through collaboration with other Government agencies and companies (e.g. improving access to the expressway in rural areas).
- Loss or change to ecosystem services such as forests, wetlands and springs must be considered, in particular with respect to vulnerable groups who cannot afford to pay for utilities such as tap water.
The RLRP needs to describe strategies for addressing changes to land acquisition and access from previous baseline and Resettlement Action Plans.

How will the RLRP attempt to address issues associated with speculators?

Means to ensure compliance of Project environmental and social commitments by Contractors.

How will UNRA handle post-construction compensation issues and impacts?

Although extensive consultation has been carried out for the Project since its initial feasibility studies in 2011, UNRA recognises that regular consultative meetings will be required as part of the RLRP disclosure, during implementation of the land acquisition process and entitlement distribution, and following commission of the expressway. The latter is of importance given the potential for cumulative impacts from other infrastructure projects in development or planned.

Private sector concerns:

- Compensation for businesses affected by loss of access due to the Project;
- Disruption of utility services that impact on local businesses;
- Further engagement for small businesses affected in the Nakawa market area;
- Questions about Affected Persons who have stopped development due to the Project but then have been advised they were no longer affected.

Community concerns:

- Failure to be compensated for lost time and loss of business due to delay between valuation and land acquisition.
- Inadequate compensation or compensation being taxed.
- Unfair or inconsistent valuation process.
- Concerns over participation in the stakeholder consultation process for those affected owners who do not reside within affected areas.
- Delayed or slow delivery of entitlements.
- Compensation for persons indirectly affected by the Project, including loss of access to homes and encroachment.
- Valuation of property previously valued but no longer exists or has since been degraded.
- Lack of community awareness of Project impacts as well as the resettlement, compensation and grievance processes.
- Issues of loans and payment that could be affected by the resettlement process.
- Mechanisms for resolving land ownership disputes and family compensation conflicts.

In addition, Section 5.1.2 discusses a number of stakeholder concerns collected during ESIA consultations that also relate to the RLRP.

5.2.3 Outcomes of Recent RLRP Consultations (2016-2018)

5.2.3.1 Livelihood Restoration

The key outcomes of the consultations conducted specifically in regards to livelihood restoration are summarised in Table 9 below. The communities consulted were generally divided up into four major focus groups: youth,
women, men and vulnerable peoples and invited to express the main challenges in those groups. In cases where communities declined to split into the groups, the community development project assessments were done as a whole group. The key community development projects proposed were presented and the groups were asked to rank the projects that they deem most important to their communities. Groups were also provided with an opportunity to voice concerns regarding livelihood restoration and other issues. Other concerns raised included ongoing delays and other issues associated with valuation, compensation, resettlement and the design of the KJE alignment. Communities were also concerned about whether they should continue to carry out activities on their plots and several community members requested to be given jobs during the construction phase of the Project.

The preferences for livelihood restoration and concerns raised have been considered in the development of livelihood restoration initiatives in the RLRP (Volume D). It is expected that the concerns/comments listed will be also be responded to by the Community Liaison Officers (CLOs) for the Project in the course of implementation of the compensation process.

Table 5-9: Key issues and concerns from Livelihood Restoration (2018)

<table>
<thead>
<tr>
<th>Stakeholder</th>
<th>Key Outcomes / Preferences for Livelihood Restoration</th>
<th>Concerns/Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nakawa Market Association</td>
<td>Youth: Building a new market with processing factories and construction of cold rooms; public toilet; recreational centre for the youth; a football playground</td>
<td>Market: Requested that whenever there are interventions about the new market, traders and their leaders should be part of the team so as to put in their submissions as stakeholders.</td>
</tr>
<tr>
<td></td>
<td>Women: Day care centre and kindergarten; public market; technical training to gain hand skills; local taxi transport for customers at the market; flyovers for crossing and clean safe water at the market</td>
<td>Suggestion: Another member suggested that the new market proposal should be given to KCCA so as they include it in the plan.</td>
</tr>
<tr>
<td></td>
<td>Men: Public modern market, public toilet, taxi stages should be reinstated, ample parking space for the market dwellers</td>
<td>Delays and project implementation: Concern of such projects of markets not being implemented like the case with Ntinda market which hasn't been constructed up to then. Yet they claim all funds are there. So he cautioned the donors to do away with any obstructions.</td>
</tr>
<tr>
<td></td>
<td>Vulnerable: Special consideration during the compensation process, access routes for the disabled and elderly, specialized public toilets and a gazetted place for the disabled in the new market</td>
<td></td>
</tr>
<tr>
<td>Nangwa and Kiwugo</td>
<td>Health centers: the health centers are very far from here the nearest are in Mukono town and Seeta Nazigo. The Namuyenje Health Center III has poor structures, no drugs, expired drugs and the nearby clinics are very expensive the majority of the community cannot afford the treatment cost.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Water and Electricity: Water and electricity- in Kiwugo village there is no electricity and water in some areas of Nangwa and no water and power in Kiwugo. The available water points are affected by the project.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Insecurity: due to poverty and unemployed people, there is excessive stealing of people's properties and killing of community members</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Lack of government secondary school: both villages lack secondary schools for both private and government, there is only one private secondary school and it's very expensive, so this contributes to high levels of dropouts in the community</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Poverty: we don't have businesses and the few we have are very poor which keeps the community in poverty. The factories around pays little money (4000) per day which can't sustain a person with his/her family</td>
<td></td>
</tr>
<tr>
<td>Kyawambugo Village</td>
<td>Women: Agriculture and livestock; brick making; business; tree planting; fetching water; service providers (hiring out tents, plates and saucepans)</td>
<td>Vulnerable groups: Concern on the absence of disabled persons and if their views won't be considered. Water points: Concern over affected water points and request to provide protected springs.</td>
</tr>
<tr>
<td></td>
<td>Youth: Youth need capital to expand their business and start up new businesses</td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>--------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Men</strong>: Agriculture, livestock, brick making, rental houses, businesses</td>
<td>since its safe water is safe and free (no payment) for everyone. Schools: Concern over lack of public schools in the community and private schools being expensive</td>
<td></td>
</tr>
<tr>
<td><strong>Not relocated</strong>: Health centre; water, SACCOs, Market</td>
<td>LRP target: Concern over whether this livelihood restoration plan targets the entire community, or targets the project affected persons only?</td>
<td></td>
</tr>
<tr>
<td><strong>Relocated</strong>: Whoever goes away should be given money from the budget of the livelihood restoration plan and he/she decides how to restore their livelihoods; We request UNRA to solve the community problems which we may find in the new places where we are going to. For example, UNRA brings water close to us</td>
<td>Relocated persons: Concern if people who will be relocated will benefit from this livelihood restoration plan</td>
<td></td>
</tr>
<tr>
<td><strong>Galabi Village</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Market</strong>: We request UNRA to construct for us a modern standard market along KJE road</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Vocational Skills</strong>: We request for vocational skills development mostly in youths for example train them in welding, building, mechanics.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Business</strong>: We request the government to support us financially such that we start up small businesses like bakery and poultry.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Farming</strong>: We request the government to sensitize and advise us on how to do modern farming, supply us with good seeds, fertilizers and modern irrigation tools such that we improve on our agricultural system</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Health Centre</strong>: We request the government to build for us a Health Center 111 with good health facilities and workers</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Electricity</strong>: We request the government to give us transformers and powerful solar panels such that we connect our houses and factories to power</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Schools</strong>: We request the government to build for us a primary school in Namumira parish</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Water</strong>: The Government should provide the sewage line so that we can be able to use the water borne toilets being that our area has a high water table</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Community playground</strong>: We request the government to build for us a modernized playground with toilets; which will help increase its revenue through hiring this place for functions and promote the youth and children’s their sports talents</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Kyungu, Nsube Parish</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Agriculture</strong>: We request UNRA to plant fruit trees along the sides of the roads such that our environment is conserved so that there is an effect with regards to better agricultural yields. We request the government to introduce a machine which checks and screens out the expired, poor sprays and pesticides for both animals and plants or to put up policies that do not allow expired and fake drugs to be imported or produced in Uganda</td>
<td>Design: Some of us have plots along KJE which are not affected but we were told that it will be hard and impossible to enter this highway because it will be fenced. I am asking shall we be allowed to put a standard business let’s say supermarket alongside the highway or we won’t be allowed at all?</td>
<td></td>
</tr>
<tr>
<td><strong>Livestock</strong>: We request the government to restore back our butcher “Kyetume Lufula” which was taken in 1984 because its land, water tanks, electricity and slaughter houses are still there. This butcher will help us get a market for our animals</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Sand mining</strong>: We request the government to get for us other places where we can collect our sand from. We request UNRA to employ our youths such that they earn from the project instead of sand mining</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Brick making</strong>: We request for fair and timely compensation such that we buy land for brick making</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Nsube A, Namumira Ward, Mukono Central</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Lufunve</td>
<td><strong>Health Centre</strong>: We request for Government aided Health Centre being affordable for everyone in the community i.e. the poor can afford.</td>
<td></td>
</tr>
<tr>
<td>Kyetume Parish, Nakisunga sub</td>
<td><strong>Police station/Post</strong>: We request for a Police Station/Post with quality services and increase on the number of policemen. Policemen should be facilitated with transport means, (motorcycle and vehicle) for proper monitoring of the community.</td>
<td></td>
</tr>
<tr>
<td>County</td>
<td><strong>Jobs</strong>: We request the government to restore back our butcher (Kyetume Lufula) such that our youths employed there.</td>
<td></td>
</tr>
<tr>
<td>Community center</td>
<td><strong>Community center</strong>: We request for the government to construct for us a community center where we can meet as a community and use it for other community related functions.</td>
<td></td>
</tr>
<tr>
<td>Playground</td>
<td><strong>Playground</strong>: The community members informed the consultant that the butcher (Kyetume Lufula) has 50 acres of land and they requested the government to deduct a small part of it for the playground because they have so many schools in the community but they lack a playground which can be used by the schools for recreational and health purposes promoting the children’s talents in football, netball and other sports.</td>
<td></td>
</tr>
<tr>
<td>Youth</td>
<td><strong>Jobs</strong>: we request the government to replace our butcher “Lufula” such that youths get employed there. Employment on this project and others; small loans for animal rearing.</td>
<td></td>
</tr>
<tr>
<td>Bukasa Village</td>
<td><strong>Women</strong>: Affordable government aided health centre; Police station/Post with quality services and increase on the number of policemen. Policemen should be facilitated with transport means, (motorcycle and vehicle) for proper monitoring of the community. Jobs: we request the government to restore back our butcher (Kyetume Lufula) such that our youths employed there; Community center: We request for the government to construct for us a community center where we can meet as a community and use it for other community related functions; Playground: The community members informed the consultant that the butcher (Kyetume Lufula) has 50 acres of land and they requested the government to deduct a small part of it for the playground because they have so many schools in the community but they lack a playground which can be used by the schools for recreational and health purposes promoting the children’s talents in football, netball and other sports.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Elderly</strong>: Health Centre; water: We request for protected springs because they are accessible by everyone in the community and are free of charge; Walk over: The main road is very busy and we the aged find it hard to walk, so we request for better walk over/Fly over aside the main road; Electricity; Police Station; Trees so that we re-forestation; Sensitization on the modern farming methods and increasing yield; Standard Market where we can buy and sell goods.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Men</strong>: Nearby health Centre; UNRA to supply us free tree seedlings such that we replace the ones cut to avoid drought and soil erosion in our community therefore environmental restoration; Water: we request for boreholes as a replacement for what is going to be lost; Access roads: We want UNRA to leave our access roads open during the construction of KJE.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Livelihood restoration</strong>: Inquiries on when the implementation of community development programs shall start.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Design</strong>: Concerns and inquiries on people previously affected by the project who are now not affected.</td>
<td></td>
</tr>
<tr>
<td>Dandiira and Lweza villages</td>
<td><strong>Jobs</strong>: The communities SACCOs we have are of high rate interests so we request the government to put a strict law on these high loan interest rates so that we borrow loans and get capital for small businesses. UNRA should consider women, men and youths on the project, in case of any job opportunity we should be called such that we earn money.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Training</strong>: We request the government the sensitize us more on vocational skills such that we begin us our businesses at our homes.</td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>-------------</td>
<td>------------------------------------------------------</td>
<td>-------------------</td>
</tr>
<tr>
<td></td>
<td>We want to be sensitized on how to do vocational skills so that we start up small businesses which doesn't acquire much capital</td>
<td>Dust pollution: Concerns over dust from construction of the KJE road and its effect on the people; request to mitigate its impacts</td>
</tr>
<tr>
<td></td>
<td>Financial support: We request for financial support in the small businesses we have such that they expand. Government SACCOs can be put in place without loan interest rates. We request the government to supply us with animals and poultry so that we concentrate in livestock</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Market: We request for a joint market for both villages and it should be for all that's to say men, women and youths because we are all farmers</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Water: We need free, reliable and safe water in the community. We request for boreholes and protected springs which are not payable so that we do our businesses as youths for example brick lying</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Insecurity: Youths should be given jobs to keep them busy and earn a living. The government should find another place for youths to collect their sand from and get more customers</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Livelihood: We request UNRA to follows us when the project starts mostly those ones who will be relocated and this can be easily done through registering all the affected people in SACCOs to ensure proper livelihood restoration</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Capital: We request UNRA to compensate us well and in time so that we can acquire fertile land for agricultural. We request the government to give us “Etanidikwa” with low interest rate so that we get capital as youths</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Education: We request the government to check the private schools, reduce on their school fees so that we the poor can access them for better education of our children. We still request the government to build more primary schools in our community</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Poor access roads: We request for better access roads which mostly connects to our sand mining places “Ebilembe” such that our sand is transported</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Health Centre: We request the government to extend well structured health centers with proper health services for example qualified health workers and drugs</td>
<td></td>
</tr>
<tr>
<td>Kasenge A and B</td>
<td>Health Centre: We request the government to construct for us a community health center 2 and this will limit on the long distances we have been moving in search of good treatment.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Water: We request for boreholes in the community since they are not payable</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Security: We request for a police post in this community and we have land near the tax park where it can be put</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Drainage channels: We request the government to plan well the proper building of the drainage, divert it such that it flows outside the trading center and people’s houses</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Waste disposal: We request for the modern rubbish dishes for proper waste management.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Market: We request for a well-structured market in our community, this will help us sell and buy our agricultural produces well and as a way of creating employment to community members mostly women.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Schools: Renovation and upgrading of St. Agnes and Kasenge Muslim school, we request that they are upgraded up to secondary</td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td>level, they build structures and even toilets for it to ensure proper leaning environment to our children</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Jobs:</strong> We request UNRA to employ us as youths of this community, both educated and uneducated ones so that we also earn a living</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Public toilets:</strong> We request for public toilets and urinals for both male and female especially in places where these quarries and factories are</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Taxi park:</strong> There is still a place near the tax park which the government can help us acquire and we expand the park to a convenient size</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Walk over:</strong> We request the government to put for us a walk over which connects the around community to the trading center and this will limited the accidents which occurs co-currently in our area</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Irrigation tools:</strong> Since most of us here are farmers we request for modern irrigation kills and machines, which can be supplied to us in groups such that we improve our agricultural sector as a community</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Quarry:</strong> We request the government to reduce on the number of quarries around at least up to 2 and then put strict laws which governs them mostly on blasting days and time</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Playground:</strong> We request for a proper play ground with toilets, where we even conduct community meetings from</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Drainage channels:</strong> During the presentation they said that their first priority should be drainage because this channel of Kawooya normally floods during rains causing children to miss school.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Schools:</strong> They requested to be built a primary and vocational school with better structures not like wooden ones</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Public toilets:</strong> This would prevent open defecation that leads to diseases</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Public hospital:</strong> They went ahead and said next would be public hospital the nearest one is in Kiswa which is quite very far and mothers suffered a lot</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Market:</strong> They suggested public markets to create jobs for the locals.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Recreational Centre:</strong> A community centre built for the purpose to prevent students from being disturbed</td>
<td></td>
</tr>
<tr>
<td>Banda II &amp; III</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Livelihood:</strong> We request for help in agricultural sector through providing quality seeds like maize, beans and many more so that we can get quality yields for sell. We request for modern agricultural tools and machines in the community which can enable us to dig big pieces of land for both subsistence and commercial. We request for support in livestock for example supplying zero grazing cattle, poultry and other animals</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Electricity:</strong> We request for electricity such that more businesses are started in our community. This will create employments for women and youths. Electricity in our community will allow us to start small businesses.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Health Centre:</strong> We request the government to build for us a health centre too in the trading centre or else we can provide land like the Catholic Church here in Busiba village has four acres so we can put it there for communal use</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Jobs:</strong> We request the project to employ women, most of us are not educated but we can cook for workers and even do other casual work on the project so that we earn</td>
<td></td>
</tr>

<tr>
<td>-------------------</td>
<td>-------------------------------------------------------</td>
<td>------------------</td>
</tr>
<tr>
<td>Nsimbe Kassi</td>
<td>Playground: The existing one shall be affected by the road</td>
<td>of members not being able to acquire loans since their properties have been marked</td>
</tr>
<tr>
<td></td>
<td>Capital: For the youth like machines for making pavers</td>
<td>Livelihood Restoration: Inquiry over why other affected areas have not had such developmental projects</td>
</tr>
<tr>
<td></td>
<td>Community centre: Then another concern was that with a community center they can also have a public toilet because a community center comes with a public toilet</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Public facilities: Public hospital; Public toilets; Vocational training; Street lightning</td>
<td></td>
</tr>
<tr>
<td>Banda B1</td>
<td>Residential houses: Residential houses based on condominium system. This was because the area remaining not affected was very small moreover KCCA doesn’t allow single strolled buildings anymore in and around city centre</td>
<td>Census: Concerns over those people who missed the census exercise</td>
</tr>
<tr>
<td>(Acholi Quarters)</td>
<td>Social utilities: Churches, mosques</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Other facilities: Shopping arcades or malls, parking facilities</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Stages: We would like to have stages and bus stop places for buses and taxis along the road with stage shelters where the youth should be allowed to operate some small businesses and also boda-boda on these stages should be allowed</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Water: Reconstruct our source of water which will be destroyed by the project and also work on the water drainage system</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Schools: The school in the neighbourhood (cream land) is affected by the project, can we have it relocated within this community?</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Access roads: Access road from Acholi quarters to the main road should be put in consideration</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Water points: Construct for us other water points since the existing one will be destroyed</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Local market: We need a local market area since some of those areas will be destroyed</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Cultural centres: Make a provision to rebuild worship centres that are affected</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Health centres: We also need a health centre within this community.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Public market; health centre; public tap; government schools; electricity; garbage containers; jobs on the project; support for vulnerable people</td>
<td></td>
</tr>
<tr>
<td>Youth</td>
<td>Jobs; capital for small businesses; police post; modern market; public toilet; public schools; recreational centre; flyers on the KJE road</td>
<td></td>
</tr>
<tr>
<td>Women</td>
<td>Public market; health centre; public tap; government schools; electricity; garbage containers; jobs on the project; support for vulnerable people</td>
<td></td>
</tr>
<tr>
<td>Kinawataka</td>
<td>Jobs: That will get us from habits like abusing drugs</td>
<td>Livelihood Restoration: Concerns on whether those who shifted from Kinawataka have an</td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>-----------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Loans</td>
<td>They added on that they needed a bank that can lend them loans as youths.</td>
<td>opportunity to operate a stall here if a market is constructed</td>
</tr>
<tr>
<td>Recreational centres</td>
<td>They need recreational centres where they can display and discover their talents and get coached. They claimed the railway removed those that existed</td>
<td>Free education for vulnerable groups: Inquiry whether the vulnerable will study for free</td>
</tr>
<tr>
<td>Public toilet</td>
<td>They need a public toilet where they don’t pay. They realized that at the end of the month, they spend 60,000/= so it's as if one is working for the toilet</td>
<td></td>
</tr>
<tr>
<td>Hospitals</td>
<td>We are the 10th biggest parish but we don’t have any hospital. The nearest is in Naguru</td>
<td></td>
</tr>
<tr>
<td>Schools</td>
<td>We have many children but the available school is the military one and its overwhelmed. So if we can get a school, we will be sure our children will study</td>
<td></td>
</tr>
<tr>
<td>Public markets</td>
<td>Our wives are hardworking but they were chased by KCCA so now life is hard. But also the men work. So if we can get a market, we will be sure life will be better.</td>
<td></td>
</tr>
<tr>
<td>Clean water</td>
<td>If they can construct for us good springs, our water would be better.</td>
<td></td>
</tr>
<tr>
<td>Worship places</td>
<td>Building of all worshipping places such as mosques, protestant and catholic churches because the born again churches are so many</td>
<td></td>
</tr>
<tr>
<td>SACCOS</td>
<td>We need a Sacco or microfinance that lends us at a relatively affordable interest. We will be greatly happy; after constructing for us a market, we will get money from this very microfinance and we use it in the market</td>
<td></td>
</tr>
<tr>
<td>Garbage collection</td>
<td>If the market is constructed, we are sure garbage won’t be a problem because KCCA also helps</td>
<td></td>
</tr>
<tr>
<td>Security lights</td>
<td>We need security lights because the security here is bad. At least the thieves won’t attack us in the light</td>
<td></td>
</tr>
<tr>
<td>Retirement fund</td>
<td>By 60, we are so helpless and weary; and we work so hard to sustain our families but in old age, we have no money for survival at all</td>
<td></td>
</tr>
<tr>
<td>Fly over</td>
<td>The express road that is about to be constructed is for high speed and so with our problems, we need a flyover so that our children are safe. We have lost our people on this very road so we badly need a fly over</td>
<td></td>
</tr>
<tr>
<td>Community centre</td>
<td>Here we can hold community meetings and happening places, reading places for our children in vacations (community library), youth rehabilitation</td>
<td></td>
</tr>
<tr>
<td>Housing</td>
<td>Government should get for us a place / build for us a place where we can stay &amp; get income for our children</td>
<td></td>
</tr>
<tr>
<td>Water trenches</td>
<td>When it rains, the place if full of water; it floods. Government should build for us water trenches which as explained by women are a threat to us</td>
<td></td>
</tr>
<tr>
<td>Special needs schools</td>
<td>Our children who also have the same challenge have no schools at all for these lame children. We also can’t afford to pay for these children yet we have produced them</td>
<td></td>
</tr>
<tr>
<td>Kito B &amp; C</td>
<td>Schools: Government to set up schools for the PAPs since most of the schools in their area are privately owned</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Access roads: There was a proposal that Access roads and flyovers should be built to allow the PAPs access their homes</td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>--------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Provision for pedestrians, Bicycles and boda bodas</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Hospitals:</strong> Government to build a hospital because there is none in the area</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Jobs:</strong> Requested for Employment opportunities e.g. a one Magala Noah (0774036336/0752036336) supplies murrum, stones and sand which he believes that the road would use during construction. He asked to be considered</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Boda stages:</strong> There is a concern that Boda boda stages will be destroyed hence affecting the livelihood of the cyclists</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Drainage systems:</strong> Said the project should also work on the drainage system very well both big and small trenches as poor drainage is one of the biggest problems in the area</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Electricity:</strong> Should be reconnect at no charge to the PAPs</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Market:</strong> There is no market in the area, the women sell the small items from their homes and sometimes the buyers struggle to cross to the homes characterized by poor drainage system</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Fund disbursement:</strong> For those who are married, they requested that UNRA should put a condition of a joint account because the men have a tendency of getting excited by the money and not sharing with their wives</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Relocation:</strong> The elderly requested that UNRA gets for them land, builds for them houses and resettles them since they no longer could build by themselves</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Feeder roads:</strong> Work on the feeder roads so that they are tarmacked</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>School and cultural sites:</strong> The owners of schools and worship places should be given special consideration</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Disability ramps:</strong> The disabled said they needed a provision for specialized flyovers for crossing and also accessing the roads in their wheelchair</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Poor water bodies:</strong> Since the project aims at taking us higher we request UNRA to extend national water which stops in Mbalala up to here; if possible we also get boreholes (which would be free of charge)</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Poor health centers:</strong> We walk long distances like 4KM and above to Mbalala-Mukono and Nazigo for the services. We request UNRA to build for us a health center 2 in the middle of the 3 villages to ensure proper treatment anytime including night.</td>
<td>Compensation funds: The community firmly requested that the support should be given to the directly to the beneficiaries but not through the Local leaders because they are no longer trust worth but give them to their friends and family members.</td>
<td></td>
</tr>
<tr>
<td><strong>Poor access roads:</strong> We request UNRA as it builds KJE, it also beautifies the connecting roads which joins our homes to the main road allowing us to transport our agricultural produces to the market.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Affected farm land:</strong> We have been getting Pam and do crafts which we could sell and get some money, so we request UNRA to sensitize us on how to do craft using other available resources. We want proper compensation so that we buy other fertile and good land for agriculture since it’s the main source of income to the majority here</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Electricity poles:</strong> We request the government to negotiate with UMEME and they place the pole in the place where a PAP wants. We request that you don’t put the poles in our land, put them in your reserve area</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Jobs:</strong> I can’t drive trucks and am not educated but I can do other casual work on the road, so we request UNRA to consider the youths of this community in case of any employment opportunity.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Stakeholder</td>
<td>Key Outcomes / Preferences for Livelihood Restoration</td>
<td>Concerns/Comments</td>
</tr>
<tr>
<td>-------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Mutungo 1 &amp; 2</td>
<td>We are not educated but we educated our children so please we even have engineers so please employ them so that we benefit as parents.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Businesses:</strong> Build for us a market where they can sell food stuffs especially women; buy animals including cattle, poultry, goats and pigs especially to the elderly men to decrease dependency on other people; Dealing in agricultural products, clothes, kiosks and Retail shops; Financial Support through groups Training in business and advise on better business opportunities</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Agriculture:</strong> Agriculture support through poultry, animal rearing. Financial and in-kind support</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Hospitals:</strong> We need a good hospital in this village. We also need community-based health centres to help mothers the needy and vulnerable who cannot afford hospital bills and move long distances</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Feeder roads:</strong> Feeder roads that connect to markets, hospitals and schools should be constructed</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Schools:</strong> We need a government school because not all of us can afford private schools and since some schools are also going to be affected by the road like this very one we are meeting from (Clever Junior school)</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Vocational training:</strong> We need a vocational training centres to help us with skills like tailoring, hair dressing, and modern agriculture</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Markets:</strong> Build the markets that will be cut off from people’s access and provide for their accessibility</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Jobs:</strong> During the project works, let the local people be considered first for both casual and technical work</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Recreational centres:</strong> We need recreational centers like play grounds for football and netball so that we sharpen and also discover our talents</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Access roads:</strong> Create as many access roads to the main road as possible for easy movement and access to businesses and homes</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Water supply and electricity:</strong> All services destroyed during construction should be replaced such as water supply and electricity</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Public toilets:</strong> Build good and decent public toilets that cater for the disabled</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Water channels:</strong> Build very good water channels along the KJE road and outside this road</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Cultural:</strong> To rebuild the worship centres that the project will destroy.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Elderly and Vulnerable Relocation: The elderly requested to be relocated to a much more convenient place near to where they have been, so that the can easily access their work places</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Men</strong> Other facilities: Drainage system; spring wells; insecurity; access roads; government schools’ hospitals and markets; road reserves in favor of the community; jobs in construction; flyovers; public toilets; street lights and cameras</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Women</strong> Government aided infrastructures: Hospitals, schools and access roads; flyovers; street lights for security enhancement, proper drainage systems</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Youth</strong></td>
<td></td>

