B.1.4 Minutes of Stakeholders Meetings – Local Leadership

Mukono Central Division Local Leadership

Consultation with Mukono Central Division Local Leadership on 21/12/2016

Comment / Issue	Response
What happens if after payment I decide to take the materials from structures which you have paid for?	You are free to take all that you want because we have no use for them including your bricks, iron sheets and harvest your crops.
Is there room for bargaining if I want to leave the place earlier than the agreed time since there are variations in payment?	There is no problem.
What brings about the change in arrangement in some areas where you decide to skip some areas which you had already acquired?	The road design is a dynamic process so the alignment can change due to a variety of reasons such as avoiding wetlands and highly populated areas.
For the remaining pieces of land which UNRA acquires for the Affected Persons, who exactly is paid this money?	In severance, we usually come back and re-evaluate the remaining pieces of land to see if the remaining land is of use to the Affected Person. If it is not of use, then they are given an additional payment and these people are relocated.
How soon is the project starting?	The project is ongoing and some sections on the Kampala Southern Bypass are already preparing for compensation. We shall involve local leaders in all activities to ensure that they are in the know.
In carrying out the project works, will there be employment opportunities for the local people?	Employment opportunities exist for the local people to work on the project and these conditions are included in the contract given to the contractor.
Why do the landlords get 30% of the payment for the land?	This is in line with the law and because the landlord still has ownership of the land unless that individual has a land title. The land user is usually given priority because they will be greatly affected by the project
You said you are not sure where you are passing in Mukono. What if you do not pass through this central division?	Some villages in this division, such as Dandira, will be affected.
How do you verify compliance to corporate social responsibility by the contractor? I request that you include local government leaders in the know to ensure that this is fulfilled.	UNRA plays the role of supervising contractor works to ensure that all contractor roles and responsibilities are fulfilled including environmental and social commitments.
You did not consider pedestrian issues for road use because the road speeds are high.	This is a toll road and so we do not expect any road provisions for crossing but rather other routes will be established for pedestrian use.
Because of this high speed, there is a high risk of accidents. How are you going to mitigate this?	
How are you going to revalue? Will you base the compensation on the new valuation or also include the old valuation?	The first valuation will be updated and incorporated into the second valuation form accordingly.

Consultation with Nakaseeta Nagogye Sub-county leadership on 29/12/2016

Consultation with Nakaseeta Nagogye Sub-county	
COMMENT	RESPONSE
How will you handle issues of conflict among neighbouring land owners?	The valuations will be done and but the payments will be put aside until these conflicts have been resolved and payment given to the rightful owner.
How does a true land agreement look like?	This agreement has the signatures of the land owner and the buyer plus the witnesses and the LC1 chairperson stamp.
Some land is owned by more than one person. How will you pay for everyone?	A joint account will be required for compensation of families.
Why is the land owner given only 30% of the land compensation and the Kibanja land owner given 70%? This is not fair.	This is so because the Kibanja owner is affected by the resettlement process more and he needs to restore his livelihood.
Why don't you make us shareholders in the project rather than paying us all the money?	This will bring about complications within the project area because the road is public property.
Will the land owner be valued separately for his property on the land?	In case he has property on the land, it will be valued and paid to him.
The 6 months will be a short time period to construct a new house and resettle.	PAPs will be given more time to relocate if it's required and a 15% disturbance allowance will be given to the PAPs to enable them to resettle as soon as possible.
The money given to us will not be enough to sustain us especially for food in the given time.	All the affected crops in the garden will be compensated so that you can be able to replace them and compensation will be fair and adequate but people will be allowed to harvest their crops to avoid food insecurity.
Will you replace our borehole from which the whole village has been getting drinking water but the land belongs to me?	Yes, community assets will be replaced and in case the land belongs to an individual, they will also be compensated.
Will you compensate people using the wetlands?	Wetland users will not be compensated because they are considered government property unless that individual has a land title for it or licence to work in the wetland.
Will UNRA compensate for the whole factory because part of it was taken?	Compensation will depend on the level of impact on the factory.
Previously, we were not paying for maintenance and repair of the spring but government usually constructs boreholes which are expensive to maintain and it will be on us the community to pay.	Livelihood restoration will take into account these aspects to ensure that such scenarios are avoided and people do not go through such problems.
How are you going to handle our graves which are on the land?	Graves will be compensated for and allow for transfer to new locations.

Why don't the Valuers tell us how much we shall be paid immediately after valuation?	We usually do this because we require time to determine the exact payments to be made to everyone.
What do we do if we do not agree with the valuations made?	You should re engage with UNRA so that we can work together and come to a harmonious agreement. You can also get an independent Valuer to redo the valuation.
When will payment be done after valuation because we shall die of hunger in case we do not carry out any activity on the land?	You are allowed to carry out any activity on the land as long as payment has not yet been done.

Kasenge A and Kasenge B community members on 29/12/2016

Consultation with Kasenge A and Kasenge B	
COMMENT	RESPONSE
Will you be able to capture the same information such as the first valuation because we harvested all the crops which were valued earlier?	Revaluation will be done so that we can access the new developments on the land.
Should we continue constructing on the land after valuation and shall the kibanja owners be paid well because some do not have land titles.	Feel free to continue constructing on your land but when the valuers finish valuing your property but all development added on the land after the valuation exercise will not be eligible for compensation.
You have adversely affected our work and so we request that this time you specify a time frame when we should expect payment.	We cannot specify the exact time and date when you will be compensated. But the plan is that by end of 2018 all Affected Persons will be compensated and all the land acquired.
Is the land acquired for the project enough or you are likely to require more land and so relocating some people?	Where need be for acquiring more land, the affected people will be valued and then payments made for their land.
What will I use the small land you have left for me after taking the bigger part for the project?	The priority land acquisition is the right of way land but these factors will be considered later after acquiring the right of way land.
Why does our chairman not inform us when the cadastral and valuers are coming?	It is the responsibility of the LC chairpersons to mobilise people and inform them of ongoing activities but next time we shall make sure that all people are informed in time.
Isn't it doubtful information when you take a picture of a child representing their parents and then the parent taken again on their return?	Only adults should be available for consultation during valuation.
How shall we bring together couples who are in disagreement to open a joint account under circumstances where they own the land together?	The valuers have expertise on how to handle property owned by more than one person. The probation officer will also sit down with these couples and come to a mutual agreement on the property.
We are requesting that you be merciful and compensate us appropriately in this process and not let us suffer like how other people have suffered.	We shall consider district prices to determine the compensation amounts basing on the average price in the area. Compensation will also be at a full replacement cost.

Do I have to open an account at a particular bank of your choice or can I open in any bank of my choice?	You can open an account in any bank of your choice.
What is IFMS?	It is an Integrated Financial Management System.
If I am still in the process of acquiring the land title shall I also be given only 70% of the payment?	You will be required to provide proof that you are in the process and arrangements to payment will be made accordingly.
You said that there will be no bodaboda on the road and the car speed will be 120km/hr. How shall the local people use the road for transportation?	The road is going to be covered and so there will be no bodaboda nor pedestrians allowed to use the road. Access points for local people will also be created.
Can I withdraw all the money you have deposited on the bank at once?	Yes, you can. It is your money but you have to consider security because having the money in the bank is safer than having it at home.
Where the property is jointly owned, do we need the same account for all the owners?	Yes, you will need a joint account which would allow all people who have a part in ownership of the property to access.
For family land, do I use my own account or do I open a joint account for all where all family members can access the money?	It would depend on the arrangement as a family; either have a joint bank account or use a family member's account.
I am worried that there is no land owner with a full acre of land. Most people buy smaller plots of land. Will this affect the payment amounts which will be paid to the plot owners?	Research will be made to determine the average rates for the land/ property in the district and this will be the final payment.
Will you compensate people who are known to live on the land but do not have letters of administration to justify their ownership of the property?	There is still time to engage with the office of the administrator general so that you can acquire valid documents.
Are you going to incorporate the changes in prices for the various properties?	Yes, we are updating. Price changes will be considered to ensure payments are made according to the current rates.
What can I do because I am illiterate and I cannot easily access the office of the administrator general?	Engage local people/ leaders who are in a position to help you.
I request that you make use of the community radio stations so that all of us are informed of the ongoing activities.	We shall inform your local leaders to use these means when trying to communicate to you the probable meetings pertaining to the project. Other methods of communication will also be used such as regular consultation meetings.
Please make sure that contractors also hire Ugandan personnel to carry out activities pertaining to the project.	UNRA is committed to ensuring local people are employed in various aspects of the project to maximise project benefits. During our inspections, we will check for this as much as possible to ensure this is addressed. It is also a mandatory requirement stated in all contractor contracts.
The foreign contractors you hired in the past have mistreated us and treated us unfairly on our own land. We request access to an office and representatives that can handle issues associated with contractors.	UNRA will have community liaison officers in different communities which will be able to handle such issues.

Nakisungu Sub county Local Leadership

COMMENT	RESPONSE
How are you going to handle the issue of our existing water sources which will be affected by the project and we were previously not spending any money on accessing this water?	Water points will be established to replace the ones which will be inaccessible after the project has been set up. For the naturally existing water sources realignments will be made in order to avoid them.
Conflicts as a result of disagreement for the compensation money given to families are coming up in regard to family owned land.	Local Council leaders should be engaged during such circumstances to assist such families come to a mutual agreement.
Plan with us what is necessary and when construction starts so that people can plan for where they can grow their crops to prevent starvation within the family.	We are working closely with you through the local leaders and Community Liaison Officials to ensure flow of communication.
Do you have a faster plan on how you will handle private land titles because for the case of Katosi road, we gave them our land titles and they have never returned them?	From the lessons learnt from other projects, we acquire land titles for all the acquired land and adjust this on your land title. This process is what makes the land title process delayed.
In case of death of the family head who was valued and the heir takes the compensation money but excludes the vulnerable widow. How will you handle this issue?	We expect the sub county leaders to assist UNRA to resolve some of these issues locally. We also require people to have letters of administration. We should determine and include the next of kin on the valuation forms who will be given the payment in case of anything.
We request that you give people advice on how to handle their specific issues so that they are well equipped with legally binding ways to handle these issues.	The Community Liaison Officers will be able to assist local people regarding such issues where they can.
How do you pay me when I do not have a land title for my existing land which will be taken?	70% of the payment will be given to you and 30% will be given to the original land owner.
How will you handle our gardens which will be affected by the project as this land will be taken for road construction?	All the affected crops and land will be compensated.
We request for a sketch map for the whole road project.	A sketch map will be provided to you which you can use for your reference.
What brings about undervaluation of the property of people and yet these people can get more money for compensation?	Some people are unrealistic on their expectations and tend to push the UNRA team to pay them a higher amount of money which is unrealistic sometimes. Re-valuation can also be done so that the right amount is derived at.
We request that you continue to be calm and approachable to people so that they can easily turn directly to you to address their concerns/ issues.	UNRA has restructured to include sociologists who are qualified to handle disputes amicably. Any issues can also be addressed through the CLOs who can resolve some issues or flag those they cannot handle on their own.
We request that you include training programs for the local people by the contractor so that we can transfer skills to our Ugandan youth	This aspect has been included in the contract document so they are mandated to transfer skills to the local people.

<ul style="list-style-type: none"> Juliana Keirungi, Senior Partner at ATACAMA Consulting made the presentation on the overview, ESIA and RAP aspects of the Kampala Jinja Expressway PPP. 	
Feedback on the Presentation and discussion	
Question/Comment	Responses by Julianna Keirungi
Mr George Ntulume-Chief Administrative Officer We are aware of the KJE PPP and have had engagements with UNRA. As a district, we support this project since it is a Government project.	Noted.

What is critically important is to engage communities so that they appreciate, understand and support the KJE project.	All affected villages parishes and sub counties were engaged but due to change in the alignment other news villages, parishes and sub counties came on board and those will also be engaged.
You need to have a comprehensive plan to interface and interact with our communities. In doing this, we have to work hand in hand and work with our technical and political leaders.	Noted. Arrangements will be done to ensure relevant people are engaged at all levels.
There are a lot of lessons to be learnt from the oil and gas projects in the Bunyoro region relating to environment and social impacts.	Currently we are doing some work in the Bunyoro region and all lessons learnt from previous resettlement and compensation activities will be considered during the planning and implementation of the KJE.
What plans do you have to ensure that fragile ecosystems like Wetlands are protected considering the fact that some options like building bridges and viaducts are expensive?	We have mapped gazetted wetlands and overlay this over the alignment to identify areas of concern. Backfilling will be avoided on the KJE to prevent barrier effects and to allow water flows to continue. Only in some areas if it is deemed necessary, the road may be suspended.
I am happy that Mabira forest is being avoided by the project because it one of the cherished ecosystem in Mukono district.	Noted.
We are glad that you have come up with livelihood restoration programs, however Corporate Social responsibility should not be left out.	Noted.
I am proposing that we should have another engagement which will include the Districts and sub county political leaders. It is very important for technical officers to understand what to do and some of us have some critical responsibilities in implementing this project.	Noted. Arrangements will be done to ensure relevant people are engaged at all levels.
If we can clearly understand the project areas, it will help us identify the political leadership needed especially when it comes to interface with the local leaders because they are the people who live with and represent the Affected Persons. We need to engage other important stakeholders in the communities including religious leaders and elders. Let us first interface with local leaders to work out the way forward.	Noted. Arrangements will be made to ensure relevant people are engaged at all levels.
In Mukono district, we have a number of large projects including the KJE Project, Standard Gauge Railway, Mukono Katosi road, and Katosi water mega project which is likely to be one of the largest projects in East Africa. We also have an oil pipeline project. I am wondering if you will discuss how we can plan these projects in a coordinated manner because some of the developments will affect	This will be handled during the cumulative impact assessment in the ESIA. The ideal situation would be to assess all projects together in a Strategic Environmental Assessment (SEA) followed by a project specific environmental impact assessment building upon this.

the same communities/people? Is this project going to compensate without consideration of the other projects? The government will lose money because people can be compensated twice from different projects.	
Using different compensation rates from the district compensation rates is good because the district determines compensation rates depending on its capacity, which can be limited by a lack of technical knowledge or resources. The only problem is whether this is going to set a precedent for other projects?	This project will be done in line with IFC PS because IFC is one of the founders of the project. For other projects, we are not aware about the approach to be used in compensation.
The issue of cash compensation, people need to be prepared before getting the money and also think of other alternatives.	Financial literacy training will be provided to prepare people before receiving the money. Different compensation options (cash compensation and in-kind compensation) will be presented to the Affected Persons to allow them to choose the best option.
Mr. Jonathan H Mukose, Deputy Chief Administration Officer The issues of coordination because all these are central government programmes within the same area. Based on our experience, the challenge is using different compensation rates. This must be addressed as this might end up bogging down some projects. The KJE project is going to be done in line with IFC PS. Will the same approach be used on the Standard Gauge Railway? I think you are aware that some of the projects are delayed because of compensation issues such as the Kampala Entebbe Expressway.	UNRA acknowledges this is a challenge at this time and is in the process of trying to solve these issues with the Government and other development proponents.
Mr. Charles Njoola, Physical District Planer Can we have some output related to the analyzed data so that we know where the road is going to pass, which infrastructure is affected, sub county and parishes and also to know how our people will be affected.	Noted.
Mr. Hamza Kamogo, Physical Planer I am requesting that you give us a GIS map to know where the project is located.	Noted.
Mr. Sultan Bagalaahiro, Community Development Officer How are you going to encourage people to support the project and what approach are you going to use?	This will be handled during the community sensitization as much as possible so that people's concerns are noted and addressed to the extent possible.
What plans do you have for the district and the people so as to overcome the challenges we may encounter?	UNRA has a team of sociologists and environmentalists to conduct monitoring for the project. UNRA will also open up community liaison officers in each community for people to

	go and air any grievances in relation to the project.
When you are sensitizing people in the affected communities, please ensure women are involved as well as the elder children in the affected families.	Noted.

<ul style="list-style-type: none"> Edgar Mugisha, Team leader at ATACAMA Consulting made the presentation on the project overview, ESIA and RAP aspects of the Kampala Jinja Expressway PPP. 	
Feedback on the Project Overview Presentation	
Question/Comment	Responses
John Kyejjusa-Community Development Officer How fast is the baseline information being collected for people that will be affected by the project? Usually speculators take advantage and buy off land in proposed project areas leading to delays for the project by making unreasonable demands.	For the collection of baseline information, about 70 villages have been engaged by UNRA. With the recent change in alignment, additional engagements will be done for new villages that have been brought on board. UNRA is aware that speculators will attempt to take advantage of the project. This will be a challenge considering the law does not stop people from selling off their land. However,

	UNRA has technology and clear guidelines to determine eligible PAPs with genuine claims for loss of land and property.
Esau Mpoza-Senior Environmental Officer Which villages, especially in Kiira Municipality, will be traversed by the project alignment?	This information will be shared and the affected villages will be engaged adequately.
Spoil materials from construction works from the expansion of the Kampala Northern Bypass and construction of the Entebbe expressway has been used by residents to encroach into Wetlands due to failure in identifying appropriate sites for stockpiling or disposing of these materials. This issue should be considered for the ESIA.	This will be considered in the ESIA and mitigation measures will be provided. We have developed maps of gazetted Wetlands from which can be overlay over the alignment to identify areas of concern. The ESIA will consider strategies to ensure spoil materials do not end up in the natural environment.
No site meeting has been conducted for these projects. Please propose regular site meetings to be held to discuss emerging and ongoing issues during the construction phase of the project.	According to the UNRA arrangement, site meetings will be routine. UNRA is working on improving its collaboration with the local Governments regarding site inspections for this project.
Who will handle the issue of compensation? Often people will seek for information about compensation from district officials yet we are not sufficiently knowledgeable with some of these projects.	The Government of Uganda is mandated to compensate people affected by infrastructure projects. Appropriate proof at of legal documentation is key in avoiding delays in compensation. UNRA continues to work closely with the CGV Department. A valuation on 2.9 km road section has been completed and payments will start soon.
Considering the KJE project will traverse wetland areas, what design plans have been considered to ensure that the wetlands are not impacted by the project.	The road will be suspended by viaducts in wetlands to avoid wetland habitats from being fragmented. From a biodiversity point of view, this will be proposed in some areas where it is assessed that suspension of the road is required.
Approvals for borrow sites should be sought. This should be clearly indicated in the report.	This will be brought to UNRA's attention.
Kiira as a municipality should be engaged as a stakeholder considering much of the project footprint is located within Kiira.	The Kiira Municipality will be engaged.
Ruth Nakatudde (Senior Physical Planer) Road designs usually take into account National interests and do not incorporate local concerns. This lack of integration should be looked into in the subsequent projects. The district is currently designing a physical development plan that should be in sync with National plans.	This is the stage (stakeholder engagement) at which the district has to make input to the design. UNRA at this stage has provided the proposed alignment to stakeholders for input. The final details of the design will be discussed with the concessionaire. There is still room to influence the designs and that is why we are here.
The mismanagement of the resettlement and compensation of affected persons is partly responsible for irregular developments and encroachment into wetlands. Vulnerable groups usually seek for cheap lands once projects have negatively impacted on them. Collection of baseline information is key and social data should be correlated with the land database.	The verification exercise will be robust and comprehensive. IFC is providing technical support to ensure affected persons are compensated appropriately. The legal team will also keep an eye on the process.

The RAP should ensure affected persons are moved or resettled appropriately.	
In most cases the mitigation measures tend to focus on the environmental and social issues ignoring the physical planning side. Answers to all concerns related to the project should be sought.	Issues pertaining to physical and land planning are very important and will be considered in the ESIA. The ESIA will review relevant plans and designs that may affect the project.
How are you handling post-construction compensation issues and impacts? Some people may be affected post construction phase. Who will address this?	Monitoring for the project stage will ensure negative impacts not foreseen will be managed appropriately. UNRA has a team of sociologists and environmental scientists to monitor the project. UNRA has also set up community liaison offices for people to report potential grievances related to the project.
Delayed compensation usually exposes affected persons to inflation. Compensation should consider this.	Noted.
Approvals for ancillary sites should be sought from the relevant local governments	NEMA issues approvals for ancillary facilities. The local Governments will also provide additional approvals and be involved in the permitting process.
Gilbert Kasozi-District Land Officer When was this project conceived, and what is its incubation period? The element of time is critical in dealing with the issue of speculators and distortion of baselines since media reports indicate that this project is behind schedule.	 <p>UNRA has drawn up a timeline as presented.</p>
The road width in some sections has been reduced to limit compensation costs. Will this affect the functionality of the road? Has the Government got plans regarding to manage potential compensation issues?	The head of design and the design team have taken this into consideration and the road functionality will not be compromised.
The transaction advisors should do a good job on this project to avoid mishaps such as what had occurred in the Bujagali Hydro power project where the Government is halfway into the concession and is now trying to buy back the concession at a large sum of money.	Noted.
The issue of balancing property rights vis-à-vis public interest is critical to this project. There is an informal moratorium to the district not to issue land titles over some of the areas that this project will traverse. We have not had any interaction with the lead agency over this matter.	We are aware of this.
This project should be harmonized with existing developments as well as future projects.	This is a challenge that UNRA has to deal with.
Is there a special plan for "volatile areas" especially Kasokoso and Bukasa?	Technology exists for work to be done without being there physically.

When will the project strip maps be made available to stakeholders in local Government?	UNRA will advise on this.
There is a need for UNRA to establish a liaison office since most of the questions are directed to the District Lands office which is not well equipped to handle them.	We are supposed to set up contact centers in different areas. Other avenues for airing grievances to UNRA also exist. These include a toll-free phone line and online platforms.
The district team should be involved in the compensation process. Often the land office is required to append signatures to verification forms for projects that we do not know about.	Best practice requires the district land office to be involved early in the project development. There has been a gap and this will be ironed out going forward.
Have gender and HIV issues been considered?	These issues have been considered in the ESIA with measures proposed for mitigation.
Isaac Galabuzi-Community Development Officer Some of the road construction activities may damage community water sources as well as hinder access to those sources. The mitigation of such impacts should be included in your plans.	This was pointed out.
Grace Nakalema-Senior Communications Officer The issues of areas that are traversed by several projects such as Kasokoso, which will host the KJE, KSB, SGR and National Housing projects, should be addressed holistically.	This is the approach we had adopted at the start of community engagements. However, we have been halted by a court directive. We shall wait from Government for guidance on these areas. We have started engagement with SGR and potentially affected persons.
What are some of the communication strategies that you are going to use to address some of the issues affecting affected persons?	The project has a communication strategy which involves community dialogues, TV and radio talk shows, online platforms. All these will be used as appropriate.

Kampala Capital City Technical Planning Committee

  EARTH SYSTEMS Environment • Water • Sustainability	Stakeholder Consultation Workshop with Kampala Capital City Technical Planning Committee for the KJE PPP Phase 1ESIA and RAP Update	
	DATE	22 nd June 2017
	VENUE	Kampala Capital City Authority Headquarters
	MEETING START	0930hrs
	MINUTES BY	Lorna Ngabirano
	MEETING REFERENCE NUMBER	ATCM/ES//KCCA 001

Attendance Register; Attached

TEXT	
<ul style="list-style-type: none"> The meeting commenced at 09:30 am. Jacob Byamukama, Ag. Deputy Director Roads Management moderated the meeting. 	
Agenda items: <ul style="list-style-type: none"> Introductions Project Overview Feedback on the project Discussion/comments Close of meeting	
Introductions	
<ul style="list-style-type: none"> Members in attendance introduced themselves by name and organisation they were representing. Jacob Byamukama gave the opening remarks and requested the consultant to provide a brief project overview of the KJE PPP. 	
Project Overview	
<ul style="list-style-type: none"> Edgar Mugisha informed the meeting that UNRA engaged EARTH SYSTEMS in association with Atacama to provide an update of ESIA and RAP of KJE project. He mentioned that although KCCA had been consulted earlier, there has been some changes and so the purpose of the meeting was to get KCCA's views on the ESIA and RAP process regarding KJE. He highlighted that the current assignment is only Phase 1 of KJE which includes Kampala-Namataba (33.5km) section of the Kampala-Jinja Expressway and the Kampala Southern Bypass (18km). He emphasised that the Consultant is working jointly with UNRA team as well as a team from CGV and so far a scoping report had been submitted and the final ESIA report will be submitted on 30th June 2017. He requested for KCCA's views especially on the cumulative impacts they foresee regarding KJE and that a Background Information Document (BID) will be sent so that any addition concerns are included. 	
Feedback on Presentation	
Question/Comment (Jacob Byamukama)	Responses by Edgar Mugisha (ATACAMA)

Jacob Byamukama requested for more information about the 2.9 km in Kampala.	The 2.9 km road in Kampala is located in Makindye Division. Because of the limited time to conduct and submit RAP, the funders requested that the RAP for Phase 1 should at least have a section of road showing all the details. Therefore the 2.9km section gives an idea on what the compensation package is likely to be. However, final Inventory of Loss expected by November 2017.
The issue on the draft design was raised. The concern is that KCCA has not seen the Drawings being used to procure the contractor. He wondered whether the plans for public transport had been put into consideration especially the junctions at Nakawa and spear motors.	UNRA has the updated designs and Patrick will share with key stakeholders.
Social issues: How does the expressway link to other public roads? Is there consideration of a gradual reduction in speed at interchanges? Have the critical sections highlighted in the drainage Master plan for Kampala been catered for?	There are interchanges at Spear Motors and UMA and a reduction of speed to 100km/hr. Regarding the Drainage Master plan, we shall advocate for harmonization of plans to reduce potential cumulative impacts.
KSB is located mostly in Kampala. Although UNRA is the National Authority on Roads, KCCA is responsible for planning and managing the road network in the city. Most road corridors take into account public transport as well as other facilities like National Water and Sewerage. So UNRA needs to send the final designs so that KCCA can comment.	UNRA to consider this especially for KSB section.
Some sections of KJE are also affected by the SGR project. These areas need to be harmonized to avoid affected persons being compensated twice.	RAP studies shall be shared to help in managing cumulative impacts and compensation of affected persons.
When will the Public hearing be conducted?	UNRA and the lenders will decide but hopefully by August 2017.
Tonney Ssemmanda (Atacama) What plans do you have for Nakawa Market?	Joel Wassa (KCCA) KCCA is in the process of securing funding from the World Bank to develop the market to put it at a level similar to that of Wandegaya. However, funds have not yet been secured as yet.
CLOSURE: The meeting was closed at 1000hours

B.1.6 Minutes of Stakeholders Meetings – Affected Communities

Kigaga Zone community

Consultation with Kigaga Zone community members on 21/11/2016

Community Consultation with Kigaga Zone	
COMMENT	RESPONSE
Why don't you compensate people who are so close to the road reserve and will also be affected by the road?	Direct, indirect and cumulative impacts will be assessed and mitigated during the assessment but certain things might come out that were never predicated but such issues will be handled during monitoring and that is why UNRA has constituted a team of sociologist and environmentalists that will be monitoring the project.
When do you start the surveying?	The surveying process will start as soon as possible.
Are you going to value property which is underground like septic tanks?	Yes, they will be valued because we shall consider the replacement cost of the building.
Will you compensate for the lost time on the land which you had stopped us from developing for over one year?	Yes, this will be compensated by revaluing and they will consider the current value of the land.
How shall we handle the loans which we had acquired to develop the land but we were unable to pay them because of the expected developments?	Provide Proof that loan was taken and values will be made on how much you are affected.
How shall you value the property which was previously valued and now you are going to revalue the property which does not exist now?	The first evaluation forms will also be considered and compared with the new evaluations which will be done.
How sure are we that this time we shall be paid on time as compared to the previous time?	This time the compensation is going to be done in phases, previously surveyors had to first surveying all the affected properties and then start compensating people but this time compensation will be done for every 3-5 km done to avoid the delay in compensation
Is the expected compensation for our property taxable income?	Compensation is not an income and so it is not subject to any tax.
Who are the funders of the project?	The project is founded by the Government of Uganda and development partners such as IFC, the European Union, the Agence Francaise de Development and the African Development Bank, the project is a public – private partnership (PPP).
Do you have a special approach on how you are going to deal with commercial land because this is majorly commercial land?	We have noted that this is basically commercial land and we shall devise a procedure on how to handle these.
Please consider the first evaluation of the land because people changed their property after evaluation.	Yes, we shall take into account the draft report.
How can the entire family benefit from the project rather than the family heads only?	All members of the affected families will be involved and during the signing of the valuation forms women will also be required to sign, opening up joint bank accounts to make sure that a man do not withdrawal the money from the bank without the consent from wife.
So many people are affected by the project but few people are aware of these meetings.	All affected persons will be engaged because this a continuous process but during the socio-economic census survey all affected persons will be interviewed and during the cadastral and asset survey, you can also pass on the

	message to your neighbours and also listen to the community radios for announcements.
How will you handle people who have misplaced their original valuation forms?	Draft report will be used to confirm assets on ground and a new form will be issued to you.
How do you going to work to ensure that all PAPs are compensated?	All PAPs along within the project area of influence will be identified and all their details will be registered during the cadastral and assets survey and socio-economic survey so that will be the bases for compensation.
Will you capture photos during the valuation and survey process?	Yes, photos will be captured.
What do you do if you don't agree with the valuation of the assessor?	Compensation will be fair and adequate for PAPs but also you can opt for an independent assessor to confirm what has been reported.

Consultation with Masaja Kibira B community members on 23/11/2016

Masaja Kibira B Community Consultation	
COMMENT	RESPONSE
If I do not have a personal bank account can the compensation be put on my sister's account instead?	No, you will be required to open your own bank account to ensure that you receive your money directly. For family property, a joint account will be required.
For those of us who have not yet paid/ fully paid the 600 thousand for Kabaka's land, how will you handle our compensation?	We shall have a discussion meeting with the kingdom of Buganda to have a common ground on this issue.
How wide is the road at the point where the stream (Mayanja) is?	Nominal Right of Way width is 60 metres
How are you going to handle people staying in wetlands because you had said you were not going to pay us?	Land titles made after 1995 and are in wetlands will not be considered but people will be compensated for their property on the land.
Will you compensate us for the lost time due to the previous valuation activities where we were stopped from adding any new developments to our land and as a result we made losses?	The property values will be updated to incorporate the changes on the land and payments adjusted. Loss of business aspects will be incorporated and people will be expected to justify this loss so that they can be compensated. A 15% disturbance value will be added to your total compensation as disturbance payment.
Some rich men are trying to hijack our land by exploiting the Wetland Protection Law and also, I am told this project is not yet approved by the Ministry of Finance.	UNRA is trying as much as possible to deal with rightful land owners and a legal due diligence will be done by the lawyer to confirm the ownership of the affected person before compensation. This project was approved by the government.
According to UNRA, how do you define wetlands?	Uganda's National Policy for the Conservation and Management of Wetland Resources (1994) defines wetlands as areas "where plants and animals have become adapted to temporary or permanent flooding." It includes permanently flooded areas with papyrus or grass swamps, swamp forests or high-altitude mountain bogs, as well as seasonal flood plains and grasslands. While all wetlands are characterized by impeded drainage, the length, their flooding period, depth water, soil fertility, and other environmental factors vary with different wetland types
What amount of money shall we remain with if NEMA will take part of it and Buganda land board will take a percentage of it?	Buganda Land board will not get a share of your payment. It will be paid separately and NEMA will not be paid because it is part of government. Payment will be made according to market value of land.
You have previously compensated all individuals. Why is it now that you do not want to compensate us just because we are in a wetland?	All affected property in the wetland areas will be compensated.

Consultation with Mutungo Zone I and Zone III community members on 24/11/2016

Community Consultation with Mutungo Zone I and ZONE III	
COMMENTS	RESPONSE
How are you going to deal with people who are no longer affected by the KJE project because of the changes in the alignment?	These people will be re-engaged to be informed of these changes.
We want to know the exact month and date when we expect our compensation because we have waited for over 2 years. This time we are badly requesting that you fast forward the project so that it can be done once and for all.	By 2018 all the affected people will be compensated and they will have relocated to a new locality.
Some people's structures broke down in the period after valuation how are you going to revalue such property now?	We shall only compensate property which still exists on the land and that which was included in the previous valuation.
Work with the Local council leaders so that you know the exact value of land in our area.	Yes, we are going to work closely with the local leaders through establishing local committee to enable decision making throughout the whole resettlement process.
We request that you revalue our property because it has been long since you last valued it.	Valuation is going to be redone for all the affected property so that we can incorporate in the new developments on the land.
Why it that in every place you carry out resettlement, people are never satisfied and they always complain?	Every project has its own problems and difficulties and this is where the misunderstandings come up. We also carry forward lessons learnt from other projects to reduce these complaints.
Will UNRA look into PAPs who have loans and payment that would be affected by the resettlement process?	Provide Proof that loan was taken and values will be made on how much you are affected.
What is the duration of payment from the time of signing the form to the time of actual payment?	After form signing, verification of the documents will be done and approval and then payment is made. Upon payment, a duration of 6 months will be given to you to move.
We are faced with the problem of land grabbing. How sure are we that you are getting the land for road construction and not for opportunistic rich people?	We have been here before addressing issues particularly about the Kampala Jinja Expressway project and land to be acquired will be for the project only.
Are you going to pay us even before we get land titles for the land on which we are on?	70% of the payment will be made to you but 30% of this amount will be given to the land lord since you do not fully own this land.
How can we give you our original land titles before you even compensate as they are our only document showing our legal ownership of the land?	Land titles are taken from you so that they are readjusted to exclude the land which was taken by the project and only indicate what is left.
How are you going to handle the issue of land which is left after valuation but is no longer of use to the land owner?	We shall pay for the whole land in case the remaining part is no longer of use to the land owner.
You are supposed to show us how much money we shall be receiving before we sign because most times we were told the amount very late when payment is being done.	Payment for compensation is a process which involves valuation, form signing and public disclosure where you are told how much money you will be compensated. Signing the valuation forms does not mean that people are in agreement with the compensation but it means that people are in agreement with the properties that have been recorded on the form.

Community Consultation with Mutungo Zone I and ZONE III	
COMMENTS	RESPONSE
We used our land titles and agreements as a way to get loans from the bank. How will you deal with this issue?	Please inform the valuers about this issue and specify which bank so that we can discuss it internally and address the issue.
When will you return to engage us in another meeting like this one?	We shall regularly engage you through your local leaders to inform you of another meeting.

Consultation with Mutungo Zone II and Zone VIII community members on 24/11/2016

Consultation with Mutungo Zone II and Zone VIII	
COMMENT	RESPONSE
When should we expect the assessors to come and do the valuation?	By estimate, the valuers will be here soon about two weeks' time but we shall go through the LCI to inform you when we shall be here. We are also updating our database to include your contacts so that we can inform you directly on the developments in the project.
After the second valuation will you consider the previous one or it will be a supplement.	The old forms will not be valid but valuation is redone to ensure we have a valid form but the previous structures which could have been demolished will be still considered.
Before you begin the project will you transfer the water to our side so that we can also access clean safe water when the actual construction starts?	With regard to utilities, during construction the contractor will work with the utility company to transfer them.
During construction, shall we have access to our homes? For those of us who are not directly affected, we can end up being affected from encroachment on our land. How will this be addressed?	Other access routes shall be established for people to use. The ESIA will consider such issues and provide solutions to mitigate the potential impact.
The road design has sharp corners. What was the intention of putting sharp corners on the high way?	The proposed road is an express road with a design speed of about 120 km/h and on ground. The corners are not as sharp as they are seen on the map.
Some of us were not around during valuation and yet the land is family land. Will we also be included in the valuation document?	We shall come back to revalue the land and determine who the actual owner is for the land. In case of conflicts, your money will be put aside and given to the rightful person after the conflict has been resolved. For family land, you will be asked to have representatives of the family to sign on all documents required.
How shall you handle the issue of absentee land lords at time of valuation? Can we use our local leaders to handle the valuation process?	If you give them the power of attorney, they can represent you. You can also assign anyone you trust to represent you as long as they are given the power of attorney.
We also hope for consideration in valuation so that people get paid for the worth of their property.	A full replacement cost will be used when compensating the affected persons.
The valuation process is not clear about housing aspects considered. For example, do you consider the material used to construct the compound and if access roads will be blocked by the project?	Show the valuers these aspects so that they can include these on the valuation form.
How shall you handle the issue of land users who are not available at the time of valuation and someone else claiming ownership of the land.	These absentee land lords will be valued when they are present and grievance committees will be set up comprising

Which offices can we go to handle land issues and conflicts so that they can solve them?	of legal people, local leaders and a team of UNRA representative in order to handle these issues.
What do we do in case you do not agree with the payment amounts UNRA comes up with?	Go through the grievance management committees to present your issues so that they can be solved, if this fails you can go to court so that these issues are addressed.
How shall you handle properties which cannot be relocated over a short period of time like schools?	You will have to inform us as soon as possible so that you are given more time to carry out your resettlement.

B.1.7 Minutes of Stakeholders Meetings – Private Sector

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Stakeholder Consultation Workshop with The Private Sector for the KJE PPP Phase 1ESIA and RAP Update	
	DATE	21 st June, 2017
	VENUE	Hotel Africana
	MEETING START	0915hrs
	MINUTES BY	Edmond Twinobusingye
	MEETING REFERENCE NUMBER	<i>ATCM/ES//UNRA 002</i>

Attendance Register; Attached

TEXT	
<ul style="list-style-type: none"> The meeting commenced at 09:15 am. Edgar moderated the meeting. 	
Agenda items: <ul style="list-style-type: none"> Introductions Project Overview Feedback on presentation Presentation of ESIA aspects of the project Presentation of RAP aspects of the project Discussion/comments <p>Close of meeting</p>	
Introductions	
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing. 	
Project Overview	
<ul style="list-style-type: none"> Eng. Patrick Muleme, Head of Design at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP. 	
Feedback on the Project Overview Presentation	
Question/Comment	Responses by Patrick (UNRA)
1) Dr Shiraz Meghani (Megha industries) We are worried that our access roads will be blocked and we will be required to use an alternative route which is very far and will affect access to our property. We have engaged UNRA through this issue but we have not got a response yet.	This issue was brought to our attention and our team was asked to review this and formulate possible mitigation measures. All these issues will be holistically addressed and presented for your feedback.
2) Dratte Patrick (Adman Source)	Works will be commenced after compensation has been done for all the PAPs.

Why do you not compensate people before starting project activities?	
How will you also ensure that people will be able to afford the toll fees required to use the road?	Payment will be made for using the road after it has been constructed. We shall not ask people to pay money over and above what they are incurring on the road at the moment.
How will you ensure local employment and sustainability aspects are incorporated in this project?	We have come up with a timeline that incorporates local content. The policy for local content was established by the government and requires that 30% of the works value must be local. This has been reflected in the contract that we shall issue the contractor.
3) George Mabweishano (VIVO Energy) The proposed road tolls on the road are many and this may affect movement and speed on the road.	The toll points will only be at the point of entry. Payments will be made at the exit way.
Can we be given the exact routes for the road or where can we get this from?	We shall provide you with the final road designs once it has been completed. We are currently still working on it.
Elaborate on the fact that slow moving vehicles will not be allowed on the road. Does this include fuel tankers?	Fuel tankers are expected to move at a faster rate so they will be able to use this express way road.
4) Nabeeta (MTAC) Do you have an arrangement with Uganda Land Commission to protect some of the government institutions that have been accessing their properties through this route?	UNRA is not mandated to give away land to other people. We only carry out land acquisition. The valuation and survey process is carried out to ensure appropriate payments are made.
Presentation of ESIA aspects of the project	
Edgar (Atacama Consulting) gave a brief about the consulting Team (Earth Systems and Atacama Consulting) and an outline of the environmental and social studies that have been conducted previously for this project since 2011 and the ongoing process of updating the ESIA to international standards.	
Presentation of the RAP Component of the KJE project	
Juliana (Atacama) presented the RAP aspects of the KJE PPP	
Discussion/comments about the ESIA and RAP aspects of the project	
Question/Comment	Answer/Response by Atacama/UNRA
1) Francis Begombe (Nakawa market) The land on which the Nakawa market is situated was leased from KCCA and so we expect the tenants on the land who are affected by the project will be fully compensated.	We have organised a consultation with the physical planning directorate of KCCA to discuss this aspect.
The vendors who are in an open space are many (over 500). We request for more engagements to be held at Naguru Community centre so that we can discuss compensation issues.	We shall look into this and conduct regular engagements with you in regard to the project. We shall make prior contact and the necessary arrangements will be made.
How will people cross to the other side of the road in places where the road cuts through the land and another piece is left on the other side?	There are circumstances of orphan land where the project developer may opt to pay

	for the whole piece of land so that you can buy more land elsewhere.
What charges will be in place for the toll road depending on the type of car and my destination point?	This will be determined by the concessionaire under the guidance of Government to ensure that it is affordable to the road users.
2) Patrick Drate (Adman Source) The challenge of this project will be the practicability of implementation where there will be circumstances of corruption and a lot of challenges from politicians and the compensation regimes of IFC that are not in sync with the Ugandan system of District rates.	We hope that we can actually successfully carry out this practically. In Uganda, people are used to compensation using district rates but in this project, we shall adopt a full replacement cost method of payment.
How will you ensure that utility services will not be interrupted by works on the project?	During the construction phase, the utility companies will work with the contractor to ensure that these assets are moved appropriately according to the new alignment.
3) Samuel Mukasa (Master Industries) What happens in the situation where you declare an Affected Person and then after several years you undeclared them and they had not put up any development. What happens in this case?	In this situation, a disturbance allowance will be given to the expected Affected Person to try to make up for the land. There is usually a mutual agreement between the two parties.
4) Tolbert Onyango (Kyadondo Rugby Club) Is there any more land which will be required outside the 60 m and from which point do you start measuring these?	In case there is need for any more land, the affected people will be contacted and compensated. Starting point of measurement is at the center of the road and 30 m to the left and 30 m to the right
Is there a working area that will be required for construction as we are located at the starting point? This will help us determine how much land we shall be left with.	This will depend on the final design of the project as it will indicate where to set up the working area to stockpile.
5) Joseph Ssekandi (Uganda Small Scale Industries Association) In which way shall we be affected by the project because our headquarters are situated along Lugogo?	During surveying and valuation, you will be able to see the exact extent of land which will be taken for the KJE.
Awareness should continue to be carried out throughout the project process because people have the right to know.	Stakeholder engagement is key with regard to all project activities and that is why the CLOs are there so that you can forward your issues and they can be addressed. A toll-free number is also available through which you can address these issues.
Our association is an umbrella organisation of many other groups. It may not be easy to explain to other members how this project will be executed and the benefits that will come with it.	As representatives of those who have not turned up, you should relay this information to them so that their feedback can be provided to us. Our engagement will continue throughout the project's lifespan. The issues can be channeled to us or UNRA for clarification.
CLOSURE: The consultation workshop was closed at 1327 hours

Attendance Register: Attached

TEXT	
<ul style="list-style-type: none"> The meeting commenced at 09:05 am. Edgar and Denis moderated the meeting. 	
Agenda items: <ul style="list-style-type: none"> Introductions Project Overview Feedback on presentation Presentation of ESIA aspects of the project Discussion/comments Presentation of RAP aspects of the project Discussion/comments <p>Close of meeting</p>	
Introductions	
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing. 	
Project Overview	
<ul style="list-style-type: none"> Engineer Ochole Moses, a Highway Specialist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP. 	
Feedback on the Project Overview Presentation	
Question/Comment	Responses by Moses (UNRA)
5) Barbra Mwanje (Safe Way Right Way) We are glad that controlled access through fencing of the expressway was considered in the design and also limitation on the types of vehicles that can access the road.	Noted.

Will there be a consideration for a minimum speed for the expressway?	We will not set a minimum speed. By design, the road should facilitate vehicle movements within safety limits.
What does controlling heavily loaded vehicles entail? Will it be the tonnage or will there be a weigh bridge? How will you enforce this?	The concession agreement will require load controls. It will be at the contractor's cost if road degradation occurs from uncontrolled loads. They will need to manage load controls to prevent such road degradation.
Will the design of the expressway be available for external review in case one needs to have a look?	As a PPP project, reference designs are available showing how the project should look like in terms of number of lanes, size and location of interchanges. The contractor may have modifications to the reference designs, although changes should be minimal.
6) George Bogere (ACODE) Considering the expressway will be fenced, will you ensure crossing points are available so as to minimise impacts on local communities?	We provided adequate crossing points where there are existing roads. When crossing an existing route, we provide either an underpass or overpass. Where the intervals are much longer, we may provide additional accesses.
What will the role of UNRA be in land acquisition is concerned regarding the alienation of land as a result of the project?	We are taking the issue of alienation of land into account in the update of the RAP. UNRA is directly involved in assessing, updating and compensating Affected Persons with the support from the CGV office.
7) Fred Tumwine (Uganda Road Accident Reduction Network Organisation) Road accidents are a big cost to the Government. What are your plans to ensure that Civil Society Organisations and other interested groups are involved in reducing road accidents?	We understand the challenges associated with road safety. Currently we have support from Uganda Police to enforce traffic rules. Looking at road users demand and the impact accidents have on roads, we have incorporated measures to design safe roads; such as providing wider roads, additional lanes at trading centers, two lanes for road traffic, and an additional lane for parking and local traffic. For long distances, climbing lanes have been incorporated into the designs. In the future, we are looking at designing roads that are dual carriage ways so that chances of accidents from overtaking and head-on collisions are eliminated.
8) Dr Edward Kanyesigye (UPHSA Uganda Medical Association) What will be the approximate cost of road usage per stretch (any indication of the cost of user charges)?	We carried out a willingness to pay survey in 2015 and 43% respondents were willing to pay to use the proposed route. This was good feedback from the public given the fact that they had no idea what the road would look like. The survey revealed that on average, people would be willing to pay 0.05 dollars

	per km. For small cars, it would be about 0.025 dollars per km or 70 Shillings per km and 7000 Shillings for 100 km and the drive will last less than an hour. The expressway will bring savings in fuel, time and reduce risk of accidents, wear and tear from potholes, and scratches. Depending on what the public is willing to pay and what the project will cost, the Government will partially subsidise so that a reasonable fee is levied on the users.
Why use the word expressway instead of motorway or highway since the term expressway introduces an element of speed and haste (recklessness).	We have a hierarchy of roads in access roads, highways, expressways and motorways. The latter are usually on the higher order. The KJE is essentially a motorway because of its design and specification; it is just below a freeway.
9) Dr Julia Baker (Balfour Beatty) Many of the infrastructure projects in Uganda are committing to biodiversity targets to avoid net loss. Given the impacts on sensitive habitats (Forests and Wetlands), does this project have a goal or target for biodiversity net loss or even net gain?	The project has been realigned to completely avoid the Mabira Forest. A feasibility assessment of the project was done in 2012 and this has been continually updated with respect to environmental and social issues. The project is fully committed to IFC standards regarding environmental protection and sustainable development.
Presentation of ESIA aspects of the project	
Edgar (Atacama Consulting) gave a brief about the consulting Team (Earth Systems and Atacama Consulting) and an outline of the environmental and social studies that have been conducted previously for this project since 2011 and the ongoing process of updating the ESIA to international standards.	
Discussion/comments about the ESIA aspects of the project	
Question/Comment	Answer/Response
1) Grace Tukahirwa- Uganda Road Sector Support Initiative Elaborate about the grievance mechanism and its structure.	Edgar-Atacama Consulting The grievance system is established by UNRA to log and manage grievances concerning its projects. For the KJE, there will be a grievance management plan implemented taking into account the social economic setting of the project areas.
Is there a gender desk specifically for Children and women?	
2) Andrew Byaruhanga-Human Rights Network Uganda Will the Kampala Southern bypass be tolled?	Moses-UNRA The Kampala Southern bypass will be tolled.
What are the dimensions of the Kampala Southern bypass?	Nigel-Earth system The KSB is a two by two lane. The width will vary with the terrain along the ROW since some sections will need cutting and filling while other areas will have interchanges that will require more land.

<p>3) Godfrey Mafabi -TASO Uganda Provide further details about health aspects regarding HIV in relation to the project.</p>	<p>Nigel-Earth system Community health and safety is an important aspect for the ESIA, including issues associated with HIV and other health ailments. The ESIA and ESMMP will outline strict requirements to ensure the project is constructed and operated in a manner that ensures community health and safety in line with Ugandan law and IFC Standards.</p>
<p>4) Beatrice Kyasimire-WCS We have a COMBO Project which aims at reconciling Government development with conservation. One of the components that we have considered is to look at best practices by agencies, companies, and interested groups. We have interacted with UNRA and are about to finalize a MOU so that we can be engaged on projects such as the KJE. We have technical expertise on offsets, methods and tools to use and given this chance the COMBO team will have an input.</p>	<p>Noted.</p>
<p>5) Grace Nangendo-WCS Many of the roads are going through wetlands which are considered as free land. What mechanisms are in place to protect them? For example, Lubigi Wetland is being depleted by a road blocking important waterways and communities encroaching into the swamp. Who is responsible for ensuring that communities do not destroy remaining wetlands? How does NEMA and UNRA work to protect the remaining wetland?</p>	<p>Nigel-Earth system The issue of wetland destruction is one that needs to be solved broadly across Government. However, what this project needs to do is avoid exacerbating the issue. This requires careful management and good thinking around the offsets. The wetlands can be designed in such a way to identify core areas within them and some areas that can be used for other purposes.</p> <p>Moses-UNRA The option of using viaducts will be considered to avoid the road blocking flow within the swamps.</p>
<p>WCS has worked with lead scientists to review the list of IUCN listed species for Uganda under different taxa. A national red list has also been developed and is with UWA. These documents are undergoing the process of ratification. It would be good to refer to this list. We have worked with the University of Oxford in developing key biodiversity areas for Uganda. There are materials that would be useful for this project regarding IFC PS6.</p>	<p>Edgar-Atacama Consulting From the experience of WCS, there is so much we can learn from you.</p>
<p>6) Kigenyi Wansolo–Busoga Kingdom During the construction phase, truck drivers are usually not mindful of other road users. Efforts should be made to reduce road incidents caused by trucks.</p>	<p>Edgar-Atacama Consulting The concessionaire will have responsibilities and conditions outlined in the ESIA to implement a truck management plan. UNRA will actively monitor and engage with the local community about road safety aspects.</p>

<p>We have a process in Busoga of documenting and preserving traditional medicines. Construction of the expressway will involve removing large tracts of vegetation. Does this project have plans of helping us preserve, protect and plant some of the vegetation that will be removed?</p>	<p>Nigel-Earth system</p> <p>In road projects like the KJE, best practice is to re-vegetate and to make sure that the amenity of the expressway is good. We can be creative and have landscapes that not only protect biodiversity but also be of traditional use and help with shielding visual impacts along the expressway.</p>
<p>7) Alice Namuli-Uganda Law Society</p> <p>Will the legal advisory team that will be required, be to IFC, UNRA or to the consultants? At what level do you expect to bring the legal advisory team on board?</p>	<p>Nigel-Earth system</p> <p>The Atacama team has a legal specialist and understanding Ugandan law is very critical.</p> <p>Edgar-Atacama Consulting</p> <p>UNRA will have a legal team. IFC as the financial advisers will also have their legal team. On the RAP side, there is a legal specialist that will look into verification of titles, compensation issues and in the ESIA itself we shall look into policy aspects, standards and regulations. Legal implications for each aspect/impact considered will be articulated.</p> <p>From an ESIA point of view, the legal advisory team is already on board. For the RAP, in most cases the Affected Persons have to be known first before verification and then disclosure after which the legal team can be engaged.</p>
<p>8) Eng. Michael Pande -UIPE</p> <p>I need clarification on the phasing of the project. After phase 1 is completed at Namataba, how long will it take before phase 2 works begin? If this is the case, how will the tolling be done for purposes of having it as one integrated project?</p>	<p>Moses-UNRA</p> <p>Phase one is projected to take three years. Then depending on when land acquisition will be completed, phase two will start and construction will last two years. Tolling will start when phase one is operational. Phase 1 will start operation before phase 2. The project has been designed in such a way that at Namagunga, the project will have a terminus into the current Jinja road to facilitate operations before phase 2 can be finished.</p>
<p>Have you explored the wider impacts of the road? Considering the economic activities such as roadside vending in Mabira, the expressway is likely to impact on these businesses.</p>	<p>Moses-UNRA</p> <p>As a toll road implies, it is more of a mobility facility. There will be impacts to be assessed however these are not significant to the extent of wiping out businesses from the existing Kampala-Jinja road. In the feasibility studies, there was an option to develop the current Kampala- Jinja Road. However, the impacts would have been far greater on existing businesses, which is why the KJE project was adopted.</p>

How will you protect this expressway from factories that are encroaching along the proposed ROW? These usually crowd along the road and cause flooding issues by blocking waterways and drainage. For instance, this has happened in Kyambogo.	Moses-UNRA We shall have the ROW fenced off to avoid encroachment. There is a proposal in the Road Bill that roads of this type will have a wider ROW of up to 80 m. Once approved, activities in the ROW will be regulated to stem encroachment and the effects of flooding.
Presentation of RAP aspects of the project	
Juliana (Atacama consulting) presented the RAP component of the KJE PPP	
Question/Comment	Answer/Response
1) Raymond Tumuhairwe-UWASNET For Affected Persons that are not willing to shift or be resettled, what is the plan?	Juliana-Atacama Consulting The constitution allows Government to expropriate land involuntarily for projects that are for the public good. Most projects try as much as possible to avoid this scenario. Moses-UNRA This is the reason why the Government wants to come up with a law to stem unnecessary delays to projects due to disputes with Affected Persons not willing to move.
2) Grace Tukahirwa-Uganda Road Sector Support Initiative There are a number of planned projects nearby including the SGR and other expressways. Why cannot a shared corridor be secured and these projects be co-located to cut costs of compensation and EIAs.	Moses-UNRA This would be ideal and the most desired scenario. However, the challenge is that planning for these developments are not always in sync and most of the development is demand driven. For instance, if other plans are not forthcoming, the KJE project still has to takeoff. Over time, there will be streamlining and some corridors will be demarcated. We are thinking of a corridor to the oil region that will also cater for the pipeline roads as well as the northern corridor from Malaba to the border with Rwanda.
How are you planning to protect children who are a vulnerable group especially during construction when they go to schools?	Juliana-Atacama Consulting Children will be considered as part of the vulnerable groups. This will also include families headed by children.
3) Fred, International Accountability project Is there a provision of resettlement as a project on its own, considering that there is going to be enormous issues of resettlement between Shoprite and Kyambogo.	Juliana-Atacama Consulting Resettlement is going to be a big component on its own however it will be considered as part of the larger project.
There is emphasis on Kasokoso due to the issue of bibanja owners or bonafide/third tier rights and mailo land which presents complexities around land ownership as well as issues of management of wetlands. Resettlement and compensation and the	Juliana-Atacama Consulting Issues of land ownership has never been easy. This will be a challenge that the legal team will sort out.

multiple layers of rights to land ownership are likely to complicate matters for the project.	
4) Gloria Kirabo-Safeway consulting How is UNRA working with the National Adaptation Plan to ensure that climate change and its impacts will not affect the project and its long-term sustainability?	Richard-UNRA A number of climate change aspects are addressed in the design as mitigation and adaptation. The key issue is the impact of rainfall. Rainfall relates to increased runoff and water and the roads drainage design will manage this. The design aspects have taken into consideration climate change projections. These will continue to be reviewed and updated. As part of the ESIA studies, there will be modelling of runoff in the ecological studies.

B.2.2 Records of Key Discussions with Stakeholders

Introduction

Pursuant to the EIA Regulations, 1998, stakeholders must be consulted as part of the Environment Impact Study with the objective of improving project design and incorporating the views of the stakeholders in all project activities where possible.

During this study, it was found that consultations within the urban centers (especially Kampala City and Mukono Municipality) were difficult as most of the potential respondents were either too busy or had little interest in being interviewed. Otherwise the traditional approach within urban settings may not achieve the desired purpose through community or stakeholders' meetings as is the case with consultations in rural areas. It is for this reason the team decided to use targeted questionnaires which respondents could fill at their own timing in addition to one to one interviews. Subsequently the use of questionnaires has been an important part of the consultations in addition to key targeted interviews on a one to one basis. A number of respondents completely refused to be consulted (e.g. Wavah of Spear Motors among others). In this case the team apologized to them and requested them that they will be returning during the RAP should their properties' be among those to be impacted upon by the road development.

The Tables below present the issues and concerns raised by various stakeholders and respondents.

Minutes prepared and issued by URS Infrastructure & Environment UK Limited Parklane Courts Plot 26 Nakasero Road, Kampala, Uganda.

OCCUPATIONAL SAFETY AND HEALTH DEPARTMENT OF THE MINISTRY OF GENDER, LABOUR AND SOCIAL DEVELOPMENT

Date held & place: OSH Depat, Kampala, 20/09/2011

Name & designation	Summary of discussion and Issues, Comment Raised
Ms Khayongo Barbra Clara Senior General Health Inspector, Tel +256 782 454245 or +256 702 194617	The team leader introduced the Kampala Jinja Road Dueling subject. He wished to know the main environmental concerns that the lead agency would be interested in highlighting during the ESIA study. In response the team from Occupational Safety and health observed the following: - They are supportive of the project and would encourage that the measures highlighted under the Occupational health and safety docket are observed. In particular the following to be done: ; <ul style="list-style-type: none">• The Contractor should have a Safety and Health Policy Document that will be available to the Commissioner on request;
Mr. Yiga Joseph Flavian Senior General Safety Inspector, Tel +256 772 423390 or +256 702 423390	<ul style="list-style-type: none">• The Contractor should have in place a risk assessment and Safety & Health management plan;• Prior to commencement of work, the Contractor will register with the Department of Occupational health and safety using Registration Form No. OSH FORM. F11• The Contractor will notify the Commissioner for Occupational Health And Safety on commencement of the works;;• Statutory plants and Equipment (Fork lifts, heavy drills etc) will be certified by the Commissioner, and the contractor will make a plant Inspection requisition using OSH, Form No. F. 107 .• There should be a PPE programme in place such that the following should be recorded: -<ul style="list-style-type: none">○ Type of equipment given○ The date and time it is supplied○ The person to whom it is given (he/she will sign for it);○ The next time the PPE will be inspected;○ When are the replacement times (e.g. for elements, etc);

OCCUPATIONAL SAFETY AND HEALTH DEPARTMENT OF THE MINISTRY OF GENDER, LABOUR AND SOCIAL DEVELOPMENT

Date held & place: OSH Depat, Kampala, 20/09/2011

Name & designation	Summary of discussion and Issues, Comment Raised
	<ul style="list-style-type: none"> During construction, a competent, qualified designated Safety and health officer should be appointed and should be fulltime on the project road during constriction; Both the workforce and management should be sensitized about the labour laws and should be well acquainted; It is recommended that a premedical examination for the workers most at risk be conducted and this should be followed by a routine medical examination during the works with a final post medical examination. This is good because it protects the contractor in case of disease outbreaks among the risky workforce; An accident record shall be kept with the contractor, and if a worker is kept out of work for three days due to the accident, such will be reported to the Commissioner; The accident record will give monthly disaggregated data giving detailed on the accident, as well as the treatment including first AID; An independent safety and health committee should be put in place. This committee should comprise of members from each section of the workforce each of whom will have been voted on to the committee by workers without interference from the management; The committee should have regular/monthly meetings and a copy of the minutes of the meeting will be sent to the Commissioner for Occupational health and safety; The use of child labour on any of the working sites is prohibited;

SHELL NAGURU.

Date held & place: Shell Naguru, 17th 08 2011

Name & designation	Summary of discussion and Issues, Comment Raised
Miss. Twinamasiko Charlotte, Cashier	This property belongs to Shell Uganda. We, Enjoy (U) Ltd, are here as tenants and our boss is only a dealer. I feel that Shell Uganda should be contacted for any concerns and views in regard to the project.
Mr. Etudat Peter	The project will affect many Ugandans. Many people working along the road have to lose jobs when the road is widened. Even our forests like Mabira will be affected. About 100 people eke a living from this premise. Casual workers, shoe sellers, mechanics and pump operators will all lose a source of living due to loss of business location. The road is used by almost all Ugandans from the East

NAKAWA MARKET VENDORS ASSOCIATION

Date held & place: Chairperson's office, 17th 08 2011

Name & designation	Issues Raised, Comments and fears	Responses by Consultants to issues raised
Lutaya Ibrahim, Member	It's good news that the government wants to expand the road but many problems will be

Date held & place: Chairperson's office, 17th 08 2011

Name & designation	Issues Raised, Comments and fears	Responses by Consultants to issues raised
Nakawa Market Vendors Association	<p>encountered. Government may need to negotiate with Kampala City Council Authority which is responsible for this market. There many businesses of different types along the road which will be lost as a result of road expansion. Car bonds will be the most affected though other road side business like seedlings gardens and airtime kiosks will be affected. About 150 vendors in Nakawa market operating near the road will be affected.</p> <p>Despite all this we want the road to be expanded because of the difficulties we are experiencing as a result of the current narrow road</p>	

UTODA COORDINATION OFFICE, NAKAWA PARK

Date held & place: Nakawa Park, 17th 08 2011

Name & designation	Issues Raised, Comments and fears	Responses by consultant to issues raised
Mr. Lwasempijja Umar.	For the good of Ugandans, the road should be widened. I'm saying this on my own behalf and what I'm saying does not represent UTODA's position on the project. This is a government program and in my view we should support government on such a good project. UTODA will be lose the taxi park but other businesses will also be affected. The number of people owning cars is increasing. Nowadays some families have more than two cars. Some have cars for each family member.	
Mr. Mutangara Dennis	Upgrading the road to a dual carriage way will ultimately be for the benefit of all Ugandans. This park is small and I think UTODA can afford to lose it for development. The contactors are my biggest concern. Why do they narrow sections along roads? There are some sections along the Northern By-pass that are very	The centers that are growing along the Masaka road have occupied the Road Reserve. The people demand high compensation which the Government is not in position to pay.

UTODA COORDINATION OFFICE, NAKAWA PARK

Date held & place: Nakawa Park, 17th 08 2011

Name & designation	Issues Raised, Comments and fears	Responses by consultant to issues raised
	<p>narrow. There are also narrow points on Masaka Road.</p> <p>The Government's problem is it's usually aware of such centers and other developments going on in the road reserve but nothing is done to stop the developers early enough. For instance as we speak, someone is constructing in the road reserve near GAPCO in Wandegaya. There is no action being taken despite the building being near the road where everyone can tell that it's within the road reserve.</p> <p>I would like to know if there are any considerations for the disabled on the proposed wide road. All current roads have no consideration for the disabled. As a result such people have endured great difficulty in using the roads. Crossing is the biggest concern that the designs should have in mind. They are in many times left without a choice so the end up paying Boda Boda riders to cross over to the other side of the road.</p> <p>The deaf, lame and the blind are Ugandans and should be able to utilize such infrastructure like all other Ugandans. I suggest that all new roads are designed to accommodate the needs of the disabled in regard to road use.</p> <p>I would propose that the option of expanding the existing road is chosen because opening up a new road is costly. Widening this road will not take as much time as a new road.</p>	
Diana Kamahoro	<ul style="list-style-type: none"> • There should be special consideration for other road users especially pedestrians. There are hardly any crossing points on the existing roads. This should be put under serious consideration for all new and planned roads. • The other concern is that of road infrastructure. Road signs are missing on many roads including new roads. We are aware that they are vandalized by scrap dealers and individuals who want to make quick money by selling scrap. Government should put in place a policy to arrest and charge all those involved in destroying road infrastructure. 	

UTODA COORDINATION OFFICE, NAKAWA PARK

Date: 17th 08 2011

Name & designation	Summary of discussion and issues raised
Mr. Muyingo Mechanic Nakawa	We are aware of the road project. We heard of this project five years ago. There is nothing we can do besides we also want to see Uganda develop. The land lords and business owners are all aware that they are here temporarily.
Premier Complex Mr. Gulzar Singh Mr. Tejawani Singh	If the option of widening this existing road is favored the government should be in position to compensate us because we bought this land and developed it. Properties along the road are prime and thus compensation may make this option more expensive than the overall cost of the road. We shall raise more concerns when we receive the questionnaire.
YAUSA Mr. Basit Hassan.	This project is good for national development but the small roads have been neglected like the Ntinda Kiwatule road.
Coin Limited Inland Car Depot. Mr. Kyewalabye John, Accountant.	My bosses are out and I don't have the mandate to speak for Coin Limited. I'm speaking as a concerned Ugandan who travels on the Kampala Jinja highway. Personally my home is in Mukono but commuting is increasingly becoming difficult for me to and fro. The traffic jam is there at all times even when I leave home as early as 6:00 am. A lot of time is lost in the traffic. At times you may travel at 10:00 Pm you will still get caught up in the jam. The Government has ignored options that can reduce on traffic jam along the Kampala- Jinja road. The government should in the mean time work on the old Jinja road through Namilyango to Nambole. The government can construct a fly over from Kyambogo to UMA show ground as an intervention to the current traffic jam. In Mukono, houses have been built very close to the main road. Even if you were to compensate people wrangles will remain and some people may not want to be compensated.
Mr. Kigemuzi Ibrahim, Manager.	If the alternative routes are developed, it will bring development to those new areas which the road will traverse. The four proposed lanes on either side may be inadequate with time because more people are buying cars everyday. We can have two roads, the existing one and a new one, which I feel will accommodate the increasing traffic.

MUKONO DISTRICT.

Purpose of meeting: Consultative meeting for the proposed upgrade of Kampala Jinja Highway

Date held & place: 19th Aug 2011, Mukono District Headquarters

Name & designation	Summary of Issues Raised
<p>Mr. Kunobwa James.</p> <p>Speaker of Mukono District council/</p> <p>Resident of Mukono</p>	<ul style="list-style-type: none"> • He said that we have been lagging behind in accessibility to good high way roads and this could be one that can make that possible. • Has ever asked the former minister of works Hon. John Nasasira at the commissioning of the Seeta Namilyago road if there would ever be need to expand the lanes along Jinja-Kampala road. • He also said that development is good but it should not supersede the interest of the humans as presented by the type of the road necessitating braking of many houses leading to high cost of compensation. • UNRA/ road designs should look at the damage that will be caused to most of the property along the road such as Kireka, Bweyogerere, Coco Cola, Seeta, Mukono, and all the schools and industries along the road. • He sited example of the city of Venus in Italy that was built in 300A.D and its all in water however the same buildings are still standing to date. • He suggested that we should merge the current lanes into one way carriage build another road to the other way carriage. He said the current road can truly be expanded into a three lane without huge compensation however that will make it aw ay road and the other way road should be built separately especially the old Jinja road. • The need to train more and efficient Highway engineers other than putting civil engineers to supervise the trained European highway engineers who contract this road works in companies like saline, stirring etc. • We also face the problem of lack of the local engineers involved in road construction. This has led to the use of less informed/trained people in lead agencies to supervise better trained/informed engineers in the companies building the roads. • The project is great however rejects option one in the same design leading to high costs of compensation. And destruction of property along the road. • The old Jinja road still exists why we don't develop it into a modern and better road. The southern bye pass should be abandoned because of its impacts and the likely ripple impacts that it causes secondary development along the new road can endanger Mabira forest and Lake Victoria. • Its better to avoid compensation, political wrangles, witch hunts and he believes that all this needs to be transferred to design appropriate technology by use of pillars to raise the road along wetlands in the southern by pass other than to pursue the Jinja-Kampala road. These built columns will allow water, crawling animals and other reptiles to be protected. • The existing road is okay they should add it up with one or more lanes however open up another road to support it so as to achieve the objective of reducing traffic along the road. <p>NB: there is need for all of us to see Uganda in more than 50 to 100 years from now own and this can make us plan and invest better. While thinking and planning the eight lanes we need to also think of junctions that join these lanes as they could take about 4 acres of land to construct a junction.</p> <p><i>The copy of the maps and questionnaire was left behind and will be followed by a soft copy through an email. The maps will be collected from him after one week.</i></p>
<p>Mr. Muwumuza Asuman.</p> <p>Minister of Works.</p> <p>0772 947560</p>	<ul style="list-style-type: none"> • My opinion is upgrading of the existing road is best option. The only worry is compensation and what people with structure especially storied buildings close to the road do. I feel that expanding the current road to a dual carriage way will puts us in the lime light in the region. • If another option is chosen, the government should still expand Kampala Jinja highway. If its 8 meters the carriage should be expanded to at least 12 meters though more than that will be better. • The government should compensate people now and acquire the 72 meters today even if they go for another option. In future when the is enough money the road can always be upgraded.

MUKONO DISTRICT.

Purpose of meeting: Consultative meeting for the proposed upgrade of Kampala Jinja Highway

Date held & place: 19th Aug 2011, Mukono District Headquarters

Name & designation	Summary of Issues Raised
Mr. Alinaffe Christopher Mukono municipality Engineer	<p>The district engineer was not in office however the team was able to find the Municipal engineer. The engineer is also a resident of Mukono district.</p> <ul style="list-style-type: none"> • Compensation for option one will be expensive. • Maintenance costs of huge and large highways may become challenge full leading to traffic jams due to one pothole that can't be fixed. • There is need for two roads to Jinja. One of which should the existing road which should be maintained and choose another from the available options. • Lessons should be taken from Northern bypass failure which was meant to divert heavy trucks and yet Uganda Revenue Authority offices are in Nakawa where most trucks get clearance. As a result the bypass has not achieved the intended purpose of reducing traffic congestion as the trucks have to follow the existing road. This is also made worse by the ware houses in Kireka, Banda, Kyambogo, Ntinda and Nakawa; leading to high traffic due to broken trucks along the road. <p><i>The hard copy of the questionnaire was left behind and will be followed by the soft copy for both the district and municipal engineers to fill in.</i></p>
Date	21 st 08 2011
Name & designation	Summary of discussion and Issues, Comment Raised
Mt. St. Marys College Namungu:	<p>The team was able to meet with the school teachers on duty and a hard copy was left behind for the head teacher to read through and give her comments. However this was also to be followed by a soft copy that would be sent by the team leader through an email.</p> <p>One of the staff members sited an incident where the interview team arrived at her parent's home to conduct the interview and they really got scared of what would happen to them since they are old and have nowhere else to relocate though compensated. This gives her parents pressure.</p>

DATE: 21ST 08 2011

Name & designation:	Summary of Issues and Comments Raised
Lugazi Town Council	<p>The team was able to meet with the town clerk and the Mayor of the town. The hard copies of the questionnaire were left for both people to fill and the team leader was go back and pick up the hard copy by Wednesday. This is because they could not use their internet and proffered to use the hard copy.</p> <p>However the following points where raised by the dual;</p> <ul style="list-style-type: none"> • There was an oversight when designing the Northern bypass to start from the Nambole and there is need for a longer northern bypass so as to reduce on the congestion along Jinja road. • There is need to light up all the roads so as to reduce on the rate of accidents that occur on our roads especially at night. Street lighting especially at black spots will go along away to ensure road safety especially at night that can save lives.

DATE: 21ST 08 2011

Name & designation:	Summary of Issues and Comments Raised
	<ul style="list-style-type: none"> The benefits of doing a road to its best design that takes care of all the social and environmental aspects should not be tasked to money but to the quality and its benefits of the road to the people. We need to change the road furniture (road signs), we have discovered that all the metal road side are being ripped off and then sold off as scrap. We need to look at the alternative sources of road signs such as wood and hard plastic that can not be recycled. This is an urgent need because some roads do not have any signs and this is also contributing to the many rampant road accident. The road design should take care of the sensitive ecosystem such as pockets of wetlands and rain forests that the road is to pass through so as to achieve sustainable development
Njeru Town Council:	The team met with the acting town clerk Mrs. Lwanga M. a hard copy was left behind and it is to be picked on Wednesday just as those of the Lugazi town council. This is because ICT has is just not in this part of town so email is not easily accessible.
Nile Breweries:	The team was not able to see the MD however the hard copies were left behind at the secretaries to be forwarded to the MD and the team is to go pick them on Wednesday. The team leader is also to follow up with the contact person to get the email of the MD so as to forward the soft copy that would enable him fill the questionnaire with ease.

BUIKWE DISTRICT.

Date held & place: Buikwe District Headquarters , 8th-9-11

Name & designation	Summary of discussion and Issues, Comment Raised
Mr. Nsubuga Kyewalyanga Minister for Education	<p>I'm wondering why the government is coming up with all those options when there is already an existing road.</p> <p>Response</p> <p>There are several reasons as to why government is looking at three options on this project. We are looking at future developments and evaluating other considerations like the approximate costs associated with each option. In the end the government will go with an option that is cost effective.</p>
Mr. Olara Johnson, District Road Inspector	<p>He thanked the team for visiting the district and engaging the technical staff on the proposed road project. The road inspector felt that this will foster cooperation between the district and project developer. He said that the project was an overdue intervention to reduce on traffic jam along the Kampala Jinja Road and reducing the distance to service centers.</p> <p>He requested that the team avails him project maps for further comments on the project.</p>
Mr. Kigongo Mathias LC V Chairperson	<p>The district is in the process of securing a grand to expand Kawolo Hospital. I was informed of the road project during a meeting at the hospital and since I had not officially informed about the road project I promised that I would talk about the hospital expansion program if I met the UNRA team. The hospital plan of expansion is towards the existing road which means it will not be possible to acquire the required land on the left side of the road where the hospital is</p>

BUIKWE DISTRICT.**Date held & place: Buikwe District Headquarters , 8th-9-11**

Name & designation	Summary of discussion and Issues, Comment Raised
(14 th Sept)	<p>situated if government goes for upgrading the existing road. However the land can be acquired from the right hand side of the road. The road should be expanded on the southern side of the hospital.</p> <p>There is a shorter option than the ones suggested which from my opinion would even be much cheaper. Government is currently upgrading Kisoga- Najja- Nyenga road which connects to Nytil in Jinja to bitumen standard. There is another section of the road from Kisoga to Katosi which will be upgraded as part of bigger project. There is tea Plantation at Ntenjeru along the stretch to Katosi which provides a shorter gateway to Bina Mutungo. This will be a much cheaper option since it is a shorter route, the properties there are still relatively cheaper and works are in their initial stage.</p>

The following comments from key informants have been derived from returned questionnaires that were administered to these institutions. Some individuals have raised concerns on an individual basis and not as the official stand of their institutions. Individual comments were not obtained by means of questionnaires but rather face to face interactions. A few of them were interviewed on telephone. As such a summary of issues raised by individuals have been presented in the previous matrices. The names presented in table below are for people who signed the questionnaires on behalf of their institutions.

COMMENTS FROM KEY INFORMANTS

Name	Title/Designation	Comments	
Directorate of Environment Affairs, Ministry of Water and Environment			
Mr. Paul Mafabi	Director, Directorate of environment Affairs (discussed on phone and draft document sent to him by email)	<ul style="list-style-type: none"> • There is need to investigate an option which does not pass through Mabira forest. • Besides wetlands are all under attack since all developers think they are free land. On the contrary, wetlands are public land which have an important conservation role. • The Kalagala Offset SMP should be incorporated in the road project and an equivalent amount of destroyed forest should be replanted; • Should consider compensating for the wetland taken so that that money can be used to restore other degraded wetlands; 	
Nature Uganda			
Diana Nalwanga	Nature Uganda, Research and Monitoring Coordinator	<ul style="list-style-type: none"> • There is need to minimise unnecessary impacts; • Since the planned road will pass through the productive part of the Mabira CFR, it normal for the ecology to be continuously changing because of the production activities; • For road kills, let us the Road Reserve remain clear to provide adequate visibility to avifauna and other wildlife so as to avoid knocking speeding motor vehicles; 	
National Forest Authority (NFA)			
Paul Buyeera Musamali	National Forest Authority, Director Corporate Affairs, NFA	<ul style="list-style-type: none"> • The NFA Management Plan will need to be reviewed to accommodate the development; • There are too many projects within the CFR environs which will need to be accommodated within the designs; • There is a fear that the road will take encroachers closer to the forest and this must be carefully considered; • Let us have an offset by planting another forest either within the degraded part of Mabira CFR or any other CFR that is degraded; • NFA is currently habituating the Monkeys within the CFR and the development may disturb the habituation exercise : - so it has to be done further within the forest; • There should be no stopping in the CFR since stopping leads to people using the CFR as their toilet leading to spreading of diseases to both wildlife and people; 	
Department of Biological Sciences, Makerere University			
Eric Sande	Head of Department of Biological Sciences and Expert on	<ul style="list-style-type: none"> • The Nahans Francolin is a truly forest bird and stays , breeds and roosts within the deepest part of the forest where the trees have large buttresses. It is unlikely to be comfortable within the degraded part of the forest especially where the proposed road will pass; 	

COMMENTS FROM KEY INFORMANTS

Name	Title/Designation	Comments	
	Avifauna, Makerere University	<ul style="list-style-type: none"> The bird, which is endangered, is most likely to be within the strict nature reserve and could occasionally come to the production area to forage; It is not common for birds to be knocked buy speeding vehicles unless they have perched on the road to eat some dropped food; 	
MTN Uganda			
Mr. Kigongo William 0312 120003 MTN Towers plot 22 Hanington Road.	Manager Wire line Access Planning	<ul style="list-style-type: none"> Most of the land along the proposed corridor is commercial for the Kampala- Mukono section and mostly residential for the remaining 72 Km to Jinja. As far as MTN Uganda is concerned, the effect of both options 1 & 2 to our underground cable infrastructure will be the same given that fact we are located in the 30 m RoW of the existing road. It is difficult for us to accurately assess any positive socio-economic impact during road construction except for the jobs that will result from this project. We anticipate better traffic flow along the widened highway. Given that our underground fibre cables that are going to be affected by this project carry the bulk the bulk of our traffic to the East and act as our gateway to the international submarine network through Kenya, we would want the compensation process to be fast tracked to give us ample time to relocate with minimal interruption. This is a very good project and it will go along away in improving traffic flow along the Northern Corridor. 	
Airtel, Uganda			
Mr. Lubuulwa Joseph. Airtel House Plot 40 Jinja Road Tel: 0752603882	Environmental & Social Management Specialist Manager	<ul style="list-style-type: none"> Both residential and commercial but predominantly land use is farming and emerging small scale industries. In the recent past, commercial activity has increased drastically in areas along the road and this has had the net effect of making the road inadequate for both motorists and pedestrians. Our business is mainly the provision of mobile telecommunication services. The impact we are likely to face is at the various base station sites (most commonly referred to as masts) above ground and fiber optic network (below ground) with the latter facing a bigger risk since any form of excavation would mean a possible interruption of the fiber network. Option 2 is probably a better proposal because there are more opportunities to have a wider road carriage and the areas there are not as developed as the existing road (option 1) so you are bound to encounter less disturbance during road construction and resettlement of homes. Positive impacts envisaged Associated job opportunities and drainage improvement. Less traffic congestion and reduced car exhaust build up during lengthy traffic jams; better distribution of land use and improved road access for both farming and small and medium businesses. 	

COMMENTS FROM KEY INFORMANTS

Name	Title/Designation	Comments	
		<ul style="list-style-type: none"> • The developer can consider improved road design like wider shoulders, more lanes for heavy commercial vehicles, and better storm water drainage especially at sections that cross over or modify existing water bodies/wet lands. • The local communities can benefit from less dust pollution and faster delivery of commodities and services arising from better vehicular flow. • The project is very critical for the country and the East African region as a whole since it forms a major part of the goods supply route to Kampala and others regions of the country in addition to movement of the population and associated services. Therefore any improvement of this road is very welcome. • 	
Uganda Electricity Transmission Company Limited, UETCL			
Mr. Muteesa Edward & Team	SPO UETCL	<ul style="list-style-type: none"> • The land use in this area is a combination of both residential, commercial and subsistence agriculture as you move from Kampala, through Mukono to Jinja. The recent trends are that the formerly rural agricultural land in the area of Mukono, Seeta and Lugazi are being turned into small residential plots by the property agents. In some areas, large farmlands are evident although not many. • On option 1--This option presents better traffic flow for the wider Kampala area but the land take is bigger too.(from Kampala to Bweyogerere) as opposed to Kampala to Kyambogo. Considering that both sides of the existing road are heavily settled with commercial buildings and utility infrastructure, this will be a bog challenge in terms of cost offsets. • On option 2-- This option presents a limited opportunity for traffic flow from Kampala to Bweyogerere as it is wide from Kampala to Kyambogo. However, in terms of disruption of businesses and cost offsets, this may be a cheaper option. • Specifically during Road construction, a lot of impacts are anticipated, some positive while others negative. Broadly though, the negative ones include disruption of the economic activities along the highway (roadside markets, carpenters, sand miners, truckers, super markets, timber dealers, commercial structures etc, while in terms of traffic flow, the disruption will be immense and will ultimately reflect in the speed of delivery of goods and services. • During this time(operation and maintenance), although people will have settled elsewhere and some attempting to settle along the new highway, there will be limited business opportunities considering that the high way will have traffic management restrictions like limited Tee –offs and limited stoppages which would otherwise avail marketing opportunities to roadside vendors. • There will be limited accessibility to neighbouring residences this being a highway and not a network of access roads. 	

COMMENTS FROM KEY INFORMANTS

Name	Title/Designation	Comments	
		<ul style="list-style-type: none"> In some areas, there is need to include market places by designing occasional tee –offs to these markets but these need to be put in strategic places not to undermine the overall objective of increased traffic flow. Additionally, accessibility to residential areas needs to be planned well, especially in places like Bweyogerere, Seeta and Mukono Equally important is to design large cable trenches for utilities on the shoulders of the highway to avoid the current trend of digging up roads for cabling or pipe works. The project is a very good proposal but there is need to explore other alternatives not necessarily following the existing carriageway. It would be prudent to explore new areas along the edges of wetlands where human activities are limited. There are proposals for rural electrification, rural road networks in the areas between Mukono and Jinja and thus intensive consultations need to be made with the concerned entities. Specifically, for UETCL, there is a proposal to extend high voltage electricity transmission from Namanve to the southern end of the proposed industrial Park and this need to be put into consideration. In other areas, the proposed Highway will interfere with the existing HV network from Owen Falls Dam to Kampala. Here, issues of routine maintenance need to be put into consideration while designing the highway. 	
Mr. Othieno John	Principal Environmental Officer	<ul style="list-style-type: none"> Roads can co-exist with transmission lines as long as they are parallel and not very close or when the road crosses the line. A major concern is clearance, the height between the ground and the lowest conductor should be 6m. The chosen option should as much as possible avoid wetlands and forests. UNRA should avoid an option that will require ecological offsets. He felt that compensation will be exorbitantly high if the existing road is a preferred option. 	
Kampala City Council Authority KCCA			
Mr. Rwenfuna Abel 0712 733277 KCCA, Planning Division.	Physical Planner	<ul style="list-style-type: none"> All land uses have a commercial face. Mainly, it is outright commercial land use. Residential land use takes on rental function and therefore becomes commercial. In a nutshell, it is both. The best option is to purchase/ acquire all the land need at ago. i.e. all the 72 meters should be purchased at ago so as to avoid future compensation when developments along the reserve have become too expensive. In the event that acquiring all the 72 meters is too expensive, you ignore the option maintain the current carriage way in good condition and go for option 2 or 4 	

COMMENTS FROM KEY INFORMANTS

Name	Title/Designation	Comments	
		<ul style="list-style-type: none"> • For Option 2, Purchase/acquire all the land required. Avoid acquiring smaller reserves as you get further from Kampala. This is where land values are lowest! It will be too expensive to acquire these reserves in the future. • Avoid constructing roads in swamps. This misguides the public.(that it is right to build in swamps) • Create/ design linkage junctions to allow as much use as possible residents use the road. • Most of the neighbourhoods selected on option 2 are already highly built up. Consider spreading further 5 Km away from the current alignment. • Positive socio-economic impacts during construction include increased money flow from workers. • Increased property values along the corridors. • Increased employment if local labour is hired. • Negative socio-economic impacts include too much dust resulting from contractors ignoring dust reduction measures. E.g. water spraying • Possibility of spread of HIV/AIDS due to loose money that male workers may want to spend on local communities for commercial sex. Accidents resulting from disorganised roads under construction. • Positive socio-economic impacts during operation and maintenance are improved traffic flow, increased investment in zones neighbouring the new roads, increased jobs. • Create a low speed lane for people accessing their properties. The project can use free water from swamps. • The project should take advantage of low prices of properties outside the centre. Buy the entire needed reserve (72) but build what we need now. In future it may be too expensive. • As much as possible recruit labour from the local community. • Avoid planning the road in swamps. This attracts development in the swamps. • Lobby for Government to allow pay lower than market rates for urban properties that were illegally constructed. • Appoint specific officers to ensure the contractor complies with mitigation measures e.g. dust reduction. • Make a programme to fight HIV during the project; workers and truck drivers leave the female population depleted and degraded whenever there is a project of this kind. • The project is long overdue. Lives, money, etc have been lost because of the current narrow corridor. • It is designed/planned to pass through already highly built up areas. After completion there will be traffic jam on the new road. E.g. Northern Bypass. 	

COMMENTS FROM KEY INFORMANTS

Name	Title/Designation	Comments	
Lugazi Town Council			
Mr. Asea JB Ozuma	Mayor Lugazi Town Council	<ul style="list-style-type: none"> Recent trends in Land use characteristics show that commercial buildings are so close, in that some sections may not allow the 50m width and Lugazi Town Council has a plan to plant trees along the Jinja Kampala highway from Mabira forest (Lwankima) to Namagunga and the round about needs to be maintained for beautification purposes. Either option can be adopted however 50 m width may leave no walk way for pedestrians, Boda Bodas, especially in Lugazi town centre. Positive socio-economic impacts: To people, we hope you'll employ from the very communities where construction is to take place. To traffic, it needs to be put into consideration especially at night as the flow is usually high and some sectors shall need lighting. Compensation, most especially for commercial buildings which are adjacent to the road in Lugazi Town. During operation and maintenance environmental change especially planting of trees and flowers in the town centres and drainage channels should be taken care of. The project may utilise the parking space at the council premises at a reasonable and considerable fee for council to also benefit. A good number of unemployed youth in the area who can be mobilised by the council for works. UNRA should ensure the new roads have good drainage channels which can be covered and cleaned. Use plastic road furniture since metallic ones are vandalised for scrap. Plant trees along the road from Lwankima to Namagunga. As Corporate Social Responsibility tarmac some road network in Lugazi town. Preserve memorial site of accident of the late sports journalists and a mass grave opposite Kawolo hospital. The project is very good and timely. 	
Njeru Town Council			
Mr. Tontika Robert 0772 483495	Senior Town Engineer	<ul style="list-style-type: none"> The land usage in this area is multiple i.e. institutional, industrial, residential and commercial. The trend has been industrial, institutional and commercial in form of residential renting. Health and safety will be key issues during operation and maintenance.

B.2.4 Sample Questionnaire used for Social Impact Assessment for the feasibility and detailed ESIA study for the Proposed Kampala – Jinja road

Names of Enumerator.....

Serial NumberDate.....

SECTION 1: PERSONAL IDENTIFICATION							
1) Project Affected Person	2) Age years	3) Sex	4) Marital Status	5) Highest level of Education	5) Tribe	6) Occupation	7) Religion

SECTION 2: LOCATION OF INFORMATION				
8) District	9) Sub-County	10) Parish	11) Village	12) Contact

SECTION 3: OWNERSHIP AND PARTICULARS OF THE AFFECTED PERSON						
<p>13) What is your status in relation to the Land ownership?</p> <p>1= Owner 2= Licensee 3= Tenant 4= Co-owner 5= Co-Tenant 6= Others (Specify)</p>	<p>14) How did you acquire this land?</p> <p>1= Bought 2= Renting 3= Inherited 4= Given as a gift. 5= Just settled 6= Other (Specify)</p>	<p>15) Do you possess any land Title or agreement for ownership or tenancy?</p> <p>1= Land Title 2=Agreement 3=Tenancy 4= No</p>	<p>16) How do you hold this land?</p> <p>1= In possession of title. 2= Inherited but no title. 3=Tenant on titled land. 4= On public land (customary) 5= Other Specify</p>	<p>17) For how long have you been on this affected plot?</p> <p>1= Since birth. 2= 0-10 years 3=10-20 years 4= over 20 years</p>	<p>18) Is there any encumbrances on this land like;</p> <p>1= yes, Claim by: family members. 2= Yes, mortgage/lien. 3= No, all documents available. 4= No, and no documentation available. 5= I don't know 6= Other specify</p>	<p>19) What is land tenure system here?</p> <p>1=Mailo 2=Communal 3=Freehold 4=Leasehold 5=Other</p>

SECTION 4: GENERAL INFORMATION CONCERNING CHILDREN

20) How many people live in H/H?		23) How many children are going to schools?		26) How many are in primary level?		29) Does this HH keep any animals or birds?	30) If yes, which animals?
21) Male	22) Female	24) Boys	25) Girls	27) Boys	28) Girls	1= Yes 2= No	1= Birds Poultry 2= Piggery 3= Goats 4= Cows 5= Other (specify)

SECTION 5: INCOME OF AFFECTED HOUSEHOLD

31) What is the Main Source of income of the household	32) What is the secondary source of income of the household	33) What other activities generate income for this household	34) Compared to other residents in this Parish, in what category of standard of living would you put this HH?	35) What would you estimate to be the total income for this HH (per month)	36) What is the function of your house?
1= Salary 2= Husbands Salary 3= Business on land 4= Business located elsewhere 5= Rent collected from affected land 6= Rent collected from elsewhere 7= Agriculture activity on affected land 8= Agriculture activity on land elsewhere 9= Transfer income (Pension/handouts) 10= Other specify	1= Salary 2= Husbands Salary 3= Business on land 4= Business located elsewhere 5= Rent collected from affected land 6= Rent collected from elsewhere 7= Agriculture activity on affected land 8= Agriculture activity on land elsewhere 9= Transfer income (Pension/handouts)	0=No other 1= Fishing 2= Hunting 3= Poultry 4= Other	(Enumerator use discretion to judge) 1= Rich 2= Average 3= Poor 4= Very Poor		1=Residential 2= Commercial 3= Rent 4=Livestock 5=Residential /commercial 6=Other (Specify)

SECTION 6: HEALTH AND TRANSPORT

37) What is the most common disease in your H/H?	38) Where do you get treatment from?	39) What is distance to nearest health Centre	40) What type of transport do you use most?	41) What is the most common cause of accidents on Jinja road?
1=Malaria 2= Diarrhea 3= Coughs/RTI 4=Worms 5=HIV/AIDS 6= Hernia 8=Other (Specify)	1=Hospital/Heath IV 2= Health Centre III 3= Health Centre II 4=Clinic 5= Traditional Healer 6=Self treatment 7=other (Specify)	1=0 – 1km 2= 1km – 2km 3= 2km – 3km 4=3km – 4km 5= Over 4 km	1=Walking 2=Boda Boda 3=Bicycle 4= Kamunye 5= Bus 6=Personal car	1=Buses 2= Trailers 3= Sugar cane wheelers 4=Bicycles/Boda Bodas 5= Taxis/Kamunyes 6=Small Car 7=Other (Specify)

SECTION 7: AGRICULTURE AND WATER SOURCES

42) What should Government do to solve the accident problem on Jinja road?	43) What food crops do you have on your land?	44) What cash crops do you have on your land?	45) What is your source of domestic water?	46) What is the distance to your preferred water source?
1=Widen road 2= Put Dual Carriage way 3= Construct new Jinja road else where. 4=Other (Specify)	1=Banana 2= Potatoes sweet 3= Cassava 4=Irish 5=Yams 6= Beans 7=Ground nuts 8=vegetables 9=Other (Specify)	1=Coffee 2= tea 3= Sugarcane 4=Vanilla 5=Horticulture 6= Pine trees 7= Eucalyptus tree 8=Fruits 9=Other (Specify)	1=Protected Well 2= Borehole 3= River/swamp 4=Piped water 5= Rain water 6=Other (Specify)	1=0 – 1km 2= 1km – 2km 3= 2km – 3km 4=3km – 4km 5= Over 4 km

B.2.5 Key Informant Questionnaire

KEY INFORMANT CHECKLIST

Environmental and Social Impact Assessment Study

Project Brief and introduction

The Government of Uganda has allocated funds to finance the feasibility study and detailed engineering design of Kampala – Jinja Road; a 72 km paved road situated in the central part of Uganda. It is a main entrance and exit to the Eastern Region through Owen Falls Dam. This is a Class 1 paved road with an Asphalt concrete surface. The road alignment with respect to vertical to vertical and horizontal is generally within the acceptable standards, although there are some deficiencies with respect to sign distances and curves.

The road is part of the National Road Authority Network that stretches to a total length of about 75 km from the center of Kampala to the Owen Falls Dam at Njeru. The first 3km, from city center to the Uganda Manufacturer's Association (UMA) main entrance is under the responsibility to Kampala Capital City Authority. The 72 km stretch from UMA main entrance to Owen Falls Dam at Njeru is under central Government/UNRA Kampala Station.

As part of the Environmental and Social Impact Assessment, there are two alternative options to the upgrade that needs your input.

For option 1 (Existing Road), includes a scenario of 4 lanes in each direction (each lane is 3.7m wide) from Kampala to Bweyogerere, 3 lanes in each direction from Bweyogerere to Mukono and 2 lanes in each direction from Mukono to Jinja. In terms of the required right of way, from K'la to Bweyogerere we are looking at approx 72m and approx 60m from Bweyogerere to Mukono. The remaining section from Mukono to Jinja, we would be looking at a right of way width of about 50m.

For Options 2 (Northern variant) and 4 (southern variant) includes 4 lanes in each direction up to Kyambogo, 3 lanes in each direction from Kyambogo to Mukono and 2 lanes in each direction from Mukono to Jinja. In terms of right of way widths, we have approx 72m from start to Kyambogo, approx 60m from Kyambogo to Mukono and about 50m from Mukono to Jinja.

The existing road carriage way width is currently about 7m, with 1.5m wide surfaced shoulders, making a total surfaced road width of about 10m. The total right of way of the existing road is about 30m.

1. In your view, how would you describe the land use characteristics in this area? Is more residential, commercial or both? Comment on the recent trends.

.....
.....
.....
.....
.....

2. Looking at the different options, a number of impacts are anticipated including resettlement of homes due to land acquisition, increased access to road infrastructure, disturbance during road construction amongst may others, In your view, what opportunities or challenges do each of the alternatives present to your business or home? Please give your view on the best option to be adopted.

Option 1:

.....
.....

.....
.....
.....

Option 2:

.....
.....
.....
.....
.....

3. What positive socio-economic impacts (i.e. to people, land, traffic, population change, work patterns, health and safety) do you anticipate during the road construction?

.....
.....
.....
.....
.....
.....

4. What positive socio-economic impacts (i.e. to people, land, traffic, population change, work patterns, health and safety) do you anticipate during the operation and maintenance?

.....
.....
.....
.....
.....
.....

5. Describe any opportunities that the project could take advantage of including getting accessibility to your premises given that it is a highway?

.....
.....
.....
.....
.....
.....

6. Make site specific suggestions on what you feel UNRA the developer should incorporate during implementation of the project for the betterment of the surrounding community and environment. (these can range from the different social, economic, that you feel would help protect the environment and also the community)

.....
.....
.....
.....
.....

7. What is your general opinion on the proposed Project?

.....
.....
.....
.....
.....

8. Is there any other project related or not related to this project that is ongoing in the area?. If it is there please indicate its nature.

.....
.....
.....

B.3 Records of Stakeholder Consultations for KSB ESIA (URS, 2013)

B.3.1 Minutes of Stakeholders Meetings

Uganda National Roads Authority — Kampala Southern Bypass

DESCRIPTION	ISSUES DISCUSSED
DATE AND PLACE	DATE 11/03/2013, NAKAWA DIVISION HQ
Name and Designation	Summary of Discussions, Issues and comments
Mr. Bashinyora John B, Gender and Community Development officer 0794661244 / 0782839640	It is better to meet the councillors at workshops or group meetings. Otherwise it will be dangerous to directly go to the communities without first sensitizing their leaders. The mayor can organize the meeting for the LC officials while the Town Clerk will mobilize the technical personnel. There will be need to facilitate these meetings. The meetings should include <ul style="list-style-type: none"> > Deputy Resident City Commissioner (Ms Faridah Kimbowa); > The Mayor and His Team; > Town Clerk and His technical team Kasokoso is a bit volatile, and it will be necessary to get to the LC2 Chair of the area Haji Mwebe on 0772432769
Name and Designation	Summary of Discussions, Issues and comments
Sebadduka Anthony, Kira Town Clerk , 0752649243	From the map and the proposed alignment, it seems the road will not pass through Kira town Council. Otherwise I welcome this development as it positive impacts are likely to benefit our Division.
Mhamerito M, Mayor Kira Town Council, 0772501116	From the proposed alignment, the road may not pass through the Division.
Date and Place	Date 14/03/2013, Nakawa Division HQ
Name and Designation	Summary of Discussions, Issues and comments
Tushabe Betty, D/Mayor – Nakawa, 0776977504 Moreen Nabiryo, KCCA, Nakawa Secretary, 0701272603, Irene Namwiga, Roads Technician, 0782027380,	It is better to meet the LCs and Chiefs first and put the local leaders in the picture. It will necessary to provide Transport refund to the leaders who will attend the meeting. The meetings should include the following: <ul style="list-style-type: none"> > Team; The LC1 Chairpersons; > LC2 Chairpersons; and > The PDCs The meeting can take place in the main hall or any other that may be identified. The technical side should be represented by the following: <ul style="list-style-type: none"> > Planners; > Buildings Inspector; > Roads Supervisor; > Road Technician; > Enforcement Section The following parishes are relevant: <ul style="list-style-type: none"> > Mutungo A > Kitintale > (Butabika) > Kireka?/Banda? > Bugolobi
Date and Place	Date 14/03/2013, Makindye Division HQ
Name and Designation	Summary of Discussions, Issues and comments
Tibihika T Leo, Town Clerk, tibihika@kcca.go.ug Makindye 0794660036,	There is need to learn from the Northern bypass experience which has shown that a dual carriage way is the minimum requirement. On the Northern bypass, trailers can not overtake and often the road is more

<p>Nabbaka Annet Moureen, Physical Planner, 0794660905 Paul Rusoke, Building Inspector, 0794660905 Nyende Hassan, Supervisor Roads, 0772376665/0702678736 Kalembe Eunice, Health Inspector 0782245821 Dorothy Nakiwala, Health Inspector, 0772009034</p>	<p>congested than within the town areas. It is important to have in place a long term plan and wait if there are no funds other than re-planning every so frequently. It will be important to consider: -</p> <ul style="list-style-type: none"> ➢ Passing underground (Tunnelling) so as to protect the wetlands; ➢ Ignore the many piecemeal plans that are on the ground; ➢ Walkways on either side should be preserved; ➢ Let us have a landscaping component to enhance the aesthetic views; ➢ There should be a design for ducts /sleeves to avoid digging up the road for service cables etc; ➢ Ensure compliance with another water transmission line planned from Gaba to Namasuba; <p>The focal person who will be contacted on the technical side will be Engineer Nyende Hassan, Supervisor Roads, 0772376665/0702678736.</p>
Date and Place	Date 15/03/2013, Makindye Division HQ
Name and Designation	Summary of Discussions, Issues and comments
<p>Dr. Ian Clerk, Mayor Makindye 0772741291 Nagujja Doreen, Gender and community development Officer 0791682641, Naisiko Martha, Gender and Community Development Officer, 0774300710, Seiko Amy Lwanga, Personal Assistant to Mayor, 0794660104</p>	<p>We need to sensitize those people where the road will pass. It is not necessary to call the whole Division. The tunnelling will be difficult since most of the Bukasa ridge is rock. That could be costly. It is easier to go around Bukasa along the edge of the wetland. The following parishes should be invited to the meetings: -</p> <ul style="list-style-type: none"> ➢ Bukasa (Muyenga Zone); ➢ Gaba parish; ➢ Lukuli Parish; ➢ Kasnaga parish; ➢ Luwafu parish (Salama zone); ➢ Luwafu parish (Luwafu Zone) <p>Other issues to not addressed are that most of the road project passes through Makindye division although further south it moves along the Wakiso boundary to the South western tip of Makindye. This is along Kawaga swamp which swamp is very deep.</p>
Date and Place	Date 02/04/2013, Makindye Division HQ
Name and Designation	Summary of Discussions, Issues and comments
<p>Nabbaka Annet Moureen Physical Planner Paul Rusoke, Building Inspector, 0702643488 Nyende Hassan, Supervisor Roads, hnyende@kcca.go.ug Mr Ntujuna Emmanuel, Ward Administrator for Luwafu, Lukuli and Salama Zones 0702600862/0794660089, Mr Kayima John, Ward Administrator for Bukasa, Kansanga, Gaba and Kabalagala, 0702451127 (please note that this one was not met directly)</p>	<p>The meeting Place can be here at Makindye in the Boardroom. The following should be invited to the meeting: -</p> <ol style="list-style-type: none"> 1. The Mayor; 2. Area Councillors (4); 3. Chairpersons LC1 for the affected areas only (7); 4. Deputy RCC for Makindye; 5. Town Clerk; 6. District Internal Security Officer; 7. Ward Administrators (2); 8. Physical Planner; 9. Building Engineer; 10. Community Development Officers; <p>There should be a transport refund of Shs 30,000/= and if going beyond lunch, there should be a lunch allowance of about 20,000/=.</p> <p>On wetlands you should provide mitigation measures starting with sensitization; They preferred a tunnel other than going along the wetland. This will save the wetland and also lead to Transfer technology in construction of tunnels;</p> <p>On dumping of soil, they said that the people who operate These large tippers always know where the dumping areas are. One needs to consult with them;</p> <p>On tendering they wished that different components are tendered to different people so that the project can move on time with the best inputs from key players.</p>

Date and Place	Date 02/04/2013, Nakawa Division HQ
Name and Designation	Summary of Discussions, Issues and comments
Godfrey Kisekka , Town Clerk 0794660037/0701432046/ 0772432046 ibkisekka@yahoo.com , gbkisekka@kcca.go.ug Moureen Nabiryeke Secretary, Nakawa Division	<p>The town clerk ready to participate in the meetings. He points out that LC1s are the most needed people for this project to ensure that they own it at grassroots level.</p> <p>At the next visit he would want to have the map in his office so that he can use it to sensitize.</p> <p>The following should attend the meetings and the best venue is their community hall.</p> <ol style="list-style-type: none"> 1. The Mayor; 2. Area Councilors (6); 3. Chairpersons LC1 for the affected areas only (7); 4. Deputy RCC for Nakawa; 5. Town Clerk; 6. District Internal Security Officer; 7. Ward Administrators Ms Charity Ruyooka(1); 8. Physical Planner; 9. Building Engineer; 10. Community Development Officers; 11. DPC, Jinja road; <p>It may be necessary to hire additional chairs since the Division hall does not have enough. Also provide facilitation in terms of transport refund and refreshments (tea or soda + some snacks);</p> <p>It seems the road will pass through the Makindye Ssabagabo Sub County so we need to get in touch with the Chief (SAS) there who is Abdu Mwasanje, 0772405498</p>
Date and Place	Date 08/04/2013, Department of Museums and Monuments
Name and Designation	Summary of Discussions, Issues and comments
Mwanja N Rose , Commissioner Department of Museums and Monuments — 0772485624, mwanjankale@yahoo.com	<p>There are some recent discoveries around Butabika /Luzira area. There are some cultural artifacts belonging to the Ngonge Clan which date back to the 13th Century. The main area is Luwafu. Even if the artifacts are not found, there is always the likely hood of finding some. In such cases chance find procedures will be followed. In this case the contractor needs to be trained on how to identify chance findings and to be taught on the procedures to follow in case of chance finds.</p>
Date and Place	Date 09/04/2013, National Forestry authority
Name and Designation	Summary of Discussions, Issues and comments
Tom Rukundo , EIA Specialist (NFA), 0772591205, 0700490410	<p>The main area is dominated by wetlands. Most have already been destroyed with people building everywhere. There is need to protect the remaining wetlands. Otherwise the forests are not many in the area (No forests)</p>
Date and Place	Date 09/04/2013, National Forestry Authority
Name and Designation	Summary of Discussions, Issues and comments
Paul Buyerah M. Director NFA, 0772466569	<p>I do not support the tunnel alternative in case of explosions or a severe earth quake. All the same there is need to harmonize the activities that have been planned which include the new Bukasa Port, a proposed rail line and the planned 132 KV line in the area. It is better if the KCCA have a grand transport master plan which harmonizes all these activities.</p> <p>Regarding the soil, it will be needed by some users depending on the grade of the soil. Government should buy a plot where this soil can be stored and then it will be used later. For instance if it turns out to be good marrum it will be used on the road and the rest can be used to make Adobe bricks (mixed with lime). If it is good clay, then it can be sold to Kajjansi (Uganda Clays) and to other makers of clay products.</p>

Date and Place	Date 09/04/2013, National Climate Change Unit
Name and Designation	Summary of Discussions, Issues and comments
Paul Isabirye, Assistant Commissioner /CCU	The environment around the lake is already threatened by human activities. We need to understand the role of the ecosystem in maintaining the health of the lake. The role of wetlands in Climate change is to provide a sink for the Methane. Presently methane has increased due to industrial activities. However the development is important and it should be allowed to go on. We need to minimize the impacts by for example building the road on pillars (Viaducts) across wetlands.

KAMPALA SOUTHERN BYPASS: SENSITIZATION MEETING FOR POLITICAL AND TECHNICAL LEADERS IN NAKAWA DIVISION HELD ON 10TH APRIL 2013 IN THE NAKAWA DIVISION COMMUNITY HALL	
Issues Raised	Responses
Ndawula Godfrey, Chairman Zone 12: <ol style="list-style-type: none"> 1. You have talked about buying plots and building for people houses, if that is the case, will bigger plots and houses be given? 2. In the case of food crops, what happens to the community members that have lived off the crops for so many years? It might be difficult to convince them, some have sent their children to the university using the same money they have been earning from those crops grown. 3. We as the local leaders need to go through the route so that we know the demarcation 	<ol style="list-style-type: none"> 1. When Government acquires land in public interest, project affected persons are compensated at the market rate and given an additional disturbance allowance to cater for the value that individuals have to their property of which some is sentimental. 2. A resettlement action plan will be prepared after the ESIA, and at that point more sensitization will be done on the compensation rates, however, what you need to know is that crops are categorized into two annual and perennial crops. In the event that it is the World Bank funding the project, they would normally require that all crops are compensated; however, if it is the Government of Uganda finding the project, then annual crops will only be required to be harvested. In any case during the resettlement action plan exercise, then it will be required to know whether crops grown are for business or food, and all these aspects factored into the valuation methodology. 3. UNRA is in the process of demarcation of the corridor, however, main aim of this meeting is to sensitize the local leaders so that when we come to your area, we can move together and get to know where the route passes within your different areas of jurisdiction.
Paul Magimbi, Chairman LC1 Bugolobi: <ol style="list-style-type: none"> 1. As a professional town planner, am aware that this project was project 41 years ago, what form assurance do we have that this project will not be hijacked by unscrupulous persons as have been the case for the Northern Bypass? 2. What happens when people are compensated and they reoccupy land or encroach on forest reserves as is the case with Bukasa, there is need to work very fast. 	<ol style="list-style-type: none"> 1. Yes, the Southern Bypass was planned many years ago, however, the challenge is that ever since it was planned and designed, the area for which it was designed has become a heavily built up area, requiring redesigning amidst the actual situation. 2. On delays on projects and hence the actions of unscrupulous persons, Uganda is taking on the concept of PPPs just as in the case of Ethiopia where the private sector is involved in road construction. The assumption that this will make infrastructural development more efficient, this is the same with the Kampala Jinja Highway; this project is not going to use public funds. 3. In any case for the Northern bypass, the project was phased, and the second phase will begin soon, for those who were paid and did not leave, it is required that they leave to corridor for the second phase to begin.