</tbody>
</table>
| Jobs: Provide us with employment opportunities on the project  
Educational programs: Provide us with mindset changing and empowering programs so that our businesses are helped.  
Recreational centers: Build recreational centers where we can exploit, discover and utilize our talents | **Compensation:** Concerns and frustration over delayed compensation  
**Employment:** Inquiries on how to become a supplier for the project |
| **Namataba Go Down, Main and Freedom City**  
Jobs: The youths and other people who are able to work should be given chance to work on the project other than strangers. If I have materials to supply, how do I become a supplier to the project? It’s hurting to see non-Ugandans doing even casual labour on the roads when we have many unemployed Ugandans (Niyonziima Francis 0700139462/077439863)  
**Compensation:** Concerns over delayed compensation  
**Employment:** Inquiries on how to become a supplier for the project |  
**Public facilities:** Hospitals, clean water and schools |
| **Namboole Farmers**  
**Elderly and vulnerable**  
Waste disposal: Help us with the rubbish people who put the rubbish in our gardens and cows which destroy our crops  
Police post: There are very many thieves who steal our crops and there is no where we can report. We used to report to Namboole management and they said we should be arrested because we are scoters. We therefore need security or a police post here in the valley  
Jobs: We need job opportunities on the project like eating places and any other work we can do  
**Security:** We need street lights on the road |  
**Compensation and valuation:** Concerns over certain crops like maize, sweet potatoes, beans, cassava won’t get compensated |
| *Men*  
Farm land; government secondary schools; capital for local Saccos, jobs for the youths; health centres; vocational training school, public sports academy for the young ones  
*Women*  
Agriculture; parking lots for small selling businesses; small shopping mall; business opportunities on the highway | |
| **Katongole, Tibaleka, mugalu, Kijjwa and Bukasa**  
Priorities are  
**Men**  
Employment for local people especially for the youth  
Health facilities  
Access to market  
**Elderly and vulnerable**  
Support to the education sector  
Health facilities  
Cross/connecting access points  
Markets in Bukasa  
**Women**  
Drainage System  
Health Facilities  
Employment for the Youth  
**Youth**  
Employment Opportunities for the Youth on the Project.  
Health Facilities and Centres  
Payment of the affected in time | |
| **K5, K6, K7 and K8**  
Priorities are  
**Men**  
Employment opportunities as people will lose their sources of income  
**Elderly and vulnerable** | |

6. **ONGOING STAKEHOLDER ENGAGEMENT PROGRAM**

6.1 **Stakeholder Engagement Approach**

Ongoing stakeholder engagement with authorities, Affected Persons, affected communities, and host communities during the Project development process will be critical.

As part of the finalisation of the Concession Agreement, an Operational Stakeholder Engagement Plan is to be developed detailing the ongoing engagement activities for the Project during the Concession Period. This operational plan should be developed by the construction contractor/concessionaire in collaboration with UNRA. The plan should provide a detailed schedule and responsibilities for the ongoing consultation activities, including planned meetings and implementation of information disclosure activities.

Once funding is in place for the acquisition of the concession, a Stakeholder Engagement Plan specific to the livelihood restoration program will also need to be developed (referred to herein as ‘Initiatives SEP’). The Initiatives SEP is further discussed in Section 0. Targeted consultations for vulnerable groups should be specifically considered the planning process.

UNRA’s approach to stakeholder engagement, consultation and disclosure will follow the methods of the IFC’s Stakeholder Engagement Good Practice Handbook (IFC, 2007), including:

- **PLAN AHEAD AND INFORM** - provide the community with balanced and objective information to ensure they understand the nature of the project, any changes, and the likely impacts, benefits and long-term legacy of the project.

- **CONSULT USING BASIC PRINCIPLES OF GOOD PRACTICE** – engage the community by providing mechanisms for two-way information flows between UNRA and the local community.

- **INVOLVE** - work directly with the community throughout the process to ensure community issues and concerns are consistently understood and considered.

- **COLLABORATE** - foster partnerships with the community whereby input is sought during key decision-making processes.

In addition to fulfilling legislative obligations, a transparent, informative and two-sided communication process for stakeholder engagement will bring the following advantages to the Project:

- Local people can bring invaluable knowledge to the decision-making process. By seeking their ideas and inputs, the Project may have better, cost effective mitigation outcomes;

- By ensuring local people and stakeholders are fully informed, the risk of project delays is reduced;

- Good consultation builds productive and enduring relationships between the proponent and local communities;

- Reduce the potential for community disaffection that can result from a lack of understanding of the Project and the permitting process; and

- Unrealistic demands and expectations can be avoided to ensure long-term community relationships.

Stakeholder consultation fatigue and issues arising from sensitive stakeholders such as in the Kasokoso are a key risk to effective engagement and participation. These risks should be managed through:

- Ensuring all engagement activities are integrated to minimise the number of meetings required;

- Engaging with local leadership to help with communicating information and managing grievances;
Improving the level of community support and participation through establishing committees on a local community level;

Facilitating access to important project information and grievance mechanism by setting up Project offices and information centres in affected communities along the road alignment; and

Communication of the grievance mechanism and conflict resolution process as per Section 8.

UNRA will continue ongoing engagements with stakeholders who need to be actively engaged on a regular basis throughout the pre-construction, construction and operations phases as appropriate. As well as meetings, a range of consultation and disclosure tools will be used as outlined in the following sections.

### 6.2 Consultation and Disclosure Tools

In addition to fulfilling legal obligations, UNRA is committed to ensuring stakeholder engagement is carried out in line with recognised international environmental and social standards such as the IFC Sustainability Framework (2012) and AfDB Integrated Safeguards Systems (2013). UNRA will include use of the various tools described below for effective engagement that is rooted in a transparent, participatory process. The tools will aim to enhance interest in the Project and develop productive relationships that lead to better project outcomes. Ongoing consultation will build off existing Government and stakeholder relationships established by UNRA.

Public disclosure will be undertaken in accordance with Section 7 of Ugandan EIA Guidelines for Road Projects (NEMA, 2004), AfDB Integrated Safeguards Systems (Operational Safeguard 1), and IFC Performance Standard 5. Information will be captured in a transparent, reliable and representative way. Key participants for public consultative meetings will include those most affected by the Project, including the disadvantaged and poor, women, responsible agencies for impact management, and the affected private sector.

#### 6.2.1 General Information Disclosure

General project information will be publicly disclosed by UNRA in a regular and consistent manner. Methods for disclosure are briefly described below. An emphasis on accessibility is made, particularly around disclosure of ESIA documents for community review.

##### 6.2.1.1 Notice Boards / Community Liaison Offices

Project notice boards and Community liaison offices will be established in strategic locations throughout the Project area (e.g. in town halls of affected communities). To the extent possible, efforts will be made to make the information understandable with minimal literacy requirements through graphics and other visual aids. Important project information and contact details for community queries and concerns must be displayed in the local languages used by residents, including details of the formal compensation and resettlement framework, livelihood restoration measures, and grievance mechanism.

Staff in the community liaison offices will be trained to be culturally appropriate and gender sensitive.

##### 6.2.1.2 Website

Important Project information will be publicly disclosed through UNRA's website and kept up-to-date. Publications of the ESIA, LRPR, and supporting documentation will also be disclosed on the AfDB website.

##### 6.2.1.3 Toll-free Phone Line

UNRA will provide a toll-free number through which questions, complaints and issues can be addressed.
6.2.1.4 Mass media

Billboards, newspapers, television and radio announcements will be used as necessary to disseminate information about the Project and inform all stakeholders about planned consultation events and when important information becomes available. An example of an UNRA consultation notice is provided in in the ‘Consultation Records’ technical appendix (Volume C).

6.2.1.5 Open Days

Open days will be held by UNRA with stakeholders and the public on a regular basis to directly answer one-on-one questions about the Project. Posters, brochures and other visual aids will be prepared to facilitate effective dissemination of important Project information.

6.2.1.6 Newsletters and emails

Newsletters and emails should be used as a direct and easy method for disseminating important information to internal stakeholders such as staff and contractors. Important information can include progress updates of Project activities, environment and safety alerts, new protocols and procedures to be implemented, and any ongoing corporate social responsibility activities.

6.2.2 Consultation Meetings

A series of formal and informal consultations were undertaken for engaging with key stakeholders for the Project, as detailed in Chapter 5. UNRA plans to continue such consultations with stakeholders as the Project progresses and as outlined below. Records will be kept of all formal and informal meetings that involve commitments, including how stakeholder views may have changed, where agreements have been reached, and action items with dates for completion.

Briefly, the general approach to future consultative meetings will be based on earlier consultation work completed, including the following steps:

1. UNRA will begin the engagement process by identifying the different stakeholders involved as per Section 4;
2. One month before the meeting, UNRA will prepare invitation letters for stakeholders providing details of the planned venue, time and other details of engagement; and
3. UNRA will record all consultative meetings to generate required reports and document details of participants, information discussed, and key outcomes and actions of the meetings.

6.2.2.1 Formal and informal consultations with affected communities

UNRA will collaborate closely with local leadership, government agencies as well as with the Resettlement and Grievance Management Committees to establish an open and transparent dialogue with affected communities. Prior to Phase 1 construction commencing, a series of regular formal and informal consultations with Affected Persons will be undertaken. The objectives of these meetings will be to provide stakeholders with information on the outcomes of the ESIA Update process, update on the Project and potential employment opportunities, and obtain feedback from stakeholders. Consultation meetings and workshops will be conducted so that all segments of the community (including women, ethnic minorities, the youth, elderly and disadvantaged households) are represented fairly and actively engaged through inclusion of appropriate community representatives in consultation meetings and committees.
6.2.2.2 Household surveying and focus group meetings

UNRA will conduct further household surveys and focus group meetings in affected communities to gather information on Project impacts, select suitable options for compensation and livelihood restoration, and evaluate the effectiveness of mitigation and livelihood restoration programs. This will be achieved by use of an appropriate questionnaire and a pre-determined checklist of questions prepared by social specialists. Focus group meetings will ensure people from various backgrounds are represented, including vulnerable groups, youth and women. The main findings will be disclosed in Annual Reports to be prepared by UNRA for interested Project stakeholders (see Section 6.2.4).

6.2.2.3 Annual public meetings

With ongoing cooperation of the Government and local authorities, UNRA will hold annual public meetings in affected Districts which are open to all stakeholders and designed to provide information about the progress of the Project.

These meetings may be conducted in the form of open days, public displays or newsletters, and reports on the Project and on options and designs adopted displayed at public buildings and busy community centres. Announcements on displays should be carried out in both electronic and print media. UNRA’s representatives should attend to receive comments, suggestions and complaints as well as answer queries.

6.2.2.4 Public hearings

The Ugandan ESIA process requires that NEMA invites the public to comment on the Environmental and Social Impact Statement prepared for the Project (Section 6.2.4.1 below). Based on public comments, NEMA may hold a public hearing for participants to present their opinion on the Project and proposed mitigation measures. Notification of public hearing will need to be made at least 10 days prior to the public meeting and publicised through both electronic and print media as appropriate or any other suitable media.

6.2.3 Engagement and Collaboration

Various strategies will be employed to effectively engage and collaborate with stakeholders throughout the life of the Project, including:

Stakeholder engagement training should be provided to Project staff and contractors tasked with engaging directly with affected communities.

Formal Coordination with Government Agencies

UNRA will coordinate and work closely with relevant government agencies for the implementation of social and environmental mitigation activities, formal compensation and Grievance Management Committees, as well as for ongoing monitoring activities. Memorandums of Understanding (MoUs) will be developed between the Construction Contractor/Concessionaire and the relevant government agencies where required.

Participatory Livelihood Restoration and Social Initiatives

As part of the RLRP implementation process, Affected Persons will be actively engaged in their local language for input into the planning and decision-making regarding the implementation of social mitigation measures for resettlement, compensation and livelihood restoration (see also Section 6.3). Suggestions and inputs will be sought through open dialogue and regular engagements with affected communities, and feedback incorporated into the Project design where practical. Where host communities are affected by resettlement decisions,
representatives of these communities will be included in these consultations as per the IFC Handbook for Preparing a Resettlement Action Plan (2002). The participation of Community Based Grievances Management Committees (see Section 7.1.5) in the decision-making process will play an important role between the local community and the Project for negotiating resettlement compensation options and designing strategies for restoration and development of livelihood restoration strategies. UNRA will also collaborate with local governments and city authorities for the planning of community development in vicinity areas where people are resettled.

**Engagement with other stakeholders**

UNRA will consider entering into collaborative partnerships where mutually beneficial. Interested stakeholders such as active NGOs and community organisations operating in the affected areas will be engaged as appropriate. The RLRP Implementation Advisory Committee will include representative members from community organisations and NGOs involved in support of resettlement activities to ensure engagement and potential collaboration.

### 6.2.4 Reporting and Formal Information Disclosure

Formal reports for the GoU and other stakeholders are outlined below. UNRA will consult with relevant officials for the content required.

#### 6.2.4.1 Project Environmental and Social Documentation

In accordance with Ugandan laws, the Updated ESIA and RLRP along with supporting Project documentation will be submitted to the GoU and publicly disclosed by UNRA. After the ESIA and RLRP studies have been completed, UNRA will submit copies of the Environmental and Social Impact Statement (ESIS) to NEMA for review and approval in consultation with other Lead Agencies. All project information will also be made available in strategic locations along the Project alignments for the local community, Affected Persons and other interested stakeholders. It may then be inspected by any person within a reasonable time. UNRA will also publicise the ESIS through various media for public comment.

Methods for disclosure are further described in Section 6.2.1.

#### 6.2.4.2 External Reporting

Project stakeholder engagement activities should be publicly disclosed through regular reports distributed to the Government and interested Project stakeholders. This type of reporting will provide a transparent record of the relationship between the Project and its stakeholders. Project reporting could include:

- General Monthly Progress Reports;
- Environmental and Social Monthly Progress Reports; and
- Annual Sustainability Reports.

The content of these reports will include:

- A summary of outcomes from consultation and disclosure undertaken with the community, government agencies and other stakeholders. Details of how stakeholder concerns/views have been considered in the project design/modification should be discussed;
- Details of any compensation payments or grievances logged, key actions taken to address concerns, as well as ongoing community initiatives and livelihood restoration programs; and
Any significant environment or community issues that have arisen in the reporting period along with the management response to the incident or issue.

Annual Reports will include an analysis of trends against fixed Key Performance Indicators (KPIs) and plans for stakeholder engagement in the next period. This report should be disseminated to interested Project stakeholders through the UNRA website. Records of public consultation sessions will be maintained and made available for public access. Routine and incident / grievance reporting relevant to the SEP will also be documented as per procedures detailed in the Environmental and Social Monitoring and Management Plan (ESMMP). Formal reports and audits related to consultation and disclosure practices should be distributed to the Government as appropriate.

6.2.4.3 Internal Reporting

A review mechanism will be in place to monitor and evaluate stakeholder engagements and their effectiveness. A tracking sheet of the different engagements will be designed to input the different information arising from the engagements. This will involve details such as who is being engaged, who is engaging, when, how and when the next engagements will take place.

Key indicators to evaluate the effectiveness of the engagements may include:

- Number of engagements held per category;
- Number of inputs and feedback received from different stakeholders;
- Number of inputs and feedback considered and integrated into the final ESIA report;
- Number of inputs and feedback informing the Project Footprint design, project implementation and post-project implementation;
- Number of grievances resolved due to facilitated explanations or provision of more comprehensive information;
- Number of stakeholders showing overall support / objection for the Project;
- Number of stakeholders satisfied from resolved grievances;
- Awareness of KJE project information that is accurate and consistent;
- Number of legal, institutional and other commitments met in relation to stakeholder engagement; and
- Status of relationships between UNRA and key stakeholders.

6.3 Future Stakeholder Engagement Activities for RLRP Implementation

6.3.1 Verification and Disclosure Process

For the ESIA, stakeholder engagement meetings, asset valuation and socio-economic baseline surveys have been conducted. Following this, the verification and disclosure stage will commence. This stage will be guided by a plan to be developed by UNRA which will detail the verification, disclosure and grievance management processes. The verification and disclosure strategy will mainly comprise the following steps:

1. Constituting the verification / disclosure team;
2. Verification / disclosure process;
3. Mobilisation and sensitisation;
4. Signing of the agreements;
5. Compensation payment; and

Verification and disclosure centres will be established in central places easily accessed by all Affected Persons, with each centre serving at least two villages. The RLRP Implementation Advisory Committee will also be established to ensure the RLRP process is compliant with Ugandan legislation and international standard requirements.

A briefing exercise is also expected to be conducted by UNRA in close cooperation with relevant authorities at local project level. Affected Persons and other project beneficiaries will be briefed by the project team through:

- Local meetings with Affected Persons and their Leaders to sensitise them about planned activities involved in the verification / disclosure process, including verification requirements, proposed days of the verification / disclosure exercise, and verification requirements prior to payments.
- Higher level Local government consultations, e.g. with KCCA.
- Engagements with other institutions.
- Media i.e. radio announcements, loudspeaker announcements and published material as written notices to be displayed in public places at religious centres, sub county offices, health centres, and LCI/Village Notice Boards.

In addition to general mobilization and sensitisation, vulnerable groups will be identified for assistance with the verification and disclosure process. During the household questionnaires, respondents are asked to indicate if their households have vulnerable people, including if they identify themselves or members of the household as:

- Female headed households;
- Widow;
- Orphans and vulnerable children;
- Elderly/aged
- Physically or mentally disabled;
- People with chronic illness;
- Jobless;
- Person doing hazardous work;
- Illegal squatter or landless;
- Extremely poor;
- Internal displaced people/refugee; or
- From a minority group (e.g. indigenous, religious, etc.).

Support will be provided to the vulnerable groups by the project sociologists and UNRA’s legal team, assisted by their next-of-kin, and the local leaders. As discussed in the RLRP, this may include financial literacy training to ensure they understand their rightful compensation.
6.3.2 Consultations for Livelihood Restoration

As described in the RLRP, seven key livelihood restoration initiatives will be implemented for the Project as follows:

1. KJE Large Business and Industry Transition Initiative
2. KJE Small Business Transition Initiative
3. KJE Agricultural Extension Initiative
4. KJE Community Assistance Initiative
5. KJE Corridor Low Cost Housing and Urban Renewal Initiative
6. KJE Kinawataka Sustainable Wetland Management Initiative
7. KJE Nakivubo Sustainable Wetland Management Initiative

Targeted consultation activities with the key stakeholders related to each of these initiatives will be conducted in the process of the detailed design and implementation of the livelihood restoration activities. It is expected that these consultations will be led by an appropriately experienced organisation employed to coordinate the livelihood restoration process, who will be engaged by UNRA. The consultations should include engagement with key NGOs active in the area such as ACTogether Uganda, Slum Dwellers International and Cities Alliance. Where appropriate, consultations should also be conducted with managers of other Projects that may interact with the KJE Project such as the SGR Project.

Once funding is in place for the acquisition of the concession, a Stakeholder Engagement Plan specific to the livelihood restoration program will need to be developed (‘Initiatives SEP’). The Initiatives SEP should detail the specific consultation activities to be conducted for each of the seven livelihood restoration initiatives, as well as schedules and specific roles and responsibilities for each consultation activity. Working groups for each of the initiatives should be established were required to guide the development of the stakeholder consultation and engagement activities. Vulnerable groups will need to be specifically considered in the planning of stakeholder engagement, and specific consultations held for vulnerable groups where required.
7. **ROLES AND RESPONSIBILITIES**

7.1.1 **UNRA**

UNRA is committed to continuing an open dialogue with its stakeholders as the Project progresses. The Consultant team will lead stakeholder engagement activities for the ESIA Update in which UNRA will actively participate. Following completion of the ESIA Update, UNRA’s Head Department of Environment and Social Safeguards in coordination with the appointed RLRP Implementation Team will have the overarching responsibility for implementing the SEP and ensuring sufficient resources are available for ongoing stakeholder engagement activities.

UNRA will lead the stakeholder engagement activities, disclosure of information, resettlement and compensation process, community support programs, community grievance management, and continued improvements to the SEP (as appropriate). It will also be responsible for engaging with all levels of Government as well as require Contractors to develop and implement appropriate community engagement programs to complement UNRA’s mechanisms. In particular, an external organisation/consultant will be needed to coordinate the consultations for the livelihood restoration initiatives to be implemented for the Project (see Section 0).

For ongoing engagement, UNRA should employ a Project Community Relations Officer or equivalent responsible for managing all project related stakeholder engagement activities on behalf of UNRA. The Community Relations Officer will be supported by a community relations team.

The Community Relations Team should act as a conduit for the local community to gain information about Project activities and air any concerns or grievances following the Grievance Procedure outlined in Chapter 8. The Community Relations Team should ensure that stakeholder engagement involves a cross-section of Project affected people with different ethnicities, ages, gender, etc. to ensure opinions and concerns of all groups are adequately considered.

UNRA will collaborate and communicate with the existing government structures and committees discussed below to manage stakeholder grievances related to the Project throughout the construction, operations and closure phases. The existing ROWMIS system will be used as the primary tool for registering and tracking grievances. In establishing the committees, channels of communication and procedures will be developed between UNRA and the committees to ensure all grievances are adequately captured, resolved and tracked by the UNRA ROWMIS system through to resolution.

7.1.2 **Construction Contractor / Concessionaire**

The main roles and responsibilities of the Construction Contractor / Concessionaire in relation to stakeholder consultation and engagement will include:

- Conduct consultations with key stakeholders regarding the detailed design of the Project and the methods of implementation of the mitigation measures outlined in the ESIA where required;
- Communicate grievances received regarding construction and operations activities to UNRA via the Grievance Mechanism (see Section 8); and
- Participate in key stakeholder engagement activities related to Project construction activities, and the operation of the Project, during the Concession Period.

7.1.3 **Grievance Management Coordinator**

UNRA’s appointed Grievance Management Coordinator should be responsible for:
Coordinating the work of Grievance Management Committees, CBGMCs, Resettlement Committees and CLOs towards the successful resolution of grievances;

- Ensuring grievances are logged and addressed following established grievance procedures;
- Responding to complex grievances and developing adequate solutions for issues that can be resolved;
- Reporting to the aggrieved parties about developments regarding their grievances and decisions taken;
- Monitoring and evaluating progress of ongoing grievances;
- Ensuring Project and Local Government staff engaged in grievance management are adequately trained in the grievance procedures; and
- Reporting on informal disputes and grievances to UNRA and the RLRP implementation unit on a regular basis.

7.1.4 Community Liaison Officers (CLOs)

The Community Liaison Officers (CLOs) will be in charge of addressing simple grievances from receipt of grievance to resolution. The CLO will also be responsible for monitoring and reporting of the resolution process, and disseminating results to the project team and Community Based Grievance Committee.

Day-to-day activities may include receiving, evaluating, resolving simple grievances, and assigning complex grievances. In instances of complex grievances, the CLO will assign grievance resolution to the technical Resettlement Implementation Unit, which will comprise a project sociologist, valuers, compensation accountant and legal team. To ensure all adequate representation and accessibility to the grievance mechanism, two CLOs will be deployed in Makindye.

7.1.5 Grievance Management Committee

To enable a culturally appropriate and accessible grievance mechanism, UNRA will establish locally constituted Grievance Management Committees (GMCs) in all affected communities comprising representatives from key stakeholder groups. The committees will serve to resolve any disputes arising from the resettlement and compensation process. UNRA will develop the team including providing necessary training and equipment.

Grievance Management Committees will sit within established institutional Grievance Management Mechanisms, however will serve as external mediators for Project grievances, including those associated with resettlement and compensation issues. Land committees at local levels (Local Council 1, Parish, District Land Committee) were considered inadequate due to capacity and resource issues.

As an independent mediator, the Grievance Management Committee will be responsible for formally resolving conflicts and disputes in all affected communities along the Project. Appropriate techniques to be used include:

- Provision of more comprehensive information;
- Facilitated explanations, discussions, and negotiations between involved parties to reach a mutual agreement; and
- Arbitration and adjudication on disagreements and conflicts as represented by selected elders, individuals, Local Council Officials and accepted local opinion/cultural leaders.

Through the Local Government Administrative structure, the Grievance Management Committee is planned to consist of representatives from key stakeholder groups; in particular, vulnerable communities to establish a culturally appropriate and accessible grievance and redress mechanism to resolve, in an impartial and timely
manner, any disputes arising from the resettlement process and compensation procedures. Key representatives should include:

- The Sub County Chief or a Representative of the Chief Administrative Officer (CAO);
- Local Council 3 Chairperson;
- Local Council 1 Chairperson of the affected village(s);
- Local Council 1 Secretary for women of the affected village(s);
- Vulnerable group representatives (where applicable);
- Local opinion / cultural leader (where appropriate); and
- Grievance Management Coordinator appointed by UNRA.

### 7.1.6 Community Based Grievances Management Committees (CBGMCs)

The purpose of CBGMCs is to serve as a channel for grievances between affected communities and the Project on a local level by working jointly with the Project’s Resettlement Offices and RLRP Implementation Team, local government and community leaders. The role of the CBGMCs will be to resolve site specific grievances relating to local property ownership and inform on the progress and status of outstanding grievances that are being handled by the Project team. UNRA will work closely with these committees to resolve any resettlement, livelihood restoration and compensation issues from the Project.

The CBGMCs can play a key role in engaging with the local community for negotiating resettlement compensation options, designing strategies for restoration and development of livelihood strategies, and monitoring overall implementation of the RLRP.

Due to high population density in affected communities of the Wakiso, KCCA and Mukono Districts, the CBGMCs will be operational at the village level, comprising of project staff and Affected Persons. The latter will include:

- Four representatives of Affected Persons;
- Woman representative;
- Opinion leader;
- Chairman of the committee, which may be the chairman of the LC1, but not necessarily; and
- Officials including:
  - 1 LC1 chairperson;
  - 1 CSO representative;
  - Municipal or division staff;
  - Representative from the Area Land Committee; and
  - Police.

### 7.1.7 RLRP Implementation Advisory Committee

Due to the length of the expressway and the different types of stakeholders and land uses that will be affected, a community NGO with experience in resettlement will be selected to provide legal aid and guidance on the resettlement and compensation process through establishment and coordination of a RLRP Implementation Advisory Committee. UNRA is in the process of identifying a suitable NGO. This committee will work to ensure the
The process is compliant with Ugandan legislation on land acquisition and expropriation as well as respecting the requirements of AfDB Integrated Safeguard Systems (Operational Safeguard 2) and IFC Performance Standard 5 on Land Acquisition and Involuntary Resettlement.

The guidelines set out in the IFC Handbook for Preparing a Resettlement Action Plan (2002) require the committee to have input from representative members of affected communities (including host communities), community leaders, UNRA and relevant governments, Project sponsors, community organisations and NGOs involved in support of resettlement activities.

Following AfDB Integrated Safeguard Systems guidance to align with Operational Safeguard 2, the establishment of RLRP oversight committees and working groups should consider the below requirement:

**“While an institutional framework can take several different forms, there are certain features that are fundamental to success. Most importantly, it is recommended that two levels of management be established. These levels of management are often referred to as:**

- **Steering Committee**: the higher level, more supervisory, strategic body.
- **Working Group**: the lower level, more hands-on, implementing body.

*This two-tier management system is preferable for governance reasons. The bodies are separate from one another, but also interdependent. This form of governance is conducive to reciprocal monitoring, and accordingly tends to result in quality delivery and mutual attentiveness to operational and other issues and concerns, as and when these arise.”*

Further details of external groups involved in the resettlement and compensation process are provided in the updated **RLRP** for the Project.
8. GRIEVANCE AND CONFLICT RESOLUTION MECHANISM

The Project will consider and address stakeholder concerns, complaints and grievances through a formal Grievance Mechanism to ensure an open and transparent dialogue between the community and UNRA throughout the life of the Project. Community participation is important in resolving disputes and helping the Grievance Management Committees to address such issues. In general, most grievances can be settled with additional explanation efforts and through adequate mediation using customary dispute settlement mechanisms as appropriate or locally assembled mediation committees.

A grievance redress procedure has already been established by UNRA. The process aligns with UNRA’s overarching grievance redress mechanism (see Annex A) and Land and Asset Management Systems, but does not impede access to judicial or administrative remediation. UNRA’s existing grievance submission portal will continue to be used while ROWMIS will be used as the primary tool for registering and tracking grievances. The tool will capture details of the aggrieved person, nature of grievance, actions taken in response and timeframes, responsibilities, and any supporting communications and documentation. The comprehensive nature of the ROWMIS tool should ensure grievances are continually tracked for evaluation and managed appropriately through to resolution.

8.1 Principles

The main principles, steps and resources for an integrated approach to a project-level grievance mechanism that is aligned with international standards is shown in Figure 8-1.

Grievance Procedures must use simple, non-technical language and be in the local language used in the community before dissemination to stakeholders.

While every effort should be made to resolve conflicts through mutual agreement of the parties involved, arbitration and adjudication on disagreements and conflicts by an independent mediator will need to be undertaken where this is not possible. The procedures below should assist complainants in arriving at fair resolutions.

The Project grievance resolution mechanism is in line with the AfDB Integrated Safeguard Systems and follows the principles outlined in the IFC Good Practice Note – Addressing Grievances from Project-Affected Communities (2009):

- **Dissemination of information on the Grievance Procedure** – The procedure should be trialled in Project affected communities, and feedback should be sought on the effectiveness of the proposed mechanisms for resolving grievances and the availability of local resources to engage in this process. The objectives and steps of the procedure should be explained during information dissemination campaigns, consultation planning and local level meetings. The process will need to be updated to reflect community and Government feedback. UNRA has applied a similar mechanism to other road infrastructure projects and through regular monitoring will ensure it continues to be appropriate to the KJE Project. UNRA will ensure the consultation process is transparent, gender sensitive and culturally appropriate.

- **Accessibility** – During community and stakeholder consultation, the main steps in the procedure should be clearly explained with a flow chart posted in each affected community along the Project alignment and in local government offices (where applicable). Project stakeholders should be made aware of the procedure and their rights to lodge grievances free of charge.

- **Receive and Register (Claim Lodgement)** – Multiple channels must be made available for individuals and groups to take their preferred method of lodging grievances.
For the KJE Project, options include:

- Online Grievance Portal (which is linked to the ROWMIS tool), soft copies of the Grievance Form available on request, and toll-free phone line;
- Project offices;
- Project staff, particularly CLOs and Grievance Management Coordinator;
- Grievance Management Committees/CBGMCs;
- Traditional authorities and community leaders; and
- National and local government authorities.

UNRA will ensure help is provided to anyone who may need help in the preparation of their claim.

► **Review and Investigate** – All grievances will be registered on a Grievance Form and entered by the Grievance Management Coordinator or appointed persons into the ROWMIS tool then tracked through to resolution. All grievances must be recorded whether received verbally or in writing, and whether they are once-off or recurrent. Submitted grievances will require discussions with the complainant(s) and potentially a site visit to gain an understanding of the issue.

► **Identify Resolution Options, Respond to Grievance and Close Out** – Once registered and relevant parties have been notified, a written response should be sent to the complainant within 24 hours and a formal response within typically seven business days. The grievance process should seek the collaborative resolution of grievances between UNRA, Government authorities and community. In addressing individual grievances, strategic resolutions that address underlying causes of grievances should be sought. UNRA should aim to resolve all grievances within 30 days.

► **Monitor and Evaluate to Improve Mechanism** – Ongoing reviews and updates of the procedure are important to ensure that current and anticipated grievances are adequately understood and resolved. This may be achieved through UNRA and Government authorities maintaining a log of all recorded grievances; and by undertaking a review of the procedure, including sourcing feedback through community consultation and government meetings on an annual basis.

Applicable guidance materials for grievance redress mechanisms are provided in the AfDB Integrated Safeguard Systems (2013).

UNRA will work closely with the committees to resolve any resettlement, livelihood restoration and compensation issues associated with the Project. The updated **RLRP** provides further guidance on the Grievance Redress Procedure and methods for implementing the Grievance Management Committees/CBGMC and RLRP Implementation Advisory Committee.
8.2 Project Conflict Resolution and Grievance Management

Project grievances and conflicts will be managed primarily through the following structures:

► Grievance Management Committee;

► Community Based Grievances Management Committees (CBGMCs); and

► Community Liaison Officers.

A discussion of their roles and responsibilities in the Project grievance process is provided in Section 7.

It is expected that the grievance process for the Project, including establishment of required committees, will be overseen by the UNRA Project Community Relations Officer. As soon as possible prior to the commencement of the Project, it is recommended that clear internal processes are established to ensure that documentation related to grievances is efficiently distributed between the various offices, staff and committees involved in the grievance management.
process. These internal communication processes should be documented in internal procedures where required, including responsibilities and timelines for each action.

### 8.3 Project Grievance Redress Procedure

The main steps of the grievance redress process are outlined in Figure 8-2 and described below. The conflict resolution and grievance process will include provisions for informal and formal negotiations and mediation. Possible intervention strategies are summarised in Table 8-1.
Figure 8-2: Project grievance process

#### Stage One  
Grievance Registration and Documentation

The aggrieved party will present their complaint or grievance to their Village or Community Leader, UNRA appointed representative (CLO or Grievance Management Coordinator) or Grievance Management Committee/CBGMC. The complaint will be recorded in a Grievance Form and entered into the ROWMIS tool.

Written confirmation of the logged complaint will be provided to the aggrieved party within 24 hours. The Grievance Management Coordinator should be notified to ensure the grievance is managed according to relevant guidelines. UNRA must ensure they are informed of all grievances and complaints in a timely manner. If after 15 days, the aggrieved party does not hear from UNRA or an appointed agent, or is not satisfied with the decision taken at this stage, the complaint may be brought to the Grievance Management Committee/CBGMC.

#### Stage Two  
Grievance Processing

Upon receipt of the grievance, the Grievance Management Committee will assign one of the categories presented in Table 8-2 and address the grievance accordingly. Grievances will be categorised into themes and prioritised in the ROWMIS tool where required.

Source: UNRA, 2017b.

**Stage Three: Resolution**

The Grievance Management Committee has 15 days within which to resolve the complaint to the satisfaction of all concerned. If required, the Grievance Management Committee/CBGMC will meet with the aggrieved party. For resettlement and compensation related grievances, the Grievance Management Committee/CBGMC may consult with the RLRP Implementation Advisory Committee for advice and may meet with the aggrieved party. The Grievance Management Committee/CBGMC must make a written decision and submit copies to the UNRA Community Relations Department, External Monitoring Agency and aggrieved party within 30 days of the grievance submission.

The Project resolution chain is as follows:

- **Order 1:** Description of first solution provided, both parties satisfied, close out by timelines stipulated in Table 8-2 Guidelines for grievance management of Affected Persons.
- **Order 2:** Case is not solved in the prescribed timelines, details of negotiation proceedings recorded, follow-up meetings completed and other stakeholders involved.
- **Order 3:** If case not solved by the involvement at Order 2, case addressed to court or any other form of redress. The timelines and actions should be captured even if this process is external to UNRA.

If the aggrieved party is not satisfied with the decision taken, the complaint will be referred to the Ugandan Law Courts as a last resort.

At this stage, the court will follow its procedures and subsequent appeals may occur at the local or national. However, the purpose of the Grievance Redress Procedure is to encourage grievances to be resolved or settled prior to this stage i.e. Order 1 or 2.

The Grievance Redress Procedure will apply to all grievances and aim to resolve complaints as quickly as possible at the Project or local levels, or provide clear procedures for appeal if that is not possible.

**Stage Four: Grievance Close Out**

The following information will be recorded and logged in ROWMIS:

- **Grievance No.**
- **Copy scanned and uploaded in UNRA system (to be automatically selected upon uploading)**
- **Project name and number**
- **Type of grievance**
- **Complainant provided with copy of the grievance?**
- **Date when grievance is first reported**
Stage Five: Reporting

Summary of the grievances report should be provided weekly, monthly or as determined by the Project. The grievance report will consist of the following main aspects:

- Type and number of grievances received;
- Proportion of grievances resolved;
- Proportion of grievances logged by men, women, children, vulnerable groups;
- Proportion of outstanding grievances; and
- Measures to clear grievance backlog.

The report will assist with developing strategies for addressing reoccurring grievances. This also provides an opportunity to consider lessons learnt and refine the grievance redress mechanism as part of the overall resettlement and livelihood restoration program monitoring and evaluation process and ensure it is working adequately for all stakeholder groups. The lessons learnt will be discussed at relevant meetings of staff and committees involved in the grievance resolution process.

8.3.1 Judicial Intervention

In collaboration with the GoU, UNRA will ensure a mechanism is in place to provide claimants following a judicial resolution process have access to a fair process that is compliant with national requirements and in keeping with international practice. This is important to ensure that any gaps in the judicial systems do not adversely affect the rights of Affected Persons or aggrieved parties, such as those from informal or rural settlements. The RLRP Implementation Advisory Committee will need to ensure that the final resolution process respects international requirements for grievance management.

NEMA (2004). Ugandan EIA Guidelines for Road Projects

ANNEX A: UNRA GRIEVANCE REDRESS MECHANISM AND PROCEDURE
GRIEVANCE REDRESS MECHANISM

Process description and Rationale

During the land acquisition process, a number or grievances are envisaged. These grievances will arise out of a variety of reasons which could be physical/environmental, situational (such as employment), and/or social issues. They could also emerge particularly in regard to disagreement on the compensation values during valuation for assets, property ownership etc.

This section describes the procedure and mechanism through which PAPs and other community members within or outside the road corridor will be able to report, make, place/lodge or express a grievance against the project.

The rationale of grievance management system is to establish contact mechanisms for the PAPs and the entire project area to raise and document complaints related to compensation and resettlement resulting from loss of land and other livelihood properties and assets. This grievance management system will be in place throughout the RAP implementation period.

1.1 Grievance Management Committee

The ADB involuntary resettlement guidelines require that as early as possible the borrower or client works with locally constituted committees made up of representatives from key stakeholder groups and, in particular, vulnerable communities to establish a culturally appropriate and accessible grievance and redress mechanism to resolve, in an impartial and timely manner, any disputes arising from the resettlement process and compensation procedures (ISS D.3 page 30). Following this requirement, efforts are being made to establish Grievances Management Committees (GMCs) not only within the seven selected villages for which this particular RAP is developed, but in all affected communities along the road corridor. The ADB’s ISS are consistent with the UNRA’s LAMS that recommends the setting up of grievance and appeal mechanism. However, the established grievance redress mechanism does not impede access to judicial or administrative remedies.

8.2.1 Community Based Grievances Management Committees (CBGMCs)

Due to high population density in the seven villages and in all affected communities of KCCA divisions, the CBGMC’s will be operational at the village level, comprising of the project staff and the PAPs. The project affected people will include; 4 PAPs representatives, woman representative, opinion leader and chairman of the committee (could or could not be the chairman of the LC1. The ex-officials to the committee include; the LC11 chairperson, 1 CSO representative, municipal or division staff, representative from the Area Land Committee and police. The role of the CBGMC’s will be to resolve site specific grievances relating to local property ownership, as well providing explanations, insights and updates in regard to complex outstanding grievances that are being handled by the project team.

8.2.2 Community Liaison Officers (CLOs)

The Community Liaison Officers (CLOs) will be in charge of receiving, evaluating, resolving simple grievances, or assigning complex grievances to the technical project team, including project sociologist, valuers, compensation accountant, and legal team so that they can investigate and resolve fairly
complex grievance of technical nature. To facilitate access to all segments of the affected communities at a marginal cost, it will be necessary to have two CLOs strategically located in Makindye division. The CLO will also be in charge of monitoring grievance resolution, writing regular grievance M&E reports process, and disseminating of results to the project team and community-based grievance committee.

8.3 Grievance Redress Procedure
The grievance resolution procedure will involve several stages, sometimes involving a back and forth processes. These processes will mainly comprise of:
- Grievances registration and documentation
- Grievances processing
- Provision of feedback
- Grievances sorting
- Reporting
These stages are further expounded below;

8.3.1 Expounding on the different steps in grievance management

8.3.1.1 Grievance registration and documentation
There shall be multiple but at the same time specific avenues by which stakeholders shall submit their grievances and concerns. These will include both avenues described within the UNRA GRM and those established specifically for this project. At the project level, such avenues shall include verbal communications with the secretary of the CBGMC, UNRA representative (community liaison officer), UNRA itself, emails or letters to responsible parties; and/or telephone calls. The CBGMC must make available all these avenues known to the public including their telephone numbers, locations of complaint/suggestion boxes, and other ways for people to submit their grievances. The secretary for the GMC and UNRA’s community liaison officers, will always communicate with all PAPs, collect relevant documents, maintain a consolidated registry of grievances, track and record the resolution status of each complaint being dealt with, and produce reports as needed.

8.3.1.2 Grievances processing
Depending on the nature of grievances, processing may include verification, investigation, negotiation, mediation or arbitration, coordination with appropriate authorities, making decisions and proposing resolutions, and implementation of agreed actions. GMCs will be trained and empowered to be able to determine grievances which they are able to handle at their level and to describe other bodies responsible for the grievances they cannot manage for escalation.

8.3.1.3 Provision of feedback
Feedback will be provided to the aggrieved parties if their grievances are resolved in the required time. If these are not resolved, then they will be informed on the necessary steps taken.

8.3.1.4 Sorting of the Grievances
Upon receipt of a grievance, the secretary of the sub-county GMC will assign the grievance to one of several thematic categories:
- **Category 1**: complaints that are not related to the project or project workers. If the activity that led to the grievance is outside the jurisdiction of this GMM, including UNRA, the sub-county committee secretary will refer the complainant to the relevant authority and record that referral as the final resolution.
- **Category 2**: Queries, comments, and suggestions. This category is for non-contentious submissions that merely require a providing a clarification or a simple response. This may be answered at the point of intake by the committee secretary or Community Liaison officer. In such cases, the committee
secretary will follow up within one week to verify the person who submitted the comment or query is satisfied with the response or other action taken.

**Category 3:** Complaints and concerns that do not involve allegations that require investigation or intervention by the police or other authorities. Grievances in this category will be managed by the GMC. Such grievances would typically involve concerns and complaints about land acquisition or livelihood restoration, environmental damages, nuisance impacts such as noise or dust, minor contamination of soil or water, risks to public safety, non-violent sexual harassment, and similar issues.

**Category 4:** Complaints and concerns that involve allegations that require investigation or intervention by the police or other law enforcement authorities. Such grievances are to be recorded in the logbook and reported immediately to law enforcement officials or other relevant state institution mandated by law to deal with such issues. This would include complaints about such things as sexual abuse (including coercion, rape, or other violence), child abuse or defilement, theft, fraud, or corruption. The committee secretary and the community liaison officer will remain in communication with relevant authorities to ensure the case is receiving timely and appropriate attention and with complainants to ensure their concerns are being addressed.

**Resolution chain**

- Description of first solution provided, If provided? Are both parties satisfied? Date of resolution of the grievance and Close out (Reflect solved). Classify as **Order 1** if timelines in table above are adhered to.
- If case not solved in the prescribed timelines, then escalate the case as **order 2**. Enter details of negotiation proceedings, follow-up meetings done and other stakeholders involved. If case closed (Reflect solved).
- If case not solved by the involvement at order 2 levels and addressed to court or any other form of redress (Classify as **Order 3**). (Dates may or may not be captured because this is external to UNRAREporting)

Summary of the grievances report should be provided during the reporting window as prescribed by the project; weekly, monthly or as determined. The basic content of the grievance report will be the type and numbers of grievances received, proportion of grievances resolved, proportion of outstanding grievances, and measures to clear grievance backlog. This will help to strategize on how to deal with frequently recurring grievances as well as constantly refining the grievance redress mechanism established by this project. This reporting will also involve constant monitoring and evaluation of the established indicators.

B.1.2 Records of Key Discussions with Stakeholders

Introduction

Pursuant to the EIA Regulations, 1998, stakeholders must be consulted as part of the Environment Impact Study with the objective of improving project design and incorporating the views of the stakeholders in all project activities where possible.
During this study, it was found that consultations within the urban centers (especially Kampala City and Mukono Municipality) were difficult as most of the potential respondents were either too busy or had little interest in being interviewed. Otherwise the traditional approach within urban settings may not achieve the desired purpose through community or stakeholders’ meetings as is the case with consultations in rural areas. It is for this reason the team decided to use targeted questionnaires which respondents could fill at their own timing in addition to one to one interviews. Subsequently the use of questionnaires has been an important part of the consultations in addition to key targeted interviews on a one to one basis. A number of respondents completely refused to be consulted (e.g. Wavah of Spear Motors among others). In this case the team apologized to them and requested them that they will be returning during the RAP should their properties’ be among those to be impacted upon by the road development.

The Tables below present the issues and concerns raised by various stakeholders and respondents.