<p>Kaija Constatine, Councilor Bugolobi:</p> <ol style="list-style-type: none"> 1. We have had of this project for a long time, since 2004, when should we expect this one to start? 2. When you come to Bugolobi, many people are growing crops like yams and sugarcane within the project area, in the case that some do not have titles what will happen to such people given that you deal with people with titles? 3. On employment, I was happy that your team will recommend that contractors give our people jobs; we have observed that some contractors come with their own workers. However, I would like to see how this will be executed. 4. On rough estimates, it is not advisable to give a potentially affected person a rough estimate, what if the rough estimate is higher than the actual compensation package? 	<ol style="list-style-type: none"> 1. The road is still in the design phase we expect in the next 3 - 4 years that it would have comments. By May we expect that the feasibility study document will be drafted and by end of December, the document will have been submitted to the World Bank. A transaction advisor has been brought on board to manage the procurement process of the concessionaire including the contractor, bankers and insurers in the road construction process. 2. There are different types of project affected persons, including land owners and licensees; the latter refer to people who utilize land without land titles, it is common in the rural areas where a father allows his son to use without actually owning it, therefore, during the RAP exercise the eligibility of different PAPS will be determined and valued accordingly. 3. It is Government policy that local skills be maximized and that contractors avoid procuring foreign skills that can be sourced locally. However, our project document will emphasize the need to employ locals. 4. The rough estimate will be used by the study team for decision making purposes specifically when it comes to selection of the best route. The RAP will have the actual estimates that can be reviewed after three years.
<p>Alfa Nkangu, Councilor Nakawa:</p> <ol style="list-style-type: none"> 1. What will be the mode of compensation for buildings, gardens and crops? 	<ol style="list-style-type: none"> 1. When Government acquires land in public interest, project affected persons are compensated at the market rate and given an additional disturbance allowance to cater for the value that individuals have to their property of which some is sentimental.
<p>Chairman, Kinawataka:</p> <ol style="list-style-type: none"> 1. Will you compensate people found in the road reserve? 2. What about ancestral tombs, how will these be valued? 	<ol style="list-style-type: none"> 1. For those who are injuriously affected for example if road touches your verandah, these will be identified and valued accordingly.
<p>Nalika Richard Basim, Building Inspector, KCCA,</p> <ol style="list-style-type: none"> 1. What will be the width of the new road, is it the same width as the Northern bypass? 2. What about access, is it open? 	<ol style="list-style-type: none"> 1. The proposed road is an urban expressway with 4 lanes each lane is 3.65 metres wide, the whole corridor is 30 metres. It is the same standard as the northern bypass with limited access. Access and exit is controlled through payment of road tolls.
<p>Nicholas, Mbuya Parish:</p> <ol style="list-style-type: none"> 1. What about those persons not directly affected by the land acquisition but are affected by dust, noise and vibrations, how will these be compensation 2. This project should not be like the northern by pass, it should be more comprehensive so that the tax payer's money does not go to waste. 	<ol style="list-style-type: none"> 1. The reason that we are undertaking the ESIA, is to see these issues can be addressed, we normally have the aspect of capturing those who are injuriously affected, and they will be compensated accordingly.
<p>Councilor, Mutungo Parish,</p> <ol style="list-style-type: none"> 1. In the initial phase, politicians are involved, but later, we are phased out 	<ol style="list-style-type: none"> 1. As the project evolves, so does the role of the politicians, at the beginning, your participation is related to information dissemination, but as the project evolves, then you are required to participate in supervision

	<p>monitoring</p> <p>2. Our team will recommend that road committees be formed and made functional so that local leaders can participate during supervision</p>
<p>Sembatya Faisal, Mutungo Canan village:</p> <p>1. We had some people from Geomaps working our village without informing the leadership, are you the people that sent them?</p>	<p>1. Yes, those consultants came from URS (United Research Services) but they were working on the Kampala Jinja Highway, both roads are already gazetted.</p>

<p>KAMPALA SOUTHERN BYPASS:</p> <p>SENSITIZATION MEETING FOR POLITICAL AND TECHNICAL LEADERS IN MAKINDYE DIVISION HELD ON 22ND APRIL 2013 IN THE MAKINDYE DIVISIONAL CONFERENCE ROOM</p>	
Issues Raised	Responses
<p>Dr. Kagoda Area Councilor Lukuli:</p> <p>4. How long is the Southern Bypass? What would be the cost per km? What is the quality of the road?</p> <p>5. Is it possible to change the alignment for example the proposing a stretch between Muyenga and Munyonyo and what would be the cost implication vis-à-vis going round the wetland?</p>	<p>4. The road is to be constructed under a PPP arrangement and it will be a toll road for a period of 15 – 20 years. It is 18 km long if it traverses above ground or 16km if tunneling is selected as an option. The road is designed based on international standard with 4 lanes with each lane being 3m wide. On cost, this being the feasibility stage, the team is still evaluating the different options using cost estimates; this stage will be completed in a year.</p> <p>5. At this stage it is not easy to change the alignment, the process of gazetting the corridor is almost completed, and we have to obtain renewals every year if required.</p>
<p>Hannington Kasaga, :Labor Officer Makindye Division:</p> <p>3. Are the people constructing the southern bypass the same as those constructing the Kampala Entebbe expressway?</p> <p>4. Workers' Safety: We have already had issues with the people on the Entebbe expressway where workers do not have the required PPE; since the Southern bypass construction has not yet began, we would require that workers be equipped with all the necessary PPE</p>	<p>4. No those are different contractors; this particular bypass is not yet at that phase.</p> <p>5. It is noted and will be integrated in the report as a recommendation</p>
<p>David Nsereko, Bukasa:</p> <p>5. I heard about this road a long time ago and I would request that you show us the demarcation and where it is passing through the wetland, it would be advisable to avoid that because the contractor spends a lot of time and money on one section just as was the case with the northern bypass.</p> <p>6. There is a lot of wildlife on Muyenga tank</p>	<p>5. It is true that this road was previously planned, however, over time, most areas where it was supposed to traverse have become heavily settled, the option of the wetland is based on the need to minimize compensation costs, however, there is there is also the option of tunneling.</p> <p>6. There are different options for road construction that the design team is evaluating for example using of duct vis-à-vis backfilling of the wetland; it is hoped that this will maintain a healthy ecosystem.</p>

<p>hill and in the wetlands, is there a possibility that the mitigation measures promote conservation of wildlife resources.</p> <p>7. Taking into account other developments, there is the sewage plant in Bukasa funded by World Bank that has failed to take off due to poor planning; the Kampala urban development project will affect the same sewage plant, we hope that this project is not going to affect it as well.</p>	<p>7. This particular project does not affect the sewage plant, as already mentioned the corridor is almost gazetted and that facility is not affected</p>
<p>Nasuuna Juliet:</p> <p>2. I would like a clear map of those people affected so that we alert our people</p>	<p>2. At the moment, the map that we have is for the different options, when the best option is selected, then we shall return and sensitize the people to be affected on the land acquisition process.</p>
<p>Mr. Ssebagala:</p> <p>3. We got a problem with the Kansanga-Ggaba Road that was funded by the Japanese where we have a very small road because Government had no money to compensate for the properties; this meant that the road which was designed for four lanes was reduced to two. My proposal is that there is proper planning and money for compensation is availed even for the structures that may be regarded as expensive at the moment so that we have a good road.</p>	<p>2. Noted</p>
<p>Councilor Tebandeke,</p> <p>3. Can we have a look at the map and can the alignment be changed?</p> <p>4. As stakeholders, it is important that we be involved in the monitoring of the project and therefore would request that we be availed the BOQs so that we are able to monitor the contractor</p>	<p>2. As mentioned earlier, the alignment will not be changed, we have options that we are evaluating during this phase</p> <p>3. That is noted, we are also going to recommend that road user committees be constituted and facilitated to perform their role effectively during the road construction phase</p>
<p>Muganga Samson:</p> <p>3. In the case of Muyenga hill where there are the tanks and quarry, we would request that you avoid these two resources.</p>	<p>2. Yes, the route selection process has already been explained and these two will not be affected</p>
<p>Pidson Wavamuno, Councilor Ggaba Parish,</p> <p>2. We need more information prior to the meeting, had we been informed on time, our planner would have attended this meeting</p>	<p>3. The deputy mayor noted the concern</p>
<p>Eng. Jonathan Kalungu:</p> <p>2. What stage are we on for the Southern bypass? Are we considering flyovers?</p>	<p>2. Yes, there will be 5 fly overs including the following:</p> <ul style="list-style-type: none"> • On Port bell road • Ggaba Road • Lukuli Road • Salaama Road • And Kampala- Entebbe expressway spur
<p>Margaret Ggaba B:</p> <p>1. We have pipes passing through that area especially on Kansanga - Ggaba road what</p>	<p>1. We have to consult with NWSC, MTN and other utilities to ensure that they are not affected and besides the</p>

will happen to these lines?	gazetting of the corridor is from the Ministry of Lands Housing and Urban development which takes into account the physical plan of Kampala. Gazetting the corridor also enables us to protect ourselves for speculators.
-----------------------------	---

MEETING RECORD			
CONTRACT:	KAMPALA SOUTHERN BYPASS	PROJECT NO:	47062380
SUBJECT:	URS REQUEST FOR INFORMATION	DATE:	06 MARCH 2013
PLACE:	KCCA MEETING ROOM 208		
Present:	Name	Company	
	Jacob Byamukama	Manager Transportation Planning & Traffic Management (KCCA)	
	Joel Wasswa	Transport Planner (KCCA)	
	A. Wilson	URS Team Leader Kampala Southern. Bypass	
	Mwondha Ivan	URS Senior Highway Engineer	
	Stephen Magezi	URS ESIA Lead	
	Isaac Muyinza	URS Traffic Engineer	
ITEM	DESCRIPTION		ACTION
1	The meeting commenced at 2.00pm		Information
1.1	INTRODUCTION The meeting was held at the request of URS as a follow-up to the earlier meeting of 07 th February to coordinate and collect information related to Kampala Southern Bypass from KCCA. As an aid to the meeting URS prepared the agenda attached at the end of this record.		Information
2	DISCUSSION		
2.1	Once assembled the meeting commenced with URS tabling the agenda (see attached) and requesting that the discussion follow the tabled agenda.		Information
2.2	Regarding standards for the all purpose road network and local roads – KCCA confirmed that some were available and copies would be provided. Currently only Portbell Road was scheduled for upgrade but KCCA would review the situation regarding other radials and advise.		KCCA
2.3	URS had already contacted Google (contacts for whom had earlier been provided by KCCA) and was now also in contact with other utility providers and authorities (i.e. NITA, Airtel, AMT, Warid, Orange etc)		Information
2.4	URS also informed KCCA that they had signed the NDA with some Telecom companies. With respect to the ESIA, URS drew attention to drainage plan requirements. KCCA advised that this was mostly included in the Drainage Master Plan and offered a copy. URS already had a copy on file and would circulate as required.		URS
2.5	URS asked if information on footpath and cycleway width and other non-motorized traffic provisions other than that in the KCCA Structure Plan (2012) was available. KCCA was developing standards for non-motorized traffic provisions (pedestrians and cycle ways) and would share ideas with URS.		KCCA

	URS drew particular attention to any requirements for such provisions at swamp crossing in KSB. KCCA would review and advise.	KCCA
	KCCA informed the meeting that they were currently in the process of developing an active travel master plan that included Non-motorised modes such as walking and cycling.	Information
	URS suggested that KCCA should have an input into the assessment and provision for Non-motorised access along the KSB.	ALL
2.6	Regarding long term traffic forecasts KCCA agreed to provide a copy of the complete transportation model. URS queried if the model was for the whole city or only CBD. KCCA confirmed the model was for whole city.	KCCA
	URS already had a copy of the model through their traffic engineer but requested a copy of the model reporting for outputs. KCCA would provide and URS would collect from KCCA the following day.	KCCA URS URS
2.7	URS would insert KCCA data into their model as that had already been agreed	
	URS noted that the BRT pilot scheme was on the Kampala – Jinja Road and requested if the future BRT proposals would impact KSB. KCCA advised that the BRT would be developed depending on the results of the pilot scheme.	KCCA
	When requested for details of the likely routes and phasing of these, KCCA referred to the concept paper in Report No 1. URS requested a copy which KCCA would provide.	KCCA
	URS also informed KCCA that they were currently having talks involving UNRA and the BRT consultants.	Information
2.8	URS requested a joint review of the KSB route proposals with respect to links in the local road network which were being severed by the bypass and the possible need to provide passage under the bypass. It was agreed that KCCA and URS would jointly review the KSB alignment options on plan first and provisionally fixed Tuesday 12 th March at 10am in URS office for this.	ALL
	Any links identified could then be inspected at site before a decision was made regarding the need for any underpasses in a bid to mitigate the severance.	ALL
	URS was advised to consult the Road Access Act during the joint exercise which sought to determine which Road links were to be cut off.	URS
2.9	Regarding gazetted roads in Kampala, KCCA advised that they were in the process of updating their list of roads and defining the road network hierarchy i.e. re-classification of the existing network. KCCA would however provide a copy of the current list of roads.	KCCA
2.10	KCCA would also provide lists of contact details within local administrative divisions and identified the latter as Nakawa and Makindye.	KCCA
	KCCA noted that the alignments also entered Wakiso which was a different jurisdiction and should also be contacted.	URS
2.11	URS noted that a copy of the 2010 satellite imagery would be of benefit. KCCA agreed that they would provide a copy.	KCCA
2.12	URS requested consultations with KCCA to share information for the ESIA studies which were just commencing. Among other information requested was a copy of the latest State of the Environment for Kampala report and the Kampala Physical Development Plan.	
	KCCA would make arrangements with their environmental specialist (Dr. Semuwemba) and advise URS of the contact.	KCCA
	URS referred in particular to the extent of additional runoff which could be expected from development currently taking place and pointed out that much information was available in the Drainage Master Plan.	Information
2.13	KCCA referred to the updated Kampala Structure Plan (2012). URS advised they had already received a copy of this from KCCA Director of Planning.	
	URS advised KCCA of the gazetting of land for the project and requested information of other planning requirements if any which applied. KCCA confirmed that planning approval was required through the Planning Committee for new roads if these were to be adopted by Kampala City. URS thought that KSB would be considered a National Road under the auspices of UNRA and KCCA considered that in this case Ministerial approval would be sought which superseded Planning Committee requirements.	Information

2.14	As follow-up to the gazetting process UNRA would send teams from their Public Relations Department to site to inform local communities of the legal position regarding the project and land frozen for it.	UNRA
	KCCA asked to be advised when this would take place as their own Public Relations teams could cooperate and coordinate with them, the situation being very sensitive.	KCCA
2.15	URS requested copies of any other reports or record held by KCCA which could be of assistance during the design process for KSB.	URS
	KCCA knew of no other documents held by them which could assist but referred URS to the Ministry of Works regarding reports on the development of Bukasa Port.	KCCA
	KCCA would advise URS of the contact later. It was noted that upgrading of Port Bell was also under design and that it may also be possible to obtain reports on that from Uganda Railway Company. .	
2.16	Regarding URS' request for any information on the possibly mostly informal settlements developing in the swamp flats, KCCA would look but thought little information was available.	URS
	KCCA commented that under Ugandan Law compensation in such cases was limited and URS noted that their Social Impact Assessment would consider World Bank guidelines and safeguards, which could be found on the internet, as most funding agencies would require this before considering any application for funds.	
The meeting ended at 3.07pm		

Minutes prepared and issued by

B.3.2 Sample Questionnaire

Uganda National Roads Authority — Kampala Southern Bypass

SOCIAL IMPACT ASSESSMENT QUESTIONNAIRE FOR EA STUDY FOR THE PROPOSED KAMPALA SOUTHERN BY PASS (KSB)							
Consultant: URS Infrastructure & Environment UK Limited ("URS") in association with Rwenzo-Green Associates Ltd - Uganda							
Names of Enumerator		DIVISION	WARD	ZONE	Date		
Section 1: Personal Identification							
1) Project Affected Person	2) Age years	3) Sex 1 = Male 2 = Female	4) Where you were born	5) Highest level of Education 1=None 2=primary four 3=Primary Seven 4=Secondary 5=High School 6= Diploma level 7 =University	6) Do you have any vocational Training 1=Yes 2 = No	7). If yes, what type of training? 1=Brick Laying/Construction 2=Teaching 3=Crafts 4=Mechanics 5=Agriculture Fisheries and forestry 6=Metal work 7=Hotel and Tourism 8=Police 9=Hotel and Tourism 10=Electricity 11=Others.....	8) Religion 1=Catholic 2=Protestant 3=Pentecostal 4=Muslim 5=Traditional 6 =SDA 7 =Others

Section 2: Location of Information				
9) District /City	10) Sub-County/Division	11) Parish/Ward	12) Village/zone	13) Contact (Optional)
14) Occupation of Respondent	15) What is your marital status	14) Occupation of Respondent	15) What is your marital status	
= Farmer 2= Trader 3= Civil servant 4=Fishing 5=Casual laborer	1=Single 2=Married 3=Separated 4=Divorced 5=Widowed or widowed			

Section 3: Ownership and Particulars of the Affected Person							
19) What is your status in relation to the Land ownership? 1= Owner 2= Licensee 3= Tenant 4= Co-owner 5= Co-Tenant 6= Others (Specify)	20) How did you acquire this land? 1= Bought 2= Renting 3= Inherited 4= Given as a gift. 5= Just settled 6= Other (Specify)	21) Do you possess any land Title or agreement for ownership or tenancy? 1= Land Title 2= Agreement 3= Tenancy 4= No	22) How do you hold this land? 1= In possession of title. 2= Inherited but no title. 3= Tenant on titled land. 4= On public land (customary) 5= Other Specify	23) For how long have you been on this affected plot? 1= Since birth. 2= 0-10 years 3= 10-20 years 4= over 20 years	24) What is land tenure system here? 1= Mailo 2= Communal 3= Freehold 4= Leasehold 5= Other	25) What is your status in respect to this house you live in? 1= Owner 2= Renting 3= Lodger (free) 4= Company House 5= Other	26) If renting How much do you pay for rent per month ? 1= under 50,000/= to 50,000 2= 50,000 to 100,000/= to 100,000 3= 100,000 to 200,000/= to 200,000 4= 200,000 to 300,000/= to 300,000 5= 300,000 to 400,000/= to 400,000 6= Over 400,000/=

Section 4: General Information concerning children							
27) How many people live in H/H? (As stated in number sixteen (16) so you can omit.		28) How many children are going to schools?		29) How many are in primary level?		30) Does this HH keep any animals or birds?	31) If yes, which animals?
						1= Yes 2= No	1= Birds Poultry 2= Piggery 3= Goats 4= Cows 5= Other (specify)
32) Male	33) Female	34) Boys	35) Girls	36) Boys	37) Girls		

Section 5: Livelihood					
38) What is the educational level of the Household head? 1=No formal Education 2=Primary 3= Secondary 4=Tertiary 5=Graduate	39). What is the main occupation of the household head? 1= Farmer 2= Trader 3= Formal employment 4=Fishing 5= Brick maker 6=Casual laborer 7= Retired 8= Other (specify)	40). If a farmer, what are your main activities 1= Growing rice 2= Growing Yams 3=Growing Sugar cane 2=Subsistence crops 3=Livestock 4= Matoke 5=Others (specify)	41). If employed, what type of employment 1= Civil Service 2= Hospitality and Tourism. 3= Health worker. 4= Telecom, Banking & utilities 5= Professional/ Consulting 6=Other (Specify)	42). If a trader, what type of business? 1= Wholesale 2= Retail shop. 3=Cattle trade 4= Tailoring trade 5=Rental houses 6=Vendor 7=Hawking 8=Others)	43) What is the function of your house? 1=Residential 2= Commercial 3= Rent 4=Livestock 5=Residential /commercial 6=Other (Specify)

44). Rank the major household expenditure items in order of importance 1= Household items 2= School fees 3= Uniform 4= Clothes 5= Medical 6= Transport 7= Water 8= Other specify	45). What is the estimated family expenditure per month?..... 1) Under 50,000/= 2) 50,000 to 100,000/= 3) 100,000 to 150,000/= 4) 150,000 to 200,000/= 5, 200,000 to 300,000/= 6) 300,000 to 400,000/= 7) Over 500,000/=	46). List the type of assets and state who owns the in the household by ticking in box <table border="1"> <thead> <tr> <th>Item</th> <th>Number</th> <th>Husband</th> <th>Wife</th> <th>Children</th> </tr> </thead> <tbody> <tr> <td>1=Cows</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>2=Boda boda</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>3=Bicycle</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>4=Goats</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>5=Hens</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>6=Radio</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>7=TV</td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Item	Number	Husband	Wife	Children	1=Cows					2=Boda boda					3=Bicycle					4=Goats					5=Hens					6=Radio					7=TV					47). What items/ assets do you have now, that you did not have two or three years ago? 1= Bicycle 2=Goats 3=Car 4= Motor cycle 5=Cows 6= TV 7=Others (Specify)
Item	Number	Husband	Wife	Children																																							
1=Cows																																											
2=Boda boda																																											
3=Bicycle																																											
4=Goats																																											
5=Hens																																											
6=Radio																																											
7=TV																																											

Section 6: Health and Energy					
54) What is the most common disease in your H/H?	55) Where do you get treatment from?	56) What is distance to nearest health Centre	57) How Much do you spend per month on Medical Bills / treatment	58) What type of lighting do you use most?	59) If you have electricity what do you use it for?
1=Malaria 2= Diarrhea 3= Coughs/RTI 4=Worms 5=HIV/AIDS 6= Hernia 8=Other (Specify)	1=Hospital/Heath IV 2= Health Centre III 3= Health Centre II 4=Clinic 5= Traditional Healer 6=Self treatment 7=other (Specify)	1=0 – 1km 2= 1km – 2km 3= 2km – 3km 4=3km – 4km 5= Over 4 km	1= 0 – 5,000/= 2= 5000/- 10,000/ 3= 10,000 – 20,000/= 4=20,000 – 30,000/= 5= Over 50,000/=	1=Paraffin 2=Solar 3=Electricity 4= Torches 5= None	1=Lighting 2= Ironing 3= Cooking 4=Industry/workshop 5=Other (Specify)

Section 7: Agriculture and Water Sources					
60) What food crops do you have on your land?	61) What cash crops do you have on your land?	62) What is your source of domestic water?	63) What is the distance to your preferred water source?	64) If you do not have piped water, who collects water in your household?	65) If you do not have piped water How does the one who collects it bring it to the House?
1=Banana 2= Potatoes sweet 3= Cassava 4=Irish 5=Yams 6= Beans 7=Ground nuts 8=vegetables 9=Other (Specify)	1=Coffee 2= tea 3= Sugarcane 4=Vanilla 5=Horticulture 6= Pine trees 7= Eucalyptus tree 8=Fruits 9=Other (Specify)	1=Protected Well 2= Borehole 3= River/swamp 4=Piped water 5= Rain water 6=Other (Specify)	1=0 – 1km 2= 1km – 2km 3= 2km – 3km 4=3km – 4km 5= Over 4 km	1=Wife 2= Husband 3= Girl child 4=Boy child 5= Worker 6= Other (specify)	1=Head loading (carrying on head / hands) 2= Bicycle 3=Boda Boda 4=Wheel burrow 5= Water truck 6= Other (specify)

Section 5: Environmental issues					
66). Do you take part in measures to protect water sources from contamination e.g. cleaning and maintaining borehole?	67). Any reported cases of contamination?	68). Are you involved in catchment protection or conservation measures e.g. terracing or tree projecting?	69). State the major sources of energy for domestic use	70). What alternative sources of energy does your household use?	71). How important is the wetland / vegetation from proposed road site to your household?
1=Yes 2=No	1=Yes 2=No	1=Yes 2=No	1=Paraffin 2=Solar 3=Firewood 4=Charcoal 5= Electricity 6=Gas (LPG)	1=Paraffin 2=Solar 3=Firewood 4=Charcoal 5= Electricity 6=Gas (LPG)	1=Very Important 2=Important 3=Negligibly Important

Housing Characteristics						
72). How would you describe your housing typology?	73). Do you have electricity in your house?	74). Do you have a telephone/Mobile phone?	75). Type of access road to your household	76). Type of community / Public access roads crossing the proposed route	77). Are community / Public roads passable?	78). If community / Public roads nearest to you are re-opened or re-routed how would it affect you and the household?
1=Permanent 2=Semi-permanent 3=Temporary	1=Yes 2=No	1=Yes 2=No	1=Path 2=Paved 3=Marrum/ gravel 4=Other	1=Path 2=Paved 3=Marrum/ gravel 4=Other	1) Non existent 2) Bad 3) Fair 4) Good	1. Don't know 2. move longer distance 3. shorter distance 4. Other (Specify)

B.4.2 Minutes of Stakeholders Consultation Workshop – Community Members

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community engagement Meeting with Lufunve village-Nakisunga Sub-county (Mukono District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	18 th January, 2018
	VENUE	Lufunve Village grounds
	MEETING START	1000 hrs.
	MINUTES BY	Lorna Ngabirano
	MEETING VENUE COORDINATES	-

Attendance Register: Attached

TEXT
The Meeting Commenced at 1000 hours.
Agenda items: <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC 1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Edith Bateganya, • Brief on the socio-economic survey, • Question and Answer Session, • Close of meeting.
Welcome remarks from the LC1 Chairperson
The Chairperson LC1 (Johnson Matte) welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE) project. He tasked the community members in attendance to listen carefully and ask questions at the end of the presentation.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation

<ul style="list-style-type: none"> Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway Project. 	
Brief on socio-economic survey	
<ul style="list-style-type: none"> Dr. Florence Akiiki Asiimwe explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village. 	
Question and Answer session of the meeting	
Question/Comment	Responses by Edith (UNRA)
1) James Kigula There has been talk on radio that Government is fronting a proposal where it can acquire land that is required by a project and then pay the owners later; is this fair?	The current law related to land acquisition for projects demands that compensation is done before land could be acquired for any project. This is what will be followed.
There is someone along Mukono-Katosi road who was paid Shs. 500,000 in compensation yet he expected 50 million shillings. Was this fair? Please explain the basis of compensation values for project affected property.	Compensation values are based on what will be affected by the project such as nature of house/land, its location etc. In case there is any complaint, take the issue to UNRA community Liaison Officers (CLOs) so that an appropriate response is given.
2) John Bosco I am a bit skeptical about compensation monies that will be paid out to affected persons. Experience has shown that UNRA pays little money that is not commensurate to the property value. Affected people are always aggrieved as a result.	Infrastructure projects have both negative and positive impacts. There may be people that may own houses on land for which they have no proper documentation, hence such people are given money only for the house and might feel unhappy.
3) Japhet Kintu Suppose one desires to know whether they will be affected by the project at this stage, can you (UNRA) share a description of the proposed alignment?	Be patient, the surveyors will come and demarcate the Right of Way.
4) Joanita Naluwaga How do you handle cases such as; where the road affects only the compound area of ones house?	Only the area that is affected by the project will be compensated. However, if 98% of your land/property has been affected, then you can receive 100% compensation for the property in question.
5) Charles Baraza We were not informed in time to prepare for this engagement meeting yet it is crucial. We request that you always inform us early and also disclose where the road alignment will be.	We will improve in this regard. As for the true demarcation of the road extents, surveyors will clearly indicate these.
6) Chairperson LC1 (Johnson Matte) What happens in cases when someone refuses to accept money for compensation because they do not desire to be relocated?	Government is empowered by law to acquire land as long as compensation is adequately and fully done.
7) Mukasa John Please allow affected people to set the price of properties that will be affected.	UNRA has to follow the law on compensation and this law does not indicate that project affected people can set their own prices for

	properties that will be affected.
How do you handle compensation for graves, since some are tilled and others are covered in terrazzo surfaces	Standard rates as regards to compensation for graves do exist. It is these that will be followed. Other traditional norms will be observed in relocating graves.
8) Betty Nabusi UNRA should ensure project affected people are not left in a worse condition than they were before compensation.	UNRA picks lessons from previous projects undertaken. However though, the socioeconomic survey that will be undertaken will provide a baseline that can be used to analyse whether people have benefitted from compensation or not.
9) Frank Emoru Please clarify on whether information collected in the social economic census in our village will be shared with the Local council chairperson to enable him plan for this village.	Reports will be submitted to UNRA, it is up to UNRA to share the report with local Council chairpersons.
10) Hanifa Naluswa How do you handle Issues where one is not in the proposed project Right-of-Way (ROW) but is affected by works when road construction starts?	Only people who are affected will be compensated. There are other unexpected impacts during construction and those will be handled at that stage.
11) Sarah Kaye As community members, where can we seek redress in case we are not satisfied with the way project works are being undertaken?	UNRA has learnt to pick up lessons from projects it undertakes in order to ensure that negative impacts on people and property are mitigated adequately on subsequent projects Nonetheless, For any complaints/queries contact UNRA on the toll free number 0800100811/2. For queries related to the KJE project call: 0757985998/0778908266
CLOSURE: The meeting was closed at 1300hours

  	Community engagement Meeting with Butabika zone A village-Nakawa Division, (Kampala District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	19 th January, 2018
	VENUE	Butabika Zone A
	MEETING START	1400 hrs.
	MINUTES BY	Lorna Ngabirano
	MEETING VENUE COORDINATES	36N 461296, 36278

Attendance Register: Attached

TEXT
The Meeting Commenced at 1400 hours.
Agenda items: <ul style="list-style-type: none"> National Anthem, Buganda Kingdom Anthem and Opening Prayer, Welcome remarks from the Local Council 1 (LC 1) Chairperson, Self-introductions from the UNRA and Atacama Consulting Team, KJE Project Overview presentation by Edith Bateganya, Brief on the socio-economic survey, Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the LC1 Chairperson
The Chairperson LC1 welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE). He thanked them for turning up in the numbers and asked them to be attentive and ask questions at the end of the presentation from UNRA. He said that people had been wondering why the project had stalled for this long. Nonetheless, they were glad that activities had resumed.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on socio-economic survey

- Dr. Florence Akiiki Asiimwe explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they will move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting

Question/Comment	Responses by Edith (UNRA)
1) Pastor Amos Okiya There was a valuation exercise that was conducted in this area. Given that the project stalled and some of the properties that were valued then have since been destroyed and some new ones have come up, how will you go about this issue?	We are undertaking an update of the data that was collected then; because there have been changes in the realities on ground. The old forms will be used to inform the new valuation exercise.
2) Jamal Maliyamungu Please consider scheduling KJE project related activities over the weekends so that all people can be present.	We know you are being inconvenienced but we ask that you be present. It is through these meetings that we pass on new information about the project. We ask that you bear with us and attend all meetings.
3) Eva Namazzi My house was valued some time back. However though, it has been vandalized overtime since we were advised to cease all developments on our land. How can we be helped?	The old valuation report will inform the new report. Please endeavor to be present when the Valuer is on ground and explain your predicament.
4) Pastor George Mukiga In 2013/14, UNRA marked the area that would be affected by the project. With change in alignment, please give consideration to people that were previously in the alignment but may now be left out.	The current laws of Uganda pertaining to land acquisition for projects do not allow for compensation of people that are not presently affected by the project.
Please assure us that you will value our properties according to current market prices.	We will value your property at current prices; we may also refer to the old records and update the current forms during valuation.
Ensure that you carry on with project activities so that we are compensated this time round and find where to relocate.	The project is on course. Surveyors will soon be here to mark the affected area and there after enumerators will undertake a socioeconomic census.
We have had contestations about land ownership within this area. Most notable among these is the feud between Buganda Kingdom, and the families of Kasasa and Daudi Chwa. How will UNRA handle this?	UNRA will try to mediate so that this is resolved to enable the project move.
5) Mariam Baziru We have cases in this community where women have worked hard and acquired property single handedly; such as land. Is it fair to share what will accrue from compensation with a husband?	Seek consensus with your spouses to avoid disagreements.

6) Stephen Onyango We have heard that you collect information from tenants; how relevant are the tenants in the socioeconomic census?	We are doing this to ascertain the livelihoods of different groups of people within the project area. These include; landowners, tenants, property owners and kibanja holders
There are people who have multiple properties within the project route. How will you handle this issue?	Compensation will be made for all properties that will be affected by the project.
7) Draku I have rightly observed that the KJE alignment was designed to avoid densely populated areas and highly developed areas. Much of it will be routed in vacant lands. Please ensure that you compensate every one that will be affected.	The demands of donors dictate that impact on human communities and biodiversity be lessened. This guides the design. However, those that will be affected will be adequately compensated.
8) Bashir Bwogi Tushemereirwe. During the initial valuation, we were within the project alignment. We have a situation here since some of us were shifted from one division to another. Will the old and new information tally?	Please focus on attaining and having your purchase agreements, we as a team will decide together with the area chairpersons where you belong. The old forms will help during the update but everyone will get a new form
9) Esther Ayo My concern is about those who are not within the alignment (directly affected). Do you still stand by your explanation that these will be considered during construction in case they suffer any impact?	At this stage of the project, only those within the alignment can be deemed to be affected. However during construction, all impacts will be handled on a case by case basis as they occur.
10) Abel Nnyanzi During a previous meeting, you informed us about changes in the alignment. Will this require surveyors to come back and survey afresh?	The surveyors will be coming back to map out the changes in the alignment.
When we asked whether to continue with our developments, you answered that we should go ahead. Suppose, only one structure of mine was captured in the last valuation and now I add two more structures, is this acceptable?	Yes, we will consider your 3 houses if they will all be affected.
UNRA contact numbers.	For any complaints contact UNRA on the toll free number: 0800100811/2 or the KJE Project lines; – 0757985998 – 0778908266
CLOSURE: The meeting was closed at 1700 hours

	DATE	19 th January, 2018
	VENUE	Mbuya II Zone 2
	MEETING START	1000 hrs.
	MINUTES BY	Lorna Ngabirano
	MEETING VENUE COORDINATES	36N 459967, 36030

Attendance Register: Attached

TEXT
The Meeting Commenced at 1000 hours.
Agenda items: <ul style="list-style-type: none"> National Anthem, Buganda Kingdom Anthem and Opening Prayer, Welcome remarks from the Local Council 1 (LC 1) Chairperson, Self-introductions from the UNRA and Atacama Consulting Team, KJE Project Overview presentation by Edith Bateganya, Brief on the socio-economic survey, Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the Local Council 1 (LC 1) Chairperson
The secretary for Defence represented the Chairperson LC1. He welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE) project. He thanked them for turning up even though they had been called at short notice and asked them to be attentive and ask questions at the end of the presentation from UNRA.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on the socio-economic survey

Dr. Florence Akiiki Asiimwe explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting

Question	Responses by Edith (UNRA)
1) Charles Baliluno You mentioned that the socioeconomic team would use tablets to identify who will/will not be affected by the project. How can we be so certain of the accuracy of the tablets?	Top management will advise on whether to go by the tablets or deploy surveyors to mark affected areas.
2) Yafesi Opio Please ensure that you notify local leaders and community members in time before such consultations are held. Otherwise, so many people may miss them and yet they are affected by the project.	This has been noted.
How is valuation done and what methods will be used for this exercise?	The current laws pertaining to valuation will apply. The price of land and property will be determined by the prevailing market prices.
We have quite a number of projects in our area. One of these is the Sewerage line project of National Water and Sewerage Corporation (NWSC). We have seen NWSC break houses even before they fully compensate affected people and we hope that KJE will not use these underhand tactics.	Compensation is made before Government acquires land and property and that is what we shall follow.
Have you considered Environmental and social impacts that may arise during construction?	These have been considered and mitigation measures have been fronted.
In cases where a portion of my land is affected by the project, do you pay for what has been affected only or you acquire the whole plot?	UNRA will determine the percentage of land take. If it is a bigger percentage, all of it will be compensated.
3) Kisakye Ronald We understand that landlords will have to give consent letters to those settled on their land. However, there are cases where two people claiming to be 'land lords' may be in court over ownership of the land. Which one should we deal with?	You have to wait on the courts to decide on the rightful landlord.
What if UNRA is taking part of the land and SGR is taking another part of the land, who will pay for the remaining land?	This will be a case of orphan land and whoever pays last of the two projects will pay and acquire orphan land.
4) Sam Mpiima Which documents should i possess to indicate ownership of the piece of land that I bought from a friend?	Purchase agreement between landlord and Kibanja holder and then a consent letter.
5) Betty Jena	Surveyors will come and peg the Right of Way

In your presentation, you talked of a possible change in alignment, where is the road passing now.	then you will know who is in or out and the exact location of the road.
6) Hajji Sulaiman Sekigude I am wondering whether this is the last meeting before actual works on the road can start.	This is not the last meeting. It is one of the meetings to give information to the affected communities.
Please consider holding these meetings over the weekends when most people are free and available.	According to public service standing orders, public work has to be done during weekdays.
Will those that are left out of the new alignment be compensated, considering that they were in the initial alignment?	According to current laws, it is affected people that will receive compensation.
7) Hadija Nagujja What if someone bought Kibanja and built a mud and wattle house, are they eligible for compensation?	Every person that will be deemed affected and can prove ownership of land and property within the proposed alignment will receive compensation.
8) George Ndolile Suppose one has a dwelling on Kampala Capital City Authority (KCCA) land, is KCCA required to provide letters of consent to them?	Please obtain all necessary documents that indicate your status of tenancy from the respective landlords.
There are cases where parents have died but the land they owned was parceled out to their children. How can the children in this case verify that the land truly belongs to them?	The Local Council chairperson of the area can attest to the ownership of the land by the children and offer a binding document to this effect.
The project has stalled yet the people affected were told to halt all developments within the alignment. Will you consider compensating them for lost time?	This issue will be handled by top management.
UNRA's contact.	UNRA toll free number 0800100811/2 – KJE Project numbers 0757985998 – 0778908266
CLOSURE: The meeting was closed at 1300hours

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community engagement Meeting with Kinawataka zone 1-Nakawa Division (Kampala District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	22 nd January, 2018
	VENUE	Kinawataka
	MEETING START	1030 hrs.
	MINUTES BY	Lorna Ngabirano
	MEETING VENUE COORDINATES	36N 456614, 38223

Attendance Register: Attached

TEXT
The Meeting Commenced at 1030 hours.
Agenda items: <ul style="list-style-type: none"> National Anthem, Buganda Kingdom Anthem and Opening Prayer, Welcome remarks from the Local Council 1 (LC 1) Chairperson, Self-introductions from the UNRA and Atacama Consulting Team, KJE Project Overview presentation by Edith Bateganya, Brief on the socio-economic survey, Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the Local Council 1 (LC 1) Chairperson
The Chairperson LC1 (Yafesi Mulindwa Salongo) welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE). He called upon members to listen to the presentations and do away with the misconceptions that they had about the project.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on the socio-economic survey
Dr. Florence Asiimwe Akiiki explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting	
Question	Responses by Edith (UNRA)
1) Abdul Aziz Gomubi Bamliia We have waited a long time for this project to take off. Please tell us if the project has resumed so that we prepare to shift.	The project is on course, the socio-economic team will visit this village to conduct a census of all people, businesses and public facilities that will be impacted by the project.
2) Councillor Local Council 2 (Mr Lwanga) Given that this area is located in Kampala, we hope that during valuation, it is Kampala rates that will apply to us.	Market rates will apply.
3) Beatrice Mbirizi There are cases where Kampala Capital City Authority demolished houses in areas where the Kampala Jinja Expressway is likely to be routed. How will you handle such cases?	UNRA will work with KCCA to understand why these houses were demolished.
4) Jordan Lukitira We have rightly observed that when surveyors mark the houses that will be impacted by the KJE project, potential tenants avoid such houses and the property owners lose money as a result. When will you compensate us so that this loss of business can be stemmed ?	We cannot tell when compensation will be made at this point. However, you may prepare the relevant documents that will be needed for compensation to be effected.
Please ensure that the enumerators who will undertake the survey census are responsible and professional.	Enumerators have been trained thoroughly. If you get any problem inform UNRA.
5) Mzee Juma Salongo Muwonge The Kampala Jinja Expressway has been over delayed considering that valuation was done in 2014. Why is this so?	We are sorry for the delay. However, this was because several projects such as the Standard Gauge Railway and the Bukasa port had come on board and they share the corridor with the KJE project within some areas such as this village. Since it is not easy to change the design for the railway, it is the road design that had to change. Harmonising this also caused a delay among other reasons
There are cases of some people claiming to be managers of public facilities such as mosques and churches. How will you dispel this?	Public facilities usually have management committees, which UNRA will liaise with.
6) Wilson Musisi What will happen to land that will be located in the corridor between the expressway and the Standard gauge Railway projects?	This is a case of orphan land. Stakeholders at a higher level regarding the two projects have agreed that orphan land will be acquired by whoever will do compensation last.
7) Titus Diwanda Please ensure that community members in this area are considered for employment on the project when works begin	The contractor will be required to consider people from the communities where the road will pass.
I belong to the category of vulnerable people; will I be considered as such and given special attention? How will this be highlighted?	This is the reason why the socio-economic survey will be undertaken. It is aimed at capturing and highlighting all these details.

8) Frolence Zalwango Suppose one has a tiny plot of land, are they to be compensated?	Yes, they will be compensated. Size does not matter. Compensation will be made for whatever will be impacted by the project regardless of its size.
9) Lawrence Kiwanuka There are people that do not have the relevant documents as pertains to ownership of property that will be affected by the project. How will you handle this?	Please ensure that you obtain all the relevant documents so that payment is made once the compensation process starts.
10) Peter Kasule The changes in alignment might leave out some people that had been affected by the initial design. Please consider them for compensation because they have waited for so long for the project to take off. It would be unfair to inform them that they will not be compensated.	For those affected by change in design, sorry. Current law states that payment will be made to those affected only. However, this concern has been noted and submitted to top management for consideration.
11) Samuel Onyango If one has a complaint against the chairperson and the way, he is conducting his work as regards to this project, where does he seek redress.	Please work well with your local leaders because they are on ground. However, you may channel your issues to UNRA through the contacts below: <i>For issues related to KJE: 0757985998 and 0778908266.</i>
12) Malinga We have heard of instances where people have not received compensation because their names disappeared from UNRA computers. Please assure us that this will not happen on this project.	This is not true. UNRA keeps both soft and hard copies of records.
13) Emmanuel I was born here, though I am lacking documents that indicate my attachment to this land. How can I be helped so that I do not miss out when it comes to compensation?	Please ensure that you obtain the required documents to indicate your ownership of the land where you have stayed for this long.
Please explain why the Kibanja holder is not entitled to 100% compensation.	The Kibanja holder is entitled to 70% of the compensation and that is how it shall be.
14) Joseph Omona Suppose one has four plots of land and one bank account, will he receive compensation for all the plots in case they are impacted by the project?	All plots will be compensated.
CLOSURE: The meeting was closed at 1300hours

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community Consultation Meeting with Banda zones: B2 and B3 (Nakawa Division-Kampala District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	23 rd January, 2018
	VENUE	Hasaya Junior School, Banda, zone-B3
	MEETING START	1000 hrs.
	MINUTES BY	Lorna Ngabirano
	MEETING VENUE COORDINATES	36 N 459454,37560

Attendance Register: Attached

TEXT	
The Meeting Commenced at 1000 hours and was moderated by the local council Chairperson, Ms. Fatuma Kitimbo.	
Agenda items: <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC 1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation, • Remarks from Dr Florence Asiimwe Akiiki-Consultant Sociologist, • Question and Answer Session, • Closing remarks by the LC1 Chairperson, <p>Close of meeting.</p>	
Welcome remarks from the LC1 Chairperson,	
The Chairperson Banda, zone B2 (Ms. Fatuma Kitimbo) welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE) project. She encouraged community members to ask questions and get clarification about the project.	
KJE Project Overview presentation	
Edith Bateganya, a Sociologist at UNRA provided an overview of the KJE project.	
Remarks from Dr. Florence Asiimwe Akiiki-Consultant Sociologist	
Dr. Florence Akiiki Asiimwe (Atacama Consulting senior sociologist) gave a brief about the impending socio-economic census to be conducted in the area and asked the community to cooperate with the enumerators and provide all the required information.	
Question and answer session	
Question	Answers by Edith (UNRA)

<p>1) Erias Kigundu We shall be required to transfer cultural items to pave way for the road project. Given that we have traditional shrines in this area, how do you intend to help us; since transferring these requires a set of elaborate rituals?</p>	<p>Please ensure that your cultural items are moved according to the traditional customs prevailing in this area.</p>
<p>2) Lawrence Kalule In instances where some people have lost their documents pertaining to land ownership to several factors such as flooding, will they be eligible for compensation.</p>	<p>You can liaise with the chairperson who will help you acquire new agreements pertaining to the land.</p>
<p>3) Moses Kitugumba On compensation, you mentioned that UNRA would allow us 6 months to relocate, and that we should give tenants 3 months free residence, but there are some tenants that have not paid rent, you are now requesting that I give them free residence. Is that feasible to you?</p>	<p>The 3 months free rent proposal applies only when a tenant has been fulfilling their obligations by paying rent on time. If a tenant has not paid, the landlord has to handle the issue. UNRA doesn't get involved in such affairs.</p>
<p>4) Sam Okumu Is it possible to sit down the Valuation officers and agree/negotiate on the price of my property before valuation?</p>	<p>UNRA will follow the current law. Value will match the property taken. Besides, What the valuers do is value your land, house, property; they then make the valuation and approach you to let you know how they arrived at that price. It is imperative that you should manage your expectations.</p>
<p>The list of special groups as mentioned in your presentation includes; the elderly, widows and the physically disabled. I suggest that widowers be added on this list.</p>	<p>This is why the social - economic team is coming to interview every household and business head. People in the community might have different problems, jobs and the like. If it is noted that one is a widower who is barely making ends meet, they will be added to the list.</p>
<p>Supposing one is constructing a structure where the road is likely to pass, should they stop building?</p>	<p>The law states that before valuation and compensation, the property is yours, so you can do as you please. When the valuers come, they will have the authority to tell you to stop any further developments. What we try to avoid is speculation, that when people are told this, they rush to build so as to get more compensation.</p>
<p>5) Charles Mawejje Please help us understand the exact extents of the planned road project in this community.</p>	<p>When surveyors come on ground, they will mark out the exact extents of the road. All properties to be affected will be indicated as so.</p>
<p>6) Mitala Solomon How will compensation work for those that may have several properties, which will be impacted by the project?</p>	<p>All the properties will be valued separately and compensated if they are affected by the project.</p>
<p>7) Esther Wamala Now that you have held this engagement, we would like to know how long we should have to wait before the valuation exercise kicks in.</p>	<p>It is not possible to give specific dates and periods for various project activities, however this engagement indicates that the project is on course and valuation will surely come.</p>

<p>8) Deborah Katabalwa. There are 3 projects (Kampala Southern Bypass, Kampala Jinja Expressway and the Standard Gauge Railway project) running in this area, the Kinawataka drainage project will also come on board very soon. It would be imperative if you harmonised your activities as government projects.</p>	<p>As UNRA, we are aware of these projects and have harmonised with them to ensure that all run smoothly.</p>
<p>9) Micheal Kiyingi. I have a piece of land in Banda B2, I have not yet processed a title and I cannot develop the land at the moment. I do have a purchase agreement though, In your talk, you mentioned only those with buildings and titles, What about a person like me?</p>	<p>We compensate what the project will affect such as; land, buildings etc. We shall therefore compensate you for your land only.</p>
<p>10) Muhammad Kavuma In some areas, we recognize KCCA as the landlord and we usually pay them, it's been a year and they haven't been accepting payments but they used to give us receipts when we did pay. Will this affect our eligibility to be compensated?</p>	<p>KCCA knows the people on their land. UNRA will work with KCCA and resolve the issue. KCCA will give consent letter once arrears are paid.</p>
<p>11) Badru Ssemwanga What about people who bought land together (co-ownership), will both be compensated?</p>	<p>Form will have two names and a joint account will be opened. So both will be compensated.</p>
<p>12) Ben Nangabo. In this community, we have conmen and fraudsters. What avenues do you have to deal with such people? We ask that you be vigilant and avoid intermediaries and "dealers" who will claim to speak for the community.</p>	<p>For this project, we shall not approach you without the prior knowledge of your local leaders. However, I also implore you to be vigilant. Another clarification is that this money will not have intermediaries. We will be dealing with individuals directly. We will provide the project numbers on which you can call and seek clarification from our team at UNRA.</p>
<p>UNRA contact numbers</p>	<p>For any complaints, contact:</p> <ul style="list-style-type: none"> – UNRA toll free number 0800100811/2 – KJE Project lines 0757985998 – 0778908266
<p>CLOSURE: The meeting was closed at 1300hours</p>

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community Consultation Meeting with Kyambogo-Zones: K4, K5, K6 and K7 (Nakawa Division, Kampala District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	23 rd January, 2018
	VENUE	Waterford Nursery and Primary School-Kyambogo
	MEETING START	1430hrs
	MINUTES BY	Lorna Ngabirano
	MEETING VENUE COORDINATES	36 N 459205, 37870

Attendance Register: Attached

TEXT
The Meeting Commenced at 1430 hours.
Agenda items: <ul style="list-style-type: none"> • National Anthem, Buganda Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC 1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation, • Remarks from Dr Florence Akiiki Asiimwe -Consultant Sociologist, • Question and Answer Session, • Closing remarks by the LC1 Chairperson, <p>Close of meeting.</p>
Welcome remarks from the LC1 Chairperson
The Chairperson welcomed the participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE) Project. He said that, the last time UNRA did any work on the KJE project in the area was in 2014.
Self-introductions from the UNRA and Atacama Consulting Team
Members in attendance introduced themselves by name and organisation they were representing.
KJE Project Overview presentation
Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Remarks from Dr. Florence Asiimwe Akiiki-Consultant Sociologist

Dr. Florence Akiiki Asiimwe (Atacama Consulting senior sociologist) gave a brief about the impending socioeconomic census to be undertaken in the community as well as the role of community engagements in project areas.

Question and answer session of the meeting.

Question	Responses by Edith Bateganya (UNRA)
1) Tom Ongom UNRA undertook surveys in these areas some time back. The process was serious and even went up to the valuation stage. What became of that process and why is an update necessary now?	There was no Public Private Partnership Act then and investors could not commit finances to the project without a binding legal framework. The time lapse between then and now necessitates an update of the previous findings.
There are areas where KCCA is the landowner; are the tenants required to obtain consent letters from KCCA?	KCCA will provide consent letters to those that stay on its land.
Will you consider tenants in the socioeconomic survey?	They will be considered and interviewed for businesses and households.
2) Philip Considering that, the alignment has changed as you said during the presentation, would you compensate those that were previously in the alignment and are now out.	Unfortunately the current law states that only those who are affected are compensated. The alignment did not change in these areas.
3) Zibeda Kiryowa UNRA has held several meetings with us in light of the KJE project. We are tired of meetings and only want to hear from you when we shall be compensated.	The project is on course and compensation will surely come.
4) Silaji Sesanga Will UNRA work with Local Council leaders in the execution of project activities?	Yes, Local leaders will be part of our teams in the field.
Please help us understand the importance of the socio-economic survey on this project.	The Socioeconomic survey will provide baseline data about communities. This data will be used to design livelihood restoration programs that will seek to mitigate the negative impacts of the project on people in the project areas.
5) Ibrahim Mulindwa Most of the household heads in this area work in the day and are likely not to be available during the census. We request that you provide us with the exact dates when you plan to undertake the census here such that we can purpose to be around.	We shall inform the local leaders when we plan to be here for the census. These in turn will pass on the information to you.
Do you have a comprehensive list of all those that are likely to be impacted by the project at this stage?	This cannot be done without the surveyors setting out the approved alignment.
We have heard of instances where project affected people have not been compensated. This has happened on the Entebbe expressway. We hope everyone will be compensated.	There could be several reasons why affected persons may not be compensated in time. We shall follow the dictates of the current laws on land acquisition, which guides that

	compensation should be made before land is acquired for a project.
Will you provide a working allowance to local council leaders that will move with your teams?	Yes, this will be done.
Please consider topping up the compensation with a disturbance allowance for the loss of time and opportunities that we have endured during the long wait for the resumption of the project.	Yes, this will be done.
In the Resettlement Plan, will you resettle us?	This will be an option for those that will prefer it over a cash payment.
6) Joy Now that the project is on course, we request that you advise us (the people that undertake businesses in rented premises) on the right time when we should move house/shift from the premises that will be affected by the project.	Ideally, you should shift only after Government has compensated property owners. However, for security reasons we do not inform tenants that landlords have been paid.
What considerations will be given those that will be affected during the construction phase of the project?	Such incidents will be handled on a case-by-case basis as they occur.
Will you consider the fact that the value of land in this area has appreciated over time?	Current market values will be factored into the compensation plan.

TEXT
The Meeting Commenced at 1430 hours.
Agenda items: <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Edith Bateganya, • Brief on the socio-economic survey, • Question and Answer Session, • Close of meeting.
Welcome remarks from the LC1 Chairperson
The Chairperson LC1 welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE) project. He informed community members that the project, just like any other, would have positive and negative impacts and how these are managed was very important.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on the socio-economic survey

- Dr. Florence Akiiki Asiimwe explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and answer session

Question/Comment	Responses by Edith (UNRA)
1) Joseph Lutaya We have seen surveyors demarcating the Right of Way in villages neighboring our own. When will surveyors reach our village?	Be patient, the surveyors have started work and soon will be in this village.
There are fears that since the KJE project will be a limited access toll road, it will affect the mobility of those who use boda-bodas (motor cycle taxis) as well as pedestrians that may need to cross the expressway. How will this be handled?	The expressway will be designed to have flyovers and underpasses for the sole reason of facilitating movement across it.
2) Isaac Kiggundu There is need for UNRA to clearly indicate where this road has been planned to pass on ground.	The Map of the planned road is on computer and surveyors will put it on ground. Please wait for surveyors to come and then you can be sure of the areas that will be traversed by the road.
3) Caroline Babirye In light of compensation monies for land and property that will be impacted by the project, shall we be allowed to open accounts in banks of our choice where the monies can be paid?	Yes, you may have accounts in commercial banks of your choice.
Suppose one has land that contains mineral resources like sand, what will happen and how will you handle such cases?	According to Ugandan law, minerals belong to Government, only land and structures can be compensated for.
4) Ibrahim Kizito The project will come along with lots of negative impacts such as an increase in the number of people migrating to our community for jobs. How can insecurity be avoided; of all the negative impacts?	Contractors will be given guidelines on how not to disturb the peace and tranquillity in the communities where they will be working.
5) Nabesero Does the right of way, which the surveyors are demarcating, include the road reserve?	Yes it does.
Please, always ensure that you inform us in advance to be around for all project activities that require our presence.	We always share the program pertaining to our visits in the villages with the local area leaders. It is up to them to mobilise you for the same
6) Constansio Namberenge My situation is that I am old, vulnerable and have graves on my land. Will the project transfer me to a suitable land and build for me? How about the graves; will you assist in translocating them	UNRA will build for you if that is what you choose and assist you in translocating the graves. The LC1 chairperson may be called upon to assist in identifying suitable land where you can be resettled within the community if possible.

from the project area?	
7) Livingstone Lukuta How do you handle cases where ones house is just on the brink of the expressway where it might be dangerous for them to stay?	At the moment UNRA is considering people who have been located within the project extents. However, impacts not envisaged at this point shall be handled when then arise.
8) Ismail Bashir Serunjogi Most people have loans obtained from banks, in most cases it is the land titles that are used as security for the loans. We understand that titles will be required in verification of land ownership. How can we go about this?	UNRA will deal with the banks. The bank can take its money and leave the rest to the person affected by the project (PAP) once compensated.
9) James Kizingula There may be cases when one does not have all the proper documents pertaining to ownership of the land where they stay. How will you handle such during verification of ownership and payment?	Payments for compensation can only be made when the rightful owners have been ascertained after document verification.
10) Erias Kiiza I have a tiny property and two Bibanja within the proposed alignment. Will I be compensated?	You will be compensated regardless of the size of your property.
Incase our mosque is within the proposed Right of way, shall we be compensated to relocate it?	Yes, you will be compensated.
11) Ahmed Damulira I have an account in a microfinance institution. Is it possible to channel compensation monies through that account so that I avoid opening an account in a bank?	Compensation payments will only be made to those that have accounts in commercial banks and not microfinance institutions.
There are people who are at various stages of acquiring land titles. How will you handle such?	This issue will be handled according to the stage in the process.
12) Kevin Kabanda I have a property within the proposed alignment, it was valued in 2008. I wonder whether I will be compensated since it has been such a long wait.	You will be compensated. The project and all the necessary activities are now on course.
UNRA contacts.	Please write down these contacts in case you need clarification or have any complaints to be attended to by UNRA. UNRA toll free number 0800100811/2 KJE Project numbers 0757985998/0778908266

  	Community engagement Meeting with Kito zones: B and C (Kiira Municipality-Wakiso District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	06 th February, 2018
	VENUE	Faith Foundation Church
	MEETING START	1415hrs
	MINUTES BY	Opolot Emmanuel
	MEETING VENUE COORDINATES	36N 462044, 36577

Attendance Register: Attached

TEXT
<p>The Meeting Commenced at 1415 hours.</p> <p>The local council 1 Chairperson of Kito C (Mr. Tonney Kalemba) moderated the meeting.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Anthem and Opening Prayer, • Welcome remarks from the LC1 Chairperson-Kito C zone (Mr. Didas Atwongyeire), • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Edith Bateganya, • Remarks from the Senior Government Valuer, • Question and Answer Session, • Closing remarks by the LC1 Chairperson, • Close of meeting.
<p>Welcome remarks from the LC1 Chairperson-Kito C zone (Mr. Didas Atwongyeire),</p> <p>The chairperson welcomed the team to the community meeting and was glad the meeting was taking place despite the perceived 'hostility' of the community towards Government projects.</p>
<p>Self-introductions from the UNRA and Atacama Consulting Team</p> <ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
<p>KJE Project Overview presentation</p> <ul style="list-style-type: none"> • Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP. • Godfrey Otori, a Senior Government Valuer attached to UNRA delivered his remarks on what to expect from the team doing the valuation and compensation. He guided

the community about how to manage expectations and be prepared for the process of compensation.	
Question and Answer session of the meeting.	
Question/Comment	Responses by Edith (UNRA)
10) Kalema Wasswa (Kito C) When valuation was conducted (about 4 years ago), we were told to halt all developments on our land now there is talk that the alignment has changed. What happens to us in case we are now out of the new alignment? Shall we be justified if we sue because our time and opportunities have been wasted by this long wait for compensation?	The change in alignment was arrived not to hurt anyone but to avoid impacting vital ecosystems like Mabira Central Forest Reserve and the confusion in areas that had multiple government projects such as Standard Gauge Railway and the Bukasa port. The law however provides that only property found onsite can be compensated. It is up to you to prove that the long wait led to the destruction of your property.
11) Emmanuel Mugisha (Kito C) Now that you intend to conduct a census and another valuation exercise, what happens to the previous valuation that was done four years ago, does it still hold?	What we are doing now is an update of the information that was obtained then. It is also necessary to factor in current costs and prices to reasonably compensate those affected.
Suppose as a community we cooperate with UNRA this time round, how long should we wait before compensation is done?	It is hard to attach a specific time line as to when we shall be here. However understand that everything that we are doing right now is a step in the direction of compensation and acquisition of land for the project
12) Peterson Mulongo Wasswa (Kito C) Some structures that were assessed previously have since collapsed over time, how will these be considered in case they are in the new alignment?	The onus will be upon the owners to prove that the structures collapsed due to the 'long wait' for compensation to come by after the valuation exercise that was undertaken some time back.
13) Fatuma Naava (Kito C) How will you assess empty/vacant land?	Empty plots will also be taken into account and the land woners will be compensated.
14) Nicholas Byamukama (Kito C) Please describe the route alignment of the Kampala Southern Bypass and the Kampala Jinja mainline that comprise the proposed Kampala Jinja Expressway.	The Kampala Jinja Expressway comprises two projects; Kampala southern Bypass will connect the Kampala Jinja mainline and the Kampala northern bypass to the kampala-Entebbe expressway while the Kampala Jinja mainline will start at the Lugogo bypass and stop at the new Nile bridge in Buikwe District.
There are instances when structures are marked as partially affected, however during works, it happens that they have to be fully demolished. How do you handle such cases?	This is a case of injurious affectation; UNRA will fully compensate those who are affected as such. Those who will be compensated as such will have to vacate the ROW to avoid further impacts.

<p>15) Peter Mugwanya (Kito C)</p> <p>Suppose one has a girlfriend, is she entitled to the compensation monies in case she stakes her claim on it?</p>	<p>Temporary fiancés will not be considered as spouses to be entitled to the compensation package. Only long-term partners will be catered for, but one can approach UNRA and explain the arrangement he / she has with the partner.</p>
<p>16) Jackson Kato (Kito C)</p> <p>NEMA and NFA claim to own this land on which we have settled yet the president directed that we as (Kibanja holders) should be paid before we can go off the land. In light of this dispute, will NEMA allow to offer us the required consent as the landowners such that we can be paid?</p>	<p>This issue will be resolved at a level higher than this.</p>
<p>17) Pastor George Mukiga</p> <p>NEMA and NFA have been trying to push us off this land, we have resisted these moves and our matters are before the head of state. Who, of NEMA and NFA is our landlord?</p>	<p>We shall seek for guidance on this issue at a higher level. However what is clear is that the landlord is entitled to 30% compensation while the Kibanja holder gets 70%. People should mind about their share of the compensation as we search for ways to acquire consent from these agencies.</p>
<p>We have a running court case as regards the ownership of this land. We have engaged the ministry of works and the office of the prime minister who have since directed that we should be compensated before we can move off this land. Please inform us whether you are ready to implement this directive.</p>	<p>Compensation in its due time will be made to all who will be affected by the project.</p>
<p>18) Hope Namuli</p> <p>Please clarify the issue of the letter of consent, why it is so important and who will provide it in our case since we do not have a landlord.</p>	<p>A consent letter is a letter the landlord gives the kibanja holder as recognition of their tenancy on the land.</p>
<p>How will you handle the compensation process for churches, schools and public places?</p>	<p>Churches and schools will also be catered for. Schools will be given even longer time to relocate (up to 12 months) in deference to the students and pupils.</p>
<p>19) Tonney Muwanguzi</p> <p>Shall we be required to produce old forms that we got during the previous valuation exercise?</p>	<p>You may keep them safe for reference.</p>
<p>20) Ali Maase (Kito C)</p> <p>How long will you take before coming back to the village to undertake the social survey and other activities?</p>	<p>The stakeholder consultation we are holding at this point indicates a resumption of project activities. Surveyors will be coming in to mark the ROW after which a team to undertake the socioeconomic census will come in. these will be followed by other teams. When this time comes, we will inform the chairperson who will pass on the communication to you.</p>

<p>21) Frank Mugarura</p> <p>How about court cases that were deemed unfair and are being appealed?</p>	<p>We shall put a caveat on the land until a definitive ruling is made.</p>
<p>22) Akankwasa</p> <p>The delayed compensation has meant that we cannot undertake any further development on our properties. How long will this go on?</p>	<p>Please carry on with your developments until you are expressly told to stop after valuation has been done.</p>
<p>23) Didas Twongyere</p> <p>In such cases where land owners have leased out their land, of the two parties who is to get compensation?</p>	<p>The licensee and the landlord will both be compensated depending on the agreement between the two parties.</p>
<p>24) Kalemba Tonny</p> <p>There are instances where some people have bought land but are paying for it in installments, how will these be resolved?</p>	<p>Agreements between the parties can be drawn up to decide on a payment plan. People should be open about such cases so that we can find solutions early in good time.</p>
<p>CLOSURE: The meeting was closed at 1716hours</p>

  	Community Consultation Meeting with Kasokoso & Kireka D-Kiganda (Kiira Municipality-Wakiso District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	06 th February, 2018
	VENUE	Kasokoso Beach
	MEETING START	1135hrs
	MINUTES BY	Opolot Emmanuel
	MEETING VENUE COORDINATES	36N 461279, 36445

Attendance Register: Attached

TEXT
<p>The Meeting Commenced at 1135hours.</p> <p>Mr Ali Mwandha, the Local council 1 Chairperson of Kasokoso village moderated the meeting.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Anthem and Opening Prayer, • Welcome remarks from the LC1 Chairperson (Mr. Ali Mwandha), • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation, • Remarks from Dr Florence Asiimwe Akiiki-Consultant Sociologist, • Remarks from a UNRA Sociologist and the Senior Government Valuer, • Remarks from the UNRA Surveyor, • Question and Answer Session, • Closing remarks by the LC1 Chairperson, • Close of meeting.
Welcome remarks from the LC1 Chairperson (Mr. Ali Mwandha)
<p>The chairperson welcomed the team to the community meeting and was glad the meeting was taking place despite the perceived hostility of the community towards Government projects, which have previously aimed at dispossessing them of their land without proper compensation.</p>
Self-introductions from the UNRA and Atacama Consulting Team
<p>Members in attendance introduced themselves by Name and Organisation they were representing.</p>
KJE Project Overview presentation

Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.

Remarks from Dr. Florence Asimwe Akiiki-Consultant Sociologist,

Dr Florence Asimwe Akiiki (Atacama Consulting senior sociologist) gave a brief about the impending socio economic census to be undertaken in the community as well as the role of community engagements in project areas and asked the community to welcome the team of census enumerators as well as provide them with the correct information when they come.

Remarks from a UNRA Sociologist and the Senior Government Valuer,

- Edward Juuko gave a brief about the role community members have to play by cooperating with project teams to ensure that project works proceed unhindered to avoid unnecessary delays.
- Godfrey Owori, a Senior Government Valuer attached to UNRA delivered his remarks on what to expect from the team doing the valuation and compensation. He guided the community about how to manage expectations and be prepared for the process of compensation.

Remarks from the UNRA Surveyor

Fiona Nanozi, a surveyor at UNRA explained to the community, the process of surveying and marking the extents of the ROW for the project.

Question and Answer session of the meeting.

Question/Comment	Responses by Edith Bateganya (UNRA)
25) Alhaji Musa Sekigudde (Kasokoso) We are thankful for this engagement that has been long overdue. We had lost track of what was happening to the KJE Project.	Noted
Are we justified in thinking that this meeting and community engagement marks the beginning of the compensation process? We have waited for so long from the previous valuation conducted four years ago.	This area has been embroiled in vicious land wrangles, these issues necessitated us to move cautiously while dealing with the community and leadership here. However, your cooperation as a community is required if this project is to proceed and avoid any further delays.
For people that were advised not to continue with construction and development of their land after the first round of valuation about four years ago, will you compensate them for losing out on development opportunities?	The law provides that only those presently affected by the project are to be compensated but if a person has proof that their building or developments was stunted because of the project, such occurrences will be considered on a case-by-case basis, But the onus is on that person to prove that they were affected thus.
During the previous valuation exercise for this project, the chairperson used to ask for Ush 5000/= to place a stamp on documents that the locals had, please give us clarification on this issue?	We ask that you stick to questions about the road project only; we do not know how the Chairperson chooses to run his office. However, we have requested that they (Chairpersons) provide agreements to locals at no expense, especially as regards to this project.

Will UNRA provide guidance on which bank we should open up accounts in? There have been rumors that only accounts in certain banks will be acknowledged during compensation	Those whose value of compensation will be 200,000/= and below, a cash payment will be made. However, for those getting paid above that, you will be required to open an account with any commercial bank of your choice. Please note that monetary compensation will not be channeled through local community credit groupings (SACCOs) or Microfinance institutions.
During the previous valuation exercise, some leaders in the community were photographed on people's land when the rightful owners were absent. This was an attempt to grab people's property by the leaders. Please ensure that this does not happen again.	We are vigilant enough and the process to final compensation requires fulfillment of many conditions to prove ownership. Please bring all such issues to our attention in time.
26) Namaganda Joan (Kasokoso) Is it possible for relatives of a deceased person (who did not leave a will) to stand in their stead in dealings with UNRA during compensation?	The family should seek guidance on how to acquire letters of administration depending on the family's decision.
27) Muyanja Umaru (Kireka D Kiganda) UNRA conducted a valuation exercise here four years ago. can we be certain that compensation is soon, especially after this engagement?	Engagement of communities is a step in the direction of compensation. However, specific dates for payment cannot be realistically divulged.
During the previous valuation exercise, cases of bribery and compromise were rife on the part of the valuers.	This was unfortunate; UNRA understands of such shortcomings and will aim at ensuring that they do not occur this time round.
When valuation was conducted, we were told to cease all developments on the land. Now that we have missed business opportunities and some of our structures collapsed over time, we should be compensated for our projects that stalled and failed.	Such impacts will be handled on a case-by-case basis if you can prove the connection between the delay in compensation and your loss of business and opportunities. Response by Edward Juuko (UNRA)
We are on this land but we do not know who the landlord is, we ask that you deal with the landlords separately from us the Kibanja holders to avoid conflict.	The landowners and Kibanja owners have different entitlements at compensation. The latter is entitled to 30% of the compensation while the former is entitled to 70% thus there should be no conflict whatsoever.
28) Ntulume Badru (Kasokoso) People are highly expectant of compensation at today's engagement. Shall we walk away with our compensation here after?	This is a community engagement meeting, one of those that prepare you to receive compensation when the time is due.
We have cases of people masquerading to be agents of UNRA here in this community. They claim to have access to high offices in UNRA. Please provide clarification on this point so that imposters do not cheat us.	UNRA is in the final stages of putting up an office in Kirinya to handle all issues related to its projects in this area. Please deal only with officials that are recognised to work with UNRA to avoid cheats.
29) Ssenkumba Herbert (Kasokoso)	Possessing a TIN Number has been a requirement on some of our projects. It is not required on this one. URA will not tax the

Is it necessary to have a TIN Number before compensation can be effected? Besides, Will URA tax the compensation monies?	monies to be paid out to project affected persons.
Will ongoing court cases or even recent court decisions on land ownership have a bearing when ascertaining whom to compensate.	This is the reason we are doing an update of the information we had collected earlier to take into consideration all the changes that have occurred over the time.
30) Mugerwa Emmanuel (Kasokoso) There are people in this village who did not get national Identity cards. Please impress it upon the chairpersons to provide introductory letters to residents at no cost when the process of compensation starts.	Those without National Identity cards should utilise this time before compensation to get them and avoid the last minute dash that can be frustrating.
This village has narrow roads, which I suppose will be used by heavy vehicles and machinery during the construction phase of the project. How will you handle cases where neighbors to these roads are affected by noise, vibrations and dust impacts?	The impacts (also called injurious effects) at that stage will be handled on a case by case basis when they do happen.
Given the unique status and challenges we face as a community, UNRA Should establish its planned community liaison office here in Kasokoso and not Kirinya as you had earlier informed us.	This has been noted.
31) Kiyimba Abdu (Kasokoso) Please define how long we have to wait before compensation can be effected.	This cannot be defined, however make sure you are ready for compensation by having the right documents and providing the right information when it is required.
What happens to such cases where wives are the property owners in a family, are men entitled to monies that will accrue from compensation for such properties?	This is an issue you will have to sort out as a family.
Some people took loans from the bank and as a result used some of their documents (such as land purchase agreements) as collateral for the loans. Can I use photocopies of these documents when they are required during valuation?	The photocopies of the documents will have to be verified.
CLOSURE: The meeting was closed at 1320hours

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community Consultation Meeting with Namataba - Kirinya (Kiira Municipality-Wakiso District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	09 th February, 2018
	VENUE	St Charles Catholic Church
	MEETING START	1016hrs
	MINUTES BY	Emmanuel Opolot
	MEETING VENUE COORDINATES	36N 463733, 36596

Attendance Register: Attached

TEXT
The Meeting Commenced at 1016hrs and was moderated by the area Local council 1 (LC 1) chairperson (Joseph Mutekanga).
Agenda items: <ul style="list-style-type: none"> National Anthem, Buganda Kingdom Anthem and Opening Prayer, Welcome remarks from the Local Council 1 (LC 1) Chairperson, Self-introductions from the UNRA and Atacama Consulting Team, KJE Project Overview presentation by Edith Bateganya, Brief on the socio-economic survey, Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the Local Council 1 (LC 1) Chairperson
The Chairperson LC1 welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE).
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on the socio-economic survey
<ul style="list-style-type: none"> Dr. Florence Asiimwe Akiiki explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting	
Question/Comment	Responses by Edith (UNRA)
<p>32) Francis Ssengendo (Namataba)</p> <p>It is four years now since UNRA carried out a valuation of our property. Now that you have surfaced again in this community, can we be sure of our compensation today and an allowance for lost opportunities during the long wait when the project stalled?</p>	<p>The project was stalled by circumstances that were not of our own making. For instance the project will adopt a Public-Private Partnership arrangement yet the legal framework governing such undertakings was not in existence and therefore parliament had to legislate to allow for the project to proceed</p> <p>There was also a need to Harmonise several projects that occurred in the same areas as the KJE PPP. These include Standard gauge Railway, Bukasa port, National Water and sewerage Corporation; Sewerage line project among others. This necessitated some changes in the alignment.</p> <p>There were issues about the rightful owners of land in the project area and this needed time to resolve.</p> <p>About the compensation for those years, we are here to do current assessments, surveys and valuations to compensate people at current rates. It is a good thing that in this area there has not been a change of alignment.</p>
<p>During the period of your first approach, you used surveyors that did not know how to do the job; they destroyed our property in the course of surveying the land.</p>	<p>I am not sure about that, but from experience, we have found our surveyors to be very professional. However, I caution you to be vigilant and watch out for impostors that claim to be UNRA surveyors, we shall share our contact details at the end of this session, and you may reach us in case you need clarification.</p>
<p>We have public facilities like play fields In the community; will you replace/relocate these in cases where they are affected?</p>	<p>Such facilities may be relocated; these are issues that the enumerators will ascertain while they are on the ground for the socioeconomic survey.</p>
<p>There are cases of people in this area that claim to have obtained leases from the National Forestry Authority, they have since moved on and sold the land to other people. Who will you compensate of the two parties?</p>	<p>We shall investigate these leases; we will find the rightful owners and compensate them in line with the law.</p>
<p>33) David Livingston Hashimana (Namataba)</p> <p>In instances where just a part of my property will be affected by the project, do you compensate for the full property or just for the part that will be affected?</p>	<p>Even if your house is partially affected, we shall pay for the whole building. There are cases where the plot of land may be cut in such a way that the leftover land has an unsuitable shape, in such cases, we compensate the person for that land as well.</p>

<p>34) John Namutali (Namataba)</p> <p>I would like to understand why you came to this area without prior communication to all the local leaders. Please endeavor to always inform all leaders before you undertake any government projects in these areas.</p>	<p>We apologize that we did not inform you the Local Council 5 chairperson; it is because we used a bottom-up approach for these engagements. We will endeavor to rectify this moving forward.</p>
<p>Considering that, I built my house in 1996 and someone else built his or hers in 2017. How will you arrive at valuations without favouring one person over the other?</p>	<p>It is true that the cost of buildings and property has changed overtime; current market prices will apply during valuation.</p>
<p>35) Jackson Bisaso (Namataba)</p> <p>We request that surveyors come and mark the project extents in this village so that we can know who will/will not be affected by the project.</p>	<p>The surveyors will surely come.</p>
<p>36) Faisal Nnyanzi I (Namataba)</p> <p>We request that you inform all the members of the local leadership before your next visit to this community.</p>	<p>This has been noted</p>
<p>I am also of the view that as you have come, you should endeavour to do community outreach in tangible ways such as buying cement to build other classroom blocks.</p>	<p>The contractor is mandated in the contract to participate in corporate social responsibility and their sociologists will determine how best to contribute to causes that benefit community as a whole.</p>
<p>Can you make it clear to us whether you will compensate those who claim to have leases on what used to be forestland? Will you pay the leaseholder, the current land occupant or the National Forestry Authority?</p>	<p>We pay different classes of affected persons, in this case, several parties are purported to have an interest in the land and therefore they will all be compensated. All we ask is that people should ascertain their status on the land and have all relevant supporting documents at the ready.</p>
<p>It is a work day and therefore many of our neighbours aren't with us at this meeting but can you give us a specific time by which you will compensate us?</p>	<p>This cannot be divulged at this point in time.</p>
<p>37) Fisca Tukundane.</p> <p>About partial affection, you have said you will compensate for the whole structure. Can I still use a portion of my property after I have received compensation?</p>	<p>No, when we pay you, we expect you to rebuild, you can do that on the remaining land if you have a sizable portion left.</p>
<p>38) Charles Lule.</p> <p>In doing your job, don't you have timeframes within which to finish the work?</p>	<p>There are timelines for the different phases of the project.</p>

<p>39) Dorothy Namuddu.</p> <p>The President promised to institute a probe into the National Environment Management Authority and the National Forestry Authority for the forest reserve that was obliterated in this area. He did not find fault with the people who had settled in the forest reserve. Will you compensate the people on forest reserve land?</p>	<p>We shall ensure that people are compensated for their property.</p>
<p>40) Claire Nantamu.</p> <p>Will you be paying people in cash or through their accounts and will it be a lump sum payment or will it be paid in instalments.</p>	<p>Those to be compensated amounts under 200,000/=, a cash payment will be made; above that, payment will be made through bank accounts. We also pay the full amount and not in installments.</p>
<p>41) Samuel Anguyo.</p> <p>Should we expect that any surveyor that approaches us from this point onwards is from UNRA.</p>	<p>Be vigilant and on the lookout for conmen and know that our surveyors will be escorted by local community leaders.</p>
<p>42) Emmanuel Mayanja.</p> <p>About your employees, we observed cases where the information collected was false e.g. that I was the owner of the land but not the house.</p>	<p>Those that have been paying attention over the last couple of years have observed that UNRA has gone through many changes, back in the day we depended on consultants to pay the people; we discovered that there was a lot of malpractice. We are now using government-employed valuers working under the direction of the Chief Government Valuer. We do not expect such fraudulent practices to occur going forward.</p>
<p>43) Rehema Namulema.</p> <p>Some people have claimed that their land and property is in the alignment, some are not sure whether they are affected. How will you handle this?</p>	<p>The surveyors will be on the ground soon and the picture will become clearer. The meetings are to sensitize and educate the community about the project.</p>
<p>44) Julia Asiimwe</p> <p>About the encroachers, we were sold land in the reserve but we did not get any documents during the transaction. What about us in that group?</p>	<p>We require that you know and tell us who sold you the land; we shall further assess your situation when we are on the ground.</p>
<p>45) Ronald Okurut</p> <p>You talked about tenants (kibanja holders) and landlords, between the two, who will be compensated?</p>	<p>We will compensate land titleholders. Kibanja holders, lease titleholders and licensees.</p>
<p>46) Mulongo Kato</p> <p>On the day that the survey is taking place are all persons supposed to be around, or can someone reschedule for the following day?</p>	<p>Please ensure that you are available for the socioeconomic surveys</p>

<p>47) George</p> <p>Suppose I do not agree with the valuation, can I contest their findings?</p>	<p>During the disclosure process, you are allowed to dispute the findings but you must have proof to back up your claims. If the claim is genuine, we will increase on the original offer. You are also allowed to contract a private Valuer for an independent valuation and provide these findings to UNRA.</p>
<p>48) Betty Tumushabe</p> <p>Please make it clear to us whether the KJE and Standard Gauge Railways are related in any way.</p>	<p>Although it is the same government running these projects, they are separate and different projects.</p>
<p>49) Wilson Lubayiza.</p> <p>In 2014, we - the farmers in the Namanve forest reserve were not informed of the project, even the NFA was not informed, we ask that you consider our queries as affected persons and communicate with us as well.</p>	<p>Engagement meetings will be held with communities that occur along the alignment.</p>
<p>50) Steven Sembatya.</p> <p>How do the valuers determine the value of the land? What parameters do they use?</p>	<p>The valuers use the market price, not the whims of the landowner. They also do market surveys / research to find out the prices of land in the area. They have many other principles of valuation, which they adhere to when coming to a final valuation. For fruit trees, they use district compensation rates. It is a rigorous and ultimately fair process.</p>
<p>CLOSURE: The meeting was closed at 1252 hours</p>

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community engagement Meeting with Mbuya II zone 1-Nakawa Division (Kampala District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	08 th February, 2018
	VENUE	Mbuya II zone 1 Grounds
	MEETING START	1035hrs
	MINUTES BY	Emmanuel Opolot
	MEETING VENUE COORDINATES	36N 458852, 34620

Attendance Register: Attached

TEXT
The Meeting Commenced at 1035hours and was moderated by the local council-1 chairperson (Nathan Masaba).
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC 1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Newton Segamwenge, • Brief on the socio-economic survey, • Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the Local Council 1 (LC 1) Chairperson
Mr. Nathan Masaba welcomed the Kampala Jinja Expressway project team and community members to the engagement meeting. He called on the team to introduce themselves and make presentations about the project to community members that had gathered.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Newton Segamwenge, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway project.
Brief on the socio-economic survey
Dr. Florence Akiiki Asiimwe explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting	
Question/Comment	Responses by Newton & Dr. Florence
51) Dawson Dick Mubali I bought this land cheaply and have stayed here for quite a long time. Where do you expect me to find land in Kampala and its suburbs with the prevailing astronomical land prices? UNRA, ensure that compensation reflects the realities on the ground.	We shall use the current market prices of the land and compensate accordingly. Simply have your documents pertaining to the land ready.
There are people who work in far off places; yet are members of this community. You mentioned that community members should be available for the socioeconomic census survey. How will you handle such cases?	Please let a responsible adult who may be the next of kin be available in this case. We may have to make phone calls to the persons to ascertain some facts about their businesses/ Households during the census survey.
52) Hannington Muzanya Please provide us an idea of where the road will pass so that unaffected people can go on with their business and work because I am sure that not everyone in this community will be affected.	The surveyors will come on ground and soon the project extents will be clear to all.
53) Alex Mwine We have been approached before by people from other agencies telling us they are allied with UNRA and now you have brought people from Atacama Consulting/Earthsystems, please expound on this point?	UNRA, Earthsystems and Atacama are working together on this project. We are here to introduce them to you as our consultants. You will know more about them as they will be conducting the socio-economic census survey in this community.
54) Yusuf Kasozi Kityo You have spoken about the requirement to open joint accounts, what of the people that do not have spouses.	There is no issue then. Equally so when it is a business undertaking. Joint accounts will mainly apply to households.
55) Rose Nakalyango If we have spent a long time on the land, say 10 to 15 years without anyone coming to claim it, are we therefore the rightful owners?	The purchase agreement will show whoever sold you this land. However; we shall also go to the lands archives to corroborate that information. If it is found that the land belongs to the Kabaka, we shall approach the Buganda land board and seek consent.
56) Ronald Idiba. You indicated in the presentation that the road alignment might have changed but we were told during the sensitization of the first road design four years ago not to make developments to the land and we haven't done so for four years, what kind of considerations will we get in case we are now out of the new alignment?	We have given you our apologies and asked for your understanding on the delay but we do not have the authority or finances to pay people that are not presently affected.
57) Shadia Nalongo. It has been four years of waiting for this project to kickoff; will you give us a deadline date by	This is a large project and we are working with many affected persons that makes it difficult to give specific periods. What we ask

which you will have started so that we can plan better?	of you is that you remain vigilant and have your documents ready.
58) Abdul Aziz. If we collectively resolve as a community with the chairperson that we do not want this road passing through our land, can this project be moved elsewhere?	Well, you would need concrete reasons as to why you think this should be so. Your support for this project as a community is crucial and needed
I have had my current account for a while, can I use it instead of opening another one, my wife is presently abroad in Dubai?	You may use it, only if it was opened in a recognised commercial bank.
59) Joel Amanya Can I use my loan account instead of opening another joint account?	Depends on the terms of the loan, which are really not our business.
60) David Mari Most of us here, including our area chairperson, have lived here for more than 35 years, no one requires a title to buy and sell land, now we are told to look for consent from the landlord. What if wealthy people from this area now rush to procure land titles claiming the land, what assurances can you give us on that?	We implore you to leave the cases of the landlord if you do not know them. The responsibility will be on UNRA to find the titleholders. What you should do is endeavor to have all your documents / agreements in place showing that you purchased the land you are occupying.
61) Richard Tumusiime I was affected by the Standard Gauge Railway project, are you sure that I will not be affected by the road project?	There was a realignment of the projects to avoid this however, the surveyors will be on the ground and then we shall know the definitive route.
62) Titus Ndiwayesu If during the 4 years hiatus of the KJE project, I bought a house that was in the alignment but did not get the original documents that UNRA issued to affected persons from the original owner, will I still be compensated?	Yes, you will if you can prove that you bought.
Some of our colleagues have been affected by the sewerage project; will you also compensate them if it is found that this project affects them too?	The sewerage project will compensate them. However, all affected persons/property will be compensated.
I have 5 partners, you are now asking me to include them in these compensation matters and yet I might have separated with them by that time. Is that fair?	We expect joint accounts to be opened for people that are presently staying together, not for people that have long been separated. For multiple-partner relationships, the partners are also entitled to compensation when they live on the property. Other novel cases will be assessed on a case by case basis but if the spouse contributed to building the structure, they are entitled to compensation. Spouses are encouraged to be open about these issues to UNRA.

<p>63) Joseph Mukasa,</p> <p>You have said that once you pay someone, it ceases being their property, in case there are cases where someone has not been paid, can I buy their land / property.</p>	<p>All we care about are the documents proving ownership of the property.</p>
<p>What about people that have been given permission to use the land by the owner, do they also need to have proof of an agreement?</p>	<p>Yeah, have all the documentation pertaining to your status on the land.</p>
<p>64) Saida Nakatte Kiiza.</p> <p>We have been waiting for a long time, is this the final year of the project; will they pay us this year?</p>	<p>We cannot give specific dates but the project is steadily on course.</p>
<p>65) Irene Namutebi.</p> <p>When the valuer comes, will he tell us the valuation there and then?</p>	<p>It is impossible to ascertain valuation on the spot; it is a long process that goes to the Chief Government Valuer for final sign off.</p>
<p>66) Ramathan Ssekandi.</p> <p>What about those that aren't in the alignment but will suffer from the effects of the road construction, what considerations are made for them?</p>	<p>That is what we call injurious affection and people should expect compensation when it occurs.</p>
<p>67) Daniel Nkugwa.</p> <p>Can you share with us the different layouts of the project so that we are aware?</p>	<p>The surveyors are on the ground and will be marking the affected property; you should please wait for the surveyors.</p>
<p>68) Eddie Jamil.</p> <p>If one bought a plot of land and put it in the sons name but the son does not have a national Identification Card, Will they be compensated as well?</p>	<p>If the son is not yet 18 years old, the father / parent can act on behalf of his / her child, all this of course with documentation proving parentage.</p>
<p>69) Aidah Namugerwa.</p> <p>After valuation, how will I know that the correct information / property has been captured for example the Valuer records 2 rooms instead of the 3 rooms of the house.</p>	<p>During the process of disclosure and valuation, you can view the valuation of your property, after that, a 30 day period will also be given for you to contest the valuation and make changes where they are required.</p>
<p>70) Mariam Kobusingye.</p> <p>For those that are doubly affected by the sewerage project and the UNRA project, will they be compensated as well?</p>	<p>Whoever undertakes compensation first, of the two projects will take care of the compensation for people that may be affected by both projects.</p>
<p>71) Margret Biira.</p> <p>I live in a mud-wall house, how much am I likely to get in compensation?</p>	<p>The valuers will inform you personally about the total valuation of your house.</p>
<p>72) Nathan Masaba (LC 1 Chairperson)</p>	<p>You should hold on to those documents, what we are doing now is simply updating those old records.</p>

People have kept the old documents that were issued at the very start of the project, should they discard them or continue keeping them.	
--	--

CLOSURE: The meeting was closed at 1218hours

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community engagement Meeting with Mutungo zone III and Mbuya 2 Zone II villages for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	08 th February, 2018
	VENUE	Canopy Gardens
	MEETING START	1444 hrs.
	MINUTES BY	Emmanuel Opolot
	MEETING VENUE COORDINATES	36 N 460472, 36005

Attendance Register: Attached

TEXT
The Meeting Commenced at 1444 hours.
Agenda items: <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC 1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Newton Segamwenge, • Brief on the socio-economic survey, • Question and Answer Session, • Close of meeting.
Welcome remarks from the LC1 Chairperson
The Chairperson LC1 welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE) project. He tasked the community members in attendance to listen carefully and ask questions at the end of the presentation.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Newton Segamwenge, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway Project.
Brief on socio-economic survey
<ul style="list-style-type: none"> • Dr. Florence Asimwe Akiiki explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting	
Question/Comment	Responses by Newton (UNRA) and Dr. Florence (Atacama Consulting)
1) Ronny Maato Most of us in Mutungo do not have a landlord, Please explain the compensation criteria regarding land with such issues?	A Kibanja holder is entitled to 70% and landlords 30% compensation for land. You should leave the landlord issues to UNRA and concentrate on securing your 70%. If the Kabaka is the landlord, we will approach the Buganda Land Board but we will surely find out who it is.
2) Fred Lwanga What of those people that were in the first alignment and had their projects stalled only to be told now that they are not affected, what considerations are made for those?	We apologize and ask for your understanding of the delay but we are only authorized to compensate those that are presently affected not those in the previous alignment.
3) Yunia Namakula For those with unfinished houses / buildings who do not live around this area. What considerations will be made for them to ensure that they do not miss any project related activity, since they cannot always be around?	We shall always give advance notice through the chairpersons of your respective leaders. They should be able to pass on the information to you.
4) Esther Sebuliba Are you serious this time? Should we be expectant of compensation and stop henceforth all the developments we were undertaking on the land?	Only until the valuer has finished with his work and he expressly informs you to stop developments should you stop. After disclosure, you will be granted 30 days to contest the valuations or make changes if you are not satisfied. Otherwise, you may continue with your projects & developments until the valuations are made.
5) Josephine Nalujja During the socioeconomic census in this area, You approached us and interviewed even the tenants. Why was this so?	The census considered businesses, public facilities & households within the Right of way. Tenants in the Right of way also have households, some have businesses, and these will be impacted by the project.
6) Micheal Kaggwe After partaking in the socioeconomic census, am I told the amount of compensation I should receive?	This can only be done during the disclosure and verification stage.
7) Sylvia Nakawunga Can you recommend which banks we should join so that our compensation is channeled through these?	Please open bank accounts with whichever commercial bank you feel comfortable with, but we do not recognize accounts in microfinance institutions.
8) Hussein Sadiq. There are cases of partners that had divorced but with this project coming on board, some parties are claiming a share of the compensation that will accrue from properties. Please advise on how this can be handled.	If you are married, that person has a claim to make but if you were not married but cohabiting, UNRA can act as an intermediary to find a solution. A partner's claim is strengthened if they can provide proof of having contributed to construction of the structure/property. These will be evaluated on a case-by-case basis.

<p>9) Ali Buyungo Should we open entirely new accounts?</p>	<p>You should open new joint accounts for spouses but that does not mean you abandon your personal account. There might be ways of changing from a single account to a joint account.</p>
<p>10) Katonda Alex After the valuation exercise, how long should we wait until we receive compensation due to us?</p>	<p>After valuation, you should expect compensation if there are not any other issues to encumber the process.</p>
<p>CLOSURE: The meeting was closed at 1620 hours</p>

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community Consultation Meeting with Namataba - Kirinya (Kiira Municipality-Wakiso District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	09 th February, 2018
	VENUE	St Charles Catholic Church
	MEETING START	1016hrs
	MINUTES BY	Emmanuel Opolot
	MEETING VENUE COORDINATES	36N 463733, 36596

Attendance Register: Attached

TEXT
The Meeting Commenced at 1016hrs and was moderated by the area Local council 1 (LC 1) chairperson (Joseph Mutekanga).
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Local Council 1 (LC 1) Chairperson, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Edith Bateganya, • Brief on the socio-economic survey, • Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the Local Council 1 (LC 1) Chairperson
The Chairperson LC1 welcomed participants to the meeting and informed them that the meeting was about the Kampala Jinja expressway (KJE).
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Edith Bateganya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on the socio-economic survey
<ul style="list-style-type: none"> • Dr. Florence Asiimwe Akiiki explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the village.

Question and Answer session of the meeting	
Question/Comment	Responses by Edith (UNRA)
<p>73) Francis Ssengendo (Namataba)</p> <p>It is four years now since UNRA carried out a valuation of our property. Now that you have surfaced again in this community, can we be sure of our compensation today and an allowance for lost opportunities during the long wait when the project stalled?</p>	<p>The project was stalled by circumstances that were not of our own making. For instance the project will adopt a Public-Private Partnership arrangement yet the legal framework governing such undertakings was not in existence and therefore parliament had to legislate to allow for the project to proceed</p> <p>There was also a need to Harmonise several projects that occurred in the same areas as the KJE PPP. These include Standard gauge Railway, Bukasa port, National Water and sewerage Corporation; Sewerage line project among others. This necessitated some changes in the alignment.</p> <p>There were issues about the rightful owners of land in the project area and this needed time to resolve.</p> <p>About the compensation for those years, we are here to do current assessments, surveys and valuations to compensate people at current rates. It is a good thing that in this area there has not been a change of alignment.</p>
<p>During the period of your first approach, you used surveyors that did not know how to do the job; they destroyed our property in the course of surveying the land.</p>	<p>I am not sure about that, but from experience, we have found our surveyors to be very professional. However, I caution you to be vigilant and watch out for impostors that claim to be UNRA surveyors, we shall share our contact details at the end of this session, and you may reach us in case you need clarification.</p>
<p>We have public facilities like play fields In the community; will you replace/relocate these in cases where they are affected?</p>	<p>Such facilities may be relocated; these are issues that the enumerators will ascertain while they are on the ground for the socioeconomic survey.</p>
<p>There are cases of people in this area that claim to have obtained leases from the National Forestry Authority, they have since moved on and sold the land to other people. Who will you compensate of the two parties?</p>	<p>We shall investigate these leases; we will find the rightful owners and compensate them in line with the law.</p>
<p>74) David Livingston Hashimana (Namataba)</p> <p>In instances where just a part of my property will be affected by the project, do you compensate for the full property or just for the part that will be affected?</p>	<p>Even if your house is partially affected, we shall pay for the whole building. There are cases where the plot of land may be cut in such a way that the leftover land has an unsuitable shape, in such cases, we compensate the person for that land as well.</p>

<p>75) John Namutali (Namataba)</p> <p>I would like to understand why you came to this area without prior communication to all the local leaders. Please endeavor to always inform all leaders before you undertake any government projects in these areas.</p>	<p>We apologize that we did not inform you the Local Council 5 chairperson; it is because we used a bottom-up approach for these engagements. We will endeavor to rectify this moving forward.</p>
<p>Considering that, I built my house in 1996 and someone else built his or hers in 2017. How will you arrive at valuations without favouring one person over the other?</p>	<p>It is true that the cost of buildings and property has changed overtime; current market prices will apply during valuation.</p>
<p>76) Jackson Bisaso (Namataba)</p> <p>We request that surveyors come and mark the project extents in this village so that we can know who will/will not be affected by the project.</p>	<p>The surveyors will surely come.</p>
<p>77) Faisal Nnyanzi I (Namataba)</p> <p>We request that you inform all the members of the local leadership before your next visit to this community.</p>	<p>This has been noted</p>
<p>I am also of the view that as you have come, you should endeavour to do community outreach in tangible ways such as buying cement to build other classroom blocks.</p>	<p>The contractor is mandated in the contract to participate in corporate social responsibility and their sociologists will determine how best to contribute to causes that benefit community as a whole.</p>
<p>Can you make it clear to us whether you will compensate those who claim to have leases on what used to be forestland? Will you pay the leaseholder, the current land occupant or the National Forestry Authority?</p>	<p>We pay different classes of affected persons, in this case, several parties are purported to have an interest in the land and therefore they will all be compensated. All we ask is that people should ascertain their status on the land and have all relevant supporting documents at the ready.</p>
<p>It is a work day and therefore many of our neighbours aren't with us at this meeting but can you give us a specific time by which you will compensate us?</p>	<p>This cannot be divulged at this point in time.</p>
<p>78) Fisca Tukundane.</p> <p>About partial affection, you have said you will compensate for the whole structure. Can I still use a portion of my property after I have received compensation?</p>	<p>No, when we pay you, we expect you to rebuild, you can do that on the remaining land if you have a sizable portion left.</p>
<p>79) Charles Lule.</p> <p>In doing your job, don't you have timeframes within which to finish the work?</p>	<p>There are timelines for the different phases of the project.</p>

<p>80) Dorothy Namuddu.</p> <p>The President promised to institute a probe into the National Environment Management Authority and the National Forestry Authority for the forest reserve that was obliterated in this area. He did not find fault with the people who had settled in the forest reserve. Will you compensate the people on forest reserve land?</p>	<p>We shall ensure that people are compensated for their property.</p>
<p>81) Claire Nantamu.</p> <p>Will you be paying people in cash or through their accounts and will it be a lump sum payment or will it be paid in instalments.</p>	<p>Those to be compensated amounts under 200,000/=, a cash payment will be made; above that, payment will be made through bank accounts. We also pay the full amount and not in installments.</p>
<p>82) Samuel Anguyo.</p> <p>Should we expect that any surveyor that approaches us from this point onwards is from UNRA.</p>	<p>Be vigilant and on the lookout for conmen and know that our surveyors will be escorted by local community leaders.</p>
<p>83) Emmanuel Mayanja.</p> <p>About your employees, we observed cases where the information collected was false e.g. that I was the owner of the land but not the house.</p>	<p>Those that have been paying attention over the last couple of years have observed that UNRA has gone through many changes, back in the day we depended on consultants to pay the people; we discovered that there was a lot of malpractice. We are now using government-employed valuers working under the direction of the Chief Government Valuer. We do not expect such fraudulent practices to occur going forward.</p>
<p>84) Rehema Namulema.</p> <p>Some people have claimed that their land and property is in the alignment, some are not sure whether they are affected. How will you handle this?</p>	<p>The surveyors will be on the ground soon and the picture will become clearer. The meetings are to sensitize and educate the community about the project.</p>
<p>85) Julia Asiimwe</p> <p>About the encroachers, we were sold land in the reserve but we did not get any documents during the transaction. What about us in that group?</p>	<p>We require that you know and tell us who sold you the land; we shall further assess your situation when we are on the ground.</p>
<p>86) Ronald Okurut</p> <p>You talked about tenants (kibanja holders) and landlords, between the two, who will be compensated?</p>	<p>We will compensate land titleholders. Kibanja holders, lease titleholders and licensees.</p>
<p>87) Mulongo Kato</p> <p>On the day that the survey is taking place are all persons supposed to be around, or can someone reschedule for the following day?</p>	<p>Please ensure that you are available for the socioeconomic surveys</p>

<p>88) George</p> <p>Suppose I do not agree with the valuation, can I contest their findings?</p>	<p>During the disclosure process, you are allowed to dispute the findings but you must have proof to back up your claims. If the claim is genuine, we will increase on the original offer. You are also allowed to contract a private Valuer for an independent valuation and provide these findings to UNRA.</p>
<p>89) Betty Tumushabe</p> <p>Please make it clear to us whether the KJE and Standard Gauge Railways are related in any way.</p>	<p>Although it is the same government running these projects, they are separate and different projects.</p>
<p>90) Wilson Lubayiza.</p> <p>In 2014, we - the farmers in the Namanve forest reserve were not informed of the project, even the NFA was not informed, we ask that you consider our queries as affected persons and communicate with us as well.</p>	<p>Engagement meetings will be held with communities that occur along the alignment.</p>
<p>91) Steven Sembatya.</p> <p>How do the valuers determine the value of the land? What parameters do they use?</p>	<p>The valuers use the market price, not the whims of the landowner. They also do market surveys / research to find out the prices of land in the area. They have many other principles of valuation, which they adhere to when coming to a final valuation. For fruit trees, they use district compensation rates. It is a rigorous and ultimately fair process.</p>
<p>CLOSURE: The meeting was closed at 1252 hours</p>

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Community engagement Meeting with Bukasa-Kirinya village- (Kiira Municipality, Wakiso District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	13 th February, 2018
	VENUE	Bukasa Playground
	MEETING START	1451 hrs.
	MINUTES BY	Emmanuel Opolot
	MEETING VENUE COORDINATES	36N 463939, 36253

Attendance Register: Attached

TEXT
The Meeting Commenced at 1451 hours.
Agenda items: <ul style="list-style-type: none"> National Anthem, Buganda Kingdom Anthem and Opening Prayer, Welcome remarks from the Local Council 1 (LC 1) Chairperson-Mr Edward Bakabulindi Self-introductions from the UNRA and Atacama Consulting Team, KJE Project Overview presentation by Mable Baguma, Brief on the socio-economic survey, Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the LC1 Chairperson
The Chairperson LC1 welcomed participants and informed them that the meeting was about the Kampala Jinja expressway (KJE) project. He welcomed UNRA and the project consultants and invited them to make presentations that would enlighten community members about the project.
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> Mable Baguma, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on socio-economic survey

- Dr. Florence Akiiki Asiimwe explained the impending socio-economic census survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the area.

Question and Answer session of the meeting

Question/Comment	Responses by Mable (UNRA)
1) Harriet Namigadde Did you inform leaders at the division level that you would be here to engage this community? It is important that you involve them in all this.	The fact is that we have been dealing with the community leaders at the local council 1 level in organising community engagements. However, we consulted leaders at the district level and this morning we were with the RDC (Resident District Commissioner) of Wakiso and security leaders and they are aware of the engagement here today.
In your presentation, you indicated that this engagement was meant for the community of Bukasa; but looking around, I do not see many people. Don't you think that you should plan better next time, maybe rent tents, a public address system, chairs, things that would attract people to attend the meeting.	This has been noted
2) Umaru Kimbugwe. You indicated that you intend to conduct fresh surveys and valuation for our property yet this was done four years ago; we were even told to halt all development on our property. Should we expect compensation for our lost time and opportunities during the four years of waiting?	The project stalled due to several reasons that included the need to realign the project route out of vital ecosystems among others. During compensation, we shall follow the law and pay for only what will be affected.
3) Richard Kiyengo. The project route was marked and valuation was also conducted previously. Now that these processes are to be repeated, we would like to know definitively if the alignment changed.	There were changes in the alignment in some places.
Will you use the information that was collected previously during the earlier valuation exercise and surveys?	The information that was collected is still valid, this is just an update of that same information.
UNRA should kindly help people in processing documents/letters confirming guardianship or administration. We understand that these will be required during valuation yet the process of attaining them is rather cumbersome.	UNRA can only guide you on the process; the lawyers can help you on this.
4) Denis Ayet. The playground where we are gathered today has been pivotal in the development of talents and opportunities for our youth. Now that it will be impacted by the project, how will you ensure that compensation is made for it?	We shall have different data collection tools during the socio-economic census and public assets / facilities of which this games pitch is one, will be captured as such. You should therefore provide all the information about the asset during that time. There will be compensation for all affected assets/facilities.
5) Simon Katende.	The project is on course and soon you will see

What assurances can you give us that this time the project will not stall?	several teams coming to your areas to execute project activities.
6) Francis Ssengendo. Please provide clarification about the fact that the municipal council approves plans in areas that might be affected by the project	We shall follow this up with them.
About attaining powers of administration, you have not exhausted it. Lawyers are expensive and our people lack the resources, knowledge and connections to get around the rampant bureaucracy. You should ask the administrator general and his office to help.	This has been noted
About compensation for agricultural crops, the municipal council passed the rates but they have not been updated for a while, why don't you use current market prices?	Current market rates will apply.
Please consider relocating this playground with in the community. I equally caution your team not to accept claims of sole ownership over the land on which the playground is housed as it belongs to the whole community.	This has been noted
7) Samwiri Ssuna. How will you handle cases where a property is partially affected	This will depend on how much the property is affected. Ideally compensation will be made for only that part that will be affected.
8) Amina Nakyanzi. You indicated that during the socioeconomic census, you will visit all households within the alignment. My issue is that my husband may not be available since he spends the whole day at work. Will you schedule an appointment to interview him as the head of his household?	We will inform the chairperson when we are to come such that he can mobilise you for the census. However, you can stand in for your husband and answer the questions pertaining to your household/businesses.
9) Happy Herbert Kaso. The government is fond of concealing from the masses information about projects. How come that in such a community engagement, the project alignment is not displayed such that those who are affected can know?	Surveyors will soon be in this area to set out the project extents and clearly delineate who is to be affected by the project. Please wait on them and this will be clear to you.
10) Edward Bakabulindi (LC1 Chairman) About the contests in the leadership of this area, I advise whoever is not certain about the true leaders of this area to go to the Wakiso District headquarters and seek clarification.	This has been noted.
11) Diirisa Mukasa. I would like to advise community members not to take sides in the leadership contests in the area. We have one chairperson and that is Mr. Edward Bakabulindi	This has been noted
12) Saddam Namanya.	The valuation report is only valid for a year, if it elapses, we do it again and we pay a 15%

During your presentation, you indicated that when a year elapses after valuation and compensation payments have not been done, the exercise has to be repeated. This is a new concept to me please help me understand it.	disturbance allowance.
13) Mahmood Sendi. I advise that before such community meetings are convened, surveyors should first mark the project alignment route such that only those who are affected can then be invited.	When a project has been designed through an area, all community members will be affected in one way or the other. It is key that all turn up for the meetings to understand the kind of project that has been planned.
CLOSURE: The meeting was closed at 1650 hours

STAKEHOLDER ENGAGEMENT for BUKASA

13/02/2018

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Stakeholder Consultation with Taxi Operators of United Taxi Park-(Nakawa Division-Kampala District) for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	09 th March, 2018
	VENUE	Former Nakawa Estates
	MEETING START	1455 hrs.
	MINUTES BY	Edmond Twinobusingye
	MEETING VENUE COORDINATES	36N 456613, 36553

Attendance Register: Attached

TEXT
<p>The Meeting Commenced at 1455 hours.</p> <p>The Chairperson-Nakawa United Taxi Park operators, Sam Kanyale moderated the meeting.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Kingdom Anthem and Opening Prayer, • Welcome remarks from the Chairperson-Nakawa United Taxi Park operators, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Henry Sseguya, • Brief on the socio-economic survey, • Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the Chairperson-Nakawa United Taxi Park operators
<p>The chairperson welcomed the team to the meeting. He expressed gladness that this meeting had been scheduled to consider the views and opinions of taxi operators on the KJE project.</p>
Self-introductions from the UNRA and Atacama Consulting Team
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Henry Sseguya, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.
Brief on the socio-economic survey
<ul style="list-style-type: none"> • Dr. Florence Akiiki Asimwe explained the impending socio-economic census survey and assured the Taxi operators that their views would be considered in the

preparation of proposals for livelihood restoration for project-affected persons/businesses.	
Question and Answer session of the meeting	
Question/Comment	Responses by Henry (UNRA)
92) Mukiibi Gyaviira While undertaking works in this area; especially our parking spots in the Nakawa Market, will UNRA provide us space where to work?	This cannot be answered now; however, discussions will be held between your leadership and UNRA and this will be resolved.
93) Farouk Mukisa During stakeholder engagements/consultation, UNRA uses good language, tones down and sends people that are good public speakers to engage project affected communities. We hope this level of respect and engagement will not change when it comes to compensation.	This will not change. Now that engagements for the KJE project have started, they will continue through all the stages of the project.
94) Yusuf Sentamu We have suffered several times in the past from forceful evictions until we sought refuge in the market. Please ensure that this project does not add to our woes. Plan for an area where to relocate us before you begin construction.	This has been noted.
95) Khalifa Mpande Please note that the most important issue for us as Taxi operators is not compensation per-se but rather having an organised place where to work.	This has been noted.
96) Musa Hassan Lusiba What is the role of the socio-economic census on this project?	We are undertaking surveys for households, businesses, and public facilities that are within the right of way. Among other benefits, baseline information from the census will guide the preparation of livelihood restoration proposals. (Dr. Florence)
97) Sadat Muwonge Are you aware that this area of Nakawa is under the jurisdiction of KCCA (Kampala Capital City Authority)? Have you aligned your plans with theirs?	KCCA is a stakeholder in this project. UNRA has had and continues to have exchanges with KCCA. They are aware of this project and its progress.
98) Kajubi Given the nature of our business (it is mobile and we have no physical structures in place), it is logical that we work together with UNRA and find space where to relocate and continue with work. Monetary compensation is not important in our case.	Several livelihood restoration options will be explored in your case and you will be called upon to make an input.
99) Godfrey	The contractor will be under strict instruction to hire 30% of the workforce from project

<p>Please guide us on how we can prepare and tap on the various employment opportunities that will come with this project. As motor vehicle, operators we possess the skills and experience that may be required to operate earth-moving machinery on the project.</p>	<p>areas. Please ensure that you attain/possess all the requisite qualifications and documents and once vacancies are announced, do not hesitate to send in your application letters. (Dr. Florence)</p>
<p>100) Dominic Kajubi</p> <p>In instances where road users will choose to protest against the set toll charges, How will UNRA react to them?</p>	<p>Protesting against the toll fees would not be the right course of action for any party that will be aggrieved about the toll fees. The project is being put up to ease the traffic mess on our roads.</p>
<p>101) Sam Kanyale (Chairperson)</p> <p>Our number one priority once the project starts is being resettled in a place where we can park our vehicles and continue operating as usual.</p> <p>Our work is strategic and depends a lot on the amount of human traffic in an area as well as the accessibility of the area where we park the Taxis to wait for passengers. Think about this when coming up with livelihood restoration options in our case.</p> <p>In as much as we drive Taxis in the city, we are operators of vehicles and could do well when hired as crane/grader operators when project works start. Please consider this too.</p>	<p>These have been noted</p>
<p>CLOSURE: The meeting was closed at 1630 hours</p>

TEXT
<p>The Meeting Commenced at 1415 hours and was moderated by the local council 1 Chairperson of Kinawataka, Mr. Yafesi Lukwitira.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Anthem and Opening Prayer, • Welcome remarks from the LC1 Chairperson-Kinawataka, • Self-introductions from the AfDB, UNRA, Earth Systems and Atacama Consulting Team, • Remarks by Edith Bateganya (UNRA), • Remarks by Edward Jjuuko (UNRA), • Question and Answer Session, • Remarks by Felix Nii Tettey Oku-(African Development Bank), <p>Close of meeting.</p>
Welcome remarks from the Local Council 1 Chairperson of Kinawataka
<p>The chairperson welcomed the team to the community and reported that the socioeconomic census survey had been completed without any major hitch. He called upon community members gathered to ensure that they clear any conflicts pertaining to the ownership of their land and property to avoid delays when the valuation team comes to the village.</p>
Self-introductions of the AfDB, UNRA, Earth Systems and Atacama Consulting Teams
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
Remarks by Edith Bateganya (UNRA)

<ul style="list-style-type: none"> Edith indicated that the engagement meeting had been organised to ensure that UNRA and the project consultants keep in touch with the community and get feedback about the socioeconomic census survey that had been earlier conducted. She also mentioned that since surveyors had marked out the project extents, it was important for community members to air their views on how all these project processes had been undertaken. 	
Remarks by Edward Jjuuko (UNRA)	
<ul style="list-style-type: none"> Edward asked community members gathered for the meeting whether; <ul style="list-style-type: none"> I) They were aware of the project extents, II) Had taken part in the socioeconomic census, III) They had any issues that required clarification by UNRA at this stage. By show of hands, all community members indicated that they were aware of the project extents. Most of the members indicated that they had taken part in the socioeconomic census survey. 26 members said they had missed the census because they were not present when it was conducted; their names and telephone contacts were registered. A 'mop-up' survey for these would be planned so that their information is captured. 	
Question and Answer session of the meeting	
Question/Comment	Responses
102) Alexander Wamala Ndawula Will Kibanja holders receive compensation for their interest in the land?	Edward (UNRA) Compensation will be made according to the stake/interest one has in the land.
103) Swamat Sekabembe Some of us do not have accounts in commercial banks; I suggest that our compensation monies are deposited at the chairperson's home from where we can obtain them.	Edward (UNRA) This is not possible. Compensation monies will be paid through commercial banks. Only those less than 200.000 Uganda Shillings will be paid in cash form.
104) Julius Mugisha During the previous valuation exercise in 2014, I had a mud and wattle house that has since become derelict and inhabitable. Please advise whether I should renovate it since you plan to undertake a fresh valuation exercise for the project.	Edward (UNRA) We have records pertaining to the previous valuation exercise that was conducted in these areas. However, we are cognizant of the fact that so many changes have occurred ever since; thus the need to undertake a fresh valuation and update the records.
A socioeconomic census was undertaken here in January this year. I plan to put up a poultry house. Will the valuers capture it now that it is missing in the census survey data?	Edward (UNRA) The census survey was conducted to attain a baseline against which we shall compare the socioeconomic situation in the project area after compensation. The role of valuers is to apportion price to your assets. What is found on ground is what will be valued.
105) Nicholas Tumuhimbise You mentioned that you intend to use data from the previous valuation exercise. Some of us	Edith (UNRA)

sold our properties because compensation was not forthcoming. How will you go about this?	We shall capture data pertaining to the new property owners. Otherwise, you have to prove that you own the properties.
106) Alex Ochieng We have land that was marked as part of the Right of Way for the KJE project. Parts of the land that will remain after severance by the project will be too tiny for me to use for anything meaningful. What should I do?	Edith (UNRA) This is a case of severance. Surveyors will highlight such cases. For instance, if your land measures 5 decimals and the road takes 4.9 decimals, it may be decided that all the land be acquired for the project.
107) Hajji Kawooya Some of us have lost considerable income from tenants that vacate our houses without paying all the rent dues thinking that UNRA has already paid compensation to us the property owners. Please advise us on how to handle this.	Edith (UNRA) UNRA has not instructed tenants to default on payments to property owners. It is unfortunate that this is happening.
108) Suleiman Nyanzi Salongo My house was marked to be within the project extents. The challenge is that my estranged wife claims that all the monies that will accrue from compensation be paid to her. What should I do about this to ensure equity?	Edith (UNRA) We advise that husband and wife should be together during compensation. You may even decide to have a joint account on which compensation monies may be paid. Please do not allow the project to divide your family.
	Lukwitira (LC 1 Chairperson) Issues of this couple are before my office and I will ensure that they are sorted soon.
109) Peter Kasule Salongo As in the previous engagements that UNRA has held with this community, I reiterate my plea that we should be granted 06 months to enable us relocate out of the project right of way.	Edith (UNRA) This has been noted.
Some of us are traditionalists who are well aware that the 'spirits' have the capacity to stifle this whole project if not handled appropriately. What plans do you have as regards to relocation of the 'spirits' out of the project area?	Edith (UNRA) We have cultural heritage specialists on the project team and they should know how to handle such situations.
110) Wilson Ahimbisibwe I work from afar, Karamoja to be precise and I spend so much money whenever I am invited to attend these meetings with UNRA. Please tell us how soon you will be compensating us.	Edward (UNRA) UNRA plans to finalise compensation of all affected persons by 2019 such that in 2020 construction of the expressway can begin.
	Edith (UNRA) We empathize with your predicament; it is important however that engagements are regularly held to keep communities posted on the progress of the project.
111) Eric There is a sanitation project that is ongoing in this area. When compensation was paid to my	Edith (UNRA) It is important to learn that tenants will not be compensated. However, we request that all landlords in the project area should give their

landlord, he kicked me out of his rental units and I had to survive against harsh odds. The KJE project should ensure that tenants are not ill-treated after compensating landlords.	tenants at least three months free of rent payments to enable them save enough money to relocate easily.
112) Godfrey Ssebagala We have graveyards that will be affected by the project. I have not heard you mention anything about their relocation or how compensation will be done for these.	Edward (UNRA) Valuers will value land, property, trees, some crops especially perennial crops, etc. Local governments of various districts have set up compensation rates for graves that will be used in compensation for the same.
Remarks by Felix Nii Tettey Oku-(African Development Bank) Felix commended the community for turning up in the numbers at such a short notice. He made his remarks as thus; The Government and her development partners are keen on ensuring that this project comes to fruition. The project will be fair and transparent and all affected parties will receive compensation as entitled to them. I encourage you all to focus on the broader benefits that will accrue from this project apart from cash compensation.	
CLOSURE: The meeting was closed at 1600 hours

Community stakeholder consultation and sensitisation meeting with Kito zones: B and C (Kiira Municipality-Wakiso District) as part of the African Development Bank-AfDB; Environment and Social Mission programme (19 – 23 March 2018)

DATE	21 st March, 2018
VENUE	Faith Foundation Church-Kito
MEETING START	1015 hrs.
MINUTES BY	Edmond Twinobusingye
VENUE COORDINATES	36N 462060, 36597

Attendance Register: Attached

TEXT
The Meeting Commenced at 1015 hours.
The local council 1 Vice-Chairperson of Kito B (Yusuf Nowaruhanga) moderated the meeting.
<p>Agenda items:</p> <ul style="list-style-type: none"> • National Anthem, Buganda Anthem and Opening Prayer, • Welcome remarks from the LC1 Chairperson-Kito C zone (Mr. Didas Atwongyeire), • Self-introductions from the AfDB, UNRA, Earth Systems and Atacama Consulting Team, • Remarks by Edith Bateganya (UNRA), • Remarks by Edward Jjuuko (UNRA), • Question and Answer Session, • Remarks by Norah Njangali (UNRA), • Remarks by Felix Nii Tettey Oku-(African Development Bank), • Close of meeting.
<p>Welcome remarks from the LC1 Chairperson-Kito C zone (Mr. Didas Atwongyeire)</p>
<ul style="list-style-type: none"> • The chairperson welcomed the team to the community even when he had been notified at short notice to mobilise community members for the same. He was glad for the regular engagements UNRA was having with the community.
<p>Self-introductions from the AfDB, UNRA, Earth Systems and Atacama Consulting Team</p>
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation.