Minutes prepared and issued by URS Infrastructure & Environment UK Limited Parklane Courts Plot 26 Nakasero Road, Kampala, Uganda.

| Ms Khayongo Barbra Clara  
Senior General Health Inspector,  
Tel +256 782 454245 or +256 702 194617 | The team leader introduced the Kampala Jinja Road Dueling subject. He wished to know the main environmental concerns that the lead agency would be interested in highlighting during the ESIA study. In response the team from Occupational Safety and health observed the following: -
They are supportive of the project and would encourage that the measures highlighted under the Occupational health and safety docket are observed. In particular the following to be done:;
• The Contractor should have a Safety and Health Policy Document that will be available to the Commissioner on request;
• The Contractor should have in place a risk assessment and Safety & Health management plan;
• Prior to commencement of work, the Contractor will register with the Department of Occupational health and safety using Registration Form No. OSH FORM. F 11
• The Contractor will notify the Commissioner for Occupational Health And Safety on commencement of the works;
• Statutory plants and Equipment (Fork lifts, heavy drills etc) will be certified by the Commissioner, and the contractor will make a plant Inspection requisition using OSH, Form No. F. 107 .
• There should be a PPE programme in place such that the following should be recorded: -
  o Type of equipment given
  o The date and time it is supplied
  o The person to whom it is given (he/she will sign for it);
  o The next time the PPE will be inspected;
  o When are the replacement times (e.g. for elements, etc);
• During construction, a competent, qualified designated Safety and health officer should be appointed and should be fulltime on the project road during constriction;
• Both the workforce and management should be sensitized about the labour laws and should be well acquainted;
• It is recommended that a premedical examination for the workers most at risk be conducted and this should be followed by a routine medical examination during the works with a final post medical examination. This is good because it protects the contractor in case of disease outbreaks among the risky workforce;
• An accident record shall be kept with the contractor, and if a worker is kept out of work for three days due to the accident, such will be reported to the Commissioner; |

<table>
<thead>
<tr>
<th>Name &amp; designation</th>
<th>Issues Raised, Comments and fears</th>
<th>Responses by consultant to issues raised</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mr. Lwasempijja Umar.</td>
<td>For the good of Ugandans, the road should be widened. I’m saying this on my own behalf and what I’m saying does not represent UTODA’s position on the project. This is a government program and in my view we should support government on such a good project. UTODA will be lose the taxi park but other businesses will also be affected. The number of people owning cars is increasing. Nowadays some families have more than two cars. Some have cars for each family member.</td>
<td></td>
</tr>
<tr>
<td>Mr. Mutangara Dennis</td>
<td>Upgrading the road to a dual carriage way will ultimately be for the benefit of all Ugandans. This park is small and I think UTODA can afford to lose it for development. The contractors are my biggest concern. Why do they narrow sections along roads? There are some sections along the Northern By-pass that are very narrow. There are also narrow points on Masaka Road. The Government’s problem is it’s usually aware of such centers and other developments going on in the road reserve but nothing is done to stop the developers early enough. For instance as we speak, someone is constructing in the road reserve near GAPCO in Wandegeya. There</td>
<td>The centers that are growing along the Masaka road have occupied the Road Reserve. The people demand high compensation which the Government is not in position to pay.</td>
</tr>
</tbody>
</table>
## UTODA COORDINATION OFFICE, NAKAWA PARK

**Date held & place:** Nakawa Park, 17th 08 2011

<table>
<thead>
<tr>
<th>Name &amp; designation</th>
<th>Issues Raised, Comments and fears</th>
<th>Responses by consultant to issues raised</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diana Kamahoro</td>
<td>is no action being taken despite the building being near the road where everyone can tell that it’s within the road reserve. I would like to know if there are any considerations for the disabled on the proposed wide road. All current roads have no consideration for the disabled. As a result such people have endured great difficulty in using the roads. Crossing is the biggest concern that the designs should have in mind. They are in many times left without a choice so the end up paying Boda Boda riders to cross over to the other side of the road. The deaf, lame and the blind are Ugandans and should be able to utilize such infrastructure like all other Ugandans. I suggest that all new roads are designed to accommodate the needs of the disabled in regard to road use. I would propose that the option of expanding the existing road is chosen because opening up a new road is costly. Widening this road will not take as much time as a new road.</td>
<td></td>
</tr>
</tbody>
</table>

- There should be special consideration for other road users especially pedestrians. There are hardly any crossing points on the existing roads. This should be put under serious consideration for all new and planned roads.
- The other concern is that of road infrastructure. Road signs are missing on many roads including new roads. We are aware that they are vandalized by scrap dealers and individuals who want to make quick money by selling scrap. Government should put in place a policy to arrest and charge all those involved in destroying road infrastructure.

| Coin Limited Inland Car Depot, Mr. Kyewalabye John, Accountant. | My bosses are out and I don't have the mandate to speak for Coin Limited. I'm speaking as a concerned Ugandan who travels on the Kampala Jinja highway. Personally, my home is in Mukono but commuting is increasingly becoming difficult for me to and fro. The traffic jam is there at all times even when I leave home as early as 6:00 am. A lot of time is lost in the traffic. At times you may travel at 10:00 pm you will still get caught up in the jam.

The government has ignored options that can reduce the traffic jam along the Kampala-Jinja road. The government should in the meantime work on the old Jinja road through Namilyango to Nambole.

The government can construct a flyover from Kyambogo to UMA show ground as an intervention to the current traffic jam.

In Mukono, houses have been built very close to the main road. Even if you were to compensate people, wrangles will remain and some people may not want to be compensated. |
| Mr. Kigemuzi Ibrahim, Manager.      | If the alternative routes are developed, it will bring development to those new areas which the road will traverse. The four proposed lanes on either side may be inadequate with time because more people are buying cars everyday. We can have two roads, the existing one and a new one, which I feel will accommodate the increasing traffic. |

---

**Purpose of meeting:** Consultative meeting for the proposed upgrade of Kampala Jinja Highway

**Date held & place:** 19th Aug 2011, Mukono District Headquarters

<table>

</thead>
</table>
| Mr. Kunobwa James. Speaker of Mukono District council/ Resident of Mukono | • He said that we have been lagging behind in accessibility to good high way roads and this could be one that can make that possible.  
• Has ever asked the former minister of works Hon. John Nasasira at the commissioning of the Seeta Namilyago road if there would ever be need to expand the lanes along Jinja-Kampala road.  
• He also said that development is good but it should not supersede the interest of the humans as presented by the type of the road necessitating braking of many houses leading to high cost of compensation. |
**MUKNOW DISTRICT.**

**Purpose of meeting:** Consultative meeting for the proposed upgrade of Kampala Jinja Highway

**Date held & place:** 19th Aug 2011, Mukono District Headquarters

<table>
<thead>
<tr>
<th>Name &amp; designation</th>
<th>Summary of Issues Raised</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>UNRA/ road designs</strong> should look at the damage that will be caused to most of the property along the road such as Kireka, Bwyogerere, Coco Cola, Seeta, Mukono, and all the schools and industries along the road.</td>
<td></td>
</tr>
<tr>
<td>He sited example of the city of Venus in Italy that was built in 300AD and its all in water how ever the same buildings are still standing to date.</td>
<td></td>
</tr>
<tr>
<td>He suggested that we should merge the current lanes into one way carriage build another road to the other way carriage. He said the current road can truly be expanded into a three lane without huge compensation how ever that will make it a way road and the other way road should be built separately especially the old Jinja road.</td>
<td></td>
</tr>
<tr>
<td>The need to train more and efficient Highway engineers other than putting Civil engineers to supervise the trained European highway engineers who contract this road works in companies like saline, stirling etc.</td>
<td></td>
</tr>
<tr>
<td>We also face the problem of lack of the local engineers involved in road construction. This has led to the use of less informed/trained people in lead agencies to supervise better trained/informed engineers in the companies building the roads.</td>
<td></td>
</tr>
<tr>
<td>The project is great how ever rejects option one in the same design leading to high costs of compensation. And destruction of property along the road.</td>
<td></td>
</tr>
<tr>
<td>The old Jinja road still exists why we don’t develop it into a modern and better road. The southern bye pass should be abandoned because of its impacts and the likely ripple impacts that it causes secondary development along the new road can endanger Mabira forest and Lake Victoria.</td>
<td></td>
</tr>
<tr>
<td>It’s better to avoid compensation, political wrangles, witch hunts and he believes that all this needs to be transferred to design appropriate technology by use of pillars to raise the road along wetlands in the southern by pass other than to pursue the Jinja-Kampala road. These built columns will allow water, crawling animals and other reptiles to be protected.</td>
<td></td>
</tr>
<tr>
<td>The existing road is okay they should add it up with one or more lanes how ever open up another road to support it so as to achieve the objective of reducing traffic along the road.</td>
<td></td>
</tr>
</tbody>
</table>

**NB:** there is need for all of us to see Uganda in more than 50 to 100 years from now own and this can make us plan and invest better. While thinking and planning the eight lanes we need to also think of junctions that join these lanes as they could take about 4 acres of land to construct a junction.

*The copy of the maps and questionnaire was left behind and will be followed by a soft copy through an email. The maps will be collected from him after one week.*

---

**Mr. Muwumuza Asuman. Minister of Works.**

0772 947560

- My opinion is upgrading of the existing road is best option. The only worry is compensation and what people with structure especially stoyed buildings close to the road do. I feel that expanding the current road to a dual carriage way will put us in the lime light in the region.

- If another option is chosen, the government should still expand Kampala Jinja highway. If its 8 meters the carriage should be expanded to at least 12 meters though more than that will be better.

- The government should compensate people now and acquire the 72 meters today even if they go for another option. In future when the is enough money the road can always be upgraded.

---

**Mr. Alinafee Christopher Mukono municipality Engineer**

The district engineer was not in office however the team was able to find the Municipal engineer. The engineer is also a resident of Mukono district.

- Compensation for option one will be expensive.
- Maintenance costs of huge and large highways may become challenge full leading to traffic jams due to one pothole that can’t be fixed.
- There is need for two roads to Jinja. One of which should the existing road which should be maintained and another from the available options.
### Purpose of meeting: Consultative meeting for the proposed upgrade of Kampala Jinja Highway

<tbody>
<tr>
<td>Lugazi Town Council</td>
<td>The team was able to meet with the town clerk and the Mayor of the town. The hard copies of the questionnaire were left for both people to fill and the team leader was go back and pick up the hard copy by Wednesday. This is because they could not use their internet and proffered to use the hard copy. However the following points where raised by the dual;</td>
</tr>
<tr>
<td></td>
<td>- There was an oversight when designing the Northern bypass to start from the Nambole and there is need for a longer northern bypass so as to reduce on the congestion along Jinja road.</td>
</tr>
<tr>
<td></td>
<td>- There is need to light up all the roads so as to reduce on the rate of accidents that occur on our roads especially at night. Street lighting especially at black spots will go along away to ensure road safety especially at night that can save lives.</td>
</tr>
<tr>
<td></td>
<td>- The benefits of doing a road to its best design that takes care of all the social and environmental aspects should not be tasked to money but to the quality and its benefits of the road to the people.</td>
</tr>
<tr>
<td></td>
<td>- We need to change the road furniture (road signs), we have discovered that all the metal road side are being ripped off and then sold off as scrap. We need to look at the alternative sources of road signs such as wood and hard plastic that can not be recycled. This is an urgent need because some roads do not have any signs and this is also contributing to the many rampant road accident.</td>
</tr>
</tbody>
</table>
DATE: 21ST 08 2011

Name & designation: Summary of Issues and Comments Raised

- The road design should take care of the sensitive ecosystems such as pockets of wetlands and rain forests that the road is to pass through so as to achieve sustainable development.

Njeru Town Council: The team met with the acting town clerk Mrs. Lwanga M. a hard copy was left behind and it is to be picked on Wednesday just as those of the Lugazi town council. This is because ICT has is just not in this part of town so email is not easily accessible.

Nile Breweries: The team was not able to see the MD however the hard copies were left behind at the secretaries to be forwarded to the MD and the team is to go pick them on Wednesday. The team leader is also to follow up with the contact person to get the email of the MD so as to forward the soft copy that would enable him fill the questionnaire with ease.

Date held & place: Buike District Headquarters, 8th-9-11

Name & designation Summary of discussion and Issues, Comment Raised

Mr. Nsubuga Kyewalyanga, Minister for Education I’m wondering why the government is coming up with all those options when there is already an existing road. Response There are several reasons as to why government is looking at three options on this project. We are looking at future developments and evaluating other considerations like the approximate costs associated with each option. In the end the government will go with an option that is cost effective.

Mr. Olara Johnson, District Road Inspector He thanked the team for visiting the district and engaging the technical staff on the proposed road project. The road inspector felt that this will foster cooperation between the district and project developer. He said that the project was an overdue intervention to reduce on traffic jam along the Kampala Jinja Road and reducing the distance to service centers.

He requested that the team avails him project maps for further comments on the project.

Mr. Kigongo Mathias, LC V Chairperson (14th Sept) The district is in the process of securing a grand to expand Kawolo Hospital. I was informed of the road project during a meeting at the hospital and since I had not officially informed about the road project I promised that I would talk about the hospital expansion program if I met the UNRA team. The hospital plan of expansion is towards the existing road which means it will not be possible to acquire the required land on the left side of the road where the hospital is situated if government goes for upgrading the existing road. However the land can be acquired from the right hand side of the road. The road should be expanded on the southern side of the hospital.

There is a shorter option than the ones suggested which from my opinion would even be much cheaper. Government is currently upgrading Kisoga- Naja- Nyenga road which connects to Ntili in Jinja to bitumen standard. There is another section of the road from Kisoga

| Mr. Paul Mafabi                                 | Director, Directorate of Environment Affairs (discussed on phone and draft document sent to him by email) | • There is need to investigate an option which does not pass through Mabira forest.  
• Besides wetlands are all under attack since all developers think they are free land. On the contrary, wetlands are public land which have an important conservation role.  
• The Kalagala Offset SMP should be incorporated in the road project and an equivalent amount of destroyed forest should be replanted;  
• Should consider compensating for the wetland taken so that that money can be used to restore other degraded wetlands;                               |
| **Nature Uganda**                               |                                                        |                                                                                                                                                                                                          |
| Diana Nalwanga                                  | Nature Uganda, Research and Monitoring Coordinator     | • There is need to minimise unnecessary impacts;  
• Since the planned road will pass through the productive part of the Mabira CFR, it is normal for the ecology to be continuously changing because of the production activities;  
• For road kills, let us the Road Reserve remain clear to provide adequate visibility to avifauna and other wildlife so as to avoid knocking speeding motor vehicles; |
| **National Forest Authority (NFA)**             |                                                        |                                                                                                                                                                                                          |
| Paul Buyeera Musamali                           | National Forest Authority, Director Corporate Affairs, NFA | • The NFA Management Plan will need to be reviewed to accommodate the development;  
• There are too many projects within the CFR environs which will need to be accommodated within the designs;  
• There is a fear that the road will take encroachers closer to the forest and this must be carefully considered;  
• Let us have an offset by planting another forest either within the degraded part of Mabira CFR or any other CFR that is degraded;  
• NFA is currently habituating the Monkeys within the CFR and the development may disturb the habituation exercise; so it has to be done further within the forest;  
• There should be no stopping in the CFR since stopping leads to people using the CFR as their toilet leading to spreading of diseases to both wildlife and people; |
| **Department of Biological Sciences, Makerere University** |                                                        |                                                                                                                                                                                                          |
| Eric Sande                                      | Head of Department of Biological Sciences and Expert on | • The Nahans Francolin is a truly forest bird and stays, breeds and roosts within the deepest part of the forest where the trees have large buttresses. It is unlikely to be comfortable within the degraded part of the forest especially where the proposed road will pass; |
### Avifauna, Makerere University

- The bird, which is endangered, is most likely to be within the strict nature reserve and could occasionally come to the production area to forage;
- It is not common for birds to be knocked down by speeding vehicles unless they have perched on the road to eat some dropped food;

### MTN Uganda

**Mr. Kigongo William**  
MTN Towers plot 22 Hanington Road.  
Manager Wireline Access Planning

- Most of the land along the proposed corridor is commercial for the Kampala-Mukono section and mostly residential for the remaining 72 Km to Jinja.
- As far as MTN Uganda is concerned, the effect of both options 1 & 2 to our underground cable infrastructure will be the same given that fact we are located in the 30 m RoW of the existing road.
- It is difficult for us to accurately assess any positive socio-economic impact during road construction except for the jobs that will result from this project. We anticipate better traffic flow along the widened highway.
- Given that our underground fibre cables that are going to be affected by this project carry the bulk of our traffic to the East and act as our gateway to the international submarine network through Kenya, we would want the compensation process to be fast tracked to give us ample time to relocate with minimal interruption.
- This is a very good project and it will go along way in improving traffic flow along the Northern Corridor.

### Airtel, Uganda

**Mr. Lubuulwa Joseph.**  
Airtel House Plot 40 Jinja Road  
Tel: 0752603882  
Environmental & Social Management Specialist Manager

- Both residential and commercial but predominantly land use is farming and emerging small scale industries. In the recent past, commercial activity has increased drastically in areas along the road and this has had the net effect of making the road inadequate for both motorists and pedestrians.
- Our business is mainly the provision of mobile telecommunication services. The impact we are likely to face is at the various base station sites (most commonly referred to as masts) above ground and fiber optic network (below ground) with the latter facing a bigger risk since any form of excavation would mean a possible interruption of the fiber network.
- Option 2 is probably a better proposal because there are more opportunities to have a wider road carriage and the areas there are not as developed as the existing road (option 1) so you are bound to encounter less disturbance during road construction and resettlement of homes.
- Positive impacts envisaged Associated job opportunities and drainage improvement. Less traffic congestion and reduced car exhaust build up during lengthy traffic jams; better distribution of land use and improved road access for both farming and small and medium businesses.
<table>
<thead>
<tr>
<th>Name</th>
<th>Title/Designation</th>
<th>Comments</th>
</tr>
</thead>
</table>
| Mr. Muteesa Edward & Team | SPO UETCL | - The developer can consider improved road design like wider shoulders, more lanes for heavy commercial vehicles, and better storm water drainage especially at sections that cross over or modify existing water bodies/wetlands.  
- The local communities can benefit from less dust pollution and faster delivery of commodities and services arising from better vehicular flow.  
- The project is very critical for the country and the East African region as a whole since it forms a major part of the goods supply route to Kampala and others regions of the country in addition to movement of the population and associated services. Therefore any improvement of this road is very welcome.  

Uganda Electricity Transmission Company Limited, UETCL | | - The land use in this area is a combination of both residential, commercial and subsistence agriculture as you move from Kampala, through Mukono to Jinja. The recent trends are that the formerly rural agricultural land in the area of Mukono, Seeta and Lugazi are being turned into small residential plots by the property agents. In some areas, large farmlands are evident although not many.  
- On option 1--This option presents better traffic flow for the wider Kampala area but the land take is bigger too.(from Kampala to Bweyogerere) as opposed to Kampala to Kyambogo. Considering that both sides of the existing road are heavily settled with commercial buildings and utility infrastructure, this will be a bog challenge in terms of cost offsets.  
- On option 2-- This option presents a limited opportunity for traffic flow from Kampala to Bweyogerere as it is wide from Kampala to Kyambogo. However, in terms of disruption of businesses and cost offsets, this may be a cheaper option.  
- Specifically during Road construction, a lot of impacts are anticipated, some positive while others negative. Broadly though, the negative ones include disruption of the economic activities along the highway(roadside markets, carpenters, sand miners, truckers, super markets, timber dealers, commercial structures etc, while in terms of traffic flow, the disruption will be immense and will ultimately reflect in the speed of delivery of goods and services.  
- During this time(operation and maintenance), although people will have settled elsewhere and some attempting to settle along the new highway, there will be limited business opportunities considering that the high way will have traffic management restrictions like limited Tee –offs and limited stoppages which would otherwise avail marketing opportunities to roadside vendors.  
- There will be limited accessibility to neighbouring residences this being a highway and not a network of access roads. |

</table>
| Mr. Othieno John   | Principal Environmental Officer            | • Roads can co-exist with transmission lines as along as the are parallel and not very close or when the road crosses the line.  
• A major concern is clearance, the height between the ground and the lowest conductor should be 6m.  
• The chosen option should as much as possible avoid wetlands and forests. UNRA should avoid an option that will require ecological offsets.  
• He felt that compensation will be exorbitantly high if the existing road is a preferred option. |
| Mr. Rwenfuna Abel  | Physical Planner                           | • All land uses have a commercial face. Mainly, it is outright commercial land use. Residential land use takes on rental function and therefore becomes commercial. In a nutshell, it is both.  
• The best option is to purchase/acquire all the land need at ago. i.e. all the 72 meters should be purchased at ago so as to avoid future compensation when developments along the reserve have become too expensive.  
• In the event that acquiring all the 72 meters is too expensive, you ignore the option maintain the current carriage way in good condition and go for option 2 or 4 |
| Kampala City Council Authority KCCA |                                             |                                                                                                                                                                                                                                                                           |

<th>Title/Designation</th>
<th>Comments</th>
</tr>
</thead>
</table>
| Mr. Asea JB Ozuma   | Mayor Lugazi Town Council       | • Recent trends in Land use characteristics show that commercial buildings are so close, in that some sections may not allow the 50m width and Lugazi Town Council has a plan to plant trees along the Jinja Kampala highway from Mabira forest (Lwankima) to Namagunga and the round about needs to be maintained for beautification purposes.  
• Either option can be adopted however 50 m width may leave no walk way for pedestrians, Boda Budas, especially in Lugazi town centre.  
• Positive socio-economic impacts: To people, we hope you’ll employ from the very communities where construction is to take place. To traffic, it needs to be put into consideration especially at night as the flow is usually high and some sectors shall need lighting. Compensation, most especially for commercial buildings which are adjacent to the road in Lugazi Town.  
• During operation and maintenance environmental change especially planting of trees and flowers in the town centres and drainage channels should be taken care of.  
• The project may utilise the parking space at the council premises at a reasonable and considerable fee for council to also benefit.  
• A good number of unemployed youth in the area who can be mobilised by the council for works.  
• UNRA should ensure the new roads have good drainage channels which can be covered and cleaned.  
• Use plastic road furniture since metallic ones are vandalised for scrap.  
• Plant trees along the road from Lwankima to Namagunga.  
• As Corporate Social Responsibility tarmac some road network in Lugazi town.  
• Preserve memorial site of accident of the late sports journalists and a mass grave opposite Kawolo hospital.  
• The project is very good and timely.                                                                                                                                                                                                                       |
| Njeru Town Council  |                                 |                                                                                                                                                                                                                                                                                                                                                                                                  |
| Mr. Tontika Robert  | Senior Town Engineer            | • The land usage in this area is multiple i.e. institutional, industrial, residential and commercial. The trend has been industrial, institutional and commercial in form of residential renting.  
• Health and safety will be key issues during operation and maintenance.                                                                                                                                                                                                                                               |
<p>| Mukono Town Council |                                 |                                                                                                                                                                                                                                                                                                                                                                                                  |
| Mr. James Kunobwa   | Speaker                         | Although preliminary discussions were held, the respondents declined to return forms                                                                                                                                                                                                                                                                                                              |
| National Water &amp; Sewerage Corporation |                  | Did not return Questionnaire                                                                                                                                                                                                                                                                                                           |</p>

B.1.4 Key Informant Questionnaire

KEY INFORMANT CHECKLIST
Environmental and Social Impact Assessment Study

Project Brief and introduction

The Government of Uganda has allocated funds to finance the feasibility study and detailed engineering design of Kampala – Jinja Road; a 72 km paved road situated in the central part of Uganda. It is a main entrance and exit to the Eastern Region through Owen Falls Dam. This is a Class 1 paved road with an Asphalt concrete surface. The road alignment with respect to vertical to vertical and horizontal is generally within the acceptable standards, although there are some deficiencies with respect to sign distances and curves.

The road is part of the National Road Authority Network that stretches to a total length of about 75 km from the center of Kampala to the Owen Falls Dam at Njeru. The first 3km, from city center to the Uganda Manufacturer’s Association (UMA) main entrance is under the responsibility to Kampala Capital City Authority. The 72 km stretch from UMA main entrance to Owen Falls Dam at Njeru is under central Government/UNRA Kampala Station.

As part of the Environmental and Social Impact Assessment, there are two alternative options to the upgrade that needs your input.

For option 1 (Existing Road), includes a scenario of 4 lanes in each direction (each lane is 3.7m wide) from Kampala to Bweyogerere, 3 lanes in each direction from Bweyogerere to Mukono and 2 lanes in each direction from Mukono to Jinja. In terms of the required right of way, from K’la to Bweyogerere we are looking at approx 72m and approx 60m from Bweyogerere to Mukono. The remaining section from Mukono to Jinja, we would be looking at a right of way width of about 50m.

For Options 2 (Northern variant) and 4 (southern variant) includes 4 lanes in each direction up to Kyambogo, 3 lanes in each direction from Kyambogo to Mukono and 2 lanes in each direction from Mukono to Jinja. In terms of right of way widths, we have approx 72m from start to Kyambogo, approx 60m from Kyambogo to Mukono and about 50m from Mukono to Jinja.