Remarks by Edith Bateganya (UNRA)	
<ul style="list-style-type: none"> Edith indicated that community engagements would always be scheduled to dispel rumours about the project and also encourage input by the community on the project. 	
Remarks by Edward Jjuuko	
<ul style="list-style-type: none"> Edward asked community members gathered for the meeting whether; <ul style="list-style-type: none"> IV) They were aware of the project extents, V) Had taken part in the socioeconomic census, VI) They had any issues that required clarification by UNRA at this stage. By show of hands, all community members indicated that they were aware of the project extents. Members also indicated that they had taken part in the socioeconomic census survey. 40 members said they had missed the census because they were not present when it was conducted, their names and telephone contacts were registered. A 'mop-up' survey for these would be planned so that their information is captured by enumerators. 	
Question and Answer session of the meeting	
Question/Comment	Responses
113) George Wampande I have an empty plot within the project extents. Will I receive compensation for this; can you indicate how much I will receive?	Edith (UNRA) In this case, you will be compensated depending on the status of your ownership of the land. For instance, Kibanja owners will be paid 70% of the value of the land.
114) Wasswa Kalema UNRA undertook valuation of our properties in 2014. So much has happened ever since; in fact, some people have even passed on. When should we expect to be paid?	Edith (UNRA) The process of compensation is underway. We apologise for the delays which have been caused to a large extent by; <ul style="list-style-type: none"> – The process of harmonising the KJE with other projects in the area such as the Standard Gauge Railway – Realignment of the project route out of critical ecosystems such as Mabira Forest, among other reasons.
115) Francesca Nankabirwa I live in Kasokoso and my work place here in Kito village will be affected by the project. The details pertaining to a structure I am building and my sugarcane gardens were not captured during the census. Will I receive compensation for these?	Edward (UNRA) The socioeconomic census was focused on households, businesses and public facilities. We shall await suggestions from the project consultants on how surveys for agricultural areas and livelihood restoration plans will be undertaken. Compensation will be made for all structures whether complete or not.
116) Swalleh Sekasamba When does a Kibanja holder have a stake in the land on which they are settled?	Edward (UNRA) A Kibanja holder with a purchase agreement and a landowner who possess a land title, both have a stake on the land.

<p>Rumors are making the rounds that we are likely not to be compensated since the ownership of this land is contested. Please clarify on this issue.</p>	<p>Edward (UNRA)</p> <p>Surveyors have marked the Right of Way in the area. They will undertake land ownership identification to ascertain the owners of the land in this area.</p>
<p>117) Pastor George Mukiga</p> <p>Please explain to us the monetary value of land in this area.</p>	<p>Edward (UNRA)</p> <p>We shall be conducting regular engagements with project communities until the project is completed. Valuers will come to undertake the valuation of your properties. Please ask them to clarify this to you. Also, understand that the law and not the whims of affected persons will guide the process.</p>
<p>118) Yusuf Nowaruhanga</p> <p>We are living on land that is claimed by the National Forestry Authority-NFA. What is our status on this land in light of the compensation to be paid to land owners?</p>	<p>Felix (African Development Bank- AfDB)</p> <p>We need a transparent process. Development partners that come to work with government have procedures and processes they adhere to and these are harmonised as much as possible with those of the Government.</p> <p>The AfDB process will not be politicised. The bank is aware that most of you dwell on land for which you have no documents to prove your tenancy thereon. It is important for you to know that UNRA will address this issue of people that cannot prove ownership of the land on which they live. No lending institution will fund a project that will disposes people and live them in a worse state.</p>
<p>119) Jane Olaki</p> <p>In the first instance when valuation was done, I had a plot of land where I was growing yams. We were told to cease all developments on the land and my house has since collapsed. Now that valuation will be repeated, will you consider what was previously on my land?</p>	<p>Edward (UNRA)</p> <p>We are aware of all these issues. However, a team from the Chief Government Valuer-CGV office is drafting a plan on how such cases will be handled according to the law.</p>
<p>120) Dr James</p> <p>Whenever a project is to be undertaken, there are timelines drawn. Please share with us the KJE project timelines to enable us plan better.</p>	<p>Edith (UNRA)</p> <p>Land acquisition is scheduled to be done by 2018. However, understand that these plans are tentative and sometimes they are affected by unforeseen circumstances such as court cases, realignment of the project route among others. Be content that the project is on course and valuers are in Mukono-Katosi as we speak.</p> <p>Edward (UNRA)</p> <p>Surveyors are undertaking asset verification. They will be done in due time. We hope that by 2019, valuation and compensation will be completed.</p>

<p>121) Isaac Khaiza</p> <p>We have issues of Buganda Kingdom Royals claiming ownership of land in this area. What if I possess a purchase agreement for land that is being claimed by royals, am I eligible for compensation.</p>	<p>Edward (UNRA)</p> <p>Such issues hinder project progress. The law states that compensation should be made after the landowner has provided consent. UNRA will facilitate dialogue between any warring parties to ensure that unnecessary delays on the project are avoided.</p>
<p>122) Hadijah Nalubega</p> <p>We are requesting that you consider our plight and expedite the compensation process. This has been overly delayed.</p>	<p>Edward (UNRA)</p> <p>This has been noted.</p>
<p>123) Emma Mugisha</p> <p>National Forestry Authority and the National Environment Management Authority are all claiming this land. The president instructed us to stay here. UNRA should not waste time in trying to establish who the land owners are.</p>	<p>Edward (UNRA)</p> <p>This has been noted.</p>
<p>Remarks by Norah Njangali</p>	
<p>Norah, the head of land acquisition at UNRA explained the land acquisition process. She indicated that valuation is done for;</p> <ul style="list-style-type: none"> – Land, – Properties on the land and – Crops. <p>She indicated that land is valued by looking at the interests on the land, its occupants and their status of occupancy. Values of the land are arrived at after a thorough market research/survey of land prices in the local area. The value of houses/structures is deduced from the dimensions, materials used in construction and the professional knowledge of the valuers. Rates for crops, grass thatched houses and graves can be attained from the District rates.</p> <p>She advised community members to ensure that they are present during valuation such that all the details about their properties are captured.</p>	
<p>Remarks by Felix Nii Tettey Oku-(African Development Bank),</p>	
<p>Felix commended UNRA, the community and project consultants for the amiable relationship he had observed in the meeting. He made his remarks as thus;</p> <p>We understand that there is a looming land issue in this community. I am hurt that there have been delays in the project processes. Timelines will be revealed to you however, these have to be realistic so that you can hold us to them. I am here because the project is moving forward and if we are to bring on board other development partners, you the community have to show support for the project. We do not want to be related to projects that demean and dispossess people of their livelihoods; we work by stringent standards. Please ensure that you act as you have been advised such that unnecessary delays on the project are eliminated.</p>	
<p>CLOSURE: The meeting was closed at 1300 hours</p>

B.4.3 Schedule of Private Sector (Big PAPs) Consultation Meetings

THE SCHEDULE OF CONSULTATIONS FOR CONSULTATIONS/ SENSITIZATION		
S/No	Type	Date of Meetings
1	Total	13 th March 2018
2	SHOPRITE Uganda Ltd	13 th March 2018
3	Megha Industries	14 th March 2018
4	Shell Limited	15 th March 2018
5	City Oil	15 th March 2018
6	Spears Motors	16 th March 2018

B.4.4 Minutes of Stakeholders Consultation Workshop – Private sector

TOTAL Stakeholder Engagement Meeting Date: 13 th March 2018	
Introduction by Edward Jjuuko UNRA	
<ul style="list-style-type: none"> Edward Jjuuko from UNRA gives a brief introduction about the KJE project 	
Question/Comment	Responses (UNRA)
124) Frank Odyek (Total Retail Development Officer) Mentioned that a team of engineers came in 2016 and showed Total road designs	Raymond shows them the current design and explains it to them
125) Total Asked whether UNRA could allocate space along the highway as part of the compensation, in addition to cash to cover the rebranding cost TOTAL has incurred on that particular petrol station in Nakawa	
126) Ivan Wesonga (Total Head of Legal) Asked about access roads and that they were still awaiting UNRA's Engineer's arrival	
127) Frank and Ivan (Total Head of Legal) Mentioned how it was expensive. Capital investment into the petrol station and leasing. Factoring in capital expenditure on redevelopment of the station and terms of the lease	Edward Jjuuko (UNRA) What is the nature of the ownership?
128) Ivan Wesonga (Total Head of Legal) It is a 20% lease from the district land board and 80% lease from a private individual. With 39 years and 35 years remaining on them respectively.	Raymond (UNRA Highway Engineer) shows them the current design and explains it to them
129) Frank Odyek Reiterates to the engineer the need for a strategic relocation and monetary compensation as well	
130) Ivan Wesonga Ivan mentions how they know government compensation deals and asks for a need for a special circumstance to get the right compensation	
131) TOTAL Mentions they are prepared to disclose information in order to get an adequate compensation. They mention that no tenants reside or operate on the property. A car wash	

is part of the petrol station but are simply licensees	
132) Frank Odyek Asks when exactly the project shall start for health and safety management, as well as contract management.	UNRA responded that ground breaking is in 2020, though land acquisition is ongoing. And that 6 months shall be given to PAPs to relocate.
133) Total TOTAL mentions that the petrol station is owned by TOTAL but is run by private business partners. Basically, to market the business, a business relationship that is regulated by periodic contracts.	
134) Frank Odyek Asked if there is a possibility for highway petrol stations	Raymond (UNRA) Responded that a framework is being developed for this
Agreements from the meeting	
<ul style="list-style-type: none"> • It was agreed that UNRA gives a formal communication to TOTAL asking for required information. Make a formal request. • Atacama sent a letter to TOTAL but they both claim not to have received it. But are willing to receive it • Social economic interview can be done after a formal letter is delivered to TOTAL. • Copies of all correspondences between UNRA and TOTAL so that communication can be systematic. 	
CLOSURE

SHOPRITE Uganda Ltd Stakeholder Engagement Meeting Date: 13 th March 2018	
Introductions	
Marc du Toit, Representative of Shoprite Uganda Ltd gave a brief history of Shoprite	
Question/Comment	Responses
1) Marc du Toit (Shoprite Representative) Mentioned he met Patrick from UNRA a year ago regarding this matter but didn't get feedback	Edward Jjuko explained that this was a follow up meeting/engagement
2) Marc du Toit (Shoprite Representative) Marc then mentioned he is aware of the whole process and wanted to get straight down to the design and how it was going to affect Shoprite.	The UNRA Engineer representative had to dash to the UNRA office to collect the latest design
<ul style="list-style-type: none"> • Edward Jjuko then started asking Marc some social related questions but Marc grew impatient as his other meeting was approaching i didn't have enough time to answer all these questions • However Dr. Florence did give him a business questionnaire which he is going to fill and give back to her • Marc mentioned with regards to the tenants that all questions for them should be asked to him and that those are contractual obligations. • The engineer luckily came back in time as Marc was about to head out. And this coincided with Patrick from UNRA's appearance as he had just come out of another meeting. • They looked at the design and agreed an entry would need to be included for Shoprite. • Marc was more satisfied with this design compared to the last design UNRA had shown him, which would take out a big portion of their parking space and put them out of business. 	
Agreements from the meeting	
<ul style="list-style-type: none"> • Marc and Patrick agreed they shall communicate with each other and reach an agreement on the final design. • Marc returned the business questionnaire to Florence or Atacama

MEGHA Industries Stakeholder Engagement Meeting Date: 14 th March 2018	
Introductions by all participants	
<ul style="list-style-type: none"> Edward Jjuuko briefly introduced the KJE project 	
Question/Comment	Responses (UNRA)
3) Dr. Shiraz Meghani (Chairman of Megha Industries) Mentioned that Patrick (UNRA Engineer) promised an access point during their last meeting.	Raymond (UNRA Highway Engineer) describes the design to the stakeholders.
4) Marc du Toit Marc du Toit, who also represents Megha Industries under Knight Frank, illustrates the dynamics of the design for Dr. Shiraz to get a better understanding of it Raymond and Marc go back and forth on the design	Raymond to provide 3D illustrations of potential access roads in the coming week
5) Dr. Shiraz Meghani Mentions how Megha Industries was the no.5 taxpayer in Uganda in 2017; and describes how this location is prime to his business and benefited many.	
Agreements from the meeting	
<ul style="list-style-type: none"> All agree that access roads are key. Not only for Megha Industries but the surrounding community as well. Raymond to provide 3D illustrations of potential access roads in the coming week Edward Jjuuko and Lorna (Atacama Consulting) to collect social economic questionnaire from Megha Industries at a later date.

CITY OIL Stakeholder Engagement Meeting
Date: 15th March 2018

Introduction

- Edward Jjuuko (UNRA) introduces the KJE project to the City Oil stakeholders
- Raymond (UNRA) describes the design and explains the alignment to the stakeholders.

Question/Comment	Responses (UNRA)
<p>1) Omar Ahmed (Mandela Group of Companies Chairman) Thanked UNRA for the presentation. Omar then outlines the importance of the affected outlet. And how it has come up in the last 2 years. And mentions they had plans of further upgrading it.</p>	
<p>Hassan (Director, Mandela Group of Companies) Asked the engineer about the northern by pass and the Entebbe Expressway. Hassan mentions he is excited because he says he sees big possibilities with KJE. Hassan suggested a possibility of a deceleration lane as you approach their affected outlet</p>	
<p>2) Omar Ahmed City Oil on Jinja Road caters for travellers by having clean washrooms within the stations, separate from the restaurant (Café Javas) They are willing to show UNRA what they are offering now. Good maintenance at all outlets.</p>	
<p>3) Hassan Hassan mentions that despite the high maintenance costs (electricity, water) they still maintain a high standard in terms of facilities offered. He then mentions how the Bombo Road outlet was a test when it came to the restaurant business at petrol stations. It proved a success and they then adapted it at all their outlets. They even claim that SHELL wanted to copy their restaurant idea by taking measurements of their restaurant facility. They both mention that food and washroom facilities are highly appreciated by their clientele</p>	<p>Edward then asked what kind of ownership City Oil is under</p>
<p>4) Hassan and Omar They mention it is a free hold ownership and hold it in perpetuity. They do not have tenants. They mention how Mandela Group of Companies constitutes of Fuel Stations, tyre shops, oil servicing, restaurants,</p>	<p>Raymond mentioned that UNRA is welcoming ideas/suggestions that City Oil might have for the affected areas</p>

<p>supermarkets and a training centre for their staff. As well as offices.</p> <p>Each subsidiary having its own separate office.</p> <p>It is run by a chairman and 6 directors.</p> <p>When asked, they said they wish to stay at their Jinja Road branch.</p> <p>Access in and out is all they require.</p> <p>Though they mention that public interests always come above private interests</p>	
<p>5) Hassan</p> <p>Asked for the full description of the expressway. Then suggested electronic toll payments.</p> <p>They were both contented and hoped for an opportunity to set up a station at one of the rest points</p>	
Agreements from the meeting	
<ul style="list-style-type: none"> Lorna (Atacama Consulting) left them with a social economic questionnaire which they shall fill and will be collected after.

SHELL Stakeholder Engagement Meeting
Date: 15th March 2018

Introduction

- Welcome remarks by the Shell Managing Director
- Introductions by Shell team
- Introductions by KJE team
- Shell Retail Manager gives his understanding of the project.
- Shell mentions that it is their first engagement regarding KJE and had been waiting for some time.
- Raymond (UNRA Highway Engineer) explains the KJE road design and impact

Question/Comment

Responses (UNRA)

1) Shell (Retail Manager)

Asked about Shell's affected petrol stations

Raymond mentions that they are the stations in Nakawa (fully affected) and Kyambogo (partially affected)
 Edward Jjuuko (UNRA) asks about the nature of ownership of Shell

2) Shell (Managing Director)

The Shell MD mentions that Shell properties are company owned under a government lease secured from KCCA
 The Kyambogo Shell outlet is under a dealership owned by a gentleman called Ashwin Kumar. And this dealership is on a 3-year renewable basis
 Ashwin is an investor who employs staff and pays and buys products for resale.
 Though still maintaining Shell standards and supervision.
 The MD mentions that Shell is a group of companies. Operating in 15 countries and an additional 9 countries as of July 2017.
 There is a group and operating units in each company.
 Shell has its own management and own board.
 Vivo Energy is the only Shell licensee in Africa.
 Comprising of the MD and a Country Leadership team

3) Issa (Shell Retail Manager)

Asked about timelines for the KJE project

Raymond then mentions that phase 1 should end in December 2018. There shall be a 6 months grace period after an acquisition and compensation has been made

4) Shell (MD)

The MD then mentioned that traffic along the Banda road shall affect Shell's outlet there.
 Shell then asks if there is an opportunity for having a station along the expressway

Raymond mentions that there shall be rest areas, but a framework is still being devised with NEMA
 One potential rest area shall be by the Sezibwa Falls

5) Shell (MD)

The MD then expressed Shell's interest in bidding for a rest spot.

Raymond then mentioned that this rest place needs to be of a certain standard and provide a range of services. Serviceability being key, and a cultural aspect being visible

6) Shell

Shell mention that KCCA is closed to new petrol stations. They aren't issuing new

UNRA agrees that this shall be discussed with KCCA

licenses and hence there should be room for another location and license for Shell. They simply want a guarantee of a replacement for the affected station, whether on a new or old road	
7) Shell Shell then asked what the basis of valuation is and the timeline. They mentioned how there have been delays on previous projects like the Kabale road. Only a partial payment was made after a significant period of time.	UNRA then mentioned that hopefully between now and December, valuation shall be done.
8) Shell Shell agrees that the 6-month grace period shall be enough to cover contractual notice, excavation and dealings with various stakeholders (Banks, Insurance companies etc)	UNRA mentions that Shell is a big taxpayer in Uganda and this means there shall be consideration on how to not completely affect their business. There is an opportunity with the rest place and all Shell needs to do is be creative and offer cultural related activities.
Agreements from the meeting

SPEARS MOTORS Stakeholder Engagement Meeting Date: 16th March 2018	
Introduction	
<ul style="list-style-type: none"> Gordon Wavamunno (Chairman, Spear Motors Limited) introduce Spear Motors members Patrick (KJE Project Manager) introduces the KJE project 	
1) Patrick (KJE Project Manager) <ul style="list-style-type: none"> Patrick mentions that land acquisition is the first process in the project. Patrick then describes the KJE alignment. He then gives Gordon the two design options 	
2) Gordon Wavamunno (Chairman, Spear Motors Limited) <ul style="list-style-type: none"> Gordon immediately shoots down the second option and urges UNRA to protect his property. He has been on the land since 1976. Spear Motors simply asks for a way in and out of their property. Gordon mentions how there is a need for free flow of traffic. Many companies shall be affected as there are multiple users who use this route. Gordon bullishly says all he need is an access in and access out 	
3) Patrick (KJE Project Manager) Patrick says we can agree to disagree	
4) Gordon Wavamunno (Chairman, Spear Motors Limited) <ul style="list-style-type: none"> Gordon makes it clear that his complex cannot be touched. The second design option was conclusively ruled out. It would affect some of his structures. The first option is alright according to Spear Motors (no structure is affected), if they can get good access points. Spear Motors asked if they shall be able to access their complex during construction 	
5) Patrick (KJE Project Manager) Patrick replied that all properties are made accessible during construction	
6) Gordon Wavamunno (Chairman, Spear Motors Limited) <ul style="list-style-type: none"> Gordon asks for value for money in terms of design. Citing good roads in Europe and Asia. He mentions how there are sewage pipes 3 feet under his complex 	
Agreements from the meeting	
<ul style="list-style-type: none"> UNRA to share design plans with Spear Motors Ltd. UNRA specifically to write official letter to Spear Motors Limited to get information for social economic questionnaire

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Stakeholder Consultation with the Resident District Commissioner (RDC) and Security leaders of Wakiso District for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	13 th February, 2018
	VENUE	Kasangati Town Council, RDC Offices
	MEETING START	1230 hrs.
	MINUTES BY	Emmanuel Opolot
	MEETING VENUE COORDINATES	36 N 0456613, 38236

Attendance Register: Attached

TEXT
The Meeting Commenced at 1230 hours and was moderated by the RDC.
<p>Agenda items:</p> <ul style="list-style-type: none"> • Welcome remarks from the Resident District Commissioner (RDC), • Self-introductions by the RDC and security leaders, • Self-introductions from the UNRA and Atacama Consulting Team, • KJE Project Overview presentation by Mable Baguma, • Remarks from the Atacama Sociologist, • Brief on the socio-economic survey, • Question and Answer Session, <p>Close of meeting.</p>
Welcome remarks from the RDC (Namagogwe Hajirah)
The RDC welcomed participants to the meeting that was convened for purposes of providing an update to the RDC on the progress of activities related to the Kampala Jinja Expressway project within the communities of Wakiso district and clarification about the security situation especially in the Bukasa community.
Self-introductions by the RDC and security leaders
<p>The Resident District Commissioner and security leaders gathered, introduced themselves by name and designation. They included;</p> <ol style="list-style-type: none"> Resident District Commissioner (RDC) – Hajirah Namagogwe. District Internal Security Officer (DISO) – Rita Kasinde.

iii. District Police Commander (DPC), Kiira – Shifah Kiribwa	
iv. Gombolola Internal Security Officer (GISO) – Majid Kiwanuka	
Self-introductions from the UNRA and Atacama Consulting Team	
<ul style="list-style-type: none"> Members in attendance introduced themselves by Name and Organisation they were representing. 	
KJE Project Overview presentation	
<ul style="list-style-type: none"> Mable Baguma, a Sociologist at UNRA gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP. 	
Brief on socio-economic survey	
<ul style="list-style-type: none"> Dr Florence Asiimwe Akiiki explained the impending socio-economic survey, type of questionnaires to be used, the number of enumerators expected, and the fact that they would move with local leaders while collecting the required data in the villages along the project route. 	
Question and Answer session of the meeting	
Question/Comment	Responses by Mable (UNRA)
1) Shifah Kiribwa-District Police Commander Kira municipality has its challenges with the Local Council 1 leadership. There are multiple people who claim authority. My suggestion is that we deal with all these representatives and not assume to choose one over the rest. These communities are zoned and each has a person it recognizes as leader.	We have a list of Local Council 1 (one) leaders we recognize as the local leaders; we had encountered these complex rival structures in the field too. We ask that maybe if we leave our list of leaders, you would help us update it to reflect the current realities on ground.
There is an observation that UNRA has not had consensus and understanding between us the leaders in this room and them especially on this KJE project. It is prudent that we should always come along when you go to the communities. This has been the strategy with other projects such as the Bukasa port project.	This is a new revelation for us; we did not deem it necessary to engage the office of the R.D.C to request that she travel with us when we go to the field. We only viewed it as a critical office we had to inform that we would be in one of the villages under their jurisdiction. We apologize for the oversight
2) Rita Kasinde-District Internal Security Officer Please give me clarification about your security especially whenever you go to communities. I would like to know when we would be required to intervene and beef up your security.	We have five police officers attached to our teams whenever we go to the field and this is sufficient.
I request that you integrate some of our local officers into your security team as they are well known in these areas and might know of particular threats that could be faced.	This has been noted
3) Florence Akiiki Asiimwe In light of the discussion and security concerns that have been fronted, is it proper that we go	DPC: I would advise that you postpone the meeting.

ahead with the community engagement that has been scheduled to take place this afternoon in Bukasa?	
My concern was that we cancelled the previous engagement that had been planned for Bukasa due to security and leadership concerns. We received numerous complaints from community members who urged us to hold the engagement on a another date, I worry that if we do not hold the engagement today, we will lose the trust of the people and might have trouble rescheduling.	RDC: It is okay; you can go ahead and hold the engagement. However my suggestion still stands. If you can put off the Bukasa community engagement, please do so.
4) Shifah Kiribwa- District Police Commander I caution you to be vigilant and alert, in case you face any resistance, please withdraw. Do not let it get out of hand. In Bukasa, the issue is that when people were settling on the land, they were advised to form different associations, there are 6 different associations and each of them has a unique leadership hierarchy.	This has been noted
5) Mabel Baguma Do these associations work as / in place of the local council leadership?	DISO: Yes, they are parallel organizations
Could you please provide us with the contact details of these parallel leaders?	<ul style="list-style-type: none"> – Simon Katende – 0703 101197 – Rasta's deputy (Mukiibi) – 0705 474248 – Musasizi – 0759 001480
CLOSURE: The meeting was closed at 1327 hours

TEXT
<p>The Meeting Commenced at 1015 hours.</p> <p>Mr. Joseph Sebuliba, a senior sociologist at NWSC, chaired the meeting.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • Welcome remarks from the meeting chairperson (Mr. Joseph Sebuliba); • Self-introductions for all the members present from NWSC, Earth Systems and Atacama Consulting; • KJE Project Overview presentation by Denis Kyongera; • Experience sharing and remarks session for Environmental assessment and Resettlement Action Planning (RAP) by members present; • Closing remarks by the meeting chairperson; and • Close of meeting.
<p>Welcome remarks from the meeting chairperson (Mr. Joseph Sebuliba)</p> <ul style="list-style-type: none"> • The meeting chairperson welcomed the team from Earth Systems and Atacama Consulting to NWSC and was glad the meeting was taking place to enable sharing of experience from Environmental and Social Impact Assessment and RAP activities for government projects.
<p>Self-introductions for all members present</p> <ul style="list-style-type: none"> • Members in attendance introduced themselves by name and organisation they were representing.
<p>KJE Project Overview presentation</p> <ul style="list-style-type: none"> • Denis Kyongera, an environmental consultant with Atacama Consulting gave the opening remarks and an overview presentation about the Kampala Jinja Expressway PPP.

Experience sharing and remarks session of the meeting	
Remark/ Question	Responses
135) Maria Nambiro	
We have an ongoing project that involves laying a new pipeline along the road reserve of the current Kampala-Jinja highway, spanning from Katosi through Seeta and finally to Naguru. Please endeavor to integrate its information in your planning activities.	
136) Innocent Twesigye	
In regards to the NWSC pipe network layout and plausible interaction with the KJE project, the NWSC GIS division is in position to provide you with all the data that you need. However this needs to be requested for formally through the Executive Director. You can then share with us the letter to follow up.	
137) Kelly Horton	
Has the RAP and compensation of affected persons by the new pipeline along the current Kampala-Jinja highway happened, and if so, is it possible to share the RAP information with us? In particular information to do with the approach, methods, implementation and monitoring strategies, and stakeholder engagement plan not necessarily the inventories of project affected persons and their losses as this might be confidential.	<p>Maria Nambiro</p> <p>We can share the RAP information with you. However, given the sensitivity of the information a formal request needs to be made.</p> <p>Joseph Sebuliba</p> <p>Also, a key thing to note is that copies of all our RAP activities are accessible at the office of the Chief Government Valuer.</p>
We are developing a green corridor concept to cover the land which will be left in between the KJE and SGR projects in the Kasokoso and Kinawataka areas. This is in a bid to have some economic production and community value attributed to this land. We would like to share these concepts with NWSC as a pertinent stakeholder in the area for your thoughts, review and collaboration in bringing this vision to light.	<p>Joseph Sebuliba</p> <p>This is a very good initiative and I would recommend that you share the same information with Kampala Capital City Authority (KCCA) and Kira municipality as some of these areas fall under their jurisdiction and their cooperation would be very vital to the realization of this concept.</p>
How have you dealt with vulnerable groups and special interest groups during the compensation and resettlement activities?	<p>Dorothy Achan</p> <p>We defined vulnerability based on the findings of the socioeconomic team that carried out a census on the project affected persons. They were generally characterized as the elderly, the very poor, the disabled, widows, youth and child headed household.</p>

	<p>Special assistance was given to all the identified vulnerable members of the community. In most cases the displacement experienced was economic in nature, more so during the execution of works.</p> <p>Joseph Sebuliba</p> <p>During the compensation process we approach payment in different ways for the following categories of persons:</p> <ul style="list-style-type: none"> • Compensation of less than UGX 100,000 was paid by cash; • Compensation ranging from UGX 100,000 to UGX 19,999,000 was paid by cheque; and • Compensation above UGX 20,000,000 was done by Electronic Fund Transfer (EFT). <p>We haven't done any resettlement in our projects due to the complex and lengthy processes involved in finding alternative locations.</p>
Have you had any experience working with project affected persons to supply re-vegetation plants from their nurseries? This would involve them starting the nurseries ahead of project implementation and putting them on a priority supplier's list to be recommended to the project contractor.	<p>Maria Nambiro</p> <p>In our projects so far, sourcing of re-vegetation plants has been handled by the project contractor. Usually the contractors seek suppliers with the quantity and quality capacity.</p> <p>Joseph Sebuliba</p> <p>Maybe another experience we can share from, is a case in Butabika where we are putting up a pre-treatment plant. The community there anticipated smell nuisance from the plant and in turn requested us to seek ways to mitigate it, which was done promptly. Also a major note is that the land of about 3 acres on which this plant is being built was offered freely by the community in the affected estate, and in turn this estate was to have free sewer connections for a period of time before being billed for the utilities.</p>
138) Denis Kyongera	
We are aware of your previous work in the Kasokoso area. Please share with us your approach to the RAP and implementation in that area.	<p>Joseph Sebuliba</p> <p>We are currently in the final phase of RAP implementation in the Kasokoso area with compensation activities expected to end by April 2018 and the whole RAP implementation completed by August 2018.</p> <p>From our experience in Kasokoso, we found that many of the people living in these areas are living in extreme poverty conditions and some are involved in criminal activity. They often aren't receptive to police presence, however are vital in providing community information (especially</p>

	<p>people's perception and opposition to the project) and swaying community collaboration. So it is a delicate balance dealing with these communities.</p> <p>In contentious areas however, it is always advisable to carry out works under the protection of the Uganda police.</p> <p>We have also sought permits to carry out works from KCCA and Kira Municipality, in whose jurisdictions we were operating.</p> <p>In Kasokoso, some of the land lies in the NEMA corridor, so when it came to compensation, we only compensated the project affected persons for their crops/ structures/ development on the land but not for the land. This was based off the legal guidance offered by the solicitor general from their interpretation of the law. Also, many of the people in the area lacked land titles while others only had sales agreements from previous occupants therefore were compensated according to the basis of valuation as stated in our reports.</p> <p>All the land titles presented for the areas in Kasokoso were vetted by our legal due diligence team and were found lacking.</p> <p>Please keep in mind that Kasokoso has many informal settlements with self-proclaimed Local councils that the government doesn't officially recognize. So be ware and endeavor to run official business through the official local councils.</p> <p>I would also like to let you know that the process has very many complaints and it is vital to keep deadlines in mind such that the project doesn't extend into overtime.</p> <p>During our planning and designing of the pipeline, we put into consideration the upcoming infrastructure projects such as KJE, SGR and KCCA drainage corridor. The pipeline right of way is 10 meters.</p> <p>Maria Nambiro</p> <p>Another thing to note is that the area has so many speculators and that you will not have to re-compensate persons that are affected by the KJE project if they have already been compensated by our project. The alignment map of our pipeline will help you identify such cases.</p>
<p>Have you had any community development programs as part of your projects?</p>	<p>Dorothy Achan</p> <p>We have had HIV sensitization. However, the community development endeavors are usually implemented by the contractor for the project.</p>

	<p>Joseph Sebuliba</p> <p>As part of the community social responsibility, we have also put up several public stand pipes that grant the community access to piped water. Their location information should also be included in your request for data to NWSC.</p>
How do you deal with sensitive ecosystems like wetlands during project implementation? Do you put in place mitigation measures?	<p>Innocent Twesigye</p> <p>We always carry out an Environmental and Social Impact Assessment (ESIA) prior to these projects. Our mitigation measures are usually based on what the consultants recommend after their assessment. These are always communicated to the project contractor such that they abide by and or implement the recommended measures.</p> <p>We also follow donor specific standards in regards to handling the general environment and sensitive ecosystems.</p> <p>Joseph Sebuliba</p> <p>In certain cases while implementing the Environmental Social Management Plans, we have had situations where contractors had to deploy dust suppression systems which entailed watering of roads and covering of loaded trucks. We also had a case where the contractor was obligated to be on standby with de-silting equipment in a flood prone area during the rainy season such that drainage channels are cleared promptly in case of any blockage. Another case involved relocating of birds to an alternative habitat.</p>
There are instances where NWSC has sunk boreholes to supply water to communities such as in Lugazi. Do you have the borehole logs for these points and could they be availed to us?	<p>Maria Nambiro</p> <p>We can share this information with you. Please be sure to include it in the request for data to NWSC.</p> <p>Innocent Twesigye</p> <p>We also work with the Department of Water Resources Management during the hydrology assessment and in obtaining a water abstraction permit. Therefore extensive reports on these boreholes are available.</p>
Have you done any water quality sampling for the affected areas.	<p>Innocent Twesigye</p> <p>We usually have baseline studies done at the ESIA stage. Upon implementation of projects we then monitor receiving water bodies/ wetlands and effluent from the discharge point.</p>
139) Tonney Ssemmanda	

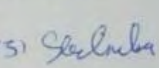

<p>Do you have grievance committees in these areas where you have been operating?</p>	<p>Joseph Sebuliba</p> <p>Yes, these committees are usually comprised of the Residential District Commissioner, the LC5 chairperson, Sub county head and LC1 chairperson.</p> <p>However, this wasn't the case for the project in Kasokoso where the grievance committees have consisted of leaders at the Division level and LC1. Also, a few other individuals opted to go to court.</p> <p>Maria Nambiro</p> <p>You should also keep in mind that the local leaders might at times have their personal interest in the project and may end up misleading the affected persons.</p>
<p>CLOSURE: The meeting was closed at 1140hours</p>

TEXT
<p>The Meeting Commenced at 1015 hours.</p> <p>Mr. Kizito Bashir Juma, Head Physical Planning, Surveying and Research at Buganda Land Board (BLB), chaired the meeting.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • Prayer • Welcome remarks from the chairperson (Mr. Kizito Bashir Juma); • Self-introductions for all the members present; • KJE Project Overview presentation by the Consultant (Atacama Consulting); • Discussions; • Closing remarks by the chairperson; and • Close of meeting.
<p>Welcome remarks from the chairperson (Mr. Kizito Bashir Juma)</p> <ul style="list-style-type: none"> • The chairperson welcomed the team from UNRA and Atacama Consulting to BLB and was glad the meeting was taking place to enable sharing of experience from Environmental and Social Impact Assessment (ESIA) and Resettlement Action Plan (RAP) activities for KJE project. He mentioned the Chairman Buganda land Board was held in the meeting somewhere else but would join in shortly.
<p>Self-introductions for all members present</p> <ul style="list-style-type: none"> • Members in attendance introduced themselves by name and organisation they were representing.
<p>KJE Project Overview presentation</p> <ul style="list-style-type: none"> • Edgar Mugisha, an environmental consultant with Atacama Consulting gave the opening remarks and Denis Kyongera an environmental consultant with Atacama

Consulting made an overview presentation about the Kampala Jinja Expressway Public-Private Partnership Project (KJE).	
Experience sharing and remarks session of the meeting	
Remark/ Question	Responses
1) Mr. Male D Kyawalabye (Chairman BLB)	Edgar Mugisha
<ul style="list-style-type: none"> How much of the Buganda Kingdom Land (under custody of BLB) is being affected by the KJE Project since we have over 20 square kilometres of land along that entire project stretch. 	<ul style="list-style-type: none"> We are not yet certain of how much kingdom land is affected however BLB could provide us with the shape-files of Buganda Kingdom land under its custody such that we can map out the actual affected land. We the consultants, UNRA Surveyors and BLB Surveyors should be able to meet and ascertain the actual size of the affected land.
<ul style="list-style-type: none"> The RAP Team (UNRA and Consultant) should come to BLB when they are ready to Value and promptly compensate the affected land. We are reluctant to release our land titles to UNRA Surveyors to enable them cut off the affected piece of land without assurance of a quick compensation process. We have had incidences where our land titles have been held for almost a year and yet there are other projects and People on land who would like to use the same land titles. Otherwise land acquisition is a standard process which we know very well and we are willing to cooperate. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> This has been noted. UNRA has since improved the land acquisition process especially on the KJE project but at times it is delayed by the land wrangles and law suits. UNRA has subdivided the KJE Right of Way into sub-section/volumes that will be assessed and compensated at different time other than waiting to assess the entire route before compensation which causes the delays.
2) Mr Kizito Bashir Juma	Edgar Mugisha
<ul style="list-style-type: none"> There should be a concept of GREEN in the design of the road. The Road reserves should be vegetated to enhance aesthetic view and environmental conservation. 	<p>This is one of the interests of the consultants and AfDB. Land scaping along the way will be done and the funders are willing to fund a Green corridor concept along the road. A large section of the roads will also be built on stilts and this will preserve the ecosystem underneath re-vegetation plan will be prepared and implemented as part of the KJE project</p> <p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA has also got into collaboration with other stakeholders and made a program called Green Right of Way (GROW). UNRA acquired land from National Forestry Authority (NFA) where they will grow trees in ex-situ and transplant grown trees to the project areas. If Buganda has tree species that are culturally representative, they should bring the ideas on board to be incorporated in the plan.

	UNRA also has a proposal to put a green park along this road and would be glad if BLB could provide unencumbered land for this initiative.
<ul style="list-style-type: none"> Stakeholder engagements usually happen during Project Planning however no such engagements are undertaken once the project construction starts and yet there are a number of grievances that arise during the construction of the project. Will the Environmental and social consultant be part of the construction team to ensure that the environmental recommendations are implemented and people's grievances are collected and addressed? 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> The presence of the consultant in the implementation phase depends on the procurement process of UNRA and the Project financiers.
<ul style="list-style-type: none"> The time lag between valuation and compensation is usually very long. There should be a factor of time included in the asset inventory such that in case of delay a certain percentage is added onto the initial assessed value of the assets. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA is paying PAPs 4 months after evaluation. UNRA is also abiding to a new legislation where money will be increased by 15% per year for any delay in compensation caused by UNRA.
<ul style="list-style-type: none"> Why shouldn't UNRA also compensate the orphan land (small piece of land left after acquiring the Right of way that may not be usable by the affected person). There have been instances where people are left with small pieces of lands that are of no use to them. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> Land for Land is being considered as a form of compensation to minimise cases of loss of productivity. UNRA is also compensating close to 90% of the land that remains and is unusable due to the project's right of way and after this the PAPs are free to even further sell the land to their neighbours who can annex it to theirs.
<ul style="list-style-type: none"> The Project affected Persons (PAPS) should not be asked to leave before compensation. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA has changed its methods in the land acquisition process by improving its communication. In this case UNRA is issuing formal eviction notices after adequate compensation. However there are instances beyond UNRA where people especially tenants evict themselves just from hear say, without any eviction notice issued by UNRA. UNRA is also avoiding raising down buildings of people that are not meant to be affected. UNRA has developed a special formula to cater for schools, hospitals and big business owners who are losing business location.
<ul style="list-style-type: none"> We are aware the road alignment will pass in Kireka where we have a king's Palace. How will the palace be affected? If not affected, how far is the road from the King's palace? The serenity of the king's residence is 	<p>David Kalanzi</p> <ul style="list-style-type: none"> Different cultural sites in Buganda have been identified and mapped out and this includes the Kabaka's palaces in Banda and Kireka.

important to the kingdom. The road design within the vicinity of the Kabaka's residence's should ensure it has no black spot because culturally the king (Kabaka) does not see a corpse.	
3) Barnabas Ndawula	Seguya Henry Kizito
<ul style="list-style-type: none"> UNRA should work closely with all major stakeholders such as Buganda Kingdom in handling the ESIA and RAP since a big portion of the project outline, if not all, lies within the Buganda kingdom. The kingdom clearly understands the behaviour and issues of its people and the Kingdom is also good at mobilising. We are willing to give acknowledgeable forms/letters to all Kibanja tenants on kingdom land as we have done before and we could also assist in verification of the rightful owners of plots. 	Yes, Buganda should be engaged all through the ESIA and RAP process.
4) Simon Kabogoza	Seguya Henry Kizito
<ul style="list-style-type: none"> Are there any plans to follow up on the project affected persons after compensation to ensure their livelihoods are maintained as indicated in the presentation? 	UNRA has developed a Monitoring and Evaluation framework where they will have two components that is a rapid assessment and a detailed assessment. In the rapid assessment, tracing of the PAPs happens after 1 month of payment to assess people that have misused the money, those that are failing to find land and those that are failing to settle in. In the detailed assessment, UNRA will trace the PAPs after 6 months of payment, and here they will be able to know which PAPs have had their livelihoods improved, those that have declined and then trace back to the livelihood plan. UNRA is also required by IFC to follow up and account for every PAP.
Seguya Henry Kizito <ul style="list-style-type: none"> The assessment is also mapping out other cultural sites such as shrines, tombs and some of these are privately owned. The assessment process is therefore having a challenge differentiating between a genuine site and one that is not. We therefore request for assistance from Buganda Kingdom in this regard. 	Kabogoza Simon <ul style="list-style-type: none"> The consultants and UNRA should liase with Buganda Heritage and Tourism board and the Ministry of culture of Buganda to get information regarding the different cultural sites and also to help the assessors identify the genuine sites and also identify those that could have been left out by the assessment process.

<ul style="list-style-type: none"> Are there any cultural sites belonging to the Buganda kingdom that are likely to be affected by the project? 	<p>David Kalanzi</p> <ul style="list-style-type: none"> Different cultural sites in Buganda have been identified and mapped out and this includes the Kabaka's palaces in Banda and Kireka.
<ul style="list-style-type: none"> The project schedule should be designed in such a way that the PAPs are quickly and adequately compensated after evaluation and ample time given to them as well to allow them to relocate and settle in the new location. 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> As per IFC performance standards PAPs should not be evicted before being adequately compensated, therefore it is not expected to happen with this project.
5) Rehema Nanvuma W	Edgar Mugisha
<ul style="list-style-type: none"> Have you started the implementation of the project? Has the verification exercise been completed especially for the stretch between Kampala and Namagunga? 	<ul style="list-style-type: none"> We are still in the RAP planning phase, once it is approved then implementation will take kick off. However there are some isolated incidents such as in Volume 1, where UNRA had to come and take action by giving the PAPs some money to avoid it being taken back as issues are being sorted. Regarding the verification exercise, disclosures have to take place, census is taken, PAPs are approached, interviewed and coordinates of their property taken. We ensure that there is an asset attached to every PAP and this has to be intermarried with the Inventory loss.
<ul style="list-style-type: none"> As big land owners, we would like to get the project strip maps to allow us determine how much of Buganda land is being affected along the entire stretch. 	<ul style="list-style-type: none"> Yes, strip maps will be shared as part of the disclosure process.
<ul style="list-style-type: none"> You have talked about selection of resettlement sites where there can be Land for Land compensation. As BLB we embrace this and would like to participate in the process. What will be the requirements? 	<ul style="list-style-type: none"> Special attention regarding resettlement is being given to vulnerable groups that have to be resettled such as those in Kasokoso. From the strip maps obtained in 2002, most land in Kasokoso was agricultural land but people have since grabbed the land and settled there. According to requirements by the lenders these people are also going to be compensated because their livelihoods must be restored. Consultations are ongoing with key stake holders such as National Housing which is looking at low cost housing for the affected people. BLB should also come on board as a key stake holder and be a partner since the Kingdom's people are being affected and the King would love to see his subjects resettled.
Mr. Mugaya Denis	

<ul style="list-style-type: none"> I don't know the mandate of the consultant but you need to pay special attention to land under public assets and some of the public assets themselves because some of the public land previous taken by the Central government has been returned to the Buganda Kingdom since 2013 and is now under the stewardship of the BLB. 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> The consultant is mandated to carry out RAP planning phase, verification phase and implementation. The report from RAP process will be available on the AfDB website for 120 days from 1st/06/2018 and there will also be an opportunity for a public hearing after the process.
<ul style="list-style-type: none"> It should also be noted that some of the issues related to land are political a case in point is Kasokoso area where you may find some obstacles. This is where public relations is very important and the kingdom would help since the kingdom owns some land in this area and people listen us, however we can only get involved if there is a good strategy for the affected people. We wouldn't want to taint our image. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> Among the contested areas is Kasokoso and with this UNRA is having ongoing discussions with National Housing to construct cheap housing in house for house compensation for those interested. Land for Land is being done for the PAPs that are interested in this form of compensation.
Denis Bugaya	
<ul style="list-style-type: none"> Some of the land being captured as public land has since been returned to Buganda. This is because a lot of public land in Buganda has been under government for a long time, and therefore the verification process must have captured it as public land yet this land has since been transferred back to Buganda. How are you going to handle delays related to approval of valuation reports? The Chief Government Valuer's (CGV) office is understaffed. The delayed approval will in turn affected prompt compensation of the affected people. 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> This is key to note and as consultants we will need to liase with BLB surveyors to check in the inventory and know which land has since been transferred back to Buganda and therefore is not public land. <p>Denis Bagaya There consultants should provide us with strip maps as earlier requested and our team of surveyors can ascertain which formerly regarded as public land has since been returned to BLB.</p>
<ul style="list-style-type: none"> There are a number of people who have land agreements in wetlands. How are you going to handle these? 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA is working in tripartite form together with Atacama and Earth Systems and challenges of the Ghost PAPs will be dealt with.
<ul style="list-style-type: none"> How are you handling the Mutungo issue? There is an ongoing court suit between the royal family and Kasaasa challenging the registration process of the Land title under Kasaasa (Landowner). 	<ul style="list-style-type: none"> UNRA has met the conflicting parties and is hopeful that something will be agreed upon.

<p>We are aware the Kasaasa master Land title has subdivisions of land titles and some of the affected people could have presented these land titles to UNRA. The land titles may look genuine but once the court case regarding the ownership of master land title is decided, this will affect all other land titles under these subdivisions. UNRA is likely to do double compensation if the affected people with land titles under these subdivisions are paid. If UNRA verifies that all the titles of the subdivisions emanated from the mother land title, as BLB we advise UNRA to halt the compensation process</p>	<ul style="list-style-type: none"> • UNRA had also started the compensation process for the people with legitimate milo titles as it awaits the court verdict. However, following this advice I will meet with our technical team and make a decision on the matter.
<p>CLOSURE: The meeting was closed at 1220hours</p>

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Stakeholder Consultation Meeting with the Commissioner, Veteran Affairs (Ministry of Defence and Veteran Affairs-MODVA) for the KJE PPP ESIA and RAP Update	
	DATE	17 th May, 2018
	VENUE	Ministry of Defence and Veteran Affairs Headquarters, Mbuya
	MEETING START	0820 hrs.
	MINUTES BY	Edmond Twinobusingye

Attendance Register: Attached

TEXT
The Meeting Commenced at 0820 hours.
Agenda items: <ul style="list-style-type: none"> – Welcome remarks from the commissioner-Veteran affairs, – Self-introductions by members present, – KJE Project Overview presentation by Denis Kyongera, – Background to Veteran issues in Uganda, – Question and Answer Session, – Close of meeting.
Welcome remarks from the commissioner-Veteran affairs,
<ul style="list-style-type: none"> • The commissioner-Veteran affairs, Mr. Mike Mabonga Wambi welcomed the team from Atacama Consulting.
Self-introductions by members present
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Denis Kyongera, a Consultant at Atacama Consulting gave an overview presentation about the Environmental and Social Impact Assessment process and the Resettlement Action Plan for the Kampala Jinja Expressway Project.
Background to Veteran issues in Uganda
<ul style="list-style-type: none"> – The Commissioner-Veteran affairs, Mr. Mike Mabonga Wambi provided a brief synopsis to issues of military veterans in Uganda as follows; <ul style="list-style-type: none"> ○ Able-bodied Ugandans who had little to no education background were enlisted for World War II and on return; they were given a small package to

retire on. These constituted the first batch of army veterans in Uganda.

- Post-independence, the turbulent political atmosphere in Uganda meant that one group of soldiers would oust another and hence there was no proper retirement plan for former soldiers. Majority of the soldiers in the rag tag rebel groups had little to no education background and hence could not have a meaningful life out of the forces.
- First, forward, in 1986 when the current government seized power, it was deemed that part of the political solution to rehabilitating former rebels and soldiers was to integrate them in the national army. However, in 1992, development partners requested that Uganda downsizes the army and as a result, 36000 soldiers were laid off without any gratuity or terminal benefits. Most of these settled in present day Kasokoso that used to be a wetland, Wakaliga and Bukasa areas. These veterans, many of whom are yet to receive their pension and gratuity are financially vulnerable with no strong economic base. It is good that this project has engaged them to get to know their issues. Solutions being designed should be empathetic of the current predicament of veterans.