The existing road carriage way width is currently about 7m, with 1.5m wide surfaced shoulders, making a total surfaced road width of about 10m. The total right of way of the existing road is about 30m.

1. In your view, how would you describe the land use characteristics in this area? Is more residential, commercial or both? Comment on the recent trends.

2. Looking at the different options, a number of impacts are anticipated including resettlement of homes due to land acquisition, increased access to road infrastructure, disturbance during road construction amongst may others, In your view, what opportunities or challenges do each of the alternatives present to your business or home? Please give your view on the best option to be adopted.

Option 1:
3. What positive socio-economic impacts (i.e. to people, land, traffic, population change, work patterns, health and safety) do you anticipate during the road construction?

4. What positive socio-economic impacts (i.e. to people, land, traffic, population change, work patterns, health and safety) do you anticipate during the operation and maintenance?

5. Describe any opportunities that the project could take advantage of including getting accessibility to your premises given that it is a highway?

6. Make site specific suggestions on what you feel UNRA the developer should incorporate during implementation of the project for the betterment of the surrounding community and environment. (these can range from the different social, economic, that you feel would help protect the environment and also the community)

7. What is your general opinion on the proposed Project?
8. Is there any other project related or not related to this project that is ongoing in the area? If it is there please indicate its nature.

### B.2 Records of Stakeholder Consultations for KSB ESIA (URS, 2013)

#### A.2.1 Minutes of Stakeholders Meetings

<table>
<thead>
<tr>
<th>Name and Designation</th>
<th>Date and Place</th>
<th>Issues Discussed</th>
</tr>
</thead>
</table>
| Mr. Batilinya John B, Gender and Community Development Officer | Date 11/03/2013, Nakawa Division HQ | It is better to meet the councillors at workshops or group meetings. Otherwise it will be dangerous to directly go to the communities without first sensitizing their leaders. The Mayor can organize the meeting for the LC officials while the Town Clerk will mobilize the technical personnel. There will be need to facilitate these meetings. The meetings should include:  
- Deputy Resident City Commissioner (Ms Faridah Kimbuly);  
- The Mayor and His Team;  
- Town Clerk and His technical team  
Kasokoko is a bit volatile, and it will be necessary to get to the LC2 Chair of the area Hajji Mweba on 0772432769 |
| Sebaliduka Anthony, Kira Town Clerk, 0752649243 | Date 14/03/2013, Nakawa Division HQ | From the map and the proposed alignment, it seems the road will not pass through Kira town Council. Otherwise I welcome this development as it positive impacts are likely to benefit our Division. |
| Miharwe M, Mayor Kira Town Council, 0772501116 | Date 14/03/2013, Nakawa Division HQ | From the proposed alignment, the road may not pass through the Division. |
| Tushabe Betty, D/Mayor – Nakwero, 0776377704; Morero Nabirya, KCCA, Nakwero Secretary, 0701273003; Iriime Namagwa, Roads Technician, 0782027380 | Date 14/03/2013, Makindye Division HQ | It is better to meet the LCs and Chiefs first and put the local leaders in the picture. It will necessary to provide Transport refund to the leaders who will attend the meeting. The meetings should include the following:  
- Team; The LC1 Chairpersons;  
- LC2 Chairpersons; and  
- The PDCs.  
The meeting can take place in the main hall or any other that may be identified. The technical side should be represented by the following:  
- Planners;  
- Buildings Inspector;  
- Roads Supervisor;  
- Road Technician;  
- Enforcement Section  
The following parishes are relevant;  
- Mutungo A  
- Kyindale  
- (Buziga)  
- Kireka/Banda?  
- Bugolobi |
| Tibbishaka T, Lee, Town Clerk, 0794860336 | Date 14/03/2013, Makindye Division HQ | There is need to learn from the Northern bypass experience which has shown that a dual carriageway is the minimum requirement. On the Northern bypass, trailers can not overtake and often the road is more... |
**Nabakka Annet, Planner, Physical**
**Paul Rukore, Building Inspector, 079466905**
**Nyendo Hassan, Supervisor Roads, 0776726783**
**Kalondye Bintie, Health Inspector 0762256031**
**Dorothy Nakwala, Health Inspector, 0772009934**

We need to sensitize those people where the road will pass. It is not necessary to call the whole Division. The tunneling will be difficult since most of the Bukasa ridge is rock. That would be costly. It is easier to go around Bukasa along the edges of the wetland. The following parishes should be invited to the meetings:

- Bukasa (Muyenga Zone);
- Gaba parish;
- Lukuli Parish;
- Karama parish;
- Luwaffu parish (Sakama zone);
- Luwaffu parish (Luwaffu Zone)

Other issues to not be addressed are that most of the road project passes through Makindye division although further south it moves along the Bukasa boundary to the South Western tip of Makindye. This is along Kawaga swamp which swamp is very deep.

---

**Date and Place**
Date 15/03/2015, Makindye Division HQ

**Name and Designation**
Nabakka Annet, Planner, Physical
Paul Rukore, Building Inspector, 0776726783
Nyendo Hassan, Supervisor Roads, 0776726783
Kalondye Bintie, Health Inspector 0762256031
Dorothy Nakwala, Health Inspector, 0772009934

The meeting Place can be here at Makindye in the Boardroom. The following should be invited to the meeting:
1. The Mayor;
2. Area Councillors (4);
3. Chairpersons LC1 for the affected areas only (7);
4. Deputy RCC for Makindye;
5. Town Clerk;
6. District Internal Security Officer;
7. Ward Administrators (2);
8. Physical Planner;
9. Building Engineer;
10. Community Development Officers

There should be a transport refund of Shs 30,000/= and if going beyond lunch, there should be a lunch allowance of about 20,000/=.

On wetlands you should provide mitigation measures starting with sensitization; They preferred a tunnel other than going along the wetland. This will save the wetland and also lead to Transfer technology in construction of tunnels.

On dumping of soil, they said that the people who operate these large lippers always know where the dumping areas are. One needs to consult with them.

On tendering they wished that different components are tendered to different people so that the project can move on time with the best inputs from key players.

<tr>
<td>Godfrey Kasaka, Town Clerk</td>
<td>The town clerk is ready to participate in the meeting. He points out that LC1s are the most needed people for this project to ensure that they own it at grassroots level. At the next visit he would want to have the map in his office so that he can use it to sensitize. The following should attend the meetings and the best venue is in their community hall: 1. The Mayor; 2. Area Councilors (6); 3. Chairpersons LC1 for the affected areas only (7); 4. Deputy RCC for Nakawa; 5. Town Clerk; 6. District Internal Security Officer; 7. Ward Administrators Ms Charity Rajekoo (1); 8. Physical Planner; 9. Building Engineer; 10. Community Development Officers; 11. DPC, Jinja Road. It may be necessary to hire additional chairs since the Division hall does not have enough. Also provide facilitation in terms of transport refund and refreshments (tea or soda + some snacks). It seems the road will pass through the Malindye Subaagabo Sub County so we need to get in touch with the chief (SAS) there who is Abdu Mwasaambo, 0772405418</td>

<td>Paul Bayera M. Director (NFA), 0772415656</td>
<td>I do not support the tunnel alternative in case of explosions or a severe earth quake. All the same there is need to harmonize the activities that have been planned which include the new Bukasa Port, a proposed rail line and the planned 132 KV line in the area. It is better if the KCCA have a grand transport master plan which harmonizes all these activities. Regarding the soil, it will be needed by some users depending on the grade of the soil. Government should buy a plot where this soil can be stored and then it will be used later. For instance if it turns out to be good marl soil it will be used on the road and the rest can be used to make Adobe bricks (mixed with lime). If it is good clay then it can be sold to Kajara (Uganda Clay) and to offset makers of clay products.</td>

<tr>
<td>Paul Isabirye, Assistant Commissioner JCCU</td>
<td>The environment around the lake is already threatened by human activities. We need to understand the role of the ecosystem in maintaining the health of the lake. The role of wetlands in climate change is to provide a sink for the methane. Presently methane has increased due to industrial activities. However the development is important and it should be allowed to go on. We need to minimize the impacts by for example building the road on pillars (Viaducts) across wetlands.</td>
</tr>
</tbody>
</table>

**KAMPALA SOUTHERN BYPASS:**

**SENSITIZATION MEETING FOR POLITICAL AND TECHNICAL LEADERS IN NAKAWA DIVISION HELD ON 16TH APRIL 2013 IN THE NAKAWA DIVISION COMMUNITY HALL**

<table>
<thead>
<tr>
<th>Issue Raised</th>
<th>Responses</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Ndawula Godfrey, Chairman Zone 12:</strong></td>
<td>1. When Government acquires land in public interest, project affected persons are compensated at the market rate and given an additional disturbance allowance to cater for the value that individuals have to their property of which some is sentimental.</td>
</tr>
<tr>
<td>1. You have talked about buying plots and building for people houses, if that is the case, will bigger plots and houses be given?</td>
<td>2. A resettlement action plan will be prepared after the ESIA, and at that point more sensitization will be done on the compensation rates; however, what you need to know is that crops are categorized into two annual and perennial crops. In the event that it is the World Bank funding the project, they would normally require that all crops are compensated; however, if it is the Government of Uganda funding the project, then annual crops will only be required to be harvested. In any case during the resettlement action plan exercise, then it will be required to know whether crops grown are for business or food, and all these aspects factored into the valuation methodology.</td>
</tr>
<tr>
<td>2. In the case of food crops, what happens to the community members that have dried off the crops for so many years? It might be difficult to convince them, some have sent their children to the university using the same money they have been earning from those crops grown.</td>
<td>3. UNRA is in the process of demarcation of the corridor; however, main aim of this meeting is to sensitize the local leaders so that when we come to your area, we can move together and get to know where the route passes within your different areas of jurisdiction.</td>
</tr>
<tr>
<td>3. We as the local leaders need to go through the route so that we know the demarcation</td>
<td></td>
</tr>
</tbody>
</table>

<p>| Paul Magimbi, Chairman LC1 Bugolobi:                                           | 1. Yes, the Southern Bypass was planned many years ago, however, the challenge is that ever since it was planned and designed, the area for which it was designed has become a heavily built up area, requiring redesigning amidst the actual situation. |
| 1. As a professional town planner, am aware that this project was project 41 years ago, what form assurance do we have that this project will not be blocked by unscrupulous persons as have been the case for the Northern Bypass? | 2. On delays on projects and hence the actions of unscrupulous persons, Uganda is taking on the concept of PPPs just as in the case of Ethiopia where the private sector is involved in road construction. The assumption that this will make infrastructural development more efficient, this is the same with the Kampala Jinja highway; this project is not going to use public funds. |
| 2. What happens when people are compensated and they reoccupy land or encroach on forest reserves as is the case with Bukasa, there is need to work very fast. | 3. In any case for the Northern bypass, the project was phased, and the second phase will begin soon for those who were paid and did not leave. It is required that they leave to the corridor for the second phase to begin. |</p>
<table>
<thead>
<tr>
<th>Kasja Nkonkwa, Counsellor Bugolobi</th>
<th>1. We have had of this project for a long time, since 2004, when should we expect this one to start?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. When you come to Bugolobi, many people are growing crops like yams and sugarcane within the project area, in the case that some do not have titles, what will happen to such people given that you deal with people with titles?</td>
</tr>
<tr>
<td></td>
<td>3. On employment, I was happy that your team will recommend that contractors give our people jobs, we have observed that some contractors come with their own workers. However, I would like to see how this will be executed.</td>
</tr>
<tr>
<td></td>
<td>4. On rough estimates, it is not advisable to give a potentially affected person a rough estimate, what if the rough estimate is higher than the actual compensation package?</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Alfa Mwangi, Counsellor Nakawa</th>
<th>1. What will be the mode of compensation for buildings, gardens and crops?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. When Government acquires land in public interest, project affected persons are compensated at the market rate and given an additional disturbance allowance to cater for the value that individuals have to their property of which some is sentimental.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Chairman, Kinawataka</th>
<th>1. Will you compensate people found in the road reserve?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. What about ancestral tombs, how will these be valued?</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Nalito Richard, Building Inspector, KCCA</th>
<th>1. What will be the width of the new road, is it the same width as the Northern bypass?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. What about access, is it open?</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Nicholas, Mbuya Parish</th>
<th>1. What about those persons not directly affected by the land acquisition but are affected by dust, noise and vibrations, how will these be compensation?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. This project should not be like the northern pass, it should be more comprehensive so that the tax payer's money does not go to waste.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Councillor, Mutingo Parish</th>
<th>1. In the initial phase, politicians are involved, but later, we are phased out</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. The road is still in the design phase, we expect in the next 3 - 4 years that it would have comments. By May, we expect that the feasibility study document will be drafted, and by the end of December, the document will have been submitted to the World Bank. A transaction advisor has been brought on board to manage the procurement process of the concessionaire including the contractor, bankers and insurers in the road construction process.</td>
</tr>
<tr>
<td></td>
<td>2. There are different types of project affected persons, including landowners and licensees; the latter refer to people who utilize and without land titles. It is common in the rural areas where a father allows his son to use without actually owning it. Therefore, during the RAP exercise the eligibility of different PAPS will be determined and valued accordingly.</td>
</tr>
<tr>
<td></td>
<td>3. It is Government policy that local skills be maximized and that contractors avoid procuring foreign skills that can be sourced locally. However, our project document will emphasize the need to employ locals.</td>
</tr>
<tr>
<td></td>
<td>4. The rough estimate will be used by the study team for decision making purposes specifically when it comes to selection of the best route. The RAP will have the actual estimates that can be reviewed after three years.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Nicholas, Mbuya Parish</th>
<th>1. The reason that we are undertaking the ESIA, is to see these issues can be addressed, we normally have the aspect of capturing those who are inappropriately affected, and they will be compensated accordingly.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. As the project evolves, so does the role of the politicians, at the beginning, your participation is related to information dissemination, but as the project evolves, then you are required to participate in supervision</td>
</tr>
<tr>
<td>Issue Raised</td>
<td>Responses</td>
</tr>
<tr>
<td>--------------</td>
<td>-----------</td>
</tr>
<tr>
<td>1. We had some people from Geomaps working our village without informing the leadership, are you the people that sent them?</td>
<td>1. Yes, those consultants came from URS (United Research Services) but they were working on the Kampala-Jinja Highway, both roads are already gazetted.</td>
</tr>
<tr>
<td>2. Our team will recommend that road committees be formed and made functional so that local leaders can participate during supervision</td>
<td></td>
</tr>

**KAMPALA SOUTHERN BYPASS:**

**SENSITIZATION MEETING FOR POLITICAL AND TECHNICAL LEADERS IN MAKINDYE DIVISION HELD ON 22ND APRIL 2013 IN THE MAKINDYE DIVISIONAL CONFERENCE ROOM**

<table>
<thead>
<tr>
<th>Issue Raised</th>
<th>Responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dr. Kagoda Area Councillor Lukaiti:</td>
<td></td>
</tr>
<tr>
<td>4. How long is the Southern Bypass? What would be the cost per km? What is the quality of the road?</td>
<td>4. The road is to be constructed under a PPP arrangement and it will be a toll road for a period of 15-20 years. It is 18km long if it traverses above ground or 16km if tunneling is selected as an option. The road is designed based on international standard with 4 lanes with each lane being 3m wide. On cost, this being the feasibility stage, the team is still evaluating the different options using cost estimates; this stage will be completed in a year.</td>
</tr>
<tr>
<td>5. Is it possible to change the alignment for example the proposing a stretch between Mukyensa and Munyonyo and what would be the cost implication vis-à-vis going round the wetland?</td>
<td>5. At this stage it is not easy to change the alignment, the process of gazetting the corridor is almost completed, and we have to obtain renewals every year if required.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Issue Raised</th>
<th>Responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hannington Kasaga, Labor Officer Makindye Division:</td>
<td></td>
</tr>
<tr>
<td>3. Are the people constructing the southern bypass the same as those constructing the Kampala Entebbe expressway?</td>
<td>4. No those are different contractors; this particular bypass is not yet at that phase.</td>
</tr>
<tr>
<td>4. Workers’ Safety: We have already had issues with the people on the Entebbe expressway where workers do not have the required PPE; since the Southern bypass construction has not yet begun, we would require that workers be equipped with all the necessary PPE</td>
<td>5. It is noted and will be integrated in the report as a recommendation</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Issue Raised</th>
<th>Responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>David Nserek, Bukasa:</td>
<td></td>
</tr>
<tr>
<td>5. I heard about this road a long time ago and I would request that you show us the demarcation and where it is passing through the wetland. It would be advisable to avoid that because the contractor spends a lot of time and money on one section just as was the case with the northern bypass.</td>
<td>5. It is true that this road was previously planned, however, over time, most areas where it was supposed to traverse have become heavily settled, the option of the wetland is based on the need to minimize compensation costs; however, there is there is also the option of tunneling.</td>
</tr>
<tr>
<td>6. There is a lot of wildlife on Mukyenga tank</td>
<td>6. There are different options for road construction that the design team is evaluating for example using of duct vis-a-vis backfilling of the wetland; it is hoped that this will maintain a healthy ecosystem.</td>
</tr>
</tbody>
</table>
**7.** This particular project does not affect the sewage plant, as already mentioned the corridor is almost gazetted and that facility is not affected

**Nasuna Juliet:**

2. I would like a clear map of those people affected so that we alert our people

2. At the moment, the map that we have is for the different options, when the best option is selected, then we shall return and sensitize the people to be affected on the land acquisition process.

**Mr. Ssebagala:**

3. We got a problem with the Kansanga-Ggaba Road that was funded by the Japanese where we have a very small road because Government had no money to compensate for the properties; this meant that the road which was designed for four lanes was reduced to two. My proposal is that there is proper planning and money for compensation is availed even for the structures that may be regarded as expensive at the moment so that we have a good road.

2. Noted

**Councillor Tuhandeke:**

3. Can we have a look at the map and can the alignment be changed?

4. As stakeholders, it is important that we be involved in the monitoring of the project and therefore would request that we be availed the GOOs so that we are able to monitor the contractor

2. As mentioned earlier, the alignment will not be changed; we have options that we are evaluating during this phase.

3. That is noted, we are also going to recommend that road user committees be constituted and facilitated to perform their role effectively during the road construction phase.

**Muganda Samson:**

3. In the case of Muyenga hill where there are the tanks and quarry, we would request that you avoid these two resources

2. Yes, the route selection process has already been explained and these two will not be affected

**Pidos Wavamuno, Councillor Ggaba Parish:**

2. We need more information prior to the meeting, had we been informed on time, our planner would have attended this meeting

3. The deputy mayor noted the concern

**Eng. Jonathan Kalunge:**

2. What stage are we on for the Southern bypass? Are we considering flyovers?

2. Yes, there will be flyovers including the following:
   - On Port bell road
   - Ggaba Road
   - Lukuli Road
   - Sakama Road
   - And Kampala-Erutea expressway spur

**Margaret Ggaba B:**

1. We have pipes passing through that area especially on Kansanga - Ggaba road what

1. We have to consult with NWSC, MTN and other utilities to ensure that they are not affected and besides the

2. Noted

ITEM  DESCRIPTION  ACTION

1  The meeting commenced at 2.00pm Information

1.1  The meeting was held at the request of URS as a follow-up to the earlier meeting of 07th February to coordinate and collect information related to Kampala Southern Bypass from KCCA. As an aid to the meeting URS prepared the agenda attached at the end of this record. Information

2  DISCUSSION

2.1  Once assembled the meeting commenced with URS outlining the agenda (see attached) and requesting that the discussion follow the listed agenda. KCCA

2.2  Regarding standards for the all purpose road network and local roads – KCCA confirmed that some were available and copies would be provided. Currently only Fort Portal Road was scheduled for upgrade but KCCA would review the situation regarding other roads and advise. Information

2.3  URS had already contacted Google (contacts for whom had earlier been provided by KCCA) and was now also in contact with other utility providers and authorities (i.e. NITA, Airtel, AMT, World, Orange etc) Information

2.4  URS also informed KCCA that they had signed the NDA with some Telecom companies. With respect to the ESIA, URS drew attention to drainage plan requirements. KCCA advised that this was mostly included in the Drainage Master Plan and offered a copy. URS already had a copy on file and would circulate as required. URS

2.5  URS stated it information on footpath and cycleway width and other non-motorized traffic provisions other than that in the KCCA Structure Plan (2012) was available. KCCA was developing standards for non-motorized traffic provisions (pedestrians and cycle ways) and would share ideas with URS. KCCA
URS drew particular attention to any requirements for such provisions at swamp crossings in KSB. KCCA would review and advise.

KCCA informed the meeting that they were currently in the process of developing an active travel master plan that included non-motorised modes such as walking and cycling.

URS suggested that KCCA should have input into the assessment and provision for non-motorised access along the KSB.

Regarding long term traffic forecasts KCCA agreed to provide a copy of the complete transportation model. URS queried if the model was for the whole city or only CBD. KCCA confirmed the model was for the whole city.

URS already had a copy of the model through their traffic engineer but requested a copy of the model reporting for outputs. KCCA would provide and URS would collate from KCCA the following day.

URS would insert KCCA data into their model as that had already been agreed.

URS noted that the BRT pilot scheme was on the Kampala - Jinja Road and requested if the future BRT proposals would impact KSB. KCCA advised that the BRT would be developed depending on the results of the pilot scheme.

When requested for details of the likely routes and phasing of these, KCCA referred to the concept paper in Report No 1. URS requested a copy which KCCA would provide.

URS also informed KCCA that they were currently having talks involving UNRA and the BRT consultants.

URS requested a joint review of the KSB route proposals with respect to links in the local road network which were being severed by the bypass and the possible need to provide passage under the bypass. It was agreed that KCCA and URS would jointly review the KSB alignment options on plan first and provisionally fixed Tuesday 12th March at 9am in URS office for this. Any links identified could then be inspected at site before a decision was made regarding the need for any underpasses in a lid to mitigate the severance.

URS was advised to consult the Road Access Act during the joint exercise which sought to determine which Road links were to be cut off.

Regarding galiated roads in Kampala, KCCA advised that they were in the process of updating their list of roads and defining the road network hierarchy i.e. re-classification of the existing network. KCCA would however provide a copy of the current list of roads.

KCCA would also provide lists of contact details within local administrative divisions and identified the latter as Nakawa and Malindye.

KCCA noted that the alignments also entered Wakiso which was a different jurisdiction and should also be contacted.

URS noted that a copy of the 2010 satellite imagery would be of benefit. KCCA agreed that they would provide a copy.

URS requested consultations with KCCA to share information for the ESIA studies which were just commencing. Among other information requested was a copy of the latest State of the Environment for Kampala report and the Kampala Physical Development Plan.

KCCA would make arrangements with their environmental specialist (Dr. Semusumba) and advise URS of the contact.

URS referred in particular to the extent of additional runoff which could be expected from development currently taking place and pointed out that much information was available in the Drainage Master Plan.

KCCA referred to the updated Kampala Structure Plan (2012) which already received a copy of this from KCCA Director of Planning.

URS advised KCCA that the galiating of land for the project and request for information of other planning requirements if any were still on-going in Kampala City. URS thought that KSB would be considered a National Road under the auspices of UNRA and KCCA considered that in this case Ministerial approval would be sought which superseded Planning Committee requirements.
2.14 As follow-up to the gazetting process UNRA would send teams from their Public Relations Department to site to inform local communities of the legal position regarding the project and land frozen for it.

KCCA asked to be advised when this would take place as their own Public Relations teams could cooperate and coordinate with them; the situation being very sensitive.

2.15 URS requested copies of any other reports or record held by KCCA which could be of assistance during the design process for KSB.

KCCA knew of no other documents held by them which could assist but referred URS to the Ministry of Works regarding reports on the development of Saille Area Port. KCCA would advise URS of the content later. It was noted that upgrading of Port Bell was also under design and that it may also be possible to obtain reports on that from Uganda Railway Company.

2.16 Regarding URS' request for any information on the possibly mostly informal settlements developing in the swamp flats, KCCA would look for such data if further information was available.

KCCA commented that under Ugandan Law compensation in such cases was limited and URS noted that their Social Impact Assessment would consider World Bank guidelines and safeguards, which could be found on the internet, as most funding agencies would require this before considering any application for funds.