Question/Comments and Answer session of the meeting

Question/Comment	Responses
<p>11) Arthur Kamyia (MODVA)</p> <p>The livelihood restoration aspect of the KJE Project ties in well with what the Ministry of Defence and veteran affairs is doing for army veterans. The ministry is looking at restoration of livelihoods of veterans by capacity building to include skills transfer, starting cooperatives to ensure that they become self-reliant and to create financial inclusion. The Ministry could support the project in this area.</p>	<p>Noted.</p>
<p>For the aspect of relocation, are you looking at cash compensation or locating a suitable piece of land to resettle those that will be displaced by the project?</p>	<p>Edgar (Atacama Consulting)</p> <p>Government, in looking at cost saving would buy the idea of locating available land, where say the veterans can be resettled. It would be better if cash compensation is channelled to the ministry of Defence to put up low cost residences for the veterans. This would come after UNRA and the ministry of Defence engage the veterans and sell the idea to them. Putting up the housing units can co-opt labour services of the project-affected veterans.</p> <p>Cities alliance has also come on board with ideas that can be taken up in this regard.</p>
<p>12) Commissioner, Veteran affairs (MODVA)</p> <p>Resettlement in the army entails psychological rehabilitation of former soldiers to cope with civilian life in the community outside the army. Other aspects of resettlement at the ministry involve;</p>	<p>Noted.</p>

<ul style="list-style-type: none"> – Skilling soldiers to enable them eke out a living through vocational training. – Rehabilitation of wounded soldiers that have been laid off to enable them engage in activities that economically empower them. <p>Veterans have to be handled well because they are militarily trained and yet have diverse challenges and could pose a risk to security if they are ignored.</p>	
It is good that the veterans have been engaged in the execution of this project however, more sensitisation is still needed and the ministry can use its political leverage to assist in popularizing this project.	Noted.
The veterans could also be enlisted to be part of the construction work that does not require specialized skills.	
13) Arthur (MODVA) The option of acquiring an alternative piece of land and building low cost housing units to resettle the veterans would be a good option. What does this entail?	Denis (Atacama Consulting) During the census survey, respondents were asked whether they would prefer cash compensation or physical relocation. Most of them preferred cash compensation. The challenge with this in wetland areas like Kasokoso, is that compensation cannot be made for a wetland. This project conforms to international standards hence if this group of veterans can be classified as vulnerable people they would need to be resettled. However, a suitable piece of land in a close radius to the city would have to be sought given that these people are urban and have sources of income close to the city.
14) Denis (Atacama Consulting) We would like to understand if the ministry of Defence and veteran affairs or the UPDF-Uganda People's Defence Force could have land that could be used to resettle the veterans out of the project area.	Commissioner, Veteran affairs (MODVA) The Uganda land commission and Buganda land Board would be more helpful in identifying land that can be leased for a long time for this purpose.
15) Arthur (MODVA) In physically resettling project affected people out of the project area, do you only construct a house for them? Do you cater for their lost sources of income and livelihood?	Edgar (Atacama Consulting) The livelihood component is key in this project. The areas to be selected for resettlement will be assessed for linkages that ensure that project affected people do not lose out on sources of income and livelihood.
16) Edgar (Atacama Consulting) In terms of releases of terminal benefits to the veterans by the line ministry, what is the outlook	Commissioner, Veteran affairs (MODVA) There is a backlog in terms of payment of terminal benefits to beneficiaries. However,

in this regard?	government through the ministry of defence and veteran affairs has come up with an idea that has been bought at the highest level. It entails sourcing for money outside the budget such that the current backlog is cleared in two phased releases. However, the ministry has made some savings in this quarter and will pay close to 2000 veterans out of the 79000 that have to be paid. This adds to the desperation of the veterans. Many that were laid off in 1992 have not been paid off. Some settled in Kasokoso and hence eviction from the project area there will add to their misery. This should be handled with care.
17) Denis (Atacama Consulting) As part of the project, the communities in the project areas are supposed to identify which community/livelihood projects could be picked on for funding by donors. Can you guide in this regard?	Commissioner, Veteran affairs (MODVA) We already have ideas in this regard that we can use for benchmarking to guide veterans in the project area in selecting a viable income/livelihood project (s). Some of the veterans in the Elgon and Rwenzori regions have gone into fish farming while others have collaborated with the Uganda Wildlife Authority to set up apiary projects in the National Park as a way of improving their livelihoods. Others in northern Uganda have taken to dairy farming, fruit processing and growing. We could pick lessons from all these.
18) Commissioner, Veteran affairs (MODVA) The idea of asking project communities to identify priority livelihood projects that could be taken on for funding by donors is an innovative one. However, for our case, it is vital that the number of veterans that will be affected by the KJE project is ascertained and where they will be resettled so that their terminal benefits once processed, will find them in a better state. In this way, they will cooperate with the project.	Edgar (Atacama Consulting) The challenges of finding terminal benefits for the veterans notwithstanding, there are programs that can come in now to make sure that the veterans can be engaged in income generating ventures as they wait for terminal benefits to come through. The road project will need labour and as such, the skilling programs by the Ministry of Defence should go on. Financial literacy campaigns should be conducted to enable veterans manage their compensation and terminal benefits.
19) Edgar (Atacama Consulting) The lenders have made it clear that the livelihood restoration component has to come out clearly in this project. As a result we have engaged communities and line ministries in this regard to ensure that this component is covered.	Arthur (MODVA) Livelihood restoration is what touches core in veteran affairs. The issue is how to uplift the livelihoods/living standards of the veterans and hence the livelihood component of the KJE Project speaks well to this aspiration.
20) Edgar (Atacama Consulting) Project impact assessment reports will be displayed on the African Development Bank website for a period of 120 days starting 1 st June 2018 so that people can read and provide input.	Commissioner, Veteran affairs (MODVA) This has been noted.

There will be a public hearing and members of the public will be invited to make submissions

B.4.7 Schedule of Civil Society Organisations Consultation Meetings

THE SCHEDULE OF CONSULTATIONS FOR CONSULTATIONS/ SENSITIZATION		
S/No	Type	Date of Meetings
1	Slum Dwellers International and Cities Alliance	15 th March 2018
2	Cities Alliance	16 th March 2018

B.4.8 Minutes of Stakeholders Consultation Workshop – Civil societies

SLUM Dwellers International and Cities Alliance Date: 15 th March 2018	
Introduction by all participants	
<ul style="list-style-type: none"> Welcome remarks by Monica (UNRA) Raymond (UNRA Highway Engineer) gives brief history about KJE Raymond then describes the alignment via PowerPoint 	
Question/Comment	Responses (UNRA)
1) Member 1 Members ask about large interchange area.	Raymond replies that the interchange needs to be big to cater for high speed volumes.
2) Member 2 A member of the meeting asked about pedestrian crossings along the expressway	Raymond mentioned that these crossings shall be underpasses and there shall be access roads as well.
3) Member 3 A member gives an example of Angola where on a similar road the government evicted people along the expressway for private investments	Raymond replied to this by mentioning how sensitization is on-going and there is hope that that won't be the case in Uganda as well Raymond mentioned how Chainage 33 is where the rest area shall be. And this is at Sezibwa Falls
4) Member 4 A member asked for an update on Kasakoso and Kinawataka areas	Monica then mentioned in interest of time for Patrick (KJE Project Manager), Cities Alliance makes their presentation first then we address those two areas afterwards
Julian (Cities Alliance) presentation	
<ol style="list-style-type: none"> He introduces Cities Alliance and gives their background. He mentions global lessons he has learned along the way These being key lessons moving forward He mentions how there is a need to establish a global best practice. By linking the road development to a broader in situ-slum upgrading. And having a programme of investments into those communities. In exchange for rapid relocation from road reserves, UNRA can work with Cities Alliance to negotiate with communities on how to relocate them to upgraded urban communities. For example, satellite cities. Julian then presented pictorial evidence of previous upgrades of slums in Alexandra, Johannesburg, South Africa and in Alagados, Bahia, Brazil. 	
CLOSURE	

Signatures:

Chairperson:.....

Date:.....

Secretary:.....

CITIES ALLIANCE and ACTogether (Follow up meeting)
Date: 16th March 2018

Introduction

- Introductions by members

1) Julian (Head of Programmes, Cities Alliance)

Asked about what safe guards are being applied in Uganda.

- He mentioned a need for a broader strategy required for funding.
- One strategy being for how to relocate and compensate people. Another strategy for the broader community.
- He then mentioned how EU is a member of Cities Alliance and have funded a lot of their projects.
- He asked the team to come up with a broad base strategy.
- To have a backup plan for PAPs who will be worse off after being relocated.
- He mentions that a concept note needs to be designed for EU to fund the project.
- Focus on people who are going to battle the relocation.
- And identify different types of communities and their safe guards. And work out a strategy for them.
- He outlines the 5 frames/headings of the Concept Note as:
 - Governance; existing institutional structure.
 - Citizenship; who are the people being affected.
 - Services; basic services needed like drainage for example.
 - Economy; an Economic Programme that can enable people to recognize benefit of living along the expressway.
 - Environment; how shall it be affected.

2) Edgar (Atacama Consulting)

Mentions that we are going by the IFC standards.

- He mentions that we must make sure livelihood restoration is achieved and that there shall be ongoing monitoring and evaluation.
- He then mentioned how Phase 1 of the census is done and currently data is being input into Survey CTO.
- About 7,700 structures have been surveyed so far.
- And that inventory of loss is being done by the UNRA team.
- Edgar describes the different categories of people being affected and their potential needs.
- The focus though being primarily on vulnerable people.

<ul style="list-style-type: none"> - Hence the concept note shall specifically address vulnerable people then the wider community at large
<p>3) Julian (Head of Programmes, Cities Alliance)</p> <ul style="list-style-type: none"> - Julian has tasked the team to put together a concept note in 6 weeks' time. - See how we are going to meet IFC standards in partnership with Cities Alliance. - Julian emphasizes that we need to establish a structure to deal with this issue. - Not a proposal but simply an objective, target and broad frame. - Land audit for a resettlement plan being key. - After which EU can sign off on the programme and give funding. - He mentions that there is a need to interact with National Housing Authority and find out what land is out there and explore the different options. - There is a need to establish a mechanism to make this happen. - He mentioned that EU and AFD promised to back the programme. Though they won't sign off safe guards unless a programme is set out. - And a reference of the concept note needs to appear in the phase 1 report.
<p>4) Edgar (Atacama)</p> <ul style="list-style-type: none"> - Edgar is going to organize a meeting between Nigel Murphy and Sam Mabala (Commissioner of Urban Development, Ministry of Works) - Edgar mentioned that in about 2 weeks' time the team shall go back to the communities to engage the PAPs on the livelihood restoration plan. - Edgar suggested creating a smaller footprint for the Nakawa Market vendors, like a tall structure. - He also suggested microfinance schemes for PAPs, either as clusters or inject capital to grow their businesses. - There is a possibility of developing the land In between SGR and KJE. - Low cost housing, but only after current income is increased to afford these and pay over time. - Improving sanitation was another suggestion from Edgar. - He also mentioned that UNRA wrote to the Ministry of Defence asking about the veteran's livelihood restoration plan. - Edgar to share programmes that the consultants have come up with
<p>5) Frederic (ACTogether Uganda)</p> <p>Suggested improving the services of people affected in the surrounding community.</p>
<p>6) Edgar (Atacama)</p> <p>Edgar mentioned that we are looking into how other projects affect this area (Kasakoso & Kinawataka) and KJE is affecting them as well</p>
<p>7) Sam</p>

<p>Sam points out that National Housing Authority suggested a few areas that could be pockets for resettlement. And hence an opportunity for low cost housing (Satellite City) there though funding is required.</p> <p>He mentions that we need to engage National Housing Authority in the discussion, to know how much of their land is being taken up by KJE</p>
<p>8) Joe Muturi (Slum Dwellers International)</p> <p>Joe mentioned that market vendors need to be consulted first, so that structures created for them are what they can work with.</p> <ul style="list-style-type: none"> - That accessibility is key to such establishments. - And that there is a need to engage the community further to meet their needs. - Livelihood Restoration engagement in 2 weeks' time at communities can be used to gather more information for the concept note and programmes.
<p>9) Sam</p> <p>Sam mentioned that the meeting with National Housing Authority will primarily address relocation and income generating activities for PAPs</p>
<p>10) Edgar (Atacama)</p> <p>Edgar gave an example of roadside nurseries and how they can generate income for people selling them along KJE</p>
<p>11) Joe Muturi (Slum Dwellers International)</p> <p>Joe mentioned that for livelihood engagements it might be easier to engage groups/associations of PAPs rather than individuals</p>
<p>12) Edgar (Atacama)</p> <p>Edgar mentioned that we need to think about the HIV/AIDS hotspots not increasing because of KJE. And creating noise barriers for both KJE and SGR</p>
<p>13) Sam</p> <p>Sam suggested committees to be formulated to steer and implement these programmes</p>
<p>Agreements from the meeting</p> <ul style="list-style-type: none"> • ACTogether to share previous reports on Kinawataka and Kasakoso with Atacama. • Atacama to also share latest findings with the team. • ACTogether to come up with Citizenship write up, Atacama to share environmental findings and Economy to be written by all for the concept note. • All agreed that KCCA needs to be brought on board to know their development plans for the affected areas • Cities Alliance to share structure for concept note and clearly specify different roles. And by next week, begin populating it. • Proposed meeting with National Housing Authority tentatively on Monday 26th March 2018 at 10 am at the Commissioner's Office. Nigel Murphy to be informed about this meeting. • Sam to confirm with National Housing Authority about meeting. Then send out invitations. • Slum Dwellers International to come up with alternatives to relocating people. • Next week, exchange of information shall happen. • Closing Remarks from Sam Mabala. • End of Meeting.

C. 1 RECORDS OF RAP CONSULTATIONS FOR THE PROJECT

C.1.2 Household Census Form

HOUSEHOLD CENSUS FOR IOL				
THE PROPOSED KAMPALA JINJA EXPRESSWAY AND SOUTHERN BYPASS (KJE PHASE I)				
Name of Enumerator		GPS Location: Easting <input style="width: 100px;" type="text"/>		Northing <input style="width: 100px;" type="text"/>
Date .../.../2017		Office use only: Household No <input style="width: 50px;" type="text"/> H <input style="width: 50px;" type="text"/>		
Section 1: Introduction to the Questionnaire				
Good morning / Good afternoon Sir / Madam,				
<p>My name is, I am part of the survey team from the Uganda National Roads Authority (UNRA). We are conducting a baseline census on affected households on the proposed Kampala Southern Bypass (KSB) and Kampala Jinja express Highway (KJE) road project, together referred to as KJE Phase 1. This survey involves talking to potentially affected community members like you about your household, employment and sources of livelihood. The information generated from this baseline survey will be used to register affected households and people and to establish resettlement and compensation options. The information collected will be confidential and will help UNRA prepare an Environmental Impact Assessment and Resettlement / Livelihood Restoration Action Plan. Therefore, the purpose of my visit here is to request for your time so that we can have a short discussion and complete a household information form. If you agree, I will be asking you some questions and recording your answers. The discussion will take about 45 minutes.</p>				
Interviewee - Name and Contact Details				
Name of the interviewee				
Telephone number				
Address				
Date of interview				
Start and end time		Start:	End:	
<p>Do not start the interview before you explain the purpose of the study (<i>Refer to the introduction</i>)</p> <p>Respondents include anyone living in the proposed road right of way. Be guided by the Local leaders or surveyor</p> <p>Respondent is preferably head of the household. If not, enquire about the availability of the household head and if possible get his/her contact. If none of the above is possible, please contact the supervisor for advice</p>				
Section 2: Location of Informant				
2.1) District	2.2) Municipality	2.3) Sub-County	2.4) Town Council	2.5) Division
2.6) Parish/Ward		2.7) Village/LCI		

Vulnerability assessment

3.2.6) Do you have vulnerable people within this household?	3.27) If yes, who are they?/Type of Vulnerable groups (Remember not to read out the codes)	Number
1= Yes	1= Female Headed households	
2= No (Skip to Section 4)	2=Widow	
	3=Child headed	
	4= Orphan and vulnerable children	
	5=Elderly/aged	
	6=Physically disabled	
	7=Mentally disabled	
	8=People with chronic illnesses	
	9=Jobless	
	10=Person doing hazardous work (define hazardous work)	
	
	11=Illegal squatters	
	12=Extremley poor	
	13= Internally displaced people/refugee	
	14=Indigenous	
	15=Others	

Section 4: Ownership and Assets							
4.1 Ownership and Asset status of the affected person							
a) Housing							
4.1.1) Do you own this house in which you are currently residing?	4.1.2) If no, what is the status of ownership?	4.1.3) If no, who is the owner?	4.1.4) If you lease, the property, how long is the lease?				
1=Yes (Go to 3.3.5) 2=No (Go to Qn 3.3.2, 3.3.3, 3.3.4)	1= Rented 2=Caretaking on behalf of owner 3=Caretaking on behalf of family 4=Others.....	Name:	Time period (indicate months or years):				
4.1.5) For how long have you owned this house?	4.1.6) Do you have another residence that you or your family owns (e.g. in another village)?	4.1.7) If yes, where?					
Time period (indicate months or years):	1=Yes 2=No						
4.1.8) Are you connected to the following services (Select all that apply)							
1=Water supply 2=Sewerage 3=Electricity							
b) Land							
4.2.1) What is your status in relation to the land ownership?	4.2.2) What is the size of your land in acres?	4.2.3) How did you acquire this land?	4.2.4) Do you possess any land title or agreement for ownership or tenancy?	4.2.5) What kind of titles do you own?	4.2.6) For how long have you been on this affected plot?	4.2.7) Are there any encumbrances on this land like: (Read out)	4.2.8) What is the land tenure system here?
1= Owner (Title holder) 2=Licensee Tenant 3= Tenant (Kibanja) 4= Co-owner 5= Co-Tenant 6=Customary tenant 7=Agricultural squatter 8=Grazer/Nomadic Pastoralists 6= Others (Specify)	_____ by _____ feet _____ Acres	1= Bought 2= Renting 3= Inherited 4= Given as a gift. 5= Just settled 6=Compensated 7=Exchanged 6= Other (Specify)	1=YES 2=NO	1= Land Title 2=Purchase Agreement 3=Tenancy 4=Registration receipt 5=Customary agreement 6=Others.....	1= Since birth. 2= 0-10 years 3=10-20 years 4= over 20 years	1= Yes, claim by family members. 2= Yes, mortgage/loan. 3= No, all documents available. 4= No, and no documentation available. 5= I don't know 6= Other (specify.....) 7=None	1=Mailo 2=Communal 3=Freehold 4=Leasehold 5=Customary land 6=Kibanja 7=Kingdom land 8=Condominium 5=Other
4.2.9) If you are a land owner and you have no land title, why?			4.2.10) If this person indicated that he is land title owner (Q4.2.4), do you have any squatters or tenants who invested in structures or land improvement on your land?	If yes, how many?			
1= I paid but the land owner is absent and cannot be easily contacted 2=Inherited the land but don't have the land title 3= there is on-going dispute over the land 4=Lack of money to process the land title			1=Yes 2=No	Category (write number) Tenants= Squatters= Others=			

c) Impacts on assets		
4.3) What facilities do you have on this land that may be affected by the project?		
a) Type of activity (circle code)	b) Degree of road impact 1= Road entirely affect it 2= Road partially affects it 3= Entirely outside road	c) Who owns it? 1= Adult Male 2=Adult female 3=Children 4=Family 5=Community
1. Empty land		
2. Residential owner occupied house		
3. Perimeter fence		
4. Latrine		
5. Family grave		
6. Residential rental houses		
7. Commercial buildings (Go to Business Census)		
8. Small production-based business (Go to Business Census)		
9. Small enterprise service-based (Go to Business Census)		
10. Wage earning activity		
11. Salary-based livelihood		
12. Own water point (specify type.....)		
13. Woodlot for timber		
14. Natural forest		
15. Garden / Agricultural land		
16. Livestock watering points		
17. Grazing land/Farm/Cow shed		
18. Bathroom		
19. Kitchen		
20. Poultry/Shed		
21. Store		
22. Other (Specify.....)		

Section 5: Livelihood Assessment
a) Incomes from affected assets

5.1) What do you use your house for?	5.2) What is the land around your house in the road corridor used for?
1= Residential 2= Commercial 3= Rent 4= Livestock 5= Residential /commercial 6= Other (Specify)	1= Livestock 2=Agriculture 3=Woodlots 4= Recreation 5= Renting out 6=Business (Go to Business Census) 7= Nothing specific

Table 5.3 Income sources of the HH

a) What are your sources of income? (Multiple responses allowed)	b) Categorization of source of income 1=Primary 2=secondary	c) Who participates in such activities 1=myself 2=Spouse 3=Children 4=Dependant Worker	d) Income in Ushs	e) Frequency 1=Daily 2=Weekly 3=Monthly 4=Biannual 5=Annual 6=N/A	f) Where is it located 1=In or near the road corridor 2=In the vicinity 3=Elsewhere
1. Subsistence agriculture (crop and livestock, poultry)					
2. Commercial agriculture (crop and livestock, poultry)					
3. Fish farming					
4. Self-employment (Specify.....)					
5. Wage-based activities (Specify.....)					
6. Salary employment (Specify.....)					
7. Rental					
8. Interest					
9. Dividend					
10. Assistance/begging/remittance					
11. Eating places					
12. Mechanic					
13. Carpentry					
14. Retail shop Kiosk					
15. Own salary					
16. Husband/Wife's salary					
17. Transfer income (Pension/handouts)					
18. Other (specify)					

5.4) What is the total annual income of your household?	5.5) Would your livelihood be affected by the Project?	5.6) If so, how?
..... Shillings	1=YES 2=NO	1. Increased distance to place of work 2. Increased distance to place of education 3. Loss of income 4. Loss of community/social network 5. Loss of access to nature-based livelihoods 6. Increased distance to medical facilities 7. Other (specify)

Section 6: Photographs of Household and People present for Interview

6.1) What do you think of the KJE/KSB Project?	Asset Photo(s) ID w/HH members
1= Good	
2= Partly good/partly bad	
3= Bad	
4= Not sure	

THANK YOU

C.2 Records of Stakeholder Consultations for KJE RAP (ICS, September 2015)

C.2.1 Sequence of the consultation process

Self-introduction from Rwenzo – Green Associates on behalf of Scot Wilson / Professional Engineering Services for UNRA

Reasons why the social team is there (consulting on the proposed road KLA – JJA) to obtain a preferred alternative out of the three / four options. These are the Northern Route (Northern By pass to Namataba (47km)), the Southern Route ((Bukasa to Namataba (42km)), the combined new alternative (South of Main Jinja road after Namataba to Jinja railway Bridge) and the Existing main Highway KLA – JJA (72km)

Team to seek information on the existing infrastructure, economic and social activities on all the four options

The team to seek information on the administrative structure along the proposed road (District, Sub County, Parish and Village)

The team to seek information on the disease burden especially HIV/AIDS within the corridor including ideas on where to put a worker's camp if necessary

Issues of occupational and cultural resources if any

Seeking comments and input from the stakeholder

Signing the form for contacted people (a mandatory requirement by both NEMA and UNRA)

End

BUSINESS

NEW VISION, Friday, June 20, 2014 35

ICAO reportedly suspended the licences of the three airlines on Tuesday

CAA suspends three airlines

By Samuel Sanya

Three airlines have been suspended. Two of them were suspended over safety issues, while the third was said to be involved in transporting guns to conflict hotspots in Asia and Africa.

The airlines are Transair, Uganda Air cargo and Agha Khan Group-owned, Air Uganda.

Impeccable sources said in addition to not meeting safety standards, Transair was involved in clandestinely transporting arms in war zones. They did not reveal the source of the arms, but said the airline had been followed for some time.

Air Uganda which entered the market about seven years ago is said to have failed the passenger safety standards, the sources noted. They said Air Uganda had been warned several times after their planes returned to base at Entebbe before reaching their destination because they could not make the entire

journey. Uganda Air Cargo is government-owned and is operated by the Ministry of Defence.

Ignie Igumira, the Civil Aviation Authority public affairs manager, confirmed the suspension. He only said: "We have been undergoing an audit as a country by the International Civil Aviation Organisation (ICAO). They check everything in the industry, including the regulator and the players."

He said the airlines will have to undergo a recertification process before resuming operations.

There are certain critical issues that affect safety that must be addressed immediately, Igumira said, adding that "there are also some minor details that will be addressed later on."

He explained that since the suspension took effect on Tuesday, none of the airline companies has submitted full information on their operations.

Igumira said CAA will help them to be recertified, if they comply with the requirements. They are supposed to submit certain information to CAA, which will in turn send it to ICAO headquarters in Montreal, Canada.

The Air Uganda chief, Cornelius Muteya, could not be reached, but an insider who preferred anonymity blamed their woes on CAA, without expounding.

Transair's website says the airline operates worldwide cargo services for commercial and humanitarian organisations. They operate large fleets of Lockheed L-100s Hercules and Boeing 727 freighter aircrafts and have done work in Angola, Bahrain and Iraq.

It says they have performed several refugee evacuations from war zones in co-ordination with humanitarian organisations, including UN forces such as MONUC in DRC. Their work involved logistics supplies and medical evacuations, their website stated.

Mukono women form village bank

By Javito Mbemba

LOCAL VIEW

Members save at least 50,000 every two months. They can get up to sh3m at 10% interest rate.

When Esther Baroma got problems with paying back a bank loan worth sh50m (that had accumulated to sh90m with interest, she contacted her bank (name withheld) to explain her problem. The manager assured her that she could pay up slowly.

"But immediately I moved out of the bank I was manhandled by court brokers who took me to a Police station. I spent there three days before being forced to sign transfer forms of my rental building in Mukono worth over sh150m," she said.

This is what made Baroma resolve to mobilise fellow women who had also been humiliated to start a bank.

The group of women in

Mukono has started a village bank - Technosave Harvest Association, to extend credit to fellow women. Baroma is its chairperson.

She said their intention is to save women the frustration, discrimination and humiliation they face at commercial banks when seeking to borrow money.

Baroma also said they would provide women with credit to improve their businesses.

A village bank is a micro deposits taking institution. It differs from a Savings And Credit Co-operative Society (SACCOs) in that the beneficiaries do not have to be owners like it is with a SACCO.

The Bank of Uganda financial institutions Instrument 2010, says a person transacting a financial institution business as a bank shall have a minimum paid up cash capital of not less than one million two hundred and fifty thousand currency points (25,000,000) invested initially in such liquid assets in Uganda as the Central Bank may approve. Technosave Harvest Association has already met this requirement. It now has 30 shareholders who pay sh50,000 annual membership,

Uganda National Roads Authority

Plot 5 Lourdel Road, Nakasero
P.O. Box 28487, Kampala, Uganda

PUBLIC NOTICE

CONSTRUCTION OF THE NEW KAMPALA-JINJA EXPRESS HIGHWAY

NOTICE TO ALL PERSONS AFFECTED BY THE PROJECT

Uganda National Roads Authority (UNRA), notifies the general public, in particular those likely to be affected by the development of the Kampala-Jinja Expressway in the following localities: **Kinawataka, Mutungo, Kito, Namataba, Kirinya, Senyi, Kitale, Kyungu, Kasokoso, Kapeke, Kasenge, Namataba, Mutanzige and Nakawala**, that the organization has contracted **Scott Wilson** to among other things carry out surveys in preparation for the construction of the new Kampala-Jinja Expressway. Officials of Scott Wilson are required to present themselves to the public with company IDs and through Local Leaders.

The Consultant will be visiting properties along the various proposed routes, surveying properties and preparing a proposed Resettlement Action Plan among other things.

UNRA would like the public to know that this exercise is **FREE** of charge and, therefore, no one should charge them for survey works. UNRA would also like to inform the affected property owners that the Consultants are not assigned to help you process land titles. Land titles should be processed by property owners through authorized Government Agencies.

UNRA remains committed to compensate all persons affected in anyway by its projects. As we have done in the past, before your land is reserved for a public purpose, you will be notified by UNRA of the proposals and you will be given an opportunity to express your views. When the time comes to acquire your land, our offices will contact you to discuss the proposals and provide any information required.

Anyone caught soliciting funding or impersonating UNRA Staff will be arrested and charged with extortion and false pretense.

Please report anyone who tries to solicit money from you to:

The Head, Corporate Communications

OFFICE OF THE VICE CHANCELLOR PRESS RELEASE

KYAMBOGO UNIVERSITY DOES NOT ISSUE WRONG DEGREES

Reference is made to your article dated 11th June 2014 which appeared in *The New Vision* titled "Kyambogo issues wrong Degrees".

In the said article impression was created that Kyambogo University had issued wrong degrees to the graduands.

That whereas typographical errors are inexcusable these were mainly isolated cases of misspelt names due to wrongly captured data.

This should not create an impression that Kyambogo University issues wrong degrees to graduands.

Management takes this very seriously and wishes to assure the public that no student has been awarded a degree he/she did not register for and does not merit.

Lawrence Madete - Spokes Person Kyambogo University

C.2.3 Sample of the introductory letter to the Local Governments

Uganda National Roads Authority

Plot 11 Yusuf Lule Road

TO WHOM IT MAY CONCERN

Dear Sir,

NATIONAL ROADS DEVELOPMENT AND MAINTENANCE PROGRAMME

FEASIBILITY STUDY AND DETAILED ENGINEERING DESIGN OF KAMPALA-JINJA ROAD (72KMS)

The Government of Uganda has allocated funds to finance the Feasibility Study and Detailed Engineering Design of Kampala- Jinja Road (72Kms). The study will assess the possibility of widening the existing road and also assess the possibilities of adopting alternative routes between Kampala and Jinja.

We are pleased to inform you that the Government has engaged **Scott Wilson Limited of the United Kingdom in Association with Professional Engineering Consultants of Uganda** to carry out the Feasibility Study and Detailed Engineering Design of the Kampala- Jinja road

The purpose of this letter is to introduce to you the consultant, Scott Wilson Limited in Association with Professional Engineering Consultants Uganda who will be undertaking a number of activities along the road.

They will need your support and assistance to ensure early completion of the assignment. The data collection activities will mainly include road surveys, environment & social assessments, construction materials identification and various engineering investigations.

We look forward to your assistance and support on this important assignment.

Yours sincerely,

Peter W. Ssebanakitta
Executive Director

C.2.5 Minutes of Meetings with Stakeholders and PAPs

Revised Records of Mukono meetings

A 5A Revised Records of the Consultative Meetings

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM)		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
General Observations for all the meetings: All meetings started with a prayer and there was a standard agenda for each. In all the team leader introduced the subject, and the experts made their contribution with respect to what was to be done by each of the three teams that were to conduct the RAP exercise. These are described below: -		
Composition of the consulting Team	1. Mrs.Magezi Gertrude Binta-Sociologist -(Team Leader)Tel:0701441846 2. Mr.Twijukye Rauben-Valuer/Surveyor-0774322165 3. Mr.Serukuma Herbert-Videographer-Tel:0702292671 4. Mr.Mayanja Charles-Research Assistant-Tel:0702094534	N/A
Purpose of meetings	The main objective of these consultation meetings was conduct Sensitization meeting for the Resettlement Action Plan (RAP) for the construction of the proposed Kampala-Jinja Expressway (76.8km)	N/A
Programme activity for all Meetings was similar	Activity 1. Arrival of Participants and Registration 2. All seated 3. Opening prayer 4. Chairperson introduces the subject and opens meeting 5. Team leader introduces team and subject. 6. Surveyor to present is Methodology and activities. 7. Valuer to present methodology and proposed activities 8. Discussions and issues of concern	N/A
Introductory remarks by team leader	For most of the meetings, the Team leader started by introducing the team members and explaining the road project. Briefly she explained that the road was proposed to start from Kampala at the UMA show grounds, and pass through the south of the present Kampala Jinja road until at about Namataba where it would cross to the northern section, go along the edge of Mabira forest and cross to the southern section at about 56km from Kampala. It would then cross through the Sugar Cane plantations until it gets to Njeru and ends at the new Nile Bridge across the Nile river. The total length of the road would be about 76.8Km. She went ahead to show the location of the	N/A

Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<p>proposed road using the provided map.</p> <p>PAPs were informed that the Surveyor was already on ground and picking the road alignment on the ground whose width will vary from approximately 60 to 80 metres. It is expected that the road from Kampala to Mukono will be six lanes (three either side) while the section from Mukono to Jinja will be four lanes (two either side). Only a few access roads will be allowed since this will be an expressway and those to use it are likely to pay some fees. There will be a link at Namboole to Join the proposed Southern by Pass which is also undergoing detailed design.</p> <p>The Road Corridor had already been gazetted which means that no developments in the corridor after the date of gazetting will be eligible for compensation. The effective date for the Instrument of gazetting is 24th January 2013 (This information was availed after Buikwe District).</p>	
Introductory remarks by the Survey and Valuation teams	<p>PAPs were further informed that the Surveyor is already on ground to set out the design of the road by pegging out to get the centre line as well as the extent to both the right and left of the road. Later during the RAP study, the Surveyor will come back to separate individual affected persons. He stresses that the Pegs are very important as they help the consultants to know which is affected property and people and requests the leaders to safeguard against destroying the Pegs and that they should continue to sensitize people about them. He explains that Pegging out helps in capturing Land that's titled land or untitled.</p> <p>He explains the different tenure systems varying from Mailo land, Lease, and freehold as well as customary land tenures. While for freehold and land Mailo land there is no</p>	N/A

Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<p>expiry, lease hold has an expiry period.</p> <p>PAPs should come up with their title deeds as proof of ownership. They should make photocopies of the title deeds. He gives an example that if the road width is 80Metres the Surveyor pegs out the right hand side extent and left hand side extent. Then the Pegs show where one stops and where the next neighbour starts which assists in getting the area. The Local leadership will have to help in identifying the right owners since some of the owners might be away. In worse cases it is possible that some people including chairpersons bring in ghosts to claim. That is why it was important for everyone be vigilant so we can identify them.</p> <p>After the land Surveyors have determined individual acreages then Valuers come to assess and determine the actual values of the affected property (any developments, trees, crops, Land and structures). The RAP team will be composed of three sub teams working hand in hand. These are the Valuation, Social and Surveyor sub Teams. The Value of crops and trees is determined by the compensation schedule as provided by the District land Board. For plants like Bananas Mature and yielding are valued at different rate than those mature not yielding. For houses like permanent, Semi permanent and temporary we don't use the compensation schedule of the District. We use a Standard BOQ (Bill of Quantities) improvised by a Consultant after an expeditious research termed as Land use Comparables by asking different people/landlords in the affected area which helps to gauge the cost of land/acre in the respective areas. Finally a disturbance allowance which is equivalent to 15% or 30% depending on the due notice is provided. After PAPs have been s given six months notice to vacate the affected area a 15% Disturbance Allowance will be added. Biggest component of the project now is land acquisition in order to pave way for the Road Project.</p>	

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM)		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	The teams always requested people/Leaders/PAPs who have not understood to ask questions for further clarifications other than learning from hearsay.	
Specific Comments from the PAPs and local leadership as well as responses from the Sensitization team are rerecorded below: -		
Date and Place held	4 th January 2014, 11:00am at Njeru Town Council.	N/A
Local leaders present	Hon. Dorothy Mpiima-Woman MP- Buikwe District Mr.Katende Ronald -Speaker(Nyenga-Town Council) Mr.Nsubuga Robert LCII Chairman Njeru South Mr.Musoke John-Chairperson	N/A
List of participants	Attached to the report	N/A
Name & designation	Summary of discussion & issues, comments raised	N/A
Mr.Katende Ronald –Speaker (Nyenga-Town Council)	<ul style="list-style-type: none"> • The Speaker explained the delay and poor attendance that the Town Clerk had refused to cooperate and had insisted that Government workers don't work on Saturday. He proposed to met the big stakeholder on a later day. • He confirmed that the next meeting at 2.00pm would be well attended. He noted that while Consultants have been very serious with their work, Town Clerk had tried his best to sabotage their efforts. This would not happen again he promised. • Speaker welcomed the area MP (hon Dorophy Mpiima) who also was in attendance. 	<ul style="list-style-type: none"> • In response Mr.Nsubuga Robert LCII Chairman Urged particiopants to go ahead despite the sabotage. . • Asked the speaker to chair the meeting
Odeba	<ul style="list-style-type: none"> • Local authority does not recognize some of the houses / structures, how will they be valued? 	<ul style="list-style-type: none"> • The valuers will generate the BOQs and value all properties the District not withstanding;

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM)		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<ul style="list-style-type: none"> • Why can't the project take residual land if it is not viable? • Will you compensate Local councils for roads closed? • Why pay for use of road if it is a short distance I use? • 	<ul style="list-style-type: none"> • If remaining portion or part of structure is not viable, it will al be valued; • Government to Government acquisition will not need compensation. • The other roads will not be closed but will be feeder roads; • Payment is a policy matter which the MP can take up
Mr. Katende Ronald- Speaker(Nyenga-Town Council)	<ul style="list-style-type: none"> • When will compensation and construction begin • And can we continue construction if we have startred? 	<ul style="list-style-type: none"> • You will stop the day your house is assessed and valued. • Team leader informed further that the road process has commenced and that there is a gazetteement (instrument) to halt any developments within the corridor. • Leadership to help by stopping importation of people into the corridor.
Hon. Dorothy Mpiima –Woman MP- Buikwe District:	<ul style="list-style-type: none"> • Was unhappy with the conduct of the Town Clerk, Njeru • This Project should not turn out like the one in Katosi where compensation was not fair and women were not involved. Involve the women so that compesation money is well used by the family; • Also try to link up with the local leaders (Kabaka's people). They speak to the people and listen to them and they will help you a lot. 	<ul style="list-style-type: none"> • The team leader informed the meeting that the last meeting in the district will be 09th/01/2014 • The 2nd meeting will be at Kinaabi UMEA Primary School at 2:00Pm same day.
	<ul style="list-style-type: none"> • 	
Date and Place held Stakeholders:	5 th /01/2014, 2:30Pm Kinaabi UMEA Primary School	N/A

		<ul style="list-style-type: none"> You can also go to the District and check.
Mukasa	<ul style="list-style-type: none"> We are in different land zones like kabakas land or kinaalwa land why don't you invite them. Please tell us more. 	<ul style="list-style-type: none"> Land institutions like Kabaka's land and the church have titles. We can't pass through without compensating them, we pay them like institutions.
Amon	<ul style="list-style-type: none"> Enlighten us more on grave compensation? 	<ul style="list-style-type: none"> Rates for Graves are got from the district land board. Chairpersons and neighbors will help us identify the right graves;
Fred Kivumbi	<ul style="list-style-type: none"> How are kibanja and those on inherited land compensated? 	<ul style="list-style-type: none"> Kibanja owners are compensated 60% Landlords are compensated 40% for land. Those on inherited land if they have letters of administration then are compensated like someone on titled land.
Hussein:	<ul style="list-style-type: none"> How about those ones within access roads are you going to compensate those ones? 	<ul style="list-style-type: none"> As long as you fall into the design of the road you will be compensated.
Jamila	<ul style="list-style-type: none"> How about widows; do you compensate them? 	<ul style="list-style-type: none"> Widows will be compensated like the other PAPs. That's why we are emphasizing the women to be around or involved to see what is actually taking place. We shall this time take the photo of a man, wife and affected property.
Francis	<ul style="list-style-type: none"> If we feel we are not content with what the Valuers have assessed. Where do we go to complain? 	<ul style="list-style-type: none"> There are forms we leave behind and if some one is not satisfied with our work he calls us back because we may have done a typing error Otherwise you resort to the grievance committee or the Valuation Tribunal.
Magezi:	<ul style="list-style-type: none"> The Surveyor has cut down our crops and we were stopped from doing any activity on the land and now the project delays for 	<ul style="list-style-type: none"> You are right that's why the add on Disturbance Allowance .You are paid 30% if you are told to vacate project

Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<ul style="list-style-type: none"> about six years without being paid. What will we be eating? 	<ul style="list-style-type: none"> affected area less than six months and 15% more than six months added to total values assessed from land, property and crops.
Kikomeko	<ul style="list-style-type: none"> What is the size of the road? I am widow please give me a higher compensation rate to go to a better place like Mukono. 	<ul style="list-style-type: none"> The road is 76.8Km in length and width 60Metres and 80Metres. As a widow, You are paid according to what has been assessed but you can still find a cheaper place than Mukono.
William:	<ul style="list-style-type: none"> The Vibrations from these machines can crack walls of the houses and also the dust. To whom do we report these to? 	<ul style="list-style-type: none"> Machines at times do destroy houses but we do care for also others outside the project area. We leave our contacts with the chairpersons .He can contact us and we give you the appeal forms to fill. We will measure again with the guidance of the law of injurious affection.
Dane	<ul style="list-style-type: none"> I might have an empty land but actually it's a grazing land. How do you compensate it and do you provide transport? 	<ul style="list-style-type: none"> We pay for the land and paying for transport for the animals would be determined by the size of the land you have.
Peter:	<ul style="list-style-type: none"> Will you pay for the yams and where will I find my friend s if they are displaced by the road? 	<ul style="list-style-type: none"> Yes, your yams will be compensated and friends you can communicate using a phone.
Nalu	<ul style="list-style-type: none"> Why there segregation and delay in payment and placement of ghosts into the route and are compensated like northern bypass? 	<ul style="list-style-type: none"> In the valuation report we capture the names, affected property. Then the ghosts can get on to the list by the assistance of Chairpersons because these are the first people we approach before people on the ground. You can help us by giving us the right information of your neighbors.

		•
Ssebaweto	<ul style="list-style-type: none"> • If there's a shrine in a tree or a stone, how do you pay for that? • Why not expand the old road? 	<ul style="list-style-type: none"> • We compensate for what we see if it's a shrine like a house we compensate for it like paying for a house. The Project doesn't provide for money for cutting a sheep for these rituals. • On expansion, there were three alternatives considered and expanding the existing road would be very costly in compensation due to the many structures and utilities there in.
Hon. Dorothy Mpiima-Woman MP- Buikwe District	<ul style="list-style-type: none"> • Need to look out for Fraudsters and don't allow to be deceived to sell the land and give you quick money. • Please get proper identification for people to recognise you. Community wants to benefit from this project like the Bujagali one by including hospital, school, market area and build resettlement area. • Let us have a secretariat at the Town Council to help us with these issues. • Please give the jobs the people of Buikwe and we can provide materials like sand, stones, don't bring workers from elsewhere. 	<ul style="list-style-type: none"> • In addition the speaker said "I thank the Honourable Member of parliament but I would to add on that People dwelling on fragmented plots should sort themselves out before this team comes back on ground".

	Councillor& LCIII	
Mr. John Bosco- Chairman LCI:	<ul style="list-style-type: none"> • Welcomes the people and explains that the meetings are several and have been subdivided among different affected areas. He explained that the boundary is at the Coffee Factory (of Ali Fadul) where the road passes. • Asks the team to help local people get jobs on this project. • The importance of the project (express road) we can set up businesses where the road is passing than thinking negatively • Noted that just like this first Kampala – Jinja road also affected some people but we are the ones now benefiting from it. 	<ul style="list-style-type: none"> • The Team explained the project and how they were to conduct the RAP
Ssebeduka:	<ul style="list-style-type: none"> • The Surveyor said after pegging out the area and the Valuers reach you and stop you. Does it imply I have lost ownership but why not after compensation? • How are we going to be able differentiate people pretending to be Valuers and Surveyors? People put on different faces .How are we going to identify Valuers and Surveyors? 	<ul style="list-style-type: none"> • Compensation is in accordance with the law; • The Minister has gazetted land for the area of the road. • Your obligation is to demand for compensation. • If a building is assessed at a beam a stage and you add on afterwards no more compensation is added to you. It implies you're bound to suffer a loss. • After we have counted/Valuated; We are not going to pay in case you lose someone look for another burial place. The team leader clarified that ' • Public developments are governed by laws and also we are also governed laws when carrying out this work. • To differentiate people, We shall give you our names, phone numbers (contacts) and we shall be using identitycards.

Father Patrick:	<ul style="list-style-type: none"> Remark: On the Northern by pass there's increased insecurity and many people have lost their lives and lack of lights. Please let them try to put lights on these roads/lanes and security personnel. I hope you apply this on the new road. 	<ul style="list-style-type: none"> Security and street lights are paramount because in darkness crime accelerates. We will forward this remark to the design team and try to put emphasis on it.
Mukasa Emmanuel:	<ul style="list-style-type: none"> For Compensation of crops I understood the rates are from the District but land I didn't understand.(Explain) 	<ul style="list-style-type: none"> To get the value of land we make a research by consulting up to 40 or 50 different owners of land in that area (district) excluding the PAPs and use comparisons.
Mulwana Ronald:	<ul style="list-style-type: none"> Elaborate more on a lease. I have a title given to someone for lease of twenty years and at the time of valuation only sixteen years have passed. Who is the right owner? 	<ul style="list-style-type: none"> It will depend on the agreement you have and then you will be paid accordingly.
Benjamin:	<ul style="list-style-type: none"> I have a conflict on land and have put the case in court. But if the court decides I am the owner are you going to pay me? How about my tenant bringing a fake title to you? 	<ul style="list-style-type: none"> Compensation will be with held until court decides who the rightful owner is upon verification of court facts. The titles will be verified through the land office and neighbours
Mr. John Bosco-Chairman LCI:	<ul style="list-style-type: none"> If I bury an additonal person after valuation how do you handle? 	<ul style="list-style-type: none"> Only what was found on the ground at the time of compensation will be paid;
Zigi	<ul style="list-style-type: none"> Do you pay kibanja holders? 	<ul style="list-style-type: none"> Bibanja holders are also paid. For those with gardens and any other developments 60% is paid to bibanja holder and 40% to the landlord
Father Mukasa:	<ul style="list-style-type: none"> What is the timeframe up to the construction start? 	<ul style="list-style-type: none"> Project started 2 years ago, evaluation will comence in February, which will be followed by land acquisition. Time frame: From now to next month we carryout valuation but the actual paying of people will be before the actual construction begins.

Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<p>compensation?</p> <ul style="list-style-type: none"> Katosi people were stopped from building and were not compensated, its nine years now. Can this happen to us? 	<p>holder gets 40%. Please do no subdivide your land. If you have the title you get the compensation as the owner 100% plus compensation for crops;</p> <ul style="list-style-type: none"> Yes delays can happen but that is an issue to be handled by the developer UNRA.
Michael	<ul style="list-style-type: none"> How do you know I am the right person (a Landlord or kibanja holder)? If I am in the process of getting a land title and you start the valuation .How do you compensate me? 	<ul style="list-style-type: none"> Ownership of a title deed defines the owner, while for kibanja the LC and neighbour will help to identify; We shall take you as a kibanja holder unless you have the blue print which we can as a titled land.
Kalanda Moses:	<ul style="list-style-type: none"> The exact alignment is not known to us on the ground; How will I get the video coverage? 	<ul style="list-style-type: none"> The Surveyor is already on ground putting marks and pegs to demarket the alignment. This will be clear soon; The video coverage is the propert of the developer UNRA who may give a copy if they want;
Lubowa Paul:	<ul style="list-style-type: none"> If the owner of the land dies and the one who inherits doesn't recognise us as his squatters/tenants on the land. What happens? 	<ul style="list-style-type: none"> To identify the right owner we shall still use the chairman and the neighbors for bibanja holders.
Mohammed:	<ul style="list-style-type: none"> Do you pay for graves and transferring them? My husband is the owner of the land and I am the owner of the crops. Whom do you compensate? 	<ul style="list-style-type: none"> We pay for both cemented and soil graves but not transport. The wife who grows the crops we shall pay her for the crops while the husband is compensated for the land;
Joyce	<ul style="list-style-type: none"> If the Road reserve is next next to my house will I be compensated? My father has given me land and I have crops and property on it. Who do you compensate and when does the valuation start? 	<ul style="list-style-type: none"> If we are taking the verandah we can take the whole house in the law there's an instrument catering for this unless you have a bigger space. We compensate land to your father and crops and property to you. A few weeks from now we shall start

Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
		Valuation
Mukasa	<ul style="list-style-type: none"> • When does Government start ownership of land? (After the mapping of the road or after paying). • For the losses of the business: Can't you count and estimate the costs for the sugar cane for a period of 5 to 10 years and pay us that money. • If a Father agrees to subdivide among his sons and he has property and crops. Who do you pay? 	<ul style="list-style-type: none"> • After the valuation the Government/UNRA has taken over ownership. • The valuation is done in accordance with the laws of Uganda, Livelihood restoration is not covered, but we are consulting on that; • We shall compensate the father for the property and crops.
Counsellor	<ul style="list-style-type: none"> • If I have animals but I have pasture on land. Don't you pay for the pasture? • 	<ul style="list-style-type: none"> • We don't pay for the pasture just like an ordinary person buying land from you. The Government can only agree to give you money for a business loss (disturbance allowance).
Moses	<ul style="list-style-type: none"> • How do you pay somebody with small portion of land remaining no activity can be done? • If my house is cut off from being accessed and walls cracked who I should see. 	<ul style="list-style-type: none"> • If somebody is losing a bigger percentage of his land the law accepts to pay him off for all the land unless has a enough land to avoid making life difficult for him. • This will be unlikely but if it happens, then you will appeal to the grievance committee and yours will be treated as an injurious impact and compensated; proof may be needed;
Halima	<ul style="list-style-type: none"> • There is stream used by 3 villages can't the water be contaminated by the road works or destroyed? • My father died and mummy bought land and gave other children to use to cultivate coffee. Can they take the land without the permission of the old woman? • Do you pay for a kibanja as a plot? I have a plot bought from kibanja holder. How do you pay that plot? • 	<ul style="list-style-type: none"> • When constructing these new roads they use culverts or pipes to protect the water drainage. • These are the kind of issues you have to settle before actual work begins otherwise the money will be withheld. • If you buy a kibanja from a kibanja holder you also become a kibanja holder and you are paid as a kibanja

		holder;
Dane	<ul style="list-style-type: none"> • If Valuers they have assessed and valued us and we are not contented .Who should help us? • I am a widow and another widow comes to sell the land. Is it possible? • 	<ul style="list-style-type: none"> • There will be a Grievance committee on ground and even the chairman can help you resolve this issue. • You can report to the Grievance committee or court but when valuing we will capture both of your names and put a comment land in dispute ;
Kevina	<ul style="list-style-type: none"> • If it takes up to 5years without being compensated. Is it right for me to use that place? • My father bought two bibanjas before he died and shared them among his two sons. But they have conflicts 	<ul style="list-style-type: none"> • That's beyond our authority and sometimes the Government has no money. But by the law what we have counted is what is paid for. And any other developments are not compensated. These issues we shall forward them to the relevant authority. • Those family matters can go to court or chairpersons can help in solving them. If a person is renting and cultivating we pay him for the crops.

Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<p>know me and threatened to kill me. They have refused to give me Busulu. If the road passes through my area. What will I do?</p> <ul style="list-style-type: none"> • Will the Electricity be along the road or in the villages? 	<p>these people and indicate disputed land and withhold the money until the dispute is rectified, everything is guided by the law.</p> <ul style="list-style-type: none"> • The local leaders should help the old woman because she looks vulnerable; • The electricity is going to be along the road in its reserve and don't expect double compensation
Regina	<ul style="list-style-type: none"> • How are you paying me who hired the land for planting? • Northern by pass PAPs have never got their land title back. Why do they delay? • About ¼ of my land is affected by the road will they compensate me? 	<ul style="list-style-type: none"> • A land lord will be paid 40% and a kibanja holder 60%. The crops will be paid for plus a 15% disturbance allowance; • The delay comes from the long process, e.g. the putting co-ordinates involves many district and each has a land board to approve what's on the title is right. Today the the system is computerized I hope it will be faster. • If ¼ of the land is affected and you can't build a house, then it will all be compensated and you will have to leave the place
Samuel	<ul style="list-style-type: none"> • I was given land for the family but I haven't made a transfer. How will they compensate me? 	<ul style="list-style-type: none"> • If the title is still in the names of the deceased but you haven't transferred. The will pay the amount in the names of the deceased and if you inherited the land you will receive the money and others get as kibanja holders.
Yusuf	<ul style="list-style-type: none"> • There is a community well if the road passes will divide it and leave it on the other side. What are you going to do? 	<ul style="list-style-type: none"> • If we are making a Survey we pick this water bodies and the contractor is directed to reallocate or protect the drainage system. He can use culverts or pipes.

Ahamed	<ul style="list-style-type: none"> It's 2014 and my things are valued and if you delay paying and things change in value can't you consider that? Most of us don't understand the road reserve. What distance are we supposed to be away from the road? If I have a title with the Bank and you come to Value me without it. What should I do? I have various places in different areas affected. How many places are you going to compensate? Which particular places are you passing? Having demoralized us since you are Social worker report to the Government. Why pay for the road yet we have given them our land. Doesn't give busulu because he doesn't know who the landlord is. Explain When there are conflicts between Valuers and PAPs (I will give you 70 million (landlord) and bring 80million) and the latter dies because of bribery is it true? Don't you know how Mehta acquired 	<ul style="list-style-type: none"> The valuation with Government they pay at that stage when valuation was done. The road is 80metres including a road reserve. In about 3weeks you will see a Surveyor putting up pegs. Yes it's acceptable to build out of the road reserve. Having a photocopy at least we will assume you know your acreage. You may inform us which bank because you may have a big loan. You may take advantage that they have paid me but the bank can come and sell the land. We do verification again. Having different places we will still capture your name in those area indicating that area. The Surveyor will be showing you practically where the road is passing and ending in the next stage when we come back.