The meeting ended at 3:07pm
## B.2.2 Sample Questionnaire

### SOCIAL IMPACT ASSESSMENT QUESTIONNAIRE FOR EA STUDY FOR THE PROPOSED KAMPALA SOUTHERN BYPASS (KSB)

Consultant: URS Infrastructure & Environment UK Limited ("URS") in association with Rwenzro-Green Associates Ltd - Uganda

ANNEX C: RECORDS OF PREVIOUS RAP CONSULTATIONS FOR THE PROJECT
ANNEX C

C. RECORDS OF PREVIOUS RAP CONSULTATIONS FOR THE PROJECT

C.2 Records of Stakeholder Consultations for KJE RAP (ICS, September 2015)

C.1.1 Sequence of the consultation process

1. Self-introduction from Rwenzo – Green Associates on behalf of Scot Wilson / Professional Engineering Services for UNRA

2. Reasons why the social team is there (consulting on the proposed road KLA – JJA) to obtain a preferred alternative out of the three / four options. These are the Northern Route (Northern By pass to Namataba (47km)), the Southern Route ((Bukasa to Namataba (42km)), the combined new alternative (South of Main Jinja road after Namataba to Jinja railway Bridge) and the Existing main Highway KLA – JJA (72km) ;

3. Team to seek information on the existing infrastructure, economic and social activities on all the four options;

4. The team to seek information on the administrative structure along the proposed road (District, Sub County, Parish and Village);

5. The team to seek information on the disease burden especially HIV/AIDS within the corridor including ideas on where to put a worker’s camp if necessary;

6. Issues of occupational and cultural resources if any;

7. Seeking comments and input from the stakeholder

8. Signing the form for contacted people (a mandatory requirement by both NEMA and UNRA)

9. End
C.1.2 RAP Public Notice

Mukono women form village bank

A village bank in a rural area has opened in Mukono District, offering an alternative source of credit to farmers. The bank, which was launched by local women, aims to provide affordable loans to farmers and small businesses in the area.

By Rebecca Namulondo

Rich women in rural areas have formed the Mukono Women Village Bank, launched by County Commissioner, Naka Elgon, as a means of empowering women. The bank aims to provide affordable loans to farmers and small businesses in the area.

The bank was launched by a group of women who have previously been involved in agricultural activities. The bank is expected to provide financing for farmers to purchase fertilizers, seeds, and other inputs needed for their crops.

The launch was attended by a number of local leaders, including the District Commissioner, who expressed confidence in the bank's ability to support local agriculture.

"This bank is a welcome addition to our rural economy," the District Commissioner said. "It will provide much-needed finance to farmers, enabling them to increase their yields and improve their livelihoods."
13 September 2010

TO WHOM IT MAY CONCERN

Dear Sir,

NATIONAL ROADS DEVELOPMENT AND MAINTENANCE PROGRAMME

FEASIBILITY STUDY AND DETAILED ENGINEERING DESIGN OF KAMPALA-JINJA ROAD (72KMS)

The Government of Uganda has allocated funds to finance the Feasibility Study and Detailed Engineering Design of Kampala-Jinja Road (72Kms). The study will assess the possibility of widening the existing road and also assess the possibilities of adopting alternative routes between Kampala and Jinja.

We are pleased to inform you that the Government has engaged Scott Wilson Limited of the United Kingdom in Association with Professional Engineering Consultants of Uganda to carry out the Feasibility Study and Detailed Engineering Design of the Kampala-Jinja road.

The purpose of this letter is to introduce to you the consultant, Scott Wilson Limited in Association with Professional Engineering Consultants Uganda who will be undertaking a number of activities along the road.

They will need your support and assistance to ensure early completion of the assignment. The data collection activities will mainly include road surveys, environment & social assessments, construction materials identification and various engineering investigations.

We look forward to your assistance and support on this important assignment.

Yours sincerely,

[Signature]

#### Introductory remarks by team leader

For most of the meetings, the Team leader started by introducing the team members and explaining the road project. Briefly she explained that the road was proposed to start from Kampala at the UMA show grounds, and pass through the south of the present Kampala Jinja road until at about Namataba where it would cross to the northern section, go along the edge of Mabira forest and cross to the southern section at about 56km from Kampala. It would then cross through the Sugar Cane plantations until it gets to Njeru and ends at the new Nile Bridge across the Nile river. The total length of the road would be about 76.8km. She went ahead to show the location of the

<td></td>
</tr>
</tbody>
</table>

PAPs were informed that the Surveyor was already on ground and picking the road alignment on the ground whose width will vary from approximately 60 to 80 metres. It is expected that the road from Kampala to Mukono will be six lanes (three either side) while the section from Mukono to Jinja will be four lanes (two either side). Only a few access roads will be allowed since this will be an expressway and those to use it are likely to pay some fees. There will be a link at Namboole to join the proposed Southern by Pass which is also undergoing detailed design.

The Road Corridor had already been gazetted which means that no developments in the corridor after the date of gazettlement will be eligible for compensation. The effective date for the Instrument of gazetting is 24th January 2013 (This information was availed after Buikwe District).

</tr>
</thead>
<tbody>
<tr>
<td>PAPs were further informed that the Surveyor is already on ground to set out the design of the road by pegging out to get the centre line as well as the extent to both the right and left of the road. Later during the RAP study, the Surveyor will come back to separate individual affected persons. He stresses that the Pegs are very important as they help the consultants to know which is affected property and people and requests the leaders to safeguard against destroying the Pegs and that they should continue to sensitize people about them. He explains that Pegging out helps in capturing land that’s titled land or untitled. He explains the different tenure systems varying from Mailo land, Lease, and freehold as well as customary land tenures. While for freehold and land Mailo land there is no</td>

| **expiry, lease hold has an expiry period.**  
PAPs should come up with their title deeds as proof of ownership. They should make photocopies of the title deeds. He gives an example that if the road width is 80Metres the Surveyor pegs out the right hand side extent and left hand side extent. Then the Pegs show where one stops and where the next neighbour starts which assists in getting the area. The Local leadership will have to help in identifying the right owners since some of the owners might be away. In worse cases it is possible that some people including chairpersons bring in ghosts to claim. That is why it was important for everyone be vigilant so we can identify them.  
After the land Surveyors have determined individual acreages then Valuers come to assess and determine the actual values of the affected property (any developments, trees, crops, Land and structures). The RAP team will be composed of three sub teams working hand in hand. These are the Valuation, Social and Surveyor sub Teams. The Value of crops and trees is determined by the compensation schedule as provided by the District land Board. For plants like Bananas Mature and yielding are valued at different rate than those mature not yielding. For houses like permanent, Semi permanent and temporary we don’t use the compensation schedule of the District. We use a Standard BOQ (Bill of Quantities) improvised by a Consultant after an expeditious research termed as Land use Comparables by asking different people/landlords in the affected area which helps to gauge the cost of land/acre in the respective areas. Finally a disturbance allowance which is equivalent to 15% or 30% depending on the due notice is provided. After PAPs have been given six months notice to vacate the affected area a 15% Disturbance Allowance will be added. Biggest component of the project now is land acquisition in order to pave way for the Road Project. |

| Local leaders present | Hon. Dorothy Mtima-Woman MP- Buliwe District  
Mr. Katende Ronald -Speaker(Nyenga-Town Council)  
Mr. Nsubuga Robert LCI Chairman  
Njeru South  
Mr. Musoke John-Chairperson | N/A |
| List of participants | Attached to the report | N/A |

**Name & designation**

Mr. Katende Ronald -Speaker (Nyenga-Town Council)

- The Speaker explained the delay and poor attendance that the Town Clerk had refused to cooperate and had insisted that Government workers don’t work on Saturday. He proposed to meet the big stakeholder on a later day.
- He confirmed that the next meeting at 2.00pm would be well attended. He noted that while Consultants have been very serious with their work, Town Clerk had tried his best to sabotage their efforts. This would not happen again he promised.
- Speaker welcomed the area MP (Hon. Dorothy Mtima) who also was in attendance.

Mr. Odeba

- Local authority does not recognize some of the houses/structures, how will they be valued?
- The valuers will generate the BOQs and value all properties the District notwithstanding.

<tr>
<td>Mr. Katende Ronald - Speaker(Nyenga Town Council)</td>
<td>• When will compensation and construction begin&lt;br&gt;• And can we continue construction if we have started?</td>
<td>• You will stop the day your house is assessed and valued.&lt;br&gt;• Team leader informed further that the road process has commenced and that there is a gazettement (instrument) to halt any developments within the corridor.&lt;br&gt;• Leadership to help by stopping importation of people into the corridor.</td>
</tr>
<tr>
<td>Hon. Dorothy Mpiima - Woman MP- Buikwe District</td>
<td>• Was unhappy with the conduct of the Town Clerk, Njeru&lt;br&gt;• This Project should not turn out like the one in Katosi where compensation was not fair and women were not involved. Involve the women so that compensation money is well used by the family; &lt;br&gt;• Also try to link up with the local leaders (Kabaka's people) They speak to the people and listen to them and they will help you a lot.</td>
<td>• The team leader informed the meeting that the last meeting in the district will be 09th/01/2014&lt;br&gt;• The 2nd meeting will be at Kinaabi UMEA Primary School at 2:00Pm same day.</td>

| **Present**                     | Hon. Dorothy Mplima-Woman MP- Bulikwe District  
Mr. Katende Ronald - Speaker(Nyenga-Town Council)  
Mr. Nsibuga Robert LCII Chairman |                   |
| **List of participants**        | Attached to the report            | **N/A**           |
| **Name & designation**          | **Summary of discussion & issues, comments raised** | **N/A**           |
| Mr. Katende Ronald - Speaker (Nyenga-Town Council) | Welcomes the Team and opened the meeting  
He introduced the local leaders and then the team from URS;  
Later he asked the team to elaborate more on a questionnaire and arms;  
Wanted to know what was a compensation schedule and BOQs?  
Elaborate more on a questionnaire and arms;  
| The Team explained the project and how they were to conduct the RAP  
Explained that the questionnaire is a form to capture social data  
Asked the PAPs to to answer the questions honestly;  
Arms are access roads, connectors or feeder roads which join the new road at different intervals.  
Compensation schedule are the rates provided by the District for compensation of crops and some structures;  
BOQs or Bill of Quantities is used to assess the value of Permanent buildings and is sensitive to materials used in construction;  
| Mabechu:  
How sure of compensation? UNRA's Record is bad.  
How are you going to compensate for lost income for crops like banana or sugar cane which have a long lifespan of production? Why is the width so big at 80 metres or so?  
| There can be many reasons for delays in compensation including use of dead bank accounts, some claimants have conflict or absent. Some have their landtitle in Banks and we have no access to them,  
Compensation rates are determined by the district and do take into account the age of the crop;  
Secondly the road also adds value to |

<tr>
<td>Sofia Nakotte</td>
<td>• How do you compensate a leasehold tenure which is still ongoing?</td>
<td>• The lease hold will be paid according to the proportion remaining</td>
</tr>
<tr>
<td></td>
<td>• How do you compensate Kibanja owner?</td>
<td>• For Kibanja we pay for his developments and the land Lord will get 40% for the land;</td>
</tr>
<tr>
<td></td>
<td>• I have bought cement, doors, windows but I haven’t put them on the house do I qualify for compensation?</td>
<td>• The Kibanja owner will get 60% of the land value;</td>
</tr>
<tr>
<td></td>
<td>• If the project delays to start can’t people utilise the land?</td>
<td></td>
</tr>
<tr>
<td>Kabaseka Aloysious</td>
<td>• If I have an old permanent house and has depreciated how do you do value it?</td>
<td>• For depreciated house, we use recent valuation rates at the current time;</td>
</tr>
<tr>
<td></td>
<td>• Access roads are you also compensating for them?</td>
<td>• The junctions at these points accessing the main road will be paid.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Anybody in the design will be compensated as well as those ones in the junctions.</td>
</tr>
<tr>
<td>Walugembe</td>
<td>• Need to know exactly where the road will pass on the ground;</td>
<td>• We have a map;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• The surveyor will soon be on the ground to show exactly where the road will pass;</td>
</tr>
<tr>
<td>Katumba</td>
<td>• If you are in the affected corridor are you advisable to go ahead building,</td>
<td>• Do not continue to build after valuation;</td>
</tr>
<tr>
<td></td>
<td>• If the pegs are pulled out do you have another plan?</td>
<td>• If pegs are destroyed, this will delay the project;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• There could be other ways of establishing the boundaries including use of the local community;</td>
</tr>
<tr>
<td>Benson</td>
<td>• How do we know the right compensation schedule rates and why don’t you bring them to us to look at them.</td>
<td>• We shall use district rates;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• At time of valuation we shall move with this compensation schedule then you can look at them.</td>
</tr>

<td>Mukasa</td>
<td>• We are in different land zones like kabakas land or kinaalwa land why don’t you invite them. Please tell us more.</td>
<td>• You can also go to the District and check.</td>
</tr>
<tr>
<td>Amorn</td>
<td>• Enlighten us more on grave compensation?</td>
<td>• Land institutions like Kabaka’s land and the church have titles. We can’t pass through without compensating them, we pay them like institutions.</td>
</tr>
<tr>
<td>Fred Kivumbi</td>
<td>• How are kibanja and those on inherited land compensated?</td>
<td>• Rates for Graves are got from the district land board. Chairpersons and neighbors will help us identify the right graves;</td>
</tr>
</tbody>
</table>
| Hussein                        | • How about those ones within access roads are you going to compensate those ones? | • Kibanja owners are compensated 60%  
• Landlords are compensated 40% for land.  
• Those on inherited land if they have letters of administration then are compensated like someone on titled land. |
| Jamila                         | • How about widows; do you compensate them? | • As long as you fall into the design of the road you will be compensated. |
| Francis                        | • If we feel we are not content with what the Valuers have assessed. Where do we go to complain? | • Widows will be compensated like the other PAPs. That’s why we are emphasizing the women to be around or involved to see what is actually taking place.  
• We shall this time take the photo of a man, wife and affected property. |
| Magezi                         | • The Surveyor has cut down our crops and we were stopped from doing any activity on the land and now the project delays for | • There are forms we leave behind and if some one is not satisfied with our work he calls us back because we may have done a typing error.  
• Otherwise you resort to the grievance committee or the Valuation Tribunal.  
• You are right that’s why the add on Disturbance Allowance. You are paid 30% if you are told to vacate project |

<tr>
<td>Kikomeko</td>
<td>• What is the size of the road?</td>
<td>• The road is 76.8Km in length and width 60Metres and 80Metres. As a widow, You are paid according to what has been assessed but you can still find a cheaper place than Mukono.</td>
</tr>
<tr>
<td></td>
<td>• I am widow please give me a higher compensation rate to go to a better place like Mukono.</td>
<td></td>
</tr>
<tr>
<td>William:</td>
<td>• The Vibrations from these machines can crack walls of the houses and also the dust. To whom do we report these to?</td>
<td>• Machines at times do destroy houses but we do care for also others outside the project area. We leave our contacts with the chairpersons. He can contact us and we give you the appeal forms to fill. We will measure again with the guidance of the law of injurious affection.</td>
</tr>
<tr>
<td>Dane</td>
<td>• I might have an empty land but actually it's a grazing land. How do you compensate it and do you provide transport?</td>
<td>• We pay for the land and paying for transport for the animals would be determined by the size of the land you have.</td>
</tr>
<tr>
<td>Peter</td>
<td>• Will you pay for the yams and where will I find my friends if they are displaced by the road?</td>
<td>• Yes, your yams will be compensated and friends you can communicate using a phone.</td>
</tr>
<tr>
<td>Nalu</td>
<td>• Why there segmentation and delay in payment and placement of ghosts into the route and are compensated like northern bypass?</td>
<td>• In the valuation report we capture the names, affected property. • Then the ghosts can get on to the list by the assistance of Chairpersons because these are the first people we approach before people on the ground. • You can help us by giving us the right information of your neighbors.</td>

<td><strong>Father Patrick:</strong></td>
<td>• Remark: On the Northern by pass there's increased insecurity and many people have lost their lives and lack of lights. Please let them try to put lights on these roads/lanes and security personnel. I hope you apply this on the new road.</td>
<td>• Security and street lights are paramount because in darkness crime accelerates. We will forward this remark to the design team and try to put emphasis on it.</td>
</tr>
<tr>
<td><strong>Mukasa Emmanuel:</strong></td>
<td>• For Compensation of crops I understood the rates are from the District but land I didn't understand. (Explain)</td>
<td>• To get the value of land we make a research by consulting up to 40 or 50 different owners of land in that area (district) excluding the PAPs and use comparisons.</td>
</tr>
<tr>
<td><strong>Mulwana Ronald:</strong></td>
<td>• Elaborate more on a lease. I have a title given to someone for lease of twenty years and at the time of valuation only sixteen years have passed. Who is the right owner?</td>
<td>• It will depend on the agreement you have and then you will be paid accordingly.</td>
</tr>
<tr>
<td><strong>Benjamin:</strong></td>
<td>• I have a conflict on land and have put the case in court. But if the court decides I am the owner are you going to pay me? • How about my tenant bringing a fake title to you?</td>
<td>• Compensation will be with held until court decides who the rightful owner is upon verification of court facts. • The titles will be verified through the land office and neighbours.</td>
</tr>
<tr>
<td><strong>Mr. John Bosco- Chairman LCI:</strong></td>
<td>• If I bury an additional person after valuation how do you handle?</td>
<td>• Only what was found on the ground at the time of compensation will be paid;</td>
</tr>
<tr>
<td><strong>Zigi:</strong></td>
<td>• Do you pay kibanza holders?</td>
<td>• Bibanza holders are also paid. • For those with gardens and any other developments 60% is paid to bibanza holder and 40% to the landlord</td>
</tr>
<tr>
<td><strong>Father Mukasa:</strong></td>
<td>• What is the timeframe up to the construction start?</td>
<td>• Project started 2 years ago, evaluation will commence in February, which will be followed by land acquisition. • Time frame: From now to next month we carryout valuation but the actual paying of people will be before the actual construction begins.</td>

| Mr. Sam Kitaka-opinion Leader:  | • Is this project a private or Government Project  
                                • If the things don’t work out whom do we sue?  
                                • You will pay for the land, how about the pastures and flowers?  
                                • Why don’t you pay for loss of income for crops like coffee instead of a one off payment?  
                                • If paid what about transport?  
                                • Why break job providing factories like NY Til Jinja instead of changing design?  
                                • There will be many negative environmental impacts (e.g. dust) which will suffocate bananas and other crops. Why not abandon this Muzungu project which will kill the livelihoods of Ugandans?  
                                • Shall you preserve the small river on our farms?  
                                • The money given to us as compensation will it be taxed because the Government wants to know the net amount? And are you financing the opening of bank accounts?  
                                • If the husband dies, the wife and children who receive the money?  
                                • How about damaged property by machines like cracks in the walls far from the road side. Are they paid for?  | • After all this then procurement which may take 2 years.  
• This is a Government road project but Government may choose to partner with other investors;  
• It is likely that the road will be a toll road;  
• The boda boda and pedestrians will not be allowed on this high speed expressway;  
• We pay for the flowers but not pasture. pasture is part of the land;  
• Yes livelihood restoration is important, but we are still finding out how to compensate for this;  
• There will be no transport except removal costs for things like containers and kiosks  
Nytil is not in the corridor and most large developments have been avoided  
• When construction begins mitigation measures including spraying road with water will be put in place;  
• Contractor has an obligation to protect water sources and an ESIA has been conducted for the purpose;  
• The compensation money paid is not taxable money;  
• The Government doesn’t give money to open up bank accounts but we advise you to open up for the safety of your money  
• On death of the husband, the contents of the will will guide payments;  
• Cases of damage outside the corridor will be rare but if they occur then you |

</table>
|                               | compensation?                    | holder gets 40% Please do no subdivide your land. If you have the title you get the compensation as the owner 100% plus compensation for crops;  
|                               | Katosi people were stopped from building and were not compensated, its nine years now. Can this happen to us? | • Yes delays can happen but that is an issue to be handled by the developper UNRA. |
| Michael                       | How do you know I am the right person (a Landlord or kibanza holder)?  
|                               | If I am in the process of getting a land title and you start the valuation . How do you compensate me? | Ownership of a title deed defines the owner, while for kibanza the LC and neighbour will help to identify;  
|                               |                                  | We shall take you as a kibanza holder unless you have the blue print which we can as a titled land. |
| Kalanda Moses                 | The exact alignment is not known to us on the ground;  
|                               | How will I get the video coverage? | The Surveyor is already on ground putting marks and pegs to demark the alignment. This will be clear soon;  
|                               |                                  | The video coverage is the propert of the developer UNRA who may give a copy if they want; |
| Lubowa Paul                   | If the owner of the land dies and the one who inherits doesn’t recognise us as his squatters/tenants on the land. What happens? | To identify the right owner we shall still use the chairman and the neighbors for kibanza holders. |
| Mohammed                      | Do you pay for graves and transferring them?  
|                               | My husband is the owner of the land and I am the owner of the crops. Whom do you compensate? | We pay for both cemented and soil graves but not transport;  
|                               |                                  | The wife who grows the crops we shall pay her for the crops while the husband is compensated for the land; |
| Joyce                         | If the Road reserve is next next to my house will I be compensated?  
|                               | My father has given me land and I have crops and property on it. Who do you compensate and when does the valuation start? | If we are taking the verandah we can take the whole house in the law there’s an instrument catering for this unless you have a bigger space.  
|                               |                                  | We compensate land to your father and crops and property to you.  
|                               |                                  | A few weeks from now we shall start |

| **Mukasa**                      | • When does Government start ownership of land? (After the mapping of the road or after paying).  
 • For the losses of the business: Can't you count and estimate the costs for the sugar cane for a period of 5 to 10 years and pay us that money.  
 • If a Father agrees to subdivide among his sons and he has property and crops. Who do you pay? | • After the valuation the Government/UNRA has taken over ownership.  
 • The valuation is done in accordance with the laws of Uganda. Livelihood restoration is not covered, but we are consulting on that;  
 • We shall compensate the father for the property and crops. |
| **Counsellor**                  | • If I have animals but I have pasture on land. Don't you pay for the pasture? | • We don't pay for the pasture just like an ordinary person buying land from you. The Government can only agree to give you money for a business loss (disturbance allowance). |
| **Moses**                       | • How do you pay somebody with small portion of land remaining no activity can be done?  
 • If my house is cut off from being accessed and walls cracked who I should see. | • If somebody is losing a bigger percentage of his land the law accepts to pay him off for all the land unless has a enough land to avoid making life difficult for him.  
 • This will be unlikely but if it happens, then you will appeal to the grievance committee and yours will be treated as an injuries impact and compensated; proof may be needed; |
| **Halima**                      | • There is stream used by 3 villages can't the water be contaminated by the road works or destroyed?  
 • My father died and mummy bought land and gave other children to use to cultivate coffee. Can they take the land without the permission of the old woman?  
 • Do you pay for a kibanja as a plot? I have a plot bought from kibanja holder. How do you pay that plot? | • When constructing these new roads they use culverts or pipes to protect the water drainage.  
 • These are the kind of issues you have to settle before actual work begins otherwise the money will be withheld.  
 • If you buy a kibanja from a kibanja holder you also become a kibanja holder and you are paid as a kibanja |

| Dane                            | ● If Valuers they have assessed and valued us and we are not contented. Who should help us?  
|                                 | ● I am a widow and another widow comes to sell the land. Is it possible?  |
|                                 |                                  | ● There will be a Grievance committee on ground and even the chairman can help you resolve this issue.  
|                                 |                                  | ● You can report to the Grievance committee or court but when valuing we will capture both of your names and put a comment land in dispute;  |
| Kevina                          | ● If it takes up to 5 years without being compensated. Is it right for me to use that place?  
|                                 | ● My father bought two bibanas before he died and shared them among his two sons. But they have conflicts | ● That's beyond our authority and sometimes the Government has no money. But by the law what we have counted is what is paid for. And any other developments are not compensated. These issues we shall forward them to the relevant authority.  
|                                 |                                  | ● Those family matters can go to court or chairpersons can help in solving them. If a person is renting and cultivating we pay him for the crops.  |

| Hospital. Will you build them again?  | How about for big family, whom do you pay if the father is deceased? | Well as individuals;  
• Water sources will be protected at time of construction or relocated;  
• In case of a deceased owner, the we will request the family to decide on whom to pay and he will get the letters of administration; |
| Conney                          | The construction of the road can bring impacts like flooding in Bwaise. We have a stream here won’t it affect it? | Mitigation measures to protect environment concerns are in place;  
• The study recommends that local people should get preference for unskilled jobs  
• The main benefits is the compensation you will get a part from development brought by the road project; |
| David S.                        | Will the project give us jobs and benefit from it or you will give them to outsiders  
Can you build us a school to compensate for the area taken? | The landlord will be paid 40% for land and 60% will remain for a kibanja holder in addition to his property and crops;  
• Confirm whether they have been paying Busuu and then the law will be followed;  
• We can check and verify if there are errors then you may use the Grievance committee setup or the valuation tribunal to look at those issues so they can compare with your Valuer and propose the way forward; |
| Isaac                           | Elaborate more on the landlord and especially squatters.  
Others like kibanja holders connive with the Chairperson taking advantage that the landlord is not there. Please try and rectify that.  
After assessing the valuation and am not satisfied can I use a private Valuer to do the re valuation? | We shall consult regarding livelihood restoration through our report; |
| Daniel                          | Since we have given you our land and we have many orphans, can you be paying us yearly for sustainability? | You can call us again to do the revaluation and the will be a committee formed to help you with this at the time of compensation. |
| Hajati                          | The valuation can be under estimated. How can I be helped? | |

| Lubowa Godfrey                  | • After the Surveyor has demarcated the land, will they bring back my title with the same dimensions?  
• I am a widow but I have children and have divided land. Will you pay me to buy land for my children | • The new title will show the land that has been cut off;  
• Your husband may have a will showing who takes the land. You can discuss with your children to see who receives the money. |
| Widow                           | • My house is affected by the road machines and has got cracks. Who should I approach? | • If it can be proved then compensation will be made, otherwise impacted properties will be paid for injurious damage; |
| Leo                             | • I have seen something measured is it the middle of the road or its sides. | • As shown here on the map the Surveyor is marking out the right and left hand side extent and the centre line so be patient. |
| Gerald                          | • If landlords are denying kibanja holders because they were misled not to pay busulu.  
• Are you going to use a standard valuation? When did the District renew its valuation rates? | • If landlords are denying kibanja holders try to settle the issue before we come. We will pick the two names until the law soughts you out.  
• The compensation schedules for crops, graves are from the District and the district renues them annually; |
| Leo                             | • When you are to pay and you delay for 10 years. When does Government take over ownership of land now or after payment?  
• When is the Government paying it may delay up to 2040. | • There may be some delays but the report goes through various stages.  
• It can be quick if money is available but doesn't stop the Government from taking over the land. |
<p>| Willy                           | • The Government can't take the land before compensation of the people. Please forward this first. Can I continue with building? | • If you continue with building after Valuation then you will suffer a loss in terms of compensation because we don't pay for the extra costs added on like roofing if assessed at a beam level. |
| Ssaif                           | • I have kibanja holders they say they don't | • We will capture all the details of |</p>

**Mr. Caleb Kamagisha - Chairperson Naminya village:**

- My concern is about landlords where the road is traversing but without non transferred titles. How are we going to treat this?  
- They are communities with a water source within a corridor and the two communities are sharing that water source and are going to be subdivided by the road. How can they get access to the water?  
- They donated a piece of land to the church at Nakibiizi and the church utilized the land and planted trees and has tenants but has no formalized ownership. How are you going to treat this?  
- Where the Town Council deposits refuse/garbage the access seems it's going to be cut off by the road. Where do you advise us to dispose our garbage?  
- If people have started to come up to buy land now because of the project. Who can we approach for advice?  
- There are two projects running concurrently. The bridge and this one which part are the two projects affecting us?  
- If the son still has the title in the names of the late. The relationship between the claimant and the landlord will be stated.  
- Water sources during the exercise we take co-ordinates of each water source and design how to protect it using culverts or pipes to protect its drainage or even we provide another.  
- No documentation and no title. The church will get compensation for crops or try to formalize the issue.  
- Town Council dumping site the access road is blocked; you can identify other access roads (road has connectors) or an alternative dumping site.  
- Restrain from buying land in the corridor that leads to opportunists who want to buy land that's why we are not giving out the map to avoid that. (I think they should accelerate the exercise.)  
- Affected by two developments you will look at the Google Seattleite map you can look and see what portion of the land is affected.  
- We shall see that you don’t receive

### Composition of the consulting Team
1. Mrs. Magezi Gertrude Binta-Sociologist - (Team Leader) Tel: 0701441845
3. Mr. Twijukye Reuben - Valuer
4. Kasingo Elither - 0772-837267

### Composition of the members present
List of attached

### Purpose of meetings
The main objective of the meeting was mainly to conduct Sensitization for the Resettlement Action Plan (RAP) for the construction of the proposed Kampala-Jinja Expressway (76.8km). The main target was the local leadership of Nakawa KCCA who are from within the affected areas. This was mainly to sensitize them on how the project will be implemented, seek their blessing as they are also expected to help explain to their respective communities. Participants included:- The mayor’s office, Ward administrators, councillors as well as LCs

### Programme Activity Schedule (Agenda)
1. Arrival of participants and registration.
2. Opening Prayer
3. Chairperson’s opening remarks.
4. Team leader.
5. Valuer/Surveyor’s methodology/Schedule of activities.
6. Open discussion/issues of concern.
7. Responses by team members.
8. Chair person’s remarks and closure.

### Arrival.
People started arriving at around 9:30am as they registered.

### Prayer.
We had a prayer lead by Innocent.

### Chairperson’s opening remarks. (Dr. Wabwire)
The Chair person/Deputy Mayor who represented his worship the mayor introduced the subject. She stressed the importance and called upon for maximum cooperation with

Ms. Mayor Betty Tushabe

<tr>
<td><strong>Introductory remarks by the team leader (Mrs. Getrude)</strong></td>
<td>She gave a detailed back ground of the project i.e that initially 3 projects were studied and that this particular one proved feasible than the rest. It is approximately 76.6 km, starts at Game and ends at Njeru in Jinja. It will be 6 lanes from Game to Km 22+200, then from Km 82 ½, it will be 4 lanes. It will be a regional private road. She said that the type of land needed will be 80 meters and narrows down in some parts of Kampala. Mr. Magezi explained to the participants the reason why in some central parts of the project the 80m wide specification was not considered. He said that it was purely environmental since the government signed the agreement with the world bank on the conservation of Mabira forest.</td>
<td>Mrs. Getrude. Mr. Magezi</td>

</tbody>
</table>
| **Valuer/Surveyor’s methodology/Schedule of activities. (Reuben)** | He narrated the engineering details of the project as follows:-  
- That the project will be 60m at game.  
- At the junction coming from MUBS, there will be an interchange taking some parts of UMA show ground.  
- That some parts of the park and the market will be affected.  
- There will be an expansion at Naguru police barracks opposite IICA.  
- A bigger junction will be put at Spear motors i.e a fly over. A road will be put around S. Motors and an access link that will allow traffic to join the new road with a 60m width.  
- At oxy gas opp. UNRA offices, the road will branch off to Kinawataka.  
- A junction will be put at Nambole to join the road from Kitintale and Kirka. | Peter (URS) |

<td>• A bigger junction will also be put at the swamp from the lower part of Kireka at RRU police then to Kasokoso. Mr. Magezi supplemented that at that point, the Kampala southern by pass will join the road project and that very soon, councillors will be called in to discuss about it. He explained that the valuer’s scope of works will be guided by the surveyor. He explained how affected properties will be marked out. He requested the leaders to tell the community to avail copies of land titles properly indicating plot and block numbers. He requested leaders to advise the community not to tamper with the lines that will be drawn as it may complicate the work and to help in establishing the boundaries. He stressed other areas of interest but most importantly that a study of land variations is done in different areas. He further explained that land is valued on the company’s own analysis schedule then trees and crops are categorized and a district’s crop compensation schedule is used. He explained that: - A disturbance allowance is also given i.e. 15% for 6 months of the total valued amount. - “Bibanja holders take 60% then land lords take 40%. - Licensees will only be valued on the basis of properties put in place. - A compensation form signed by all parties will be availed. Mrs. Magezi informed the meeting that there will be information gathered by a social worker. The claimants photos will be taken and that no monies what so ever should be solicited from the community. Mr. Magezi explained that the cut off date will be the census last day and that claimants will be free to sell off their</td>

<tr>
<td>Open discussion.</td>
<td>Different questions were asked by different participants and appropriate responses were given as follows:-</td>
<td></td>
</tr>
<tr>
<td>Mr. Asaba (Chairman LC 1)</td>
<td>When is the actual project kick off?</td>
<td>Mrs. Magezi: The project started way back in 2010 when the designing of EIA started. The team has already covered Buliwe and Kasokoso areas. Any body without a land title is considered a Kibanja holder and is compensated. Those in wetlands will only be compensated for their properties but not land since it belongs to the government.</td>
</tr>
<tr>
<td></td>
<td>- What are the actual Specifications for the junctions?</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- How big will they be?</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- How will People without land titles be compensated?</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- How about people who have developments in wetlands, will they be compensated?</td>
<td></td>
</tr>
<tr>
<td>Hon. Phillip (Kinawataka)</td>
<td>- How will the different projects be harmonized at Kinawataka?</td>
<td>KCCA has already tried to ensure that all projects at that point are implemented in harmony and the road project will as well be discussed with the relevant stake holders. Mr. Magezi informed members that the EIA</td>

| Composition of the consulting Team | | |
|-----------------------------------|--------------------------|

| Composition of the members present | | |
|------------------------------------|--------------------------|
| List of participants attached | | |

| Purpose of meetings | | |
|---------------------|--------------------------|
| The main objective of the meeting was mainly to conduct Sensitization for the Resettlement Action Plan (RAP) for the construction of the proposed Kampala-Jinja Expressway (76.8km). The main target for that particular day was the community around Nakawa area. | | |

| Programme Activity Schedule (Agenda) | | |
|--------------------------------------|--------------------------|
| Programme Activity Schedule/Agenda:- | |
| 1. Arrival | 2. Prayer |
| 3. Chairperson’s opening remarks. | 4. Team leader. |
| 5. Valuer/Surveyor’s methodology/Schedule of activities. | |
| 6. Open discussion. | 7. Responses by team members. |
| 8. Chair person’s remarks and closure. | | |

| Arrival | | |
|--------|--------------------------|
| People started arriving at around 1:37pm | | |

| Prayer | | |
|--------|--------------------------|
| The meeting started at 02:07pm with a prayer. | | |

<p>| Chairperson’s opening remarks. (Dr. Wabwire) | | |
|-----------------------------------------------|--------------------------|
| The chairman opened the meeting by explaining to the Community the purpose of the meeting. Some queries were raised by the community on whether he was informed or not and that they never had an input in drafting the agenda. The team leader requested the community if they had any input in vain. Hon. Councilor, Nakawa area informed the | | |</p>

</table>
| Introductory remarks by the team leader (Mrs. Getrude) | The team leader introduced the entire team to the community. She gave a brief and precise history of the road project that:  
  - It will be a private road project, 80m wide starting from Gama up to Mukono.  
  - From Gama the road will be 6 lanes up to Kyambogo. She explained the project up to Jinja. She further told the community that there will be a social team taking photographs and taking the information of the people affected. She requested the community to cooperate. | N/A               |
| Valuer/Surveyor’s methodology/Schedule of activities (Reuben) | He introduced himself and explained to the community how the surveyor will mark out the areas affected. He informed the community that the chairman LC1 and KCCA will be fully involved. He requested the community to cooperate with the team by availing the required information and not to delete the marked lines as it will complicate the work.  
About compensation, he explained to the participants that a District’s crops compensation schedule will be considered while valuing crops. He explained that trees will be considered on the maturity basis.  
About land, he explained that research is carried out about the current land value in different areas and used to compensate the affected clients. He further informed them that land lords will get 60% of the total value while squatters will get 40%. | N/A               |
**RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-IJINJA EXPRESSWAY (76.8KM) WITH NAKAWA RESIDENTS HELD AT NAKAWA ON 27TH JULY 2014.**

<tbody>
<tr>
<td></td>
<td>He informed the participants that building-gs will be valued by ascertaining the current BOQ on as is basis by first measuring the internal measurements and valuing the costs of materials used. He said that all prices considered in this are got from the District compensation schedule. He further explained that a disturbance allowance of 15% is given to someone who has to vacate within 6 months, the 30% to those who will be told to vacate before 6 months.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>He explained to them that compensation assessment forms will be filled, signed by property owners, their witnesses and chairmen LCI’s. He requested the community to avail land titles and all sorts of land disagreements if any before valuing. He finally explained that for a licensee, only his/her property will be valued and compensated.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Mrs. Getrude supplemented that a file will be developed with a list of family members and their properties.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The valuer explained that the cutoff point is the point at which the valuer has reached some one’s home.</td>
<td></td>
</tr>
</tbody>
</table>

**Open discussion.** Different questions were asked by different participants and appropriate responses were given as follows:-

<p>| Mr. Bukenya: | What if my water business is affected, will I be compensated? | Only what is demolished is compensated but not the water. |</p>
<table>
<thead>
<tr>
<th>Composition, activity, or issues</th>
<th>Concerns, comments, Observations</th>
<th>Responses, Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mr. Paul Mugambe:</td>
<td>How about the value of land, buildings and the monthly rental income that the owner has been generating on a monthly basis?</td>
<td>It's only the existing property that can be valued and compensated. Mrs. Magezi supplemented that at the moment there is no legislation that caters for compensation of income.</td>
</tr>
<tr>
<td>Dr. Kenneth Ochieng</td>
<td>Assume am compensated and a small piece of land remains, can that piece of land be taken up as well?</td>
<td>The remaining piece can be considered in the second phase but in the first phase, the company compensates for affected property only.</td>
</tr>
</tbody>
</table>
| Mr. Kenneth Kamugisha          | • When is the road project commencing?  
• As if the project targets tenants not landlords, how will you inform tenants? | The project will begin immediately after compensation. The meeting is open to all. Messages will be got from the chairmen and in the media. Mr. Magezi supplemented that in this case, the agreement between the landlord and the tenant will apply. He further explained about salvage, that the owner will be free. |

C.2  Records of Stakeholder Consultations for KJE RAP (ICS, September 2015)

C.2.1  Sequence of the consultation process

1. Self-introduction from Rwenzo – Green Associates on behalf of ICS for UNRA
2. Reasons why the social team is there (consulting on the proposed KSB) to seek the views of the stakeholders and impacted people;
3. Team to seek information on the existing infrastructure, economic and social activities;
4. The team to seek information on the administrative structure along the proposed road (District, Division, Parish/Ward and Village/zone);
5. The team to seek information on the disease burden especially HIV/AIDS within the corridor including ideas on where to put a worker’s camp if necessary;
6. Issues of occupational and cultural resources if any;
7. Seeking comments and input from the stakeholder
8. Signing the form for contacted people (a mandatory requirement by both NEMA and UNRA)
9. End
C.2.2  RAP Public Notice

CAAA suspends three airlines

By Daniel Enyango

Three airlines have been suspended. Two of them were stationed in Uganda while the third one was based in Tanzania. The action was taken by the Civil Aviation Authority (CAA) in accordance with the Civil Aviation Act, 2009.

The airlines are Jumia Air, Uganda, and Airtel Kenya, Karatu, Tanzania. The CAA has suspended the operations of these airlines due to non-compliance with safety regulations.

The CAA has also issued a notice to all airlines operating in Uganda and Tanzania, advising them to ensure compliance with all regulations.

Mukono women form village bank

By Joanne Mwebwa

When a group of women in Mukono faced problems with making ends meet, they decided to form a village bank to help each other. They have been successful in saving and lending money, and now they are able to buy new business equipment.

LOCAl VIEW

Mukono has started a Village Bank (Village Finance Cooperative Society) which is currently providing loans to local communities.

Uganda National Roads Authority

PUBLIC NOTICE

CONSTRUCTION OF THE NEW KAMPALA-JINJA EXPRESS HIGHWAY

NOTICE TO ALL PERSONS AFFECTED BY THE PROJECT

Uganda National Roads Authority (UNRA) notifies the general public, in particular those likely to be affected by the development of the Kampala-Jinja Expressway in the following localities: Kinekwa, Museveni, Kizungu, Jinja, Nakasongola, Bwindi, Nakasongola, Kapeeka, Kisenyi, Namagoma, Mutanda, Kira, and Gomba.

The Consultant will be visiting properties along the various proposed routes, surveying properties and preparing a proposed Resettlement Action Plan among other things.

UNRA would like the public to know that this exercise is FREE of charge and, therefore, no one should charge them for survey works. UNRA would also like to inform the affected property owners that the Consultant is not entitled to take ownership of their property until the Resettlement Action Plan is finalised.

Anyone caught soliciting funding or impersonating UNRA Staff will be arrested and charged with extortion and false pretences.

TEAM THE HEAD, Corporate Communications

Uganda National Roads Authority

TO WHOM IT MAY CONCERN

Dear Sir,

NATIONAL ROADS DEVELOPMENT AND MAINTENANCE PROGRAMME

FEASIBILITY STUDY AND DETAILED ENGINEERING DESIGN OF KAMPALA-JINJA ROAD (72KMS)

The Government of Uganda has allocated funds to finance the Feasibility Study and Detailed Engineering Design of Kampala-Jinja Road (72Kms). The study will assess the possibility of widening the existing road and also assess the possibilities of adopting alternative routes between Kampala and Jinja.

We are pleased to inform you that the Government has engaged Scott Wilson Limited of the United Kingdom in Association with Professional Engineering Consultants of Uganda to carry out the Feasibility Study and Detailed Engineering Design of the Kampala-Jinja road.

The purpose of this letter is to introduce to you the consultant, Scott Wilson Limited in Association with Professional Engineering Consultants Uganda who will be undertaking a number of activities along the road.

They will need your support and assistance to ensure early completion of the assignment. The data collection activities will mainly include road surveys, environment & social assessments, construction materials identification and various engineering investigations.

We look forward to your assistance and support on this important assignment.

Yours sincerely,

[Signature]
Peter W. Ssebagwa

| Unknown Resident 1                                   | Was the Southern Bypass route changed as stated by National Water and Sewerage Cooperation?                                 |
|                                                      | No, there is no other route that has been created other than the same one still shown on this sketch map and so National Water and Sewerage Cooperation did not have the correct information. |

<p>| Mr. Wandera Joseph LC 1 Chairperson                  | What if we continued constructing on our land, shall we be compensated for additional structures put in place? | No, an affected person will only be compensated for that particular affected property valued at that particular time and so one should not bother |</p>
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is there any specific bank where money shall be deposited because Crane bank came around to open accounts and we were told that it had got instructions from UNRA to do so?</td>
<td>No, there is no specific bank that was authorized and instructed by UNRA to do the opening of accounts. The team will notify the affected people when the time for actual compensation begins. Crane bank took advantage of the land acquisition process of the Kampala Jinja Expressway including the Kampala Southern Bypass.</td>
</tr>
<tr>
<td>Unknown Resident 2 Why does government never issue or state a specific time when compensation would take place or even fails to state particular dates?</td>
<td>Government always gives updates on whatever activity is taking place. Since it has several processes that it deals with before, during and after the land acquisition before implementation of the project, Government cannot determine which date and time to pay off one since the time varies. If any activity is to be carried out on ground such as this sensitisation which is being done today, the affected people are informed through their local leadership, radios and neighbours.</td>
</tr>
<tr>
<td>How many UNRA’s do we have? We always see many groups coming saying they are working for UNRA.</td>
<td>We only have one institution called the Uganda National Roads Authority which selects and authorises Consultants to do the work that it assigns them.</td>
</tr>
<tr>
<td>Unknown Resident 3 Is this the final stage of the valuation?</td>
<td>We are in the advance team that is sensitizing other teams will come for a final detailed land survey, valuation survey and socio economic survey and let none take any money from you because this exercise does not require one affected to pay of any sort of money. What is needed from you is your utmost cooperation.</td>
</tr>
<tr>
<td>What if one is dead, what will happen?</td>
<td>Do not give us names of people who are already dead because money will be sent to those specific accounts and so valid signatures will be required.</td>
</tr>
<tr>
<td>Mr. Paddy Dennis Where does this route exactly start from?</td>
<td>We cannot fully establish where this route exactly starts from but we will be able to know the exact point when the land surveyors come on ground to ascertain and mark out the corridor and area for compensation in which the road and its reserve is going to be constructed.</td>
</tr>
</tbody>
</table>
Unknown Resident 4

Is there any rule or law that guides time of payment, and in case time elapses, is one liable to go to court?

No, there is no specific law to that effect and in case of any issues please report to the valuation team, land survey team and the socio team. If the matter cannot be solved by the team, then one is free to seek redress from the Courts of Law. You should not just rush to lawyers because you can easily be cheated. There will be a Grievance Mechanism Committee to deal with complaints before one seeks redress from the Courts of law and this team would include local leadership such as the Parish Chiefs, Local councils and Chief Executive Officers.

Unknown Resident 5

What if a house gets destroyed after the valuation exercise, what will happen?

One will still be compensated since the details were already captured. However, We only do not pay for what has been established after our cut-off date of the valuation exercise.

Mr. Mudiba Muzayisa

Crane Bank took our land titles photo copies with reason that it was part of UNRA's requirement to open accounts with crane bank. So what is next? Should we go to Crane Bank to close our accounts?

No, that is not true. Do not rush to open up bank accounts. You should only wait for the right time when you will be instructed on what to do.

NAKAWA URBAN COUNCIL: MUTUNGO PARISH [KCCA]

Meeting with: Residents from the villages of Mutungo Zone 1 and Mutungo Zone 2

Purpose of Meeting

Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass

Date Held & Place

7th July 2015, at Canopy Country Club

Time: 9.30AM

Present

1. Mrs. Gertrude Binta Magezi- RAP Specialist & Team Leader
2. Mr. Ssentamu Joshua- Land Surveyor
3. Mr. Lule Ivan- Valuation Team- Assistant
4. Ms. Musoki Rose Mary- Social Team-Assistant
5. Mr. Sserunkuma Herbert- Video Capturer

See List of participants attached.

Name & Designation

Issues Raised, Comments and Fears

Responses by Consultant to Issues Raised

Mr. Adam Kibuuka

No, they will not be re-assessed, but for those who were not, they will have to be assessed. Then, for any part of the land owned by the same person that falls under the corridor of the Kampala Jinja Express Highway and the
<table>
<thead>
<tr>
<th><strong>LC 1 Chairperson</strong>&lt;br&gt;<strong>Mutungo Zone 2 0700192901</strong></th>
<th>Jinja Express highway and were assessed. Will they be re-assessed or not?</th>
<th>other half in the corridor of the Kampala Southern Bypass respectively, will be assessed under the same person's name with the same reference number.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When is the project starting?</strong></td>
<td>This project started in 2010; we are in the final stages. We shall sensitise until 15th July 2015. We shall also inform you through the local council leadership on when we shall return to do a detailed land survey, valuation survey and socio economic survey.</td>
<td></td>
</tr>
<tr>
<td><strong>What will happen to those people without land titles but with agreements?</strong></td>
<td>People without land titles will be regarded as kibanja holders and for those who have lived there since birth will be valued with the help of local council leadership and other witnesses, Photocopies of land titles and agreements will be required during this exercise.</td>
<td></td>
</tr>
<tr>
<td><strong>Mr. Kasuja</strong>&lt;br&gt;<strong>Owner of canopy country club</strong></td>
<td>This land is still in court and we do not know the right owner of this land because we hear, it is for Kasaasa and not the Kabaka's land. How long will it take one to be paid?</td>
<td>We value the land but indicate “land in dispute”, but payments are made to the side that wins. Put in mind that the land lord takes 40% and the licensee takes 60%. We cannot ascertain the time in which one will be paid.</td>
</tr>
<tr>
<td><strong>Will I be compensated for the long time taken to be compensated since your failure to compensate me in time will have put my development plans on hold?</strong></td>
<td>Be patient enough, the road will take short period of time and do not add any other buildings or any other structures after assessment has been done because any addition will not be paid for.</td>
<td></td>
</tr>
<tr>
<td><strong>Is it possible to get the exact value of my property at that actual time of assessment?</strong></td>
<td>No, it is not possible for the valuation team to disclose the value of your property at that time since getting the value of the property involves several processes such as comparison with current market prices, rates from the district compensation rates. In case your district does not have current and updated rates, we value your property using the neighbouring updated district compensation rates.</td>
<td></td>
</tr>
<tr>
<td><strong>Mr. LUKYAMUZI</strong>&lt;br&gt;<strong>Denis</strong></td>
<td>After the Surveyor and Valuer, we always have problems with private organizations who take long period of time to pay and also even cheat us. So how will you help us if such a problem arises?</td>
<td>Please make sure that you play your part by having the right documents such as valid land titles and agreements. In addition, solve all the land disputes on land to avoid delaying the payment process. We do not have any information about companies that cheat but for any dissatisfaction; you are allowed to take your case to local councils, Parish Chiefs, Courts of Law. You could even contact us on our mobile phones.</td>
</tr>
<tr>
<td><strong>Valuer’s use pencils and therefore within a short period of time, all details tend to get erased and worn out. So how shall we be sure that for your company the information attained on ground will not be altered, lost or even erased?</strong></td>
<td>We have no knowledge of such company that uses pencils, but we can assure you that the owner of the property will be on ground while we do the assessment together. A copy of an assessment which will be in indelible ink signed by the owner and stamped by the local council leadership.</td>
<td></td>
</tr>
<tr>
<td><strong>Mr. Lwanga Fred</strong></td>
<td>We were told to get accounts from Crane bank, so what will happen?</td>
<td>We did not inform any one to get accounts with any bank. Crane bank just took advantage of this situation.</td>
</tr>
</tbody>
</table>
We shall inform you on what to do when the time for payment is due for those with or without bank accounts.