Mr.Katende Ronald –Speaker (Nyenga-Town Council)	<ul style="list-style-type: none"> My concern is about landlords where the road is traversing but without non transferred titles. How are we going to treat this? They are communities with a water source within a corridor and the two communities are sharing that water source and are going to be subdivided by the road. How can they get access to the water? They donated a piece of land to the church at Nakibizi and the church utilized the land and planted trees and has tenants but has no formalized ownership. How are you going to treat this? Where the Town Council deposits refuse/garbage the access seems it's going to be cut off by the road. Where do you advise us to dispose our garbage? If people have started to come up to buy land now because of the project. Who can we approach for advice? There are two projects running co-currently. The bridge and this one which part are the two projects affecting us? 	<ul style="list-style-type: none"> If the son still has the title in the names of the late .The relationship between the claimant and the landlord will be stated. Water sources during the exercise we take co-ordinates of each water source and design how to protect it using culverts or pipes to protect its drainage or even we provide another. No documentation and no title. The church will get compensation for crops or try to formalize the issue. Town Council dumping site the access road is blocked; you can identify other access roads (road has connectors) or an alternative dumping site. Restrain from buying land in the corridor that leads to opportunists who want to buy land that's why we are not giving out the map to avoid that. (I think they should accelerate the exercise.) Affected by two developments you will look at the Google Seattleite map you can look and see what portion of the land is affected. We shall see that you don't receive

	the team. She declared the meeting open.	
Introductory remarks by the team leader (Mrs.Getrude)	<p>She gave a detailed back ground of the project i.e that initially 3 projects were studied and that this particular one proved feasible than the rest. It is approximately 76.6 km, starts at Game and ends at Njeru in Jinja. It will be 6 lanes from Game to Km 22+200, then from Km 82 ½, it will be 4 lanes. It will be a regional private road. She said that the type of land needed will be 80 meters and narrows down in some parts of Kampala.</p> <p>Mr.Magezi explained to the participants the reason why in some central parts of the project the 80m wide specification was not considered. He said that it was purely environmental since the government signed the agreement with the world bank on the conservation of Mabira forest.</p>	<p>Mrs.Getrude. Mr.Magezi</p>
Valuer/Surveyor's methodology/Schedule of activities. (Reuben)	<p>He narrated the engineering details of the project as follows:-</p> <ul style="list-style-type: none"> • That the project will be 60m at game. • At the junction coming from MUBS, there will be an interchange taking some parts of UMA show ground. • That some parts of the park and the market will be affected. • There will be an expansion at Naguru police barracks opposite JICA. • A bigger junction will be put at Spear motors i.e a fly over. A road will be put around S. Motors and an access link that will allow traffic to join the new road with a 60m width. • At oxy gas opp. UNRA offices, the road will branch off to Kinawataka. • A junction will be put at Nambole to join the road from Kitintale and Kireka. 	<p>Peter (URS)</p>

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM) WITH KCCA LOCAL LEADERS HELD AT NAKAWA COMMUNITY HALL ON 23RD JULY 2014.		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<ul style="list-style-type: none"> • A bigger junction will also be put at the swamp from the lower part of Kireka at RRU police then to Kasokoso. Mr.Magezi supplemented that at that point, the Kampala southern by pass will join the road project and that very soon, councilors will be called in to discuss about it. <p>He explained that the valuer's scope of works will be guided by the surveyor. He explained how affected properties will be marked out. He requested the leaders to tell the community to avail copies of land titles properly indicating plot and block numbers.</p> <p>He requested leaders to advise the community not to tamper with the lines that will be drawn as it may complicate the work and to help in establishing the boundaries.</p> <p>He stressed other areas of interest but most importantly that a study of land variations is done in different areas. He further explained that land is valued on the company's own analysis schedule then trees and crops are categorized and a district's crop compensation schedule is used. He explained that: - A disturbance allowance is also given i.e 15% for 6 months of the total valued amount.</p> <ul style="list-style-type: none"> - "Bibanja holders take 60% then land lords take 40%. - Licensees will only be valued on the basis of properties put in place. - A compensation form signed by all parties will be availed. <p>Mrs. Magezi informed the meeting that there will be information gathered by a social worker. The claimants photos will be taken and that no monies what so ever should be solicited from the community.</p> <p>Mr.Magezi explained that the cut off date will be the census last day and that claimants will be free to sell off their</p>

	properties after compensation.	
Open discussion.	Different questions were asked by different participants and appropriate responses were given as follows:-	
Mr.Asaba (Chairman LC 1)	When is the actual project kick off? - .What are the actual Specifications for the junctions? How big will they be? - How will People without land titles be compensated? - How about people who have developments in wetlands, will they be compensated?	Mrs.Magezi: The project started way back in 2010 when the designing of EIA started. The team has already covered Buikwe and Kasokoso areas. Any body without a land title is considered a Kibanja holder and is compensated. Those in wetlands will only be compensated for their properties but not land since it belongs to the government.
Hon.Phillip (Kinawataka)	- How will the different projects be harmonized at Kinawataka? - How will swamp reclamation be handled?	KCCA has already tried to ensure that all projects at that point are implemented in harmony and the road project will as well be discussed with the relevant stake holders. Mr.Magezi informed members that the EIA

		carried out recommends that the road is suspended to allow the water down to run its natural way.
Hon.Daniel (Kyambogo)	- Will the google road sketches be availed to KCCA members ?	Mrs.Getrude:The sketches were given to KCCA authorities way back.
Hon.Winnie	- How will Institutions be compensated e.g Markets, Universities etc? - How long will it take to compensate?	Institutions will be handled like the rest but the government will decide on where to bank the money. Compensation will be after the surveyor and valuers have finished the work and after the government has scrutinised all the claims.
Innocent	- Has NEMA okayed some portions of the wetlands?	An EIA was taken and catered for all those concerns.
Mr.Moro (Vice c/man Banda zone)	He noted with concern some marks on people's properties in Banda zone and was wondering how the team went ahead to mark people's properties without consulting them first.	Mrs.Magezi: Those marks could have been put by an initial team of Surveyors but said that our surveyors will come on the ground.

	community that they were sensitized at the division and that they were aware. He advised the chairman to open the meeting. The chairman declared the meeting open.	
Introductory remarks by the team leader (Mrs. Getrude)	<p>The team leader introduced the entire team to the community. She gave a brief and precise history of the road project that:-</p> <ul style="list-style-type: none"> • It will be a private road project, 80m wide starting from Game up to Mukono. • From Game the road will be 6 lanes up to Kyambogo. <p>She explained the project up to Jinja.</p> <p>She further told the community that there will be a social team taking photographs and taking the information of the people affected. She requested the community to cooperate.</p>	N/A
Valuer/Surveyor's methodology/Schedule of activities. (Reuben)	<p>He introduced himself and explained to the community how the surveyor will mark out the areas affected. He informed the community that the chairman LC1 and KCCA will be fully involved. He requested the community to cooperate with the team by availing the required information and not to delete the marked lines as it will complicate the work.</p> <p>About compensation, he explained to the participants that a District's crops compensation schedule will be considered while valuing crops. He explained that trees will be considered on the maturity basis.</p> <p>About land, he explained that research is carried out about the current land value in different areas and used to compensate the affected clients. He further informed them that land lords will get 60% of the total value while squatters will get 40%.</p>	N/A

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM) WITH NAKAWA RESIDENTS HELD AT NAKAWA ON 27TH JULY 2014.		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
	<p>He informed the participants that building-gs will be valued by ascertaining the current BOQ on as is basis by first measuring the internal measurements and valuing the costs of materials used. He said that all prices considered in this are got from the District compensation schedule. He further explained that a disturbance allowance of 15% is given to someone who has to vacate within 6 months, the 30% to those who will be told to vacate before 6 months.</p> <p>He explained to them that compensation assessment forms will be filled, signed by property owners, their witnesses and chairmen LC1's. He requested the community to avail land titles and all sorts of land disagreements if any before valuing. He finally explained that for a licensee, only his/her property will be valued and compensated.</p> <p>Mrs.Getrude supplemented that a file will be developed with a list of family members and their properties.</p> <p>The valuer explained that the cutoff point is the point at which the valuer has reached some one's home.</p>	
Open discussion.	Different questions were asked by different participants and appropriate responses were given as follows:-	
Mr.Bukenya:	What if my water business is affected, will I be compensated?	Only what is demolished is compensated but not the water.

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM) WITH NAKAWA RESIDENTS HELD AT NAKAWA ON 27 TH JULY 2014.		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
Mr.Paul Mugambe:	How about the value of land, buildings and the monthly rental income that the owner has been generating on a monthly basis?	It's only the existing property that can be valued and compensated. Mrs. Magezi supplemented that at the moment there is no legislation that caters for compensation of income.
Dr.Keneth Ochieng	Assume am compensated and a small piece of land remains, can that piece of land be taken up as well?	The remaining piece can be considered in the second phase but In the first phase, the company compensates for affected property only.
Mr. Keneth Kamugisha	<ul style="list-style-type: none"> When is the road project commencing? As if the project targets tenants not landlords, how will you inform tenants? 	<p>The project will begin immediately after compensation.</p> <p>The meeting is open to all. Messages will be got from the chairmen and in the media.</p> <p>Mr. Magezi supplemented that in this case, the agreement between the landlord and the tenant will apply. He further explained about salvage, that the owner will be free</p>

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM) WITH NAKAWA RESIDENTS HELD AT NAKAWA ON 27 TH JULY 2014.		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
		to take everything after demolition.
Mr.Asiimwe Robert	What will be the width of the road reserve from the current?	30m from the centre line either side.
Ms.Harriet	How will someone who inherited property without any land titles/documents be treated?	It's a rare case but the chairperson will confirm that you are the rightful owner of the property.
Mr. Tumwesigye Richard	<ul style="list-style-type: none"> - What is the difference between UNRA and URS? - What if I have no title or not in my names? - What about buildings marked X? 	UNRA stands for Uganda National Roads Authority; it's a government parastatal while URS stands for united research Services and is an international private company. X was for preliminary surveys.
Mr. Emmy Johnes	Won't the demolitions affect the appearance of the whole place?	The contractors will maintain the beauty of the place.
Dr.Wabwire	What is the exact date of displacement?	As will be determined by the contractors.
Francis.	As if the project favors the rich and the poor are marginalized.	The project favors all irrespective of one's status.
Mr.Magala Ibra.	What is the difference between survey work done previously and the current work?	Work started in 2010 with a preliminary

RECORDS OF THE CONSULTATIVE/SENSITIZATION MEETINGS FOR THE RESETTLEMENT ACTION PLAN (RAP) FOR THE CONSTRUCTION OF THE PROPOSED KAMPALA-JINJA EXPRESSWAY (76.8KM) WITH NAKAWA RESIDENTS HELD AT NAKAWA ON 27TH JULY 2014.		
Composition, activity, or Issues	Concerns, comments , Observations	Responses , Remarks
		design/feasibility study then the detailed study.
Couldn't reveal self	One of the participants, an old woman, asked how one will be paid in case he was valued by KCCA previously.	Was told that there won't be any double payments made.
Chair person's remarks and closure (Dr.Wabwire)	The chairman thanked both the team members and the community for an active participation however he requested to be informed early enough in case of any arrangements. He officially closed the meeting at 4:06pm. Next meeting will be communicated appropriately.	N/A

A 7B - SOCIAL IMPACT ASSESSMENT QUESTIONNAIRE FOR THE FEASIBILITY AND DETAILED ESIA STUDY FOR THE PROPOSED KAMPALA – JINJA ROAD

Consultant: SCOT WILSON IN ASSOCIATION WITH RWENZO – GREEN ASSOCIATES LTD, KAMPALA, UGANDA

Names of Enumerator..... **Serial Number** **Date**.....

Section 1: Personal Identification							
1) Project Affected Person	2) Age years	3) Sex	4) Marital Status	5) Highest level of Education	5) Tribe	6) Occupation	7) Religion

Section 2: Location of Information				
8) District	9) Sub-County	10) Parish	11) Village	12) Contact

Section 3: Ownership and Particulars of the Affected Person						
13) What is your status in relation to the Land ownership? 1= Owner 2= Licensee 3= Tenant 4= Co-owner 5= Co-Tenant 6= Others (Specify)	14) How did you acquire this land? 1= Bought 2= Renting 3= Inherited 4= Given as a gift. 5= Just settled 6= Other (Specify)	15) Do you possess any land Title or agreement for ownership or tenancy? 1= Land Title 2= Agreement 3= Tenancy 4= No	16) How do you hold this land? 1= In possession of title. 2= Inherited but no title. 3= Tenant on titled land. 4= On public land (customary) 5= Other Specify	17) For how long have you been on this affected plot? 1= Since birth. 2= 0-10 years 3= 10-20 years 4= over 20 years	18) Is there any encumbrances on this land like; 1= yes, Claim by: family members. 2= Yes, mortgage/lien. 3= No, all documents available. 4= No, and no documentation available. 5= I don't know 6= Other specify	19) What is land tenure system here? 1=Mailo 2=Communal 3=Freehold 4=Leasehold 5=Other

Section 4: General Information concerning children						
20) How many people live in H/H?		23) How many children are going to schools?		26) How many are in primary level?		29) Does this HH keep any animals or birds?
						1= Yes 2= No
21) Male	22) Female	24) Boys	25) Girls	27) Boys	28) Girls	30) If yes, which animals? 1= Birds Poultry 2= Piggery 3= Goats 4= Cows 5= Other (specify)

Section 5: Income of Affected Household					
31) What is the Main Source of income of the household 1= Salary 2= Husbands Salary 3= Business on land 4= Business located elsewhere 5= Rent collected from affected land 6= Rent collected from elsewhere 7= Agriculture activity on affected land 8= Agriculture activity on land elsewhere 9= Transfer income (Pension/handouts) 10= Other specify	32) What is the secondary source of income of the household 1= Salary 2= Husbands Salary 3= Business on land 4= Business located elsewhere 5= Rent collected from affected land 6= Rent collected from elsewhere 7= Agriculture activity on affected land 8= Agriculture activity on land elsewhere 9= Transfer income (Pension/handouts)	33) What other activities generate income for this household 0=No other 1= Fishing 2= Hunting 3= Poultry 4= Other	34) Compared to other residents in this Parish, in what category of standard of living would you put this HH? (Enumerator use discretion to judge) 1= Rich 2= Average 3= Poor 4= Very Poor	35) What would you estimate to be the total income for this HH (per month)	36) What is the function of your house? 1=Residential 2= Commercial 3= Rent 4=Livestock 5=Residential /commercial 6=Other (Specify)

Section 6: Health and Transport				
37) What is the most common disease in your H/II?	38) Where do you get treatment from?	39) What is distance to nearest health Centre	40) What type of transport do you use most?	41) What is the most common cause of accidents on Jinja road?
1=Malaria 2= Diarrhea 3= Coughs/RTI 4=Worms 5=HIV/AIDS 6= Hernia 8=Other (Specify)	1=Hospital/Health IV 2= Health Centre III 3= Health Centre II 4=Clinic 5= Traditional Healer 6=Self treatment 7= other (Specify)	1=0 – 1km 2= 1km – 2km 3= 2km – 3km 4=3km – 4km 5= Over 4 km	1=Walking 2=Boda Boda 3=Bicycle 4= Kamunye 5= Bus 6=Personal car	1=Buses 2= Trailers 3= Sugar cane wheelers 4=Bicycles/Boda Bodas 5= Taxis/Kamunyes 6=Small Car 7=Other (Specify)

Section 7: Agriculture and Water Sources				
42) What should Government do to solve the accident problem on Jinja road?	43) What food crops do you have on your land?	44) What cash crops do you have on your land?	45) What is your source of domestic water?	46) What is the distance to your preferred water source?
1=Widen road 2= Put Dual Carriage way 3= Construct new Jinja road else where. 4=Other (Specify)	1=Banana 2= Potatoes sweet 3= Cassava 4=Irish 5=Yams 6= Beans 7=Ground nuts 8=vegetables 9=Other (Specify)	1=Coffee 2= tea 3= Sugarcane 4=Vanilla 5=Horticulture 6= Pine trees 7= Eucalyptus tree 8=Fruits 9=Other (Specify)	1=Protected Well 2= Borehole 3= River/swamp 4=Piped water 5= Rain water 6=Other (Specify)	1=0 – 1km 2= 1km – 2km 3= 2km – 3km 4=3km – 4km 5= Over 4 km

C.3 Records of Stakeholder Consultations for KJE RAP (ICS, September 2015)

C.3.1 Sequence of the consultation process

1. Self-introduction from Rwenzo – Green Associates on behalf of ICS for UNRA

Reasons why the social team is there (consulting on the proposed KSB) to seek the views of the stakeholders and impacted people;

Team to seek information on the existing infrastructure, economic and social activities;

The team to seek information on the administrative structure along the proposed road (District, Division, Parish/Ward and Village/ zone);

The team to seek information on the disease burden especially HIV/AIDS within the corridor including ideas on where to put a worker's camp if necessary;

Issues of occupational and cultural resources if any;

Seeking comments and input from the stakeholder

Signing the form for contacted people (a mandatory requirement by both NEMA and UNRA)

End

BUSINESS

NEW VISION, Friday, June 20, 2014 35

ICAO reportedly suspended the licences of the three airlines on Tuesday

CAA suspends three airlines

By Samuel Sanyu

Three airlines have been suspended, two of them were suspended over safety issues, while the third was said to be involved in transporting guns to conflict hotspots in Asia and Africa.

The airlines are Transafrica, Uganda Air cargo and Agha Khan Group-owned, Air Uganda.

Impeccable sources said, in addition to not meeting safety standards, Transafrica was involved in clandestinely transporting arms to war zones. They did not reveal the source of the arms, but said the airline had been followed for some time.

Air Uganda which entered the market about seven years ago is said to have failed the passenger safety standards, the sources noted. They said Air Uganda had been warned several times after their planes returned to base at Entebbe before reaching their destination because they could not make the entire

journey. Uganda Air Cargo is government-owned and is operated by the Ministry of Defence.

Ignite Igundura, the Civil Aviation Authority public affairs manager, confirmed the suspension.

He only said: "We have been undergoing an audit as a country by the International Civil Aviation Organisation (ICAO). They check everything in the industry, including the regulator and the players."

He said the airlines will have to undergo a recertification process before resuming operations.

"There are certain critical issues that affect safety that must be addressed immediately," Igundura said, adding that "there are also some minor details that will be addressed later on."

He explained that since the suspension took effect on Tuesday, none of the airline companies has submitted full information on their operations.

Igundura said CAA will help them to be recertified, if they comply with the requirements. They are supposed to submit certain information to CAA, which will in turn send it to ICAO headquarters in Montreal, Canada.

The Air Uganda chief, Cornwell Muleya, could not be reached, but an insider who preferred anonymity blamed their woes on CAA, without expounding.

Transafrica's website says the airline operates worldwide cargo services for commercial and humanitarian organisations. They operate large fleets of Lockheed L-100s Hercules and Boeing 727 freighter aircrafts and have done work in Angola, Bahrain and Iraq.

It says they have performed several refugee evacuations from war zones in co-ordination with humanitarian organisations, including UN forces such as MONUC in DRC. Their work involved logistics supplies and medical evacuations, their website stated.

Mukono women form village bank

By Jovita Mirembe

When Esther Baroma got problems with paying back a bank loan worth sh50m that had accumulated to sh90m with interest, she contacted her bank (name withheld) to explain her problem. The manager assured her that she could pay up slowly.

"But immediately I moved out of the bank, I was manhandled by court brokers who took me to a Police station. I spent there three days before being forced to sign transfer forms of my rental building in Mukono worth over sh150m," she said.

This is what made Baroma resolve to mobilise fellow women who had also been humiliated to start a bank.

The group of women in

LOCAL VIEW

Members save at least 50,000 every two months. They can get up to sh3m at 10% interest rate.

Mukono has started a village bank — Technosave Harvest Association, to extend credit to fellow women. Baroma is its chairperson.

She said their intention is to save women the frustration, discrimination and humiliation they face at commercial banks when seeking to borrow money. Baroma also said they would provide women with credit to improve their businesses.

A village bank is a micro-deposits taking institution. It differs from a Savings And Credit Co-operative Society (SACCO) in that the beneficiaries do not have to be owners like it is with a SACCO.

The Bank of Uganda financial institutions instrument 2010, says a person transacting a financial institution business as a bank shall have a minimum paid up cash capital of not less than one million two hundred and fifty thousand currency points (25,000,000) invested initially in such liquid assets in Uganda as the Central Bank may approve. Technosave Harvest Association has already met this requirement. It now has 30 shareholders who pay sh50,000 annual membership.

Uganda National Roads Authority (UNRA)
Plot 5 Lourdel Road, Nakasongola
P.O. Box 28487, Kampala, Uganda

PUBLIC NOTICE

CONSTRUCTION OF THE NEW KAMPALA-JINJA EXPRESS HIGHWAY

NOTICE TO ALL PERSONS AFFECTED BY THE PROJECT

Uganda National Roads Authority (UNRA), notifies the general public, in particular those likely to be affected by the development of the Kampala-Jinja Expressway in the following localities: **Kinawataka, Mutunga, Kito, Namataba, Kirinya, Senyi, Kitale, Kyungu, Kasokoso, Kapeke, Kasenge, Namataba, Mutanzige and Nakawala**, that the organization has contracted **Scott Wilson** to among other things carry out surveys in preparation for the construction of the new Kampala-Jinja Expressway. Officials of Scott Wilson are required to present themselves to the public with company IDs and through Local Leaders.

The Consultant will be visiting properties along the various proposed routes, surveying properties and preparing a proposed Resettlement Action Plan among other things.

UNRA would like the public to know that this exercise is **FREE** of charge and, therefore, no one should charge them for survey works. UNRA would also like to inform the affected property owners that the Consultants is not assigned to help you process land titles. Land titles should be processed by property owners through authorized Government Agencies.

UNRA remains committed to compensate all persons affected in anyway by its projects. As we have done in the past, before your land is reserved for a public purpose, you will be notified by UNRA of the proposals and you will be given an opportunity to express your views. When the time comes to acquire your land, our offices will contact you to discuss the proposals and provide any information required.

Anyone caught soliciting funding or impersonating UNRA Staff will be arrested and charged with extortion and false pretense.

Please report anyone who tries to solicit money from you to:

OFFICE OF THE VICE CHANCELLOR PRESS RELEASE

KYAMBOGO UNIVERSITY DOES NOT ISSUE WRONG DEGREES

Reference is made to your article dated 11th June 2014 which appeared in *The New Vision* titled "Kyambogo issues wrong Degrees".

In the said article impression was created that Kyambogo University had issued wrong degrees to the graduands.

That whereas typographical errors are inexcusable these were mainly isolated cases of misspelt names due to wrongly captured data.

This should not create an impression that Kyambogo University issues wrong degrees to graduands.

Management takes this very seriously and wishes to assure the public that no student has been awarded a degree he/she did not register for and does not merit.

Lawrence Magete - Spokes Person Kyambogo University

TO WHOM IT MAY CONCERN

Dear Sir,

NATIONAL ROADS DEVELOPMENT AND MAINTENANCE PROGRAMME

FEASIBILITY STUDY AND DETAILED ENGINEERING DESIGN OF KAMPALA-JINJA ROAD (72KMS)

The Government of Uganda has allocated funds to finance the Feasibility Study and Detailed Engineering Design of Kampala- Jinja Road (72Kms). The study will assess the possibility of widening the existing road and also assess the possibilities of adopting alternative routes between Kampala and Jinja.

We are pleased to inform you that the Government has engaged **Scott Wilson Limited of the United Kingdom in Association with Professional Engineering Consultants of Uganda** to carry out the Feasibility Study and Detailed Engineering Design of the Kampala- Jinja road

The purpose of this letter is to introduce to you the consultant, Scott Wilson Limited in Association with Professional Engineering Consultants Uganda who will be undertaking a number of activities along the road.

They will need your support and assistance to ensure early completion of the assignment. The data collection activities will mainly include road surveys, environment & social assessments, construction materials identification and various engineering investigations.

We look forward to your assistance and support on this important assignment

Yours sincerely,

Peter W. Ssebanakitta
Executive Director

RECORDS OF THE ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT AND RESETTLEMENT ACTION PLAN SENSITIZATION MEETINGS FOR THE KAMPALA SOUTHERN BYPASS – 6 th July to 15 th July 2015 BY ICS – ENGINEERING & ENVIRONMENT LTD IN ASSOCIATION WITH RWENZO- GREEN ASSOCIATES LTD IN KAMPALA CAPITAL CITY AUTHORITY [KCCA] AND WAKISO DISTRICT RESPECTIVELY.		
NAKAWA URBAN COUNCIL : BUTABIKA PARISH [KCCA]		
Meeting with: Residents from the villages of Butabika Zone A		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	6 th July 2015, at Butabika Zone A LC 1 Office Time: 2.00PM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Lule Ivan- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Ms. Akumu Harriet.	When shall we be compensated?	Compensation will come later after all processes of field data capture and verification of data of affected People. At the moment, we are in the processes of sensitizing people and later after a period of two weeks will be able to come back with questionnaires to acquire socio economic data [bio- data] from each affected household, do a detailed land survey as well as a detailed valuation survey.
	My plot was surveyed in my absence, was that right?	They should have informed you and you should have been able to be present at that time.
Unknown Resident 1	Was the Southern Bypass route changed as stated by National Water and Sewerage Cooperation?	No, there is no other route that has been created other than the same one still shown on this sketch map and so National Water and Sewerage Cooperation did not have the correct information.
Mr. Wandera Joseph LC 1 Chairperson	What if we continued constructing on our land, shall we be compensated for additional structures put in place?	No, an affected person will only be compensated for that particular affected property valued at that particular time and so one should not bother

		constructing more buildings after the cut-off date of the valuation exercise in the hope of being compensated for structures that have been put after the cut off date for the valuation exercise. The Affected people should report to their representatives for their issues to be addressed.
	Is there any specific bank where money shall be deposited because Crane bank came around to open accounts and we were told that it had got instructions from UNRA to do so.	No, there is no specific bank that was authorized and instructed by UNRA to do the opening of accounts. The team will notify the affected people when the time for actual compensation begins. Crane bank took advantage of the land acquisition process of the Kampala Jinja Expressway including the Kampala Southern Bypass.
Unknown Resident 2	Why does government never issue or state a specific time when compensation would take place or even fails to state particular dates?	Government always gives updates on whatever activity is taking place. Since it has several processes that it deals with before, during and after the land acquisition before implementation of the project, Government cannot determine which date and time to pay off one since the time varies. If any activity is to be carried out on ground such as this sensitisation which is being done today, the affected people are informed through their local leadership, radios and neighbours.
	How many UNRA's do we have? We always see many groups coming saying they are working for UNRA.	We only have one institution called the Uganda National Roads Authority which selects and authorises Consultants to do the work that it assigns them.
Unknown Resident 3	Is this the final stage of the valuation?	We are in the advance team that is sensitizing; other teams will come for a final detailed land survey, valuation survey and socio economic survey and let none take any money from you because this exercise does not require one affected to pay of any sort of money. What is needed from you is your utmost cooperation.
	What if one is dead, what will happen?	Do not give us names of people who are already dead because money will be sent to those specific accounts and so valid signatures will be required.
Mr. Paddy Dennis	Where does this route exactly start from?	We cannot fully establish where this route exactly starts from but we will be able to know the exact point when the land surveyors come on ground to ascertain and mark out the corridor and area for compensation in which the road and its reserve is going to be constructed.

Unknown Resident 4	Is there any rule or law that guides time of payment, and in case time elapses, is one liable to go to court?	No, there is no specific law to that effect and in case of any issues please report to the valuation team, land survey team and the socio team. If the matter cannot be solved by the team, then one is free to seek redress from the Courts of Law. You should not just rush to lawyers because you can easily be cheated. There will be a Grievance Mechanism Committee to deal with complaints before one seeks redress from the Courts of law and this team would include local leadership such as the Parish Chiefs, Local councils and Chief Executive Officers.
Unknown Resident 5	What if a house gets destroyed after the valuation exercise, what will happen?	One will still be compensated since the details were already captured. However, We only do not pay for what has been established after our cut-off date of the valuation exercise
Mr. Mudiba Muzayisa	Crane Bank took our land tittles photo copies with reason that it was part of UNRA's requirement to open accounts with crane bank. So what is next? Should we go to Crane Bank to close our accounts?	No, that is not true. Do not rush to open up bank accounts. You should only wait for the right time when you will be instructed on what to do.

NAKAWA URBAN COUNCIL: MUTUNGO PARISH [KCCA]		
Meeting with: Residents from the villages of Mutungo Zone 1 and Mutungo Zone 2		
Purpose of Meeting		Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass
Date Held & Place		7 th July 2015, at Canopy Country Club Time: 9.30AM
Present		1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Lule Ivan- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Adam Kibuuka	I thank Mr. Kasujja, [the owner of Canopy Country club] for hosting us. There are those who were affected by the Kampala	No, they will not be re-assessed, but for those who were not, they will have to be assessed. Then, for any part of the land owned by the same person that falls under the

LC 1 Chairperson Mutungo Zone 2 0700192901	Jinja Express highway and were assessed. Will they be re-assessed or not?	corridor of the Kampala Jinja Express Highway and the other half in the corridor of the Kampala Southern Bypass respectively, will be assessed under the same person's name with the same reference number.
	When is the project starting?	This project started in 2010; we are in the final stages. We shall sensitise until 15 th July 2015. We shall also inform you through the local council leadership on when we shall return to do a detailed land survey, valuation survey and socio economic survey.
	What will happen to those people without land titles but with agreements?	People without land titles will be regarded as kibanja holders and for those who have lived there since birth will be valued with the help of local council leadership and other witnesses, Photocopies of land titles and agreements will be required during this exercise.
Mr. Kasujja Owner of canopy country club	This land is still in court and we do not know the right owner of this land because we hear, it is for Kasaasa and not the Kabaka's land. How long will it take one to be paid?	We value the land but indicate "land in dispute", but payments are made to the side that wins. Put in mind that the land lord takes 40% and the licensee takes 60%. We cannot ascertain the time in which one will be paid. .
	Will I be compensated for the long time taken to be compensated since your failure to compensate me in time will have put my development plans on hold?	Be patient enough, the road will take short period of time and do not add any other buildings or any other structures after assessment has been done because any addition will not be paid for.
	Is it possible to get the exact value of my property at that actual time of assessment?	No, it is not possible for the valuation team to disclose the value of your property at that time since getting the value of the property involves several processes such as comparison with current market prices, rates from the district compensation rates. In case your district does not have current and updated rates, we value your property using the neighbouring updated district compensation rates.
Mr. Lukyamuzi Denis	After the Surveyor and Valuer, we always have problems with private organizations who take long period of time to pay and also even cheat us. So how will you help us if such a problem arises?	Please make sure that you play your part by having the right documents such as valid land titles and agreements. In addition, solve all the land disputes on land to avoid delaying the payment process. We do not have any information about companies that cheat but for any dissatisfaction; you are allowed to take your case to local councils, Parish Chiefs, Courts of Law. You could even contact us on our mobile phones.
	Valuer's use pencils and therefore within a short period of time, all details tend to get erased and worn out. So how shall we be sure that for your company the information attained on ground will not be altered, lost or even erased?	We have no knowledge of such company that uses pencils, but we can assure you that the owner of the property will be on ground while we do the assessment together. A copy of an assessment which will be in indelible ink signed by the owner and stamped by the local council leadership.
Mr. Lwanga Fred	We were told to get accounts from Crane bank, so what will happen?	We did not inform any one to get accounts with any bank. Crane bank just took advantage of this situation.

		We shall inform you on what to do when the time for payment is due for those with or without bank accounts.
	We advise that, there should be specific rates with you at the point of valuation.	The advise is noted but we get updated district compensation rates from District Local Government and particularly the District Land Board. We also need time to do all computations. In the event that one is not satisfied please contact us and the local authorities.
Mr. Ssemugenyi Patrick	How do you value, by multiplying or dividing? In case our taps, boreholes are destroyed, whom do we report to? Do contractors take any initiative to demolish after compensation?	We value by multiplying. UNRA takes into account the replacement of such services that have been destroyed. The Contractors also demolish after ascertaining payment of residents in collaboration with the local councils. Announcements are made to notify people when to demolish and so they are given notice to vacate the land.

NAKAWA URBAN COUNCIL: MUTUNGO PARISH [KCCA]		
Meeting with: Residents from the villages of Mutungo Zone 9 .		
Purpose of meeting		Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass
Date held & place		7 th July 2015, at LC 1 Office Time: 1.00PM
Present		1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Lule Ivan- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.
Name & Designation	Issues Raised, Comments and fears	Responses by Consultant to Issues Raised
Mrs. Shaban	People are being affected by road reserves, what will happen to those who are in injurious state?	The 60meters include the road reserve and for those who will be injuriously affected will be compensated immediately after negotiating with the Contractor.
	Will you consider current prices of land?	Yes, we will consider the prevailing market price.
Ms. Margaret Kyeterekera	In case of any conflict on land, how will you handle that?	We shall continue with the assessment process and still note down the conflict issue. Once conflict is resolved, we shall proceed with payments.

Mr. Matende Ssentamu	Is every one going to be compensated?	We shall only compensate the people who will be in the corridor of the road demarcation. One will be able to know that he or she lies in that corridor after the land survey team has demarcated the corridor and this is most likely going to be in two weeks time.
Mr. Okurolid Samuel	We need specific time, because you told us, it started in 2012, and how sure are we that you will come back in two weeks time?	We can assure you that we shall return to the ground for this detailed study because we are in the final stages.
Mr. Deo Byabandwa	Are we allowed to take our property and when are we expecting you?	You are allowed to take whatever belongs to you after being paid the compensation money. You will be informed of such when the time is due.
Mr. Odari Paul	What will happen to those of us who are still processing land titles?	Remember payment is made with only those of valid land titles. You are advised to find a work solution to that matter. Money will be with held until one avails and original land title to complement the photocopy that was handed in during the assessment process.
Ms. Sylvia Obongo	What if I have a small portion of land affected, will it be necessary for you to take my land title that covers a large piece of land?	Yes, it will be required so that it can be demarcated on your land that the portion taken is being paid for by Government and that the portion in question is truly yours.
Mr. Osengge Alfred	What will the socio team come to do on ground and in case of any conflict, where shall we go?	The Socio economic team will be responsible for collecting the bio-data of the affected project person and institutions. It will be taking note of any conflicts and will take care of acquiring details of the disadvantaged along the corridor acquired. The team will work closely with the local leadership of the area.
Ms. Nambi Rose	We got loans in banks and our land titles have been used, shall we be allowed to use photocopies?	Yes, photocopies will be needed at the beginning and later originals will be required at the time when the actual payments are being made. You are highly advised to be with them.
Mr. Shaban Latif	Will my money be refunded which was used to process the plan and given to Kampala Capital City Authority with evidence of receipts?	We are not responsible for that and so make a follow up with Kampala Capital City Authority.
	Does the Valuer and the resident get to know the amount of money to be paid at that moment?	One cannot be able to know the amount of money at the time of assessment because what the valuation team records is further computed with current market prices to attach a correct value. In addition, the Ministry of Finance, Planning and Economic Development and Bank of Uganda that pays are highly involved. Therefore a lot is involved before getting the exact figure for each person.
Mr. Makumbi	If at all one was given a kibanja by his grandfather but died, can such a person be compensated by use of his names?	Yes, such a person will be compensated because we even work closely with the local council leadership to ascertain such ownership .You are allowed to use your names.

	Where are your offices found?	Our Company is called announced to all companies that ICS Engineering and Environment Ltd a subsidiary of Infra Consulting Services Ltd Registered in England and it is located on Nakasero Road Plot 26 at Parklane Courts next to multiplex building.
Unknown Resident	Why don't you come along with Kampala Capital City Authority groups for such kind of meetings?	The Kampala Capital City Authority already knows that the project is ongoing so it is not necessary for them to be here and besides the main client is Uganda National Roads Authority.
Mr. Badiru Ssekajja LC 1 Chairperson	Make sure that you do not take long to come back on ground since people end up suffering with no developments taking place.	We will make sure we do our best and will keep in touch for any updates.

NAKAWA URBAN COUNCIL: MUTUNGO PARISH [KCCA]		
Meeting with: Residents from the villages of Bungalows 3 Zone and Prison Zone		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	8 th July 2015, at Temptations Time: 8.30AM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Lule Ivan- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Majimbi Chair person Prison's Zone 0702/07722649 77	For those who have attended this meeting representing your bosses, we request you to talk and update them on issues about the Kampala Southern Bypass as talked about. That is; Mr Muhammed Khalifa 0717776655/0712051266, Operations manager Gaz, Robert Mr. Basajabalaba represented by Mr. Robert Mafabi	We appreciate your concern.
Esther Nadunga	How wide is the road reserve?	The road corridor its self including the road reserve is 60meters wide and includes a walking lane, pedestrians

Chairperson Bungalows Zone 3		and carriage way. Advise your people not to remove any pegs, iron bars and other material that will be used to tell boundaries of valuation.
	People may not want to give you land titles directly but to UNRA, so how will you handle that?	UNRA has authorized us to get those photocopies for valuation and later one will be required to hand in original land titles and agreements for the payment verification processes. Land owners will get 40% and licensees will be given 60% since these will have put land into use.
	Is empty land next to the building Compensated?	Yes, empty land is compensated.
	Please provide mechanisms not to be cheated when being valued.	We shall put pegs and marks on houses. We shall also work closely with local council leadership and so do not get worried of being cheated.

NAKAWA URBAN COUNCIL: MUTUNGO PARISH [KCCA]		
Meeting with: Residents from the villages of Mutungo Zone 11		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	8 th July 2015, at Pastor Samanya's Church Time: 10.30AM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Lule Ivan- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Masedde Simon	What if the agreement was used to acquire the loan what happens?	We work hand in hand with the banks, more to that; we only pay back the value that is equivalent to what was valued from your property.
	Will this money be taxed?	No. compensation money will not be taxed.

	What happens if one is not present?	You will be informed through any means of communication, radios, through local councils and so you encouraged to be present.
Pastor Samanya	We heard that the government wants to take over this whole place to construct an industry, so will you do both?	No. we are only responsible for the Kampala Southern Bypass and do not know about that.
Mr. Moses	Your boss (UNRA), Madam Kagina said will only compensate land owners leaving out squatters, and so from where will you get the money to pay licensees?	We have not yet been notified about that, but will inquire.
Mrs. Kwagala Miriam	What happens if you attach a specific value on a particular land at that moment and after a period of time value increases? Do you include p labour?	We only consider current market prices and also consider labour incurred during construction of a particular structure.
Mr. Ibra Kibirige	When shall we be paid? What assurance is there that we shall be paid because the Kampala Entebbe Express Highway has faced a number of problems with UNRA about payments.	It will not even take five years before payment is made. We the Consultants are answerable to UNRA, Ministry of Finance, Planning and Economic Development and lastly the Bank of Uganda which electronically sends money onto your accounts. So this involves many processes and we therefore have no control over ones payments. We can only assure you that you will be compensated provided your land has no encumbrances, has valid land titles and agreements.
Mr. Mustafa	What if not satisfied, where do we go? Should we continue with our developments	Please Endeavour to contact us because we work hand in hand with the local councils and if the worst comes to the worst please go to the Courts of Law. Do not add on other developments after valuation because they will not be compensated.
Mr. Sseruja	What if not satisfied, office do we go to?	Please Endeavour to contact us because we work hand in hand with the local councils and if the worst comes to the worst please go to court.
	Should we continue with our developments	Do not add on other developments after evaluation because will not be compensated.
	Whom should we give our accounts to?	The contractors responsible for payments and will be notified.
Mr. Moses(Refugee) Zone 11	Is every one compensated because I am from Congo and have property in this area?	Yes, everyone is compensated in Uganda.
Mr. Wassio James Mobiliser Zone 11.Lc 1 office	We request for a valuation report in our office	We cannot do that, but we always put display period to check errors and also your councilors can get for you approved and updated valuation rates from the district so that residents can see them and avoid dissatisfactions. Thank you.

NAKAWA URBAN COUNCIL: MUTUNGO PARISH [KCCA]		
Meeting with: Residents from the villages of Mutungo Zone 12		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	8 th July 2015, at Love and Truth Church Kitintale Time: 1.00PM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Lule Ivan- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Godfrey LC 1 Chairperson	Where will the road pass? How do you handle compensation of land under dispute?	We shall ascertain that when we come back on ground to survey. We also value the property affected and indicate that the land in question is under dispute, but payments are done after the conflict is resolved.
Mr. Mugerwa	Whose land is this? We hear it is for Dumpsum	We also do not know the exact owners but our work is to survey, value and acquire each house hold bio-data, and it is up to any land lord to up and inform us and in any case, conflict arises, payment is made after settlement but a licensee gets 60% and land lord 40%.
Mr. Tumusiime Geoffrey	How do we tell that, a specific structure is under injury?	Engineers always tell the side effects of road construction and always take samples and so if one finds out that your building was affected, you will be compensated.
Mr. Patrick Byekeigaki	What if a house gets destroyed after valuation what happens?	It is still compensated.
Mr. Semakula Othman	How sure are we that we shall be paid before demolishing our structures?	Government takes into account to pay back affected people before demolishing and that is why we are here to ascertain people to be compensated.

MAKINDYE URBAN COUNCIL: KANSANGA PARISH [KCCA]		
Meeting with: Residents from the villages of Kiggundu Zone		
Purpose of Meeting		Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass
Date Held & Place		9 th July 2015, at Pearl of Africa Primary and Nursery School with Mr. Dalama and at Mr. Kazwama's Residence respectively. Time: 10.00AM
Present		1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3.Mr.Lule Ivan- Valuation Team- Assistant 4.Ms.Musoki Rose Mary-Social Team-Assistant 5.Mr.Sserunkuma Herbert-Video Capturer See List of participants attached.
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Dalama	Do you do any documentation after valuation? When are you coming back? Please make sure you pass by to pick land title photocopies when required and thank you for the work	Yes. We even leave you with photocopies of the assessment forms after valuation that are stamped and signed by the local council leadership. We shall notify you through a phone call and through your local council 1 Chairperson. Thank you too for your co-operation
Mr. Kazwama Joseph	But we heard about this some years back and how come it is just being worked on? But why can't we give you our land tittles and agreements after valuation?	Yes, government has several processes it passes through to the final stage of road construction and we are in last stages where affected people have to be compensated before road construction. These photocopies will also guide us during valuation process, where each affected person will hold a reference number and you will be expected to hand in originals when required to process payments.
Mr. Sserugo Roman LC1 Chairperson 0772316690	Thank you for coming and will be waiting for you. But please implement what you have talked about. Again, show us the route of Southern Bypass.	We appreciate and so in collaboration with Uganda National Roads authority, all will be implemented. No, all I have shown you is enough, to fully ascertain the likely points through where it will pass, wait for the day of survey, and is not going to be long.
	What if we are not satisfied, where do we go?	Please our phone contacts as noted on the board and can also fast report to the local councils before you run to UNRA or even Courts of Law.
	Will empty plots be paid for?	Empty plots will be compensated.

	Do plots in wetlands hold different values from those in dry lands?	No, Values are the same, what varies is the area in which certain plot is located.
--	---	--

MAKINDYE URBAN COUNCIL: KANSANGA PARISH [KCCA]		
Meeting with: Residents from the villages of Heritage Zone and Luwafu Zone		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	9 th July 2015, at Kasaawe [Football Play Ground] Time: 2.00PM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3.Mr.Lule Ivan- Valuation Team- Assistant 4.Ms.Musoki Rose Mary-Social Team-Assistant 5.Mr.Sserunkuma Herbert-Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Ssendisa Councillor Makindye Division	<p>We have to develop but this should benefit both us and you too in such a way that our people are not taken far away from us since we are approaching election time.</p> <p>You have talked about conflicts, I advise my people to take note of their boundaries and request officers present to implement what they have told us today and do not cheat us.</p>	<p>Please, our role is to see to it that people are sensitized, a land survey is made and assessment of the affected property is done. Finally one will be paid and so whatever comes is up to one to decide which other place to move to.</p> <p>We appreciate your concern and we will do our best as long as we both do our roles.</p> <p>We will not cheat anybody, because even the law says one should be compensated at a level slightly higher than he or she has been at.</p>
Mr. Jjingo Temakasa	We need to know the exact Chairperson that will move with the surveyors because we have issues with our land agreements.	Indeed we need to collaborate with the local councils and please make sure that you sort out your issues before we get back on ground.
Mrs. Mbazira Rose	How long will we take to get compensated?	We cannot ascertain the time but we are in the last stages and so you will be informed in due course.
Mr. Nsimbwa Member of Parliament Makindye Division	<p>We request you to compensate the people before demolition.</p> <p>Promise to acquire updated district compensation rates for my people to</p>	<p>Yes, we will do so and that is why we are at the stage of sensitization, survey and valuation coming up so that payments are made before demolition.</p> <p>Yes, we have noted this and our bosses will be notified about additional of other metres to the road reserve.</p>

	<p>avoid any issues arising from wrong evaluation rates.</p> <p>Please tell your bosses to add on some other meters in addition to the road reserve.</p> <p>An agreement must hold a buyer ,seller, date, terms of reference, witnesses, measurements and neighbors plus the stamp; so for those without right ownership, sort your selves out before survey and valuation</p>	Thank you for your concern and promise to work hand in hand with you for the success of this project.
Mr. Mujuzi Edison	We advise you to always give us updates.	We shall work closely with the local council leadership. You will be getting up dates.
	We have issues with Kampala Capital City Authority channels. What will happen?	The issues' pertaining to the channels are a matter for Kampala Capital City Authority and is not our concern.
	What if one is on public land, what will happen?	In cases where land belongs to Government, and then there is no way government will pay itself. However will just be compensated for the structures on the public land.
	Will our money paid to us be tax?	No, compensation money will not be taxed.

Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Mugambwa David	When was this plan put in place?	This programme started in 2012 and we are currently in last stages. We cannot give a time frame on when we shall

		return to the ground for a detailed survey but you will be informed in due course.
	You said you use different values to value different items, clarify on this issue. We request you to always provide us with where to sit for such meetings.	Yes, we use different values on different property owned and an example is, differences in land value in the different areas.
Mr. Ssemudu	Prices change each time; what prices will you consider?	We shall consider the prevailing Market price
	We also request you to come along with the money when you come to value.	No, we cannot come along with money in cash at the time of assessment since there are other processes such as verification of land titles, names and reports for approval by the Chief Government Valuer's office. There are other situations which will require Bank of Uganda to transfers money through the electronic transfer system directly means to ones bank account.
Mr. Samali Lutaya	Clarify on issues of demarcations and disturbance allowance	We request you to hand in the photocopies of land titles, so that they can guide us on each person's boundaries. Each one should be there in person to clarify on other issues pertaining ownership of property to be assessed.
	Government should increase on the 30 %and 15% disturbance allowance	It is up to Government to either change this figure attached as an additional payment to what is valued or not. We have taken note of this.
Mr. Muzibu Aggrey	How can we tell that whatever amount that you will attach to our property is correct?	If we certainly attach a wrong amount, please that will be regarded as a police case. We cannot risk our company's reputation for such irresponsibility. I can only assure you that we shall only use current market rates and the updated district compensation rates for assessment. In case one is not satisfied with the assessment, please contact us on phone numbers noted on the board. We shall also put up Grievance Committee which will include, local council leadership, including Parish Chiefs and other members chosen.
Ms. Olivia Musoke	We need to know whether we shall be affected.	You will know that when we come back on ground to survey because we cannot exactly establish this fact of who lies in this corridor at this particular time.

MAKINDYE URBAN COUNCIL: LUKULI PARISH [KCCA]	
Meeting with: Residents from the villages of Upper Konge 2 Zone	
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass

Date Held & Place		10 th July 2015, at Behind Baker's Place Time: 2.00PM
Present		1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3.Mr.Lule Ivan- Valuation Team- Assistant 4.Ms.Musoki Rose Mary-Social Team-Assistant 5.Mr.Sserunkuma Herbert-Video Capturer See List of participants attached.
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Ms. Nabatanzi	How will you handle the issues of land grabbers? For people under lease ownership, does the balance go to the land owner?	Such issues are under licensees and so these get 60% of the money and 40% goes to the land lord. Each one gets his own share although, for the one in possession of lease hold; one is paid for the remaining years left to complete ones lease ownership. In summary, the land owner is paid his share and so is the licensee. The difference is that one on lease hold is paid inclusive of years ahead.
LC 1 Chairperson	I am also affected by this road and so let us closely together. I also thank you all for coming.	We appreciate your concern and will cooperate with you.
LC1 Secretary	What if one's land lord is Buganda land board? We also advise you to tell us before the due date so that we get ready to receive you.	We shall work closely with the Buganda land board and when the time for payment is due. At the moment, we shall carry out the land survey and assess your property. On the other hand, you can sort yourselves out with the Buganda land board to get avoid any future challenges during the payment period.
Ms. Sylvia Kigunya	Should we continue with our developments or stop at stages where we are after the valuation exercise?	We are advising you to stop at whatever stage you are after the assessment exercise because compensation is meant for only what has been assessed and there is no other time set for re assessment since the next step will be payments and demolition in preparation for road construction.
Unknown Resident	But where will you get funds since this Southern Bypass is not indicated in the budget?	We currently have no funders but were assigned by UNRA to carry out a detailed land survey, valuation survey and socio economic survey. Payments will be made later so that the Contractors can find the road corridor clear.
Mr. Bugolobi Bonifesi	We also need to develop our selves; so give us the time frame of when you are likely to finish the road construction.	We cannot estimate when the road construction will be started. We are in the final stages of acquiring the corridor for the road. After this activity of the detailed land survey, valuation survey and socio economic survey, we shall inform you on what will follow.

Mr. Swaibu Navil	We have heard that the Northern Bypass had several issues. How sure are we that you will not just estimate those values?	We value using the updated District Compensation Rates and use neighbouring updated rates by law if your district compensation rates are not updated. More to that, you can call us on numbers noted down on board or get your private Valuer in the event of disagreement. The other alternatively is to seek redress from competent Courts of law.
------------------	--	--

MAKINDYE URBAN COUNCIL: SALAAMA PARISH [KCCA]		
Meeting with: Residents from the villages of Nakinyuguzzi Zone		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	13 th July 2015, at Gloria Medical Centre Time: 10.00AM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Twijukye Rauben- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Ms. Nalugo Melabu	What if the land title is in the names of an elderly who does not talk?	You are advised to sit as a family with your lawyer and draft registered powers of attorney. Use a thumb print to show us the one authorised to get the money on his or her account.
Mr. Lwanga Sam	Will you put pegs in our houses for those affected?	No, we shall only put marks on your houses to indicate the extent of the corridor. You are also advised not to remove them so that they can us to guide the valuation team and the socio team that will have come after the land survey team.
	Please make clarity on the 15% and 30% disturbance allowance.	The 15% and 30% disturbance allowance is an additional amount to the total sum of the compensation figure that one will have received for compensation.
	Shall we be compensated before our houses are demolished?	You will first be paid before demolition of any assessed structure.
Mr. Siraji	Is it the same company that will start the road to wakiso?	Yes, but we do not know whether it will be us or some other company to make payments.

	What if one person owns different plots of land in different areas. How will you handle that?	One will have a unique reference number and so will each plot of land which will be assessed independently but indicating same name and reference number.
Ms. Nayenga	Do you value empty land?	Yes, we value empty land and local council leadership will be present to witness and append identify the ownership. He or She will append a signature on the Assessment and Payment Voucher Forms.
Mr. Nyombi Persie	What percentage does the squatter get and the land lord?	The licensee gets 60% and 40% goes to the land lord.

MAKINDYE URBAN COUNCIL: SALAAMA PARISH [KCCA]		
Meeting with: Residents from the villages of Kiggaga Zone and Kosovo Zone		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	13 th July 2015, at the Late Mzee Mwanje's Place Time: 2.00PM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Twijuikye Rauben- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Kaggwa Godfrey	In instances where a small portion of land remains, what happens?	Please make sure you alert the land survey team or and the valuation survey team immediately so that it is valued.
Mr. Fredrick Nsimbwe LC 1 Vice Chairperson Kosovo zone	We request that you leave behind details of this meeting to be able to share with those who are absent in this meeting.	We have noted this although; we did not come with extra copies to give out. You can still use the copy we gave you to explain to the people who are not present in this meeting.
Mr. Ssemusu Erieza	Will I be compensated without an agreement but with 'busuulu' receipts?	Yes, you fall under the kibanja ownership and you and your land lord will receive one's own share respectively.
Mr. Ssenyonjo Gerald	Will this power line change?	It is UNRA's responsibility to provide and replace community services such as replacement of taps, bore

		holes if they are affected by the road construction and they can be relocated if the need arises.
Mrs. Kakembo Fatima	Will one be valued even before going to settle payment issues with Buganda land board?	Yes, one will be valued before going to settle payment issues with Buganda land board but we are advising you to settle your issues before the payment period to avoid any future challenges.
Unknown Resident Kosovo zone	When is the project starting? Will some of us staying in wet lands be compensated?	We cannot be able to know the exact time and date on when we shall start the detailed work but you will be notified in due course. We have not received any official communication about people staying in wet lands but you will be considered for valuation.
Mr. Ssentamu Joshua Land Surveyor	This question goes to the Buganda land board. What if your people fail to get money to pay the fees to your office so that they can be given land agreements until payment period?	Mr. Ssonko, [Representative from Buganda land board] replied saying, 'We will work hand in hand with our people and the company that will be responsible for payments or even we shall see how to deduct our money before one gets their total amount of money for compensation.'
Mumbejja Nakibiri	Will you value graves?	Yes, we talked about valuing permanent and semi permanent structures including graves. We shall also take into consideration the type of materials used for construction.

MAKINDYE SSABAGABO SUB-COUNTY: MASSAJJA PARISH [WAKISO DISTRICT]		
Meeting with: Residents from the villages of Massajja B Kibira Zone		
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass	
Date Held & Place	14 th July 2015, at LC 1's Office Time: 10.00AM	
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3. Mr. Twijuikye Rauben- Valuation Team- Assistant 4. Ms. Musoki Rose Mary- Social Team- Assistant 5. Mr. Sserunkuma Herbert- Video Capturer See List of participants attached.	
Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Ntege	When will you start the detailed land survey and valuation?	We cannot be certain about the specific time but you will be informed in the due course.

	Please clarify on 15% and 30% payment.	This is the percentage that will be given to you according to time one will be given to vacate the area needed for the road construction. For those who will be given a notice of less than six months will be given 30% disturbance allowance because they will have been given shorter time to relocate and 15% disturbance allowance will be given to those who will have been given a period of six months and above to vacate the road corridor. This will come during the period of actual payment.
Mr. Ntale Julius	Will your road reserve include the 30meters channel distance?	The issue about channels is the Engineers business and not ours. You should know that the 60metres corridor will include the entire road reserve though proposed tunnels have been left out.
Mr. Ssentamu Frank	How will you handle a situation where a large piece of land is owned by several occupants but with only one land lord?	Each occupant will get his or her own 60% payment and the other 40% will go to the land lord.
Mr. Ssesimbwa Mohammed	What will happen to some of us with no land titles?	You will be required with the help of your local chairpersons to hand in valid photocopies of land agreements or any other documents to prove that you are the right owner of the particular property affected.
Unknown Resident 1	We also request you to give us jobs	We do not have jobs currently but other jobs may arise in future during the time of actual road construction.
Mrs. Eva Lule Nassali	Please let us know when you will be coming back.	Will take into consideration your advice of sending messages on your phones for any updates.
Mr. Salongo Ashraaf	How long will the whole process take?	We cannot tell how long the process will take because we shall start the activities from Butabika, through Bugolobi, Kasanga and Salaama until we reach Masajja. We shall only be able to give you updates when we are almost reaching this village.
Mr. Juuko Michael	We request you not to pay us in installments because we heard that the people affected on the Northern Bypass were paid in installments.	We shall not pay in installments and we have not heard of such happenings. We have only heard about specific days and periods of time being given to various villages during the time of compensation.