We advise that, there should be specific rates with you at the point of valuation.

The advise is noted but we get updated district compensation rates from District Local Government and particularly the District Land Board. We also need time to do all computations. In the event that one is not satisfied please contact us and the local authorities.

Mr. Ssemugenyi Patrick

How do you value, by multiplying or dividing? In case our taps, boreholes are destroyed, whom do we report to?

Do contractors take any initiative to demolish after compensation?

We value by multiplying. UNRA takes into account the replacement of such services that have been destroyed. The Contractors also demolish after ascertaining payment of residents in collaboration with the local councils. Announcements are made to notify people when to demolish and so they are given notice to vacate the land.

</thead>
<tbody>
<tr>
<td>Mrs. Shaban</td>
<td>People are being affected by road reserves, what will happen to those who are in injurious state?</td>
<td>The 60meters include the road reserve and for those who will be injuriously affected will be compensated immediately after negotiating with the Contractor.</td>
</tr>
<tr>
<td></td>
<td>Will you consider current prices of land?</td>
<td>Yes, we will consider the prevailing market price.</td>
</tr>
<tr>
<td>Ms. Margaret Kyeterekera</td>
<td>In case of any conflict on land, how will you handle that?</td>
<td>We shall continue with the assessment process and still note down the conflict issue. Once conflict is resolved, we shall proceed with payments.</td>
</tr>
<tr>
<td>Name</td>
<td>Question</td>
<td>Response</td>
</tr>
<tr>
<td>------------------</td>
<td>--------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Mr. Matende Ssentamu</td>
<td>Is everyone going to be compensated?</td>
<td>We shall only compensate the people who will be in the corridor of the road demarcation. One will be able to know that he or she lies in that corridor after the land survey team has demarcated the corridor and this is most likely going to be in two weeks time.</td>
</tr>
<tr>
<td>Mr. Okurold Samuel</td>
<td>We need specific time, because you told us, it started in 2012, and how sure are we that you will come back in two weeks time?</td>
<td>We can assure you that we shall return to the ground for this detailed study because we are in the final stages.</td>
</tr>
<tr>
<td>Mr. Deo Byabandwa</td>
<td>Are we allowed to take our property and when are we expecting you?</td>
<td>You are allowed to take whatever belongs to you after being paid the compensation money. You will be informed of such when the time is due.</td>
</tr>
<tr>
<td>Mr. Odari Paul</td>
<td>What will happen to those of us who are still processing land titles?</td>
<td>Remember payment is made with only those of valid land titles. You are advised to find a work solution to that matter. Money will be withheld until one avails and original land title to complement the photocopy that was handed in during the assessment process.</td>
</tr>
<tr>
<td>Ms. Sylvia Obongo</td>
<td>What if I have a small portion of land affected, will it be necessary for you to take my land title that covers a large piece of land?</td>
<td>Yes, it will be required so that it can be demarcated on your land that the portion taken is being paid for by Government and that the portion in question is truly yours.</td>
</tr>
<tr>
<td>Mr. Osengge Alfred</td>
<td>What will the socio team come to do on ground and in case of any conflict, where shall we go?</td>
<td>The socio economic team will be responsible for collecting the bio-data of the affected project person and institutions. It will be taking note of any conflicts and will take care of acquiring details of the disadvantaged along the corridor acquired. The team will work closely with the local leadership of the area.</td>
</tr>
<tr>
<td>Ms. Nambi Rose</td>
<td>We got loans in banks and our land titles have been used, shall we be allowed to use photocopies?</td>
<td>Yes, photocopies will be needed at the beginning and later originals will be required at the time when the actual payments are being made. You are highly advised to be with them.</td>
</tr>
<tr>
<td>Mr. Shaban Latif</td>
<td>Will my money be refunded which was used to process the plan and given to Kampala Capital City Authority with evidence of receipts?</td>
<td>We are not responsible for that and so make a follow up with Kampala Capital City Authority.</td>
</tr>
<tr>
<td></td>
<td>Does the Valuer and the resident get to know the amount of money to be paid at that moment?</td>
<td>One cannot be able to know the amount of money at the time of assessment because what the valuation team records is further computed with current market prices to attach a correct value. In addition, the Ministry of Finance, Planning and Economic Development and Bank of Uganda that pays are highly involved. Therefore a lot is involved before getting the exact figure for each person.</td>
</tr>
<tr>
<td>Mr. Makumbi</td>
<td>If at all one was given a kibanja by his grandfather but died, can such a person be compensated by use of his names?</td>
<td>Yes, such a person will be compensated because we even work closely with the local council leadership to ascertain such ownership. You are allowed to use your names.</td>
</tr>
</tbody>
</table>
Where are your offices found?

Our Company is called announced to all companies that ICS Engineering and Environment Ltd a subsidiary of Infra Consulting Services Ltd Registered in England and it is located on Nakasero Road Plot 26 at Parklane Courts next to multiplex building.

<table>
<thead>
<tr>
<th>Unknown Resident</th>
<th>Why don’t you come along with Kampala Capital City Authority groups for such kind of meetings?</th>
<th>The Kampala Capital City Authority already knows that the project is ongoing so it is not necessary for them to be here and besides the main client is Uganda National Roads Authority.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mr. Badiru Ssekajja LC 1 Chairperson</td>
<td>Make sure that you do not take long to come back on ground since people end up suffering with no developments taking place.</td>
<td>We will make sure we do our best and will keep in touch for any updates.</td>

5. Mr. Sserunkuma Herbert - Video Capturer  
See List of participants attached.

### Name & Designation | Issues Raised, Comments and Fears | Responses by Consultant to Issues Raised
--- | --- | ---
Mr. Dalama | Do you do any documentation after valuation? When are you coming back?  
Please make sure you pass by to pick land title photocopies when required and thank you for the work | Yes. We even leave you with photocopies of the assessment forms after valuation that are stamped and signed by the local council leadership. We shall notify you through a phone call and through your local council 1 Chairperson. Thank you too for your co-operation

Mr. Kazwama Joseph | But we heard about this some years back and how come it is just being worked on?  
But why can’t we give you our land titles and agreements after valuation? | Yes, government has several processes it passes through to the final stage of road construction and we are in last stages where affected people have to be compensated before road construction.  
These photocopies will also guide us during valuation process, where each affected person will hold a reference number and you will be expected to hand in originals when required to process payments.

Mr. Sserugo Roman LC1 Chairperson 0772316690 | Thank you for coming and will be waiting for you. But please implement what you have talked about. Again, show us the route of Southern Bypass.  
What if we are not satisfied, where do we go? | We appreciate and so in collaboration with Uganda National Roads authority, all will be implemented. No, all I have shown you is enough, to fully ascertain the likely points through where it will pass, wait for the day of survey, and is not going to be long.  
Please our phone contacts as noted on the board and can also fast report to the local councils before you run to UNRA or even Courts of Law.

Will empty plots be paid for? | Empty plots will be compensated.

Do plots in wetlands hold different values from those in dry lands? | No. Values are the same, what varies is the area in which certain plot is located.
## Purpose of Meeting

Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass

## Date Held & Place

9th July 2015, at Kasaawe [Football Play Ground]

Time: 2.00PM

## Present

1. Mrs. Gertrude Binta Magezi - RAP Specialist & Team Leader
2. Mr. Ssentamu Joshua - Land Surveyor
3. Mr. Lule Ivan - Valuation Team - Assistant
4. Ms. Musoki Rose Mary - Social Team - Assistant

<th>Responses by Consultant to Issues Raised</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mr. Ssendisa Councilor Makindye Division</td>
<td>We have to develop but this should benefit both us and you too in such a way that our people are not taken far away from us since we are approaching election time. You have talked about conflicts, I advise my people to take note of their boundaries and request officers present to implement what they have told us today and do not cheat us.</td>
<td>Please, our role is to see to it that people are sensitized, a land survey is made and assessment of the affected property is done. Finally one will be paid and so whatever comes is up to one to decide which other place to move to. We appreciate your concern and we will do our best as long as we both do our roles. We will not cheat anybody, because even the law says one should be compensated at a level slightly higher than he or she has been at.</td>
</tr>
<tr>
<td>Mr. Jjingo Temakasa</td>
<td>We need to know the exact Chairperson that will move with the surveyors because we have issues with our land agreements.</td>
<td>Indeed we need to collaborate with the local councils and please make sure that you sort out your issues before we get back on ground.</td>
</tr>
<tr>
<td>Mrs. Mbazira Rose</td>
<td>How long will we take to get compensated?</td>
<td>We cannot ascertain the time but we are in the last stages and so you will be informed in due course.</td>
</tr>
<tr>
<td>Mr. Nsimbwa Member of Parliament Makindye Division</td>
<td>We request you to compensate the people before demolition. Promise to acquire updated district compensation rates for my people to avoid any issues arising from wrong evaluation rates. Please tell your bosses to add on some other meters in addition to the road reserve.</td>
<td>Yes, we will do so and that is why we are at the stage of sensitization, survey and valuation coming up so that payments are made before demolition. Yes, we have noted this and our bosses will be notified about additional or other metres to the road reserve. Thank you for your concern and promise to work hand in hand with you for the success of this project.</td>
</tr>
</tbody>
</table>
An agreement must hold a buyer, seller, date, terms of reference, witnesses, measurements and neighbors plus the stamp; so for those without right ownership, sort your selves out before survey and valuation.

Mr. Mujuzi Edison: We advise you to always give us updates. We shall work closely with the local council leadership. You will be getting up dates.

We have issues with Kampala Capital City Authority channels. What will happen?

The issues' pertaining to the channels are a matter for Kampala Capital City Authority and is not our concern.

What if one is on public land, what will happen?

In cases where land belongs to Government, and then there is no way government will pay itself. However will just be compensated for the structures on the public land.

Will our money paid to us be tax?

No, compensation money will not be taxed.

MAKINDYE URBAN COUNCIL: LUKULI PARISH [KCCA]

Meeting with: Residents from the villages of Lower Konge Zone

Purpose of Meeting

Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass

Date Held & Place

10th July 2015, at Behind Baker's Place

Time: 10.00AM

Present

1. Mrs. Gertrude Binta Magezi- RAP Specialist & Team Leader
2. Mr. Ssentamu Joshua- Land Surveyor
3. Mr. Lule Ivan- Valuation Team- Assistant
4. Ms. Musoki Rose Mary- Social Team-Assistant
5. Mr. Sserunkuma Herbert- Video Capturer

See List of participants attached.

Name & Designation | Issues Raised, Comments and Fears | Responses by Consultant to Issues Raised

Mr. Mugambwa David

When was this plan put in place?

This programme started in 2012 and we are currently in last stages. We cannot give a time frame on when we shall return to the ground for a detailed survey but you will be informed in due course.

You said you use different values to value different items, clarify on this issue. We request you to always provide us with where to sit for such meetings.

Yes, we use different values on different property owned and an example is, differences in land value in the different areas.
<table>
<thead>
<tr>
<th>Mr. Ssemudu</th>
<th>Prices change each time; what prices will you consider?</th>
<th>We shall consider the prevailing Market price</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>We also request you to come along with the money when you come to value.</td>
<td>No, we cannot come along with money in cash at the time of assessment since there are other processes such as verification of land titles, names and reports for approval by the Chief Government Valuer’s office. There are other situations which will require Bank of Uganda to transfer money through the electronic transfer system directly means to one’s bank account.</td>
</tr>
<tr>
<td>Mr. Samali Lutaya</td>
<td>Clarify on issues of demarcations and disturbance allowance</td>
<td>We request you to hand in the photocopies of land titles, so that they can guide us on each person’s boundaries. Each one should be there in person to clarify on other issues pertaining ownership of property to be assessed.</td>
</tr>
<tr>
<td></td>
<td>Government should increase on the 30% and 15% disturbance allowance</td>
<td>It is up to Government to either change this figure attached as an additional payment to what is valued or not. We have taken note of this.</td>
</tr>
<tr>
<td>Mr. Muzibu Aggrey</td>
<td>How can we tell that whatever amount that you will attach to our property is correct?</td>
<td>If we certainly attach a wrong amount, please that will be regarded as a police case. We cannot risk our company’s reputation for such irresponsibility. I can only assure you that we shall only use current market rates and the updated district compensation rates for assessment. In case one is not satisfied with the assessment, please contact us on phone numbers noted on the board. We shall also put up Grievance Committee which will include, local council leadership, including Parish Chiefs and other members chosen.</td>
</tr>
<tr>
<td>Ms. Olivia Musoke</td>
<td>We need to know whether we shall be affected.</td>
<td>You will know that when we come back on ground to survey because we cannot exactly establish this fact of who lies in this corridor at this particular time.</td>
</tr>
</tbody>
</table>

**Meeting with:** Residents from the villages of **Upper Konge 2 Zone**

**Purpose of Meeting**

Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass

**Date Held & Place**

10th July 2015, at Behind Baker’s Place

Time: 2.00PM

**Present**

1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader
2. Mr. Ssentamu Joshua- Land Surveyor
3. Mr. Lule Ivan- Valuation Team- Assistant
<table>
<thead>
<tr>
<th>Name &amp; Designation</th>
<th>Issues Raised, Comments and Fears</th>
<th>Responses by Consultant to Issues Raised</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ms. Nabatanzi</td>
<td>How will you handle the issues of land grabbers? For people under lease ownership, does the balance go to the land owner?</td>
<td>Such issues are under licensees and so these get 60% of the money and 40% goes to the land lord. Each one gets his own share although, for the one in possession of lease hold; one is paid for the remaining years left to complete ones lease ownership. In summary, the land owner is paid his share and so is the licensee. The difference is that one on lease hold is paid inclusive of years ahead.</td>
</tr>
<tr>
<td>LC 1 Chairperson</td>
<td>I am also affected by this road and so let us closely together. I also thank you all for coming.</td>
<td>We appreciate your concern and will cooperate with you.</td>
</tr>
<tr>
<td>LC1 Secretary</td>
<td>What if one's land lord is Buganda land board? We also advise you to tell us before the due date so that we get ready to receive you.</td>
<td>We shall work closely with the Buganda land board and when the time for payment is due. At the moment, we shall carry out the land survey and assess your property. On the other hand, you can sort yourselves out with the Buganda land board to get avoid any future challenges during the payment period.</td>
</tr>
<tr>
<td>Ms. Sylvia Kigunya</td>
<td>Should we continue with our developments or stop at stages where we are after the valuation exercise?</td>
<td>We are advising you to stop at whatever stage you are after the assessment exercise because compensation is meant for only what has been assessed and there is no other time set for reassessment since the next step will be payments and demolition in preparation for road construction.</td>
</tr>
<tr>
<td>Unknown Resident</td>
<td>But where will you get funds since this Southern Bypass is not indicated in the budget?</td>
<td>We currently have no funders but were assigned by UNRA to carry out a detailed land survey, valuation survey and socio economic survey. Payments will be made later so that the Contractors can find the road corridor clear.</td>
</tr>
<tr>
<td>Mr. Bugolobi Bonifesi</td>
<td>We also need to develop ourselves; so give us the time frame of when you are likely to finish the road construction.</td>
<td>We cannot estimate when the road construction will be started. We are in the final stages of acquiring the corridor for the road. After this activity of the detailed land survey, valuation survey and socio economic survey, we shall inform you on what will follow.</td>
</tr>
<tr>
<td>Mr. Swaibu Navil</td>
<td>We have heard that the Northern Bypass had several issues. How sure are we that you will not just estimate those values?</td>
<td>We value using the updated District Compensation Rates and use neighbouring updated rates by law if your district compensation rates are not updated. More to that, you can call us on numbers noted down on board or get your private Valuer in the event of disagreement. The other alternatively is to seek redress from competent Courts of law.</td>
</tr>

<thead>
<tr>
<th>Name &amp; Designation</th>
<th>Issues Raised, Comments and Fears</th>
<th>Responses by Consultant to Issues Raised</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ms. Nalugo Melabu</td>
<td>What if the land title is in the names of an elderly who does not talk?</td>
<td>You are advised to sit as a family with your lawyer and draft registered powers of attorney. Use a thumb print to show us the one authorised to get the money on his or her account.</td>
</tr>
<tr>
<td>Mr. Lwanga Sam</td>
<td>Will you put pegs in our houses for those affected?</td>
<td>No, we shall only put marks on your houses to indicate the extent of the corridor. You are also advised not to remove them so that they can use to guide the valuation team and the socio team that will have come after the land survey team.</td>
</tr>
<tr>
<td></td>
<td>Please make clarity on the 15% and 30% disturbance allowance.</td>
<td>The 15% and 30% disturbance allowance is an additional amount to the total sum of the compensation figure that one will have received for compensation.</td>
</tr>
<tr>
<td></td>
<td>Shall we be compensated before our houses are demolished?</td>
<td>You will first be paid before demolition of any assessed structure.</td>
</tr>
<tr>
<td>Mr. Siraji</td>
<td>Is it the same company that will start the road to Wakiso?</td>
<td>Yes, but we do not know whether it will be us or some other company to make payments.</td>
</tr>
<tr>
<td></td>
<td>What if one person owns different plots of land in different areas. How will you handle that?</td>
<td>One will have a unique reference number and so will each plot of land which will be assessed independently but indicating same name and reference number.</td>
</tr>
<tr>
<td>Ms. Nayenga</td>
<td>Do you value empty land?</td>
<td>Yes, we value empty land and local council leadership will be present to witness and append identify the ownership. He or She will append a signature on the Assessment and Payment Voucher Forms.</td>
</tr>
<tr>
<td>Mr. Nyombi Persie</td>
<td>What percentage does the squatter get and the land lord?</td>
<td>The licensee gets 60% and 40% goes to the land lord.</td>
</tr>

<td>Please make sure you alert the land survey team or and the valuation survey team immediately so that it is valued.</td>
</tr>
<tr>
<td>Mr. Fredrick Nsimbwe LC 1 Vice Chairperson Kosovo zone</td>
<td>We request that you leave behind details of this meeting to be able to share with those who are absent in this meeting.</td>
<td>We have noted this although; we did not come with extra copies to give out. You can still use the copy we gave you to explain to the people who are not present in this meeting.</td>
</tr>
<tr>
<td>Mr. Ssemusu Erieza</td>
<td>Will I be compensated without an agreement but with 'busuulu' receipts?</td>
<td>Yes, you fall under the kibanja ownership and you and your land lord will receive one's own share respectively.</td>
</tr>
<tr>
<td>Mr. Ssenyonjo Gerald</td>
<td>Will this power line change?</td>
<td>It is UNRA’s responsibility to provide and replace community services such as replacement of taps, bore holes if they are affected by the road construction and they can be relocated if the need arises.</td>
</tr>
<tr>
<td>Mrs. Kakembo Fatima</td>
<td>Will one be valued even before going to settle payment issues with Buganda land board?</td>
<td>Yes, one will be valued before going to settle payment issues with Buganda land board but we are advising you to settle your issues before the payment period to avoid any future challenges.</td>
</tr>
<tr>
<td>Unknown Resident Kosovo zone</td>
<td>When is the project starting? Will some of us staying in wet lands be compensated?</td>
<td>We cannot be able to know the exact time and date on when we shall start the detailed work but you will be notified in due course. We have not received any official communication about people staying in wet lands but you will be considered for valuation.</td>
</tr>
</tbody>
</table>
Mr. Ssentamu Joshua
Land Surveyor | This question goes to the Buganda land board. What if your people fail to get money to pay the fees to your office so that they can be given land agreements until payment period? | Mr. Ssonko, [Representative from Buganda land board] replied saying, ‘**We will work hand in hand with our people and the company that will be responsible for payments or even we shall see how to deduct our money before one gets their total amount of money for compensation.**’

Mumbejja Nakibiri | Will you value graves? | Yes, we talked about valuing permanent and semi permanent structures including graves. We shall also take into consideration the type of materials used for construction.

</thead>
</table>
| Mr. Ntege | When will you start the detailed land survey and valuation?  
Please clarify on 15% and 30% payment. | We cannot be certain about the specific time but you will be informed in the due course.  
This is the percentage that will be given to you according to time one will be given to vacate the area needed for the road construction. For those who will be given a notice of less than six months will be given 30% disturbance allowance because they will have been given shorter time to relocate and 15% disturbance allowance will be given to those who will have been given a period of six months and above to vacate the road corridor. This will come during the period of actual payment. |

<p>| Mr. Ntale Julius | Will your road reserve include the 30meters channel distance? | The issue about channels is the Engineers business and not ours. You should know that the 60metres corridor will include the entire road reserve though proposed tunnels have been left out. |</p>
<table>

ANNEX D: EXAMPLE OF UNRA CONSULTATION NOTICE FOR PAPS
Compensation of Project Affected Persons (PAPs) and Expropriation of the Certificates of Title for the Road Reserve along Sembabule-Villamaria Road.

SCHEDULE FOR SENSITIZATION MEETINGS, DISCLOSURE AND VERIFICATION

For the Disclosure and Verification exercise, the beneficiaries and Project Affected Persons (PAPs) are required to present the following:

- Valid Identity document (National I.D Card, Voters Card, Driving Permit, Passport); if no valid identification can be produced a signed letter from the L.C.1, approved by an Elder and witnessed by two neighbors will be accepted;
- 8 passport size photos (for identifying verification and payment confirmation);
- Original Certificate of Land Title for titled land where land is to be transferred to UNRA;
- Bank statement, where payment is to be made by electronic fund transfer
- Letters of Administration for the Estate Administrators in the case of deceased persons
- Land Sale Agreements for untitled land/bibanja owners
- Offer letters from the giver for those given bibanja from their relatives/elders.
- Powers of attorney for Project Affected Persons who are physically absent for the verification purposes.
- For properties registered in company/Institutions/Associations/Investment clubs and others in a similar category, the following documents are required: Articles of Association and Memorandum of understanding, Certificate of Incorporation, Form 7, passport size photos for the appointed directors and bank statement for the company.

NOTE:
- All affected persons should endeavour to attend the sensitization meetings
- Persons paid/compensated are required to vacate the properties compensated so that the project execution proceeds smoothly and safely
- This same advert and the list of all Project Affected Persons (PAPs) can be viewed in person at the respective Village LC 1 Offices, District Headquarters and Sub County Headquarters.

APPRÉCIATION: UNRA appreciates the cooperation extended to the team to-date by the public and all stakeholders and would like to assure the public that, verification and compensation is transparent as stipulated in the laws of Uganda. In this regard, the general public is once again informed that the consultant, EAST AFRICAN CONSULTING SURVEYORS AND VALUERS in association with SYNERGY SURVEYS AND ASSOCIATES, was contracted by UNRA for the preparation and implementation of the compensation and resettlement process on the Sembabule-Villamaria road section. Please report any deals of unauthorized persons, conmen and middlemen.

Earth Systems is a multi-disciplinary environmental and social science and engineering firm that provides specialist advice and hands-on capabilities in water management and treatment, environmental and social management and impact assessments, waste management, international development, energy and carbon, climate change, sustainability and environmental information. Earth Systems has successfully completed hundreds of projects in Australia, Asia, Africa, South America, North America and the Pacific since the company’s establishment in 1993. We serve a wide range of sectors including mining, energy, oil and gas, infrastructure development, urban and rural development, water and waste water, and aid and international development.

Our reputation is built on high quality, objective and value-adding service that reflects environmental expectations of the present and anticipates those of the future. Professional excellence and integrity, high standards of business ethics and quality service are the foundation of our commitment to our clients.