MAKINDYE SSABAGABO SUB-COUNTY: BUSABALA PARISH [WAKISO DISTRICT]	
Meeting with: Residents from the villages of Kabuuma Zone	
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass
Date Held & Place	14 th July 2015, at LC 1's Office Time: 2.00PM

Present		1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3.Mr.Twijuikye Rauben- Valuation Team- Assistant 4.Ms.Musoki Rose Mary-Social Team-Assistant 5.Mr.Sserunkuma Herbert-Video Capturer See List of participants attached.
Name & Designation	Issues Raised, Comments and fears	Responses by Consultant to Issues Raised
Ms. Joweria Naava	You have only talked about mailo land, how will kibanja owners be handled?	They all mean the same and we shall need photocopies of land titles and agreements. One will be required to present the original documents at a later stage before payment is done.
Mr. Muyanja Sam	How can you assure us that we shall be paid without having ghost beneficiaries?	We shall work closely with the local council leadership. In addition to this, we shall request you to inform us or inquire in the event of any wrong names. A display list of beneficiaries will be put up to ascertain correct information before payment is done by UNRA.
Imam Kiggundu Musa	How will you handle issues of factories affected including space for parking and will you still pay for that small portion of land that will have remained behind not affected by the road? People have fear that will be undervalued since they are occupying wet lands.	We will compensate accordingly in such a way that 60% will go to the owner of the factory if he is licensee and 40% to the land lord.

MAKINDYE SSABAGABO SUB-COUNTY: BUSABALA PARISH [WAKISO DISTRICT]	
Meeting with: Residents from the villages of Kibira Zone	
Purpose of Meeting	Records of the Environmental and Social Impact Assessment and Resettlement Action Plan Sensitization meetings for the Kampala Southern Bypass
Date Held & Place	15 th July 2015, at LC 1's Office Time: 10.00AM
Present	1. Mrs. Gertrude Binta Magezi-RAP Specialist & Team Leader 2. Mr. Ssentamu Joshua- Land Surveyor 3.Ms.Musoki Rose Mary-Social Team-Assistant 4.Mr.Sserunkuma Herbert-Video Capturer See List of participants attached.

Name & Designation	Issues Raised, Comments and Fears	Responses by Consultant to Issues Raised
Mr. Lugolobi Julius	What if a small portion of the compound is affected which clearly indicates that you will have changed design of my place. Can I be compensated for being inconvenienced?	You will only be compensated for that small portion of land that is affected. We have not yet received any communication about catering for such a kind of inconvenience although we have noted. Inconveniences will be considered in the disturbance allowance depending on the law that applies i.e. it could be 15% or 30%.
Mr. Nsubuga Samuel	Do you consider market prices when valuing?	Yes, we do consider the current market value when the valuation is taking place and for other things valued, we are guided by the updated District Compensation Rates.
Ms. Nakato Esther	What if we have the same agreement with my husband and he is unavailable, what will happen?	You need to sort out your issues before payment can be done.

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF NALUVULE, MWANYANJIRI AND WANKOBA VILLAGES IN MUKONO DISTRICT ON 26TH /03/2018

AGENDA

1. Opening prayer
2. Remarks from the local leader
3. Presentation
4. Group formation
5. Discussion and Prioritizing
6. Closing

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by the area counselor of Naluvule village	Mukyala Goret
2.	REMARKS FROM THE LOCAL LEADER The chairperson of Naluvule village welcomed the community members from the three villages and she thanked them much for turning up for the meeting and requested them to contribute to whatever will be discussed by the team. The chairperson introduced the consultant team to the people/meeting and she informed the team that the community has a lot of questions but since they are around, they will be able to answer all the questions and she opened the meeting	Chairperson Naluvule village

<p>3.</p>	<p>PRESENTATION by the Consultant</p> <p>The consultant welcomed the community members and thanked them so much for turning up in big numbers. She introduced herself together with the team to the community members. She requested them not to tire to attend the meetings called upon by UNRA or its representatives. She further gave a background of the purpose of the meeting- Livelihood Restoration Planning which is a component within the project</p> <p>She informed the community members that the Kampala-Jinja express highway is one of the biggest projects we have in Uganda and it's funded by the International Donors including the European Union, African Development Bank which are interested in livelihood restoration of those affected by the project and their social life at large that's why all steps are taken into consideration to ensure that nobody is left out.</p> <p>She further clarified that for every project funded by the mention funders there are some terms and conditions that are followed to secure funds and one of them is, all affected people and communities must be left at the standard where the project found them, or it has to lift them from the level where the project found them but not go below that level. She emphasized that the project may affect individual but as the same time it may affect the community. But then we have to come up with solutions to the livelihood challenges.</p> <p>She informed the meeting that the KJE project considered the livelihood restoration program budgets for restoring the individual and which will help the community. She encouraged everybody to participate to bring out issues that will help them restore their livelihood. She guided them on how to come up with the restoration program by identifying their problems, diagonalize them, prioritize (beginning with the most pressing need and finally generate the solutions) and then come up with solutions / the strategies to the identified and prioritize issues.</p> <p>She informed them that since different groups of people have different needs according to their age groups and what they do, she requested them to be divided in the group of the women, elderly to capture their specific issues that concern them.</p> <p>The meeting agreed to have a big meeting first and later groups of women and elderly were engaged over the same topic and issues were raised to the same.</p>	<p>Consultant (Mrs. Kavuma Esther)</p>
------------------	---	---

	Below are the proceedings of the meeting from the community members.																					
	<p>From the discussion, below is the list OF THE COMMON PROBLEMS IN THE COMMUNITY as mentioned by the community members.</p> <ol style="list-style-type: none">1. Contaminated water sources – which are now affected by the project. About 3 water sources (springs and wells) within community2. Mwanyajiri church parking- was affected by the project yet we used by the community for parking purposes and functions3. Affected swamp areas taken over by the project. (they were sources of firewood, crafts material, gardening, water etc.) Affected gardens in the (Ebisennyi)- were all taken yet we could get firewood and Pam tree for sell4. Destroyed electricity poles- we took long to get power here now it came the poles are in project area5. Affected shops in the trading – like the only nearby shops in Mwanyanjiri village is in the project area6. Poor access roads7. Too many thieves around – and likely to increase as the project is being implemented and this start as soon as your project began8. Health Facilities. There is no health facility to serve the community, and the expected Health Centre II facility is under construction. The community need the facility for HIV treatment, accidents and need of family planning services9. Unemployment, especially by the youth. <p>PRIORITIZED PROBLEMS BY THE COMMUNITY</p> <p>This activity saw the community agreeing on the most pressing problem to the community and the ranking, was the most pressing being given one to the least being given 9, as shown in the table below;</p> <table><tr><th>Problem</th><th>Rank</th></tr><tr><td>Poor water bodies</td><td>1</td></tr><tr><td>Poor health centers</td><td>2</td></tr><tr><td>Poor access roads</td><td>3</td></tr><tr><td>Affected gardens</td><td>4</td></tr><tr><td>Destroyed electricity poles</td><td>5</td></tr><tr><td>Unemployment</td><td>6</td></tr><tr><td>Too many thieves</td><td>7</td></tr><tr><td>Affected shops</td><td>8</td></tr><tr><td>Church parking</td><td>9</td></tr></table>	Problem	Rank	Poor water bodies	1	Poor health centers	2	Poor access roads	3	Affected gardens	4	Destroyed electricity poles	5	Unemployment	6	Too many thieves	7	Affected shops	8	Church parking	9	All
Problem	Rank																					
Poor water bodies	1																					
Poor health centers	2																					
Poor access roads	3																					
Affected gardens	4																					
Destroyed electricity poles	5																					
Unemployment	6																					
Too many thieves	7																					
Affected shops	8																					
Church parking	9																					

NB; After when the problems were listed and ranked from the most to the least pressing, the community members came up with the following solutions for the above-mentioned problems

SOLUTIONS TABLE FOR THE ABOVE PROBLEMS

PROBLEM	RANK	SOLUTION
Poor water bodies	1	<ul style="list-style-type: none"> • Ponisano and am the “kalinda luuzi “here, we have been using these projected springs for so long and we don’t have diseases like stomach pain, so we request for more protected springs because they have clean water, used for both domestic and livestock and not payable. • My name is Bwantuyo George; sine the project aims at taking us higher we request UNRA to extend national water which stops in Mbalala up to here • Chairperson, unplayable things are good for a community so if possible, we get boreholes
Poor health centers	2	<ul style="list-style-type: none"> - Chairperson Wankoba village, as people of these communities we walk long distances like 4KM and above to Mbalala- Mukono and Nazigo for the services. We request UNRA to

			build for us a health center 2in the middle of the 3 villages to ensure proper treatment anytime including night.	
	Poor access roads	3	<ul style="list-style-type: none"> - We request UNRA as it builds KJE, it also beautifies the connecting roads which joins our homes to the main road so that we transport our agricultural produces well to the market. 	
	Affected gardens	4	<ul style="list-style-type: none"> - We have been getting Pam and do crafts which we could sell and get some money, so we request UNRA to sensitize us on how to do craft using other available resources. - We want proper compensation so that we buy other fertile and good land for agriculture since it's the main source of income to the majority here. 	
	Destroyed electricity poles	5	<ul style="list-style-type: none"> - We request the government to negotiate with UMEME and they place the pole in the place where a PAP wants. - We request that you don't put the poles in our land, 	

			put them in your reserve area	
	Unemployment	6	<ul style="list-style-type: none"> - Mukasa, I can't drive trucks and am not educated but I can do other casual work on the road, so we request UNRA to consider the youths of this community in case of any employment opportunity. - We are not educated but we educated our children so please we even have engineers so please employ them so that we benefit as parents. 	
	<p>After all the above activities were done, community members had questions concerning the project which the consultant answered, and they are as below;</p> <p>QN; during construction and the truck damages my house what can I do? Consultant; if such a thing happens, you consult the person in charge at that time and he/she tells you what to do.</p> <p>QN; what if I have any complaint concerning valuation whom can I see currently Consultant; please see the chairperson, they have all the contacts for the people concerned and your issues will easily reach the UNRA office.</p> <p>Mr. Musisi Michael had a concern, we request UNRA to think about us during its meetings and at least prepare for us something to eat because we spend a lot of time in your endless meetings</p>			
4	<p>GROUP FORMATION</p> <p>Later after all this the consultant requested the community members to Form groups and two groups of the elderly and the women were formed and had their discussion.</p>			elders

THE ELDERLY FGD

Regarding the issues affecting the elderly is the dependency on other people and wanted to have businesses where they could get some money to maintain their livelihood and the following projects were mentioned,

- Market; where they can sell food stuffs especially women
- Animals including cattle, poultry, goats and pigs especially to the elderly men.

Regarding the strategies for implementing the projects,

- The community members suggested UNRA would train the community on how to carry out some activities like poultry and then be monitored by the same team (Muyinda Agnes)
- the team may use the local leaders to make a follow up regarding the project (Katabazi Florence)

However, elders had other requests to UNRA as below;
Paulo Ssiyakubuza, we request UNRA to support our grandchildren with school fees, because some of us have orphans.

Nantale phederisi, I am old so I request UNRA to buy me a modern walking stick so that am able to move from one place to another.

Katabazi Florence, as elders we want UNRA to employ our children both educated and the illiterates so that we benefit as elders even if the jobs are not on the project but in UNRA.

The consultant promised the elderly that all their mentioned issues and concerns are well noted, and they will be presented to the project implementers.

WOMEN FGD:

The women also presented their issues which affects them as community women and presented projects that can be done to restore improve their livelihoods.

- Women revealed through this meeting that men do not reveal the amounts of money that they would be compensated and may not be able to plan for the money.
- The women have the fear that men usually have more than one wife and he shares the

	<p>compensation awards among other wives, yet they home have not been affected by the project. They requested UNRA to emphasize this in their sensitization</p> <p>The consultant informed the women that the project encourages spousal consent and spouses which helps women to know how much will be paid and therefore can monitor when payments are made.</p> <p>LIVELIHOOD OPTIONS RAISED BY WOMEN:</p> <p>Women identified their livelihood options and strategies and the Table below summarizes the options:</p> <table border="1"> <thead> <tr> <th>No</th><th>Livelihood Options</th><th>Strategies</th></tr> </thead> <tbody> <tr> <td>1.</td><td>Agriculture support through poultry, animal rearing</td><td>Financial and in-kind support.</td></tr> <tr> <td>2.</td><td>Businesses like dealing in agricultural products, clothes, kiosks and Retail shops</td><td>Financial Support through groups Training in business and advise on better business opportunities</td></tr> </tbody> </table> <p>The community firmly requested that the support should be given to the directly to the beneficiaries but not through the Local leaders because they are no longer trust worth but give them to their friends and family members.</p> <p>Although it was established that there are no existing/functioning groups, they promised to form groups through which they hope support will be directed.</p>	No	Livelihood Options	Strategies	1.	Agriculture support through poultry, animal rearing	Financial and in-kind support.	2.	Businesses like dealing in agricultural products, clothes, kiosks and Retail shops	Financial Support through groups Training in business and advise on better business opportunities	
No	Livelihood Options	Strategies									
1.	Agriculture support through poultry, animal rearing	Financial and in-kind support.									
2.	Businesses like dealing in agricultural products, clothes, kiosks and Retail shops	Financial Support through groups Training in business and advise on better business opportunities									
5.	<p>AGREEING</p> <p>The all community gathered again and agreed on the above issues and requested the concerned body to consider them accordingly.</p>	All									

CLOSURE

The area councilor thanked the community members for participating and requested the UNRA team to consider all the mentioned issues.

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Livelihood Restoration Planning with Kinawataka-Nakawa Division –Kampala District for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	27 th March 2018

	MEETING VENUE COORDINATES	Waypoint:897 E459297,N370

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF KINAWATAKA NAKAWA DIVISION- KAMPALA DISTRICT ON 27TH /03/2018

AGENDA

2. Opening prayer
3. Anthems
3. Remarks from the local leader
4. Remarks from consultant
5. Group formation and discussion
6. Prioritizing and reactions to discussion
7. A.O.B
8. Closure

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by a volunteer from kinawataka community.	Chairperson kinawataka
2.	The Uganda and Buganda anthems were sung	
3.	REMARKS FROM THE LOCAL LEADER The Defense chairman on behalf the chairman welcomed the consultants and requested them to introduce themselves. One by one on a team of five ladies led by Dr Florence Asimwe introduced themselves. The chair in his remarks said that he did not have much to say but to invite the visitors and they tell the people the purpose of the meeting	Chairperson Kinawataka -Yafessi LUKWITIRA

	<p>the hygiene of this place is challenging and still lacking.</p> <ol style="list-style-type: none"> We need clean water; if they can construct for us good springs, our water would be better. Water trenches: this is our biggest problem because water enters our houses when it rains and it highly contributes to sickness. Worship places: as echoed by women, we need traditional worshipping places. We need a Sacco or microfinance that lends us at a relatively affordable interest. We will be greatly happy; after constructing for us a market, we will get money from this very microfinance and we use it in the market. Garbage collection: if the market is constructed, we are sure garbage won't be a problem because KCCA also helps. We need security lights because the security here is bad. At least the thieves won't attack us in the light. Retirement fund for the elderly: by 60, we are so helpless and weary; and we work so hard to sustain our families but in old age, we have no money for survival at all. Fly over: the express road that is about to be constructed is for high speed and so with our problems, we need a flyover so that our children are safe. We have lost our people on this very road so we badly need a fly over. Community center: Here we can hold community meetings and happening places, reading places for our children in vacations (community library). <p>PRIORITY</p> <ol style="list-style-type: none"> Hospital Secondary & primary schools. Market. <p>WOMEN FGD</p> <ol style="list-style-type: none"> Need for a project that will help our children; we don't feel happy when our children are not in school and not dressed well at all. There was need for a project that would empower women with skills like tailoring, hair dressing, catering and many others. We need a market from where we can access what we need for food and also do business. We need a microfinance where we can access small loans to help us in business and also cater for fees and other problems. Job opportunities in UNRA project; give us an opportunity to work because we can work. Our husbands can also work and earn some income. Please don't get workers from somewhere else. We don't have clean water at all. We drink water from water channels. We need clean water. Please construct for us water trenches so that water moves well. 	<p>Women</p>
--	--	---------------------

6.

7. We also need security. This place isn't secure at all.

8. Building of all worshipping places such as mosques, protestant and catholic churches because the born again churches are so many.

9. Build for us recreational centres where we can always meet for such meetings and other community sensitisation and mobilisation programs.

VULNERABLE FGD

1. Government should get for us a place / build for us a place where we can stay & get income for our children.

2. Government should build for us water trenches which as explained by women are a threat to us.

3. Our children who also have the same challenge have no schools at all for these lame children. We also can't afford to pay for these children yet we have produced them.

PRIORITY LIVELIHOOD PROJECTS

Number	Project
1	Hospital
2	Secondary and primary school
3	Modern Market
4	Water trenches
5	Access and feeder roads
6.	Fly overs

REACTION BY THE CONSULTANT

She explained that the reason why UNRA decided to come to the grassroots is that sometimes leaders make development plans without asking the people.

And so UNRA will go through all the steps, LC's, divisions, districts; and if what UNRA will have discovered and is not in the development plan, will be done by ADB. (African Development Bank)

The contractor will have 30% of the workers as locals from the communities where the project will be. And so people should get ready, when the adverts are out, they should apply and get employed. This will be for the youth, men and women.

She urged that people should be ready and get prepared to utilize the opportunities that are coming with this road.

A.O.B

The chairman requested the people to ask questions.

Some of the questions asked are:

7.

1. If a market is constructed, will some of those who shifted from kinawataka have an opportunity to operate a stall?'

Dr Florence answered the question by saying that it's the LC's that will

Vulnerable

All

Dr. Florence Asiimwe

	<p>help in planning and help in looking for good people to operate it. So its actually possible to work in that market.</p> <p>2. If a school is constructed, will the vulnerable will study for free?’</p> <p>Dr. Asiimwe said that it would depend on the project done because disability is not inability.</p> <p>CLOSURE</p> <p>The chairperson and the consultant thanked the people for coming and chairperson closed the meeting at 17:40hrs</p>

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF KASENGE A AND B VILLAGES

IN Nama Sub County MUKONO DISTRICT ON 27TH /03/2018

AGENDA

1. Opening prayer
2. Remarks from the local leader
3. Presentation
4. Group formation
5. Agreeing
6. Closing

Attendees

Attendance List attached

NO.	Description	PERSON RESPONSIBLE
1.	OPENING PRAYER Meeting was opened with a word of Prayer from a community member	
2	REMARKS FROM THE LOCAL LEADER The Chairperson Kasenge A welcomed the Consultants and the community members and requested that the community members listen and work towards the implementation of the project.	
3	PRESENTATIONS The Consultant gave a brief background of the project and explained the purpose of the meeting which wanted the community members to	CONSULTANT

	<p>contribute towards planning for the livelihood restoration of those who had been affected by the project and the community at large.</p> <p>It was agreed that the (between the Consultant and the community) that only two groups be formed since there were no youth and not so many of the elderly people were available, so a group of men and women were formed and presented their issues, prioritized them and gave solutions or strategies how they could be achieved.</p>	
4	<p>Men's' Group:</p> <p>The men identified their problems that included;</p> <ol style="list-style-type: none"> 1. Water- The major water sources are local protected springs but are few and cannot match the fast growing population. 2. Market – they lack a common market for selling and buying of their product especially agricultural products. 3. Poor school- the community has schools with poor structures, no toilets and poor access roads which connect to such schools for example Kasenge Muslim and St. Agnes primary school. 4. Health center- the community has no government hospital round and the nearest government health facility is in Lugazi which is 16 miles from this area. 5. Insecurity –There is increasing insecurity in the area brought about by the unemployed youth. Insecurity targets both their lives and property. 6. Unemployment – Many of the youth are jobless 7. Playground- we have many schools around but we don't have play grounds which limits our children to improve their sports talents like football and recreational purposes. 8. Payments –Although there are a number of factories in the area that have taken on some of the youths, the workers are poorly paid. These unsatisfied youth as a result resort to stealing people's property in the area. 9. Quarry- there are number of quarries (5 Quarries existing within the area) in the area and these blast have effect on the property/animals of residents (effect on livelihood) like animals and humans experiencing miscarriages, poultry may not lay eggs etc. 10. Public toilet- the community has factories plus these five quarries which employs a lot of workers but they have no toilet and this has affected the community hygiene. 11. Walk over- the community has a very busy market in Mbalala trading center and it's on the main road so people cross anyhow and get accidents because there is no provision for pedestrians. 12. Tax park- our area tax park very small and during the picking of people and turning of taxies many people gets injured due to limited place and this has caused a lot of accidents. 13. Drainages –here around there is a river called "Mwola" and when it rains this river over floods because of the poor drainages which are 	ALL

not well built and due to this, water flows into the trading center and people's houses.

14. Poor waste disposals- the community lacks a proper place to dispose rubbish so even if the Kampala –jinja express highway is but without rubbish place, people will still throw the rubbish in the drainages.
15. Stagnant water- most people here dig stones from the soil and this leave very big and deep holes on the ground so when it rains heavy such water remains stagnant.
16. Poor irrigation skills- most people are farmers but they still use poor and indigenous irrigation skills which affects the level of their agricultural yields.

After listing and explaining the community problems , men ranked them starting with the most pressing problem to the least pressing one as the table illustrates it below;

PROBLEM	RANK
Health	1
Water	2
Insecurity	3
Drainages	4
Poor wastes disposal	5
Market	6
Poor schools	7
Unemployment	8
Public toilets	9
Tax park	10
Walk over	11
Poor irrigation skills	12
Quarries	13
Stagnant water	14
Payments	15

The ranking process was well agreed upon by the entire group and later after that, men suggested solutions to the above ranked community problems as illustrated below;

PROBLEM	RANK	SOLUTION
Health	1	We request the government to construct for us a community health center 2 and this will limit on the long distances we have been moving in search of good treatment.
Water	2	We request for boreholes in the community since they are not payable
Insecurity	3	Ssemitego Abudalah, we request for a police post in this community and we have land near the tax park where it can be put.

	Drainages	4	Ssembusi, we request the government to plan well the proper building of the drainage, divert it such that it flows outside the trading center and people's houses	
	Poor waste disposal	5	Titalabe Edward, we request for the modern rubbish dishes for proper waste management. LC, we request for rubbish tracks so that they pick rubbish and take. This will keep the entire community clean.	
	Market	6	Chairperson, We request for a well structured market in our community, this will help us sell and buy our agricultural produces well and as a way of creating employment to community members mostly women.	
	Poor schools	7	Ssemwanga Lutaya, we have a school called St. Agnes its private but has a government hand so we request that its upgraded up to secondary level, they build structures and even toilets for it to ensure proper leaning environment to our children. We also have Kasenge Muslim primary school which needs structures and we request for the renovation of the roads which connects to these schools.	
	Unemployment	8	Ssenyonjjo Robert, when the project starts, we request UNRA to employ us as youths of this community, both educated and uneducated ones so that we also earn a living.	
	Public toilets	9	Ejoyati Andrew, we request for public toilets and urinals for both male and female especially in places where these quarries and factories are.	
	Taxi park	10	Ejoyati Andrew, there is still a place near the tax park which the government can help us acquire and we expand the park to a convenient size.	
	Walk over	11	LC, we request the government to put for us a walk over which connects the around community to the trading center and this will limited the accidents which occurs co-currently in our area.	
	Poor irrigation skills	12	Ochom Samuel, since most of us here are farmers we request for modern irrigation kills and machines, which can be supplied to us in groups such that we improve our agricultural sector as a community.	
	Quarry	13	Kato Godfery kizito, we request the government to reduce on the number of quarries around at least up to 2 and then put strict laws which governs them mostly on blasting days and time	

	Stagnant water	14	Ochom Samuel, we request the government to supply us with water pumps such that we pump that stagnant water and it works as a way of irrigating people’s gardens and then creating more space for those ones who do stone digging.	
	Payments	15	Katerega Millari, we request the government to set a standard fee of payment at any work place for both salary and waged people such that fewer payments are abolished, this will help youth to develop because they will be earning reasonable money.	
	Playground	16	Christome Johnbosco, we request for a proper play ground with toilets ,where we even conduct community meetings from	
	<p>Women Issues: The women presented their issues and they are as follows; <u>Issues/ problems raised by women</u></p> <ul style="list-style-type: none"> • We have water problem in this village. We have shortage of clean water and the little sources we have the road will destroy them in construction process • We are not in good health conditions. We don’t have any nearby government health center. We walk around 5 miles to reach Mukono HC IV. We have more of private clinics yet they are expensive • We lack education. We only have one UPE school and the rest are private schools which are expensive. On top of that we do not have any USE like any other villages that have seed schools. Most of our children stop at primary seven since their parents cannot afford the private secondary schools around • Flooding water. When it rains this whole place floods up to the main road reason being that the industries around blocked the drainage channels due to their construction. • We have very many vulnerable children in our village especially orphans that are left behind and their relatives steal all their property thus end up becoming thieves and idlers • Our road has been so poor with a lot of potholes yet it’s the main road that we use here in Kasenge. But of recent T/C helped us and did some grading so we are better off. • Another problem that we have is that people here are so expectant about the road compensation but UNRA is not telling us anything straight. Most people are not putting up any developments in their land because they are not sure when the road construction is starting • For me my issues are two, one is that we need a central market for our products especially Agric products. We need a central market that is constructed well with shelter 			All

	<ul style="list-style-type: none"> • Another problem is that I have land together with my husband but we had a conflict and the case is in court apparently, but on that piece of land I had constructed my temporary • We have a problem of stone quarrying, when the machines blast the stones they blow off our roofs and our lives are at risk • For me my problem is that my husband is not around but he authorized me to go ahead sin for everything in the compensation process but the UNRA people told me that I have to go to the lawyers and swear an affidavit but I don't have that money they ask for yet my husband and I agreed and we have no any problem. • For me I am a church representative. Our church land was affected by the road but they told us to write to Namirembe Diocese but they have not yet replied us yet we also want our immediate compensation like everyone else. When we asked the UNRA people they told us to wait for the diocese decision but this will take long • Some of us who work from small kiosks, the TC had excused us from the license but we see the word license on assessment forms that UNRA gave us. • We need Zebra crossing along the Jinja high way because we have lost very many people on that road. The small humps that are existing are meaningless now so we need a big hump that stops the cars • I am worried of staying along the road since the road affects my compound yet my house is not affected. How will I stay so close to the road? • Another problem we have is that we don't have stable power its always on and off yet the bill comes back when its high. More to that we lose our products when power goes off for long like juice, Bushera which is the source of income <p>Ranking and solutions;</p> <table border="1"> <thead> <tr> <th>Ranking</th><th>Problems/ issues</th><th>Suggestions/ recommendations</th></tr> </thead> <tbody> <tr> <td>1.</td><td>Shortage or lack of enough water. We only have one borehole</td><td>We need tap water/ piped water, though they usually tell us that our area is so hill that it's hard to get water up to here</td></tr> <tr> <td>2.</td><td>Lack of government health center</td><td>We surely need a Health Centre II OR III</td></tr> <tr> <td>3.</td><td>We need Zebra crossing along the Jinja high way because we have lost very many people on that road. The small humps that are existing are meaningless now so we need a big hump that stops the cars</td><td>You can put for us a fly- over</td></tr> </tbody> </table>	Ranking	Problems/ issues	Suggestions/ recommendations	1.	Shortage or lack of enough water. We only have one borehole	We need tap water/ piped water, though they usually tell us that our area is so hill that it's hard to get water up to here	2.	Lack of government health center	We surely need a Health Centre II OR III	3.	We need Zebra crossing along the Jinja high way because we have lost very many people on that road. The small humps that are existing are meaningless now so we need a big hump that stops the cars	You can put for us a fly- over	
Ranking	Problems/ issues	Suggestions/ recommendations												
1.	Shortage or lack of enough water. We only have one borehole	We need tap water/ piped water, though they usually tell us that our area is so hill that it's hard to get water up to here												
2.	Lack of government health center	We surely need a Health Centre II OR III												
3.	We need Zebra crossing along the Jinja high way because we have lost very many people on that road. The small humps that are existing are meaningless now so we need a big hump that stops the cars	You can put for us a fly- over												

	4.	Flooding water. When it rains this whole place floods up to the main road reason being that the industries around blocked the drainage channels due to their construction	New drainage systems should be constructed so that water flows well than flooding in our homes. These upcoming factories should be regulated to construct properly not to block the drainage systems
	5.	Air pollution from the factories around is too much also	Factories around should be regulated and should think about the community people where they operate from than minding about their business only
	6.	We lack education. We only have one UPE school and the rest are private schools which are expensive. On top of that we do not have any USE like any other villages that have seed schools. Most of our children stop at primary seven since their parents cannot afford the private secondary schools around	We should be given a seed secondary school
	7.	Our children that work from these companies/ factories are not considered when they get accidents while at work. These Chinese just ignore them not even to compensate them after getting an accident from their work	Our children should be considered like any other worker and be compensated
	8.	We have very many vulnerable children in our village especially orphans that are left behind and their relatives steal all their property thus end up becoming thieves and idlers	These children should be given school fees and money for upkeep
	9.	We need a central market for our products especially agricultural products. We need a central market that is constructed well with shelter	UNRA should construct for us a common market in the TC
	10.	The consent issue of our partners when they are not around	UNRA should help us find help us find the right lawyers and facilitate them for us
		We have a problem of stone quarrying, when the machines blast the stones they blow off	Companies should be stopped because our lives are in danger

		our roofs and our lives are at risk	
<p>Other issues raised.</p> <p>The following questions related to the project were asked;</p>			
No	Name	Question	Response
	Wakabiri	<ul style="list-style-type: none"> we are so worried of the dust which will come up due to the construction of the KJE road and it will affect the people who will stay and their activities so we request you to find ways of mitigating that problem. We also request UNRA as community members to consider us and our children in case of any employment opportunity during the construction time such that we also benefit from the project. Lastly we request you to be very much observant and considerate in compensation because our friends on other roads which you paid are still complaining about the little money and others were not given the money at all so we are, so worried about you people. 	
	Christom johnbosco	<ul style="list-style-type: none"> By the way what is UNRA, what does it do and where does its authority stops because I came late after the introduction? 	UNRA stands for Uganda National Roads Authority; it's under the ministry of works. Its main work is to control, construct and maintain roads in Uganda however we have national roads which are for specifically for

				<p>UNRA, others are for the District and sub county by the district and then the sub county level. So UNRA works on roads which connects one district to another district, now it's working on a road called (KJE) Kampala- Jinja express high way. It's UNRA which designed, work and maintains it so briefly that's UNRA.</p>	
			<ul style="list-style-type: none"> • will you pay for my structures to shift elsewhere because I don't have money to shift since you will not pay for the land that has conflicts 		
			<ul style="list-style-type: none"> • Are you going to pay for the structures that will be destroyed since we have not been paying license? 		
			<ul style="list-style-type: none"> • The last team that was here said that they will come to fill the forms for business people but we have not filled them yet? 		
			<ul style="list-style-type: none"> • Green valley high school proposed UNRA should put for them some access roads from the high way express for easy access to the school main gate. 		
			<ul style="list-style-type: none"> • We need Zebra crossing along the Jinja high way because we have lost very many people on that road. The small humps that are existing are meaningless now so 		

			we need a big hump that stops the cars		
			<ul style="list-style-type: none"> I am worried of staying along the road since the road affects my compound yet my house is not affected. How will I stay so close to the road? 		
			<ul style="list-style-type: none"> Another problem we have is that we don't have stable power its always on and off yet the bill comes back when its high. More to that we lose our products when power goes off for long like juice, Bushera/millet drink which is the source of income. 		
	The consultant thanked the group for active participation. The discussion with men was well done and later after this they joined the main discussion meeting for agreement with other community members.				

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Livelihood Restoration Planning in Kito B,C and Taxi zone Wakiso District for the KJE PPP Phase 1 ESIA and RAP Update

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF KITO B, KITO C AND TAXI ZONE BWEYOGERERE DIVISION- WAKISO DISTRICT ON 4TH/04/2018

AGENDA

1. Opening prayer and anthems.
2. Remarks from the local leader
3. Remarks from consultant
4. Group formation
5. Discussion and Prioritizing
6. Closure

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by one of the local people, The National and Buganda anthems were sung.	Wasswa Kalema
2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the people and also asked the other leaders to introduce themselves which was done.	Kito B,C,and Taxi zone Chairpersons
3.	REMARKS FROM THE CONSULTANT Ms Sophia Ashaba welcomed the people and told them the purpose of the meeting. She told the people that the reason was mainly consultation on the livelihood restoration programme and any other changes they would like to see, She also noted that they would take note of any other matters arising. Wasswa Kalema, one of the local people asked why UNRA representatives had come to to engage the project affected persons before compensation and sought to know what UNRA wanted from them? He asked why the project doesn't mature and complained that were so	Consultant (Sophia ASHABA)

<p>tired of waiting for compensation.</p> <p>Another local- a man asked why they have not been approached for valuation of their property</p> <p>The PAPs made it clear that they were not welcoming the discussion of the livelihood restoration programme before compensation.</p> <p>The major issues were:</p> <ol style="list-style-type: none"> i. When their property is being surveyed (persons who have not received the final confirmation on whether they are in the right of way ii. When their property will be re-valued (those whose property valuation was done over a year ago iii. And when compensation money will be paid <p>One Pastor Mukiiga Goerge who said was the chairman of the legal committee of the areas of Kito B,C and Taxi zone said that he even met the president, where he asked whether the people had been compensated; whether money to pay them was available and why it wasn't being paid.</p> <p>He said that UNRA was taking long and they did not want to hear of any other programme or anything else that wasn't related to money.</p> <p>There were several complaints from the people including complaints of property in the right way that had been destroyed, loss of livelihood (work, income, and development had come to a standstill).</p> <p>REACTION FROM THE CONSULTANT</p> <p>The consultant informed the people that UNRA was going to compensate all the PAPs, and reminded them this process had already began in some sections of Munyonyo and Makindye. She asserted that UNRA working hard to see that the process is sped up. Though, she reminded them that as this is a big project- all the necessary steps have to be followed for a smooth process & successful implementation</p> <p>At certain points, the meeting got heated up and threatened to get out of control- and the consultant requested through the chairpersons of the different zones to decide whether to proceed with the meeting or call it off. The chair requested that those interested should remain and those not interested should move out which the people agreed too. This was done with the help of the defense secretaries</p> <p>One of the female PAPs proposed that the livelihood program should be through different focus groups</p> <p>It was also alleged by one of the attendees that the invite seems to have been sent only to the PAPs, yet he thought the livelihood restoration program is even for those not affected by the project physically</p> <p>The PAPs refused to form the groups but agreed to give their views regarding the different groupings from the audience which the consultant's team later agreed to even after explaining to them why there was need for being in the different groups.</p> <p>ISSUES FROM THE MEN</p> <p><i>Note: Importance of the issues ranked beginning with no.1 as the most</i></p>	<p>Sophia ASHABA</p> <p>All</p>
---	---

	<p><i>critical one</i></p> <ol style="list-style-type: none"> 1. There was a concern on whether the government would set up schools for the PAPs since most of the schools in their area are privately owned 2. There was a proposal that Access roads and flyovers should be built to allow the PAPs access their homes. 3. They requested for a provision for pedestrians, bicycles and boda bodas. 4. Replace the hospitals 5. Requested for Employment opportunities e.g a one Magala Noah (0774036336/ 0752036336) supplies murrum ,stones and sand which he believes that the road would use during construction. He asked to be considered. 6. There is a concern that Boda boda stages will be destroyed hence affecting the livelihood of the cyclists. 7. A one simon peter said the project should also work on the drainage system very well both big and small trenches as poor drainage is one of the biggest problems in the area. 8. Electricity should be reconnect at no charge to the PAPs <p>ISSUES BY THE WOMEN</p> <ol style="list-style-type: none"> 1. Schools that are going to be destroyed should be rebuilt. 2. Hospital; a hospital should be built because there is none in the area. 3. Market; there is no market in the area, the women sell the small items from their homes and sometimes the buyers struggle to cross to the homes characterized by poor drainage system. 2. For those who are married, they requested that UNRA should put a condition of a joint account because the men have a tendency of getting excited by the money and not sharing with their wives. 	
	<p>THE ELDERLY AND VULNERABLE</p> <ol style="list-style-type: none"> 1. The elderly requested that UNRA gets for them land ,builds for them houses and resettles them since they no longer could build by themselves 2. Put access roads for the people who are on the road side because they will otherwise be so much inconvenienced by the express road. 3. Work on the feeder roads so that they are tarmacked. 4. The owners of schools and worship places should be given special consideration. 5. The disabled said they needed a provision for specialized flyovers for crossing and also accessing the roads in their wheel chairs. <p>There was no suggestion coming from the youths since they claimed that they were affected by the above issues</p>	Elderly and Vulnerable
5.	<p>CLOSURE</p> <p>The chairperson thanked all the people for turning up in big numbers and</p>	All

for their suggestions. The closing prayer was made by one Pastor Mukiiga.George.

A LIVELIHOOD RESTORATION PLAN MEETING FOR NAMATABA GO DOWN, MAIN AND FREEDOM CITY BWEYOGERERE DIVISION- WAKISO DISTRICT ON 4TH /04/2018

AGENDA

1. Opening prayer.
2. Remarks from the local leader
3. Remarks from consultant
4. Group formation
5. Discussion and Prioritizing
6. Closure

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by the vice chairperson of Namataba Main.	Chairperson Namataba Main
2.	REMARKS FROM THE LOCAL LEADER The Vice Chairperson on behalf of the chairperson welcomed the people and also asked the other leaders to introduce themselves which was done. He also invited the consultant and her team for introductions to the community.	All local council leaders of the area
3.	Remarks by the Consultant Ms. Sophie welcomed the people and asked her team to self-introductions. She also invited Henry a senior sociologist from Unra to speak to the people. Henry, in his remarks, talked about the various perceptions and questions that the people could have concerning the project. He explained to the people that before actual compensation, there are many stages that a project goes through and one of them is the livelihood restoration that the consultants had come to do. He also assured the people that he knows that compensation had	Consultant (Ms. Sophie Ashaba)

delayed for reasons beyond UNRAs control but the PAPS should be patient and be cooperative so that they are settled. He informed them that UNRA also wants to work on them fast because other projects are in line and that before they ask for their compensation, they should be ready amongst themselves ensuring that there are no land disputes, proper agreements and titles and also their national IDS.

He therefore requested them to be cooperative with the consultants, give them the information they want so that their compensation is also quickened.

The consultant Ms. Sophia Ashaba thanked the UNRA representative for very good introductory remarks. She said that the main reason for the meeting was for livelihood restoration program whereby the thoughts and issues arising from the meeting concerning the three villages affected by KJE would be of great importance to the formation of a livelihood restoration program.

The people said they were uncomfortable with the groups and they felt that their issues would still be noted without forming the groups despite the explanation given by the consultant on the importance of the focus groups.

ISSUES FROM THE COMMUNITY:

Some of the issues that arose from the community are:

1. All we want is money language not any other thing because all our programs are on a standstill.
2. Our greatest challenge is delayed compensation and this has destroyed our property.
- 3 . How is this livelihood restoration program connected to the road project?
4. The youths and other people who are able to work should be given chance to work on the project other than strangers.
5. If I have materials to supply, how do I become a supplier to the project? Its hurting to see non Ugandans doing even casual labour on the roads when we have many unemployed Ugandans.(Niyonziima Francis 0700139462/0774339863)
6. We need a hospital, clean water and a school in this area.
7. Its true that we are on government land, some have built and others haven't, but in the meeting with the president of Uganda, he said that we should be forgiven, so how will that be handled?
8. We have our roads which we constructed , shall UNRA take care of these roads ?
9. How long will your process take because we have been asked and called for very many meetings?
10. Last time in 2013 I was valued but this time I'm out of the roadway, how will I be considered?
11. I am in between SGR and KJE, who exactly will compensate me?
12. We have our roads, when this KJE comes, what will happen to the people who are left on either side?

	<p>13. If I have a plot and I have been building should I continue and build or stop?</p> <p>14. Our spring, the only source of water here is doing badly, so if it's possible, Unra should contribute to the construction of this spring.</p> <p>15. When money comes, most men misbehave and so we request that Unra asks for a joint account for those who are married so that the money is not misused and family neglected.</p> <p>The consultant assured the community members that their issues have been noted down and the right offices will be informed and that they would get a response soon.</p> <p>She urged them not to get tired because the process was about to come to an end.</p>	
	CLOSURE	
	The chairman Namataba Go down closed the meeting at 17:20hrs	Chairman

Objectives of the meeting
<ul style="list-style-type: none"> Identifying and prioritizing beneficial community projects for the remaining community
Agenda items: <ul style="list-style-type: none"> Opening prayer Communication from the chair Issues arising Consultants response AOB Closing remarks
Introductions
<ul style="list-style-type: none"> Chairperson deputy b2 welcomed members since other leaders were not there. He led in the singing of the national and Buganda anthems respectively. Prayer was led by a member who was a pastor. The vice chairperson took the members through the agenda and the purpose of the meeting. He said that he will not talk much since the UNRA team was around and they were to introduce themselves then go ahead and say the purpose of the meeting.
Consultant's remarks
<p>It's from this point that Dr. Assimwe the consultant thanked members for attending. she also thanked the previous social economical team and told members that soon Valuers will be coming. She also reminded those who missed the census to always register themselves and will be communicated to.</p> <p>The consultant also told members told members to be ready and have all the necessary documents and even open up accounts from any commercial bank of their choice that because money would be transferred electronically.</p> <p>The consultant introduced the purpose of the meeting that ADB wants to develop these communities by implementing useful community projects. And its them the community members to decide what they need most. From this point she told the members to divide</p>

themselves into 4 groups that is the youth, men, women, and the vulnerable and after they present their projects.

Group Presentation

After 30minutes members presented as follows:

Men:

- ✓ drainage channels
- ✓ safe water
- ✓ public markets
- ✓ hospitals.
- ✓ During they presentation they said that their first priority should be drainage because this channel of kawooya normally floods during rains. They went ahead and said next would be public hospital the nearest one is in Kiswa which is quite very far and mothers suffered a lot. Then they said that a primary and vocational school would be of help. Lastly they suggested public markets to create jobs for the locals.
- ✓ Men had questions like wont their power and water be affected during the construction of the road?, then they showed concern about how their houses will survive during construction because these houses are very weak.
- ✓ The men also suggested Valuers meeting them before the valuation process.
- ✓ They also suggested access roads during construction.
- ✓ And they suggested that communication should change at least communicating through SMS so as members don't miss out.

Women:

- ✓ Drainage
- ✓ Public toilets
- ✓ Schools especially primary schools
- ✓ Hospitals
- ✓ Saccos to improve their businesses.
- ✓ Garbage disposal site
- ✓ Capacity building
- ✓ The women had questions like wont the downer people be affected because the road will be passing up

- ✓ They also had concern of the very old people saying that these older people had no knowledge of land so was it possible to compensate them by building them homes?
- ✓ Then they wondered how will those houses which will have cracks during construction be compensated.
- ✓ They also raised a concern of poor communication from UNRA because they get to know when its late.
- ✓ Then another concern was of the locals getting employed by the project contractors.

Youth:

- ✓ Drainage channels because the kawooya channel floods and kids fail to go to school.
- ✓ Public toilets because when it rains people let out their fecal matters which causes diseases
- ✓ Schools with better structures not like wooden ones
- ✓ Increased garbage collection and if possible bring in big dust bins
- ✓ Public hospital
- ✓ Safe water because there was only one protected spring located in b2 which serves the whole community.
- ✓ Public markets which bring the food near and also create jobs
- ✓ Community centres instead of disturbing pupils like what was happening that day.
- ✓ Youth had question like “how will the people in the road reserves be compensated?”
- ✓ What happens to a small piece of land which cannot serve any purpose?

Consultant’s remarks to the issues raised

From that point the chairperson invited the consultant to respond. The consultant Dr Assimwe said that it was time for members to rank these projects according to what they prefer most.

1. Drainage channels
2. Schools both primary secondary and vocational.
3. Public toilets
4. Public hospital
5. Public market

6. Recreational centre.

After the consultant informed them that the team will have to move to divisions and ministries to find out which plans they have for these communities so as not to duplicate the projects. Then after the team will present the projects to ADB. She also told members that there will be continuous monitoring of these projects.

A.O.B

The consultant went ahead and answered questions, sighting that power and water won't be affected, that as far as they know the contractors are very experienced and will handle them carefully or would create alternative sources.

For the case of the shaky houses she told members that those affected by the construction will be also looked at.

For small pieces of land she told members that in case they realize the land is useless then UNRA will have to take it up also.

For the case of the Valuers the consultant said that she didn't know how they worked so she couldn't answer for them.

For the case of poor communication, she promised members that if authorities allow surely they will be using bulk sms.

The consultant also told them that Valuers and surveyors will be responsible for the empty land.

CLOSING REMARKS

- After the chairperson closed the meeting with a prayer from pastor. He also urged members to always endeavour to attend these meetings.

NO.	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by one of the community members from Busiba village.	Mama Betty
2.	REMARKS FROM THE CHAIRPERSON The chairperson of Busiiba welcomed the team and the two communities for the meeting. He apologized for their late coming but it was due to the fact that it was a rainy morning and every one had gone to the garden. He assured the consultant team security while in his village and informed them that his people are interested in listening to what they are going to say that's why the community allowed all the project activities like data collection to take place although they don't know yet about their compensation awards nor when to be paid. He handed over the session to the consultants.	Chairperson (Ssalongo Paddy)
3.	PRESENTATION The consultant welcomed the community members and thanked them for turning up in big numbers; She apologized for combining the two villages	Consultant (Mrs. Kavuma Esther)

	<p>and told them that since they are near each other and being a busy agricultural time they had been advised to put them together and the good thing was that the same information was going to be delivered.</p> <p>She introduced herself together with the team she had moved with to the community members.</p> <p>She gave a brief background and why there was need for the Livelihood Restoration Planning for the people and areas that have been affected by the project (Kampala-Jinja Expressway) one of the biggest projects currently in Uganda. She mentioned that the Project is being funded by the African Development Bank, European Union, there are some terms and conditions which must be followed to secure funds and one of them is that, all affected people and communities must be left on the same standard where the project found them, or go up but not down so we want to see the people and communities developing although some people would have lost their assets, but their lives should be restored.</p> <p>From that background therefore she requested the community not to get tired of attending all the meetings so that all that is needed for proper preparation is done.</p> <p>She further informed the community, that this project has a budgets for such programs which may help the community members restore back their livelihoods therefore livelihood restoration is a priority. Therefore, we are going to identify the needs, prioritize then and find strategies /solutions with in our groups, later on present it to the community.</p> <p>The community members split into groups of the youth, women and men. They discussed and presented.</p>													
4.	<p>Group formation</p> <p>The community members agreed to form the groups but before that, they had questions which they wanted the consultant to answer first before they proceed, and she did it well as shown below;</p> <table border="1"> <thead> <tr> <th>No</th><th>Question</th><th>Answer</th></tr> </thead> <tbody> <tr> <td></td><td>You talked about helping the community to restore back its livelihood so are you going to use our compensation or there is money?</td><td>No, the Livelihood component has its own funds. I want to make it clear, your compensation money will not in any way cater for livelihood it will be your money to put back what you would have lost due to the project.</td></tr> <tr> <td></td><td>Is UNRA going to plan for our compensation or it's me to plan and budget for my money</td><td>You will plan and make a decision for your money, but maybe UNRA may advise you.</td></tr> <tr> <td></td><td>Why do you group us yet it's the same village and affected in the same way?</td><td>Like I said at the beginning, you have different problems depending on age and sex</td></tr> </tbody> </table>	No	Question	Answer		You talked about helping the community to restore back its livelihood so are you going to use our compensation or there is money?	No, the Livelihood component has its own funds. I want to make it clear, your compensation money will not in any way cater for livelihood it will be your money to put back what you would have lost due to the project.		Is UNRA going to plan for our compensation or it's me to plan and budget for my money	You will plan and make a decision for your money, but maybe UNRA may advise you.		Why do you group us yet it's the same village and affected in the same way?	Like I said at the beginning, you have different problems depending on age and sex	All
No	Question	Answer												
	You talked about helping the community to restore back its livelihood so are you going to use our compensation or there is money?	No, the Livelihood component has its own funds. I want to make it clear, your compensation money will not in any way cater for livelihood it will be your money to put back what you would have lost due to the project.												
	Is UNRA going to plan for our compensation or it's me to plan and budget for my money	You will plan and make a decision for your money, but maybe UNRA may advise you.												
	Why do you group us yet it's the same village and affected in the same way?	Like I said at the beginning, you have different problems depending on age and sex												

		however the main reason why we group you is that, this is Africa where we have different culture and behaviours for example in some cultures women don't talk when men are around yet they are also affected and have developmental ideas so with interest of not missing out we decide to separate you accordingly.	
NB: After being convinced with proper answering of their questions, they decided to go into their groups and the following were the presented.			

PRESENTATION FROM THE GROUPS

1. WOMEN GROUP

The following is the list of problems which were identified by the women;

1. **Electricity** –the village doesn't have power which keeps women in poverty because profitable businesses like bars and salons are not existing because of lack of power.
2. **Water**- water points are far (within the villages) and as a result;
 - Women with their children walk long distances in search of water.
 - Children have been kidnapped, (so far 3 kids have been kidnapped) on their way to the spring and this worries mothers and the entire community,
 - Project has affected 3 unprotected springs in Busiiba village and 3 protected springs in Lukonge village
3. **Poverty**, this is cross cutting.
4. **Health centers** – women emphasized that there are no health centers near, yet they deliver at night and this makes them moving long distances at night, the nearest health center is 5 miles away.
5. **Unemployment** – most of the women are house wives who depends on irresponsible men and this makes them together with their children lack some necessities
6. **Poor access roads**- the roads around a very bad and slippery which hinders them to transport their agricultural producers to the market for sell hence contributing to poverty in their community.

The problems were generated and explained as seen above, the women prioritized them starting with the most pressing to the least pressing problem as the table below illustrates and came up with the solutions.

Table showing the problems ranking and solution per issues.

PROBLEM	RANK	SOLUTION
---------	------	----------

Poverty	1	<ul style="list-style-type: none"> • More sensitization is needed on how to practice modern agriculture and other vocational skills which can help women fight poverty. • We request the government to give us livestock for example poultry, cattle, pigs and goats.
Electricity	2	<ul style="list-style-type: none"> • We request for electricity such that more businesses are started in our community. This will create employments for women and youths
Health center	3	<ul style="list-style-type: none"> • We request the government to build for us a health center too in the trading center or else we can provide land like the Catholic Church here in Busiba village has four acres so we can put it there for communal use.
Unemployment	4	<ul style="list-style-type: none"> • We request the project to employ women, most of us are not educated but we can cook for workers and even do other casual work on the project so that we earn.
Access roads	5	<ul style="list-style-type: none"> • As the government and UNRA construct KJE, we also request them to maintain our access roads so that we are able to move from one place to another with our agricultural produces safely.
Water	6	<ul style="list-style-type: none"> • We request for two boreholes in each village and we don't want taps because its water is not reliable and they are payable so most of the community members can't afford monthly payments. In this case, boreholes are better for the community.

2. YOUTHS GROUP

The youths discussed their problems and the following is the list of problems which affects them communally

1. **Electricity** –there is no electricity in the community, so youths can't start up small businesses to earn a living because they use electricity for example for hair salons
2. **Capital for business**- The youth lack working capital to startup different businesses
3. **Capital for agriculture** –some youth here are farmers but they lack capital to improve their way of farming so that they can earn

The youth ranked their problems and came up with the solutions to their problems as presented in the table below. However, they emphasized that once the mentioned are solved, the livelihood of the youth will be restored. The table below illustrates the solutions

Table showing the mentioned problems, ranking and solutions

Problems	Rank	Solution
Capital for business	1	<ul style="list-style-type: none"> • We need SAACOs with low interest rate in our community so that we can get small loans and start up small businesses as youth. • We also request for Boda Bodas for youth to ride and at least get daily income. • We request the government to supply us with technical washing bay machines such that we start such businesses in the trading center and more youths will be employed.

Electricity	2	<ul style="list-style-type: none"> We request the government to extend electricity to our community and small businesses which uses power will start through getting capital from the above mentioned SAACOs once started to enable youths get what to do.
Capital for agriculture	3	<ul style="list-style-type: none"> We request for modern water pumps for irrigation and this will improve on the number of yields we get from our agricultural produces. We request the government to support us in livestock rearing through supplying communities with high breed of cattle, goats and poultry.

3. MEN GROUP

The men also discussed their issues and the following is the list of problems identified which affects men.

1. **Electricity** –due to lack of power, there is limited business in the community and this also contributes to unemployment in the area.
2. **Water**- the community mostly has unprotected springs which are also far from where they stay, and this makes the community members walk long distances in search for water.
3. **Poverty** –most of the community members here are farmers and they are too poor because they lack good agricultural support
4. **Poor access roads** – the connecting roads from our villages to the main road are too poor and this affects our transportation of agricultural produces from where they are to the main road.
5. **Very long distances to secondary schools**- secondary schools are too far from this community and children move long distances
6. **Health center** – they are far from the community and yet people fall sick day and night
7. **Insecurity** – there is a lot of insecurity, people produce is being stolen, animals, thieves break into the houses, so people's lives and property is at risk and the police post is very far from the community.

After explaining the above problems, men went ahead and ranked them starting with the most pressing problem to the least pressing one as the table below shows it well.

ILLUSTRATION FOR THE COMMUNITY PROBLEMS AND THEIR RANK

PROBLEMS	RANK
Electricity	1
Poverty	2
Water	3
Poor access roads	4
Secondary schools	5
Health centers	6
Insecurity	7

Then community men worked hand in hand to generate the possible solutions for the above mentioned community problems as the table below shows it clearly.

Table shows the identified problem ranking and the identified solutions

PROBLEMS	RANK	SOLUTIONS
Electricity	1	<ul style="list-style-type: none"> As men of this community we want to start up a graining mill because all the families in the community plants maize and eats posho but the problem is electricity, so we request for electricity so that our businesses are established.
Poverty	2	<ul style="list-style-type: none"> We request for help in agricultural sector through providing quality seeds like maize, beans and many more so that we can get quality yields for sell. We request for modern agricultural tools and machines in the community which can enable us to dig big pieces of land for both subsistence and commercial. We request for support in livestock for example supplying zero grazing cattle, poultry and other animals.
Water	3	<ul style="list-style-type: none"> The community needs boreholes and protected springs because they are affordable by everyone in the community.
Poor access roads	4	<ul style="list-style-type: none"> Our community access roads should be maintained for us to be able to transport our produces well from one place to another.
secondary schools	5	<ul style="list-style-type: none"> We request the government to build for us secondary schools in the community such that our children move a walkable distance hence proper and safe learning.
Health centers	6	<ul style="list-style-type: none"> The community needs a near health center to which is well structured, with good health workers and standard health services for proper medication of the community members.
Insecurity	7	<ul style="list-style-type: none"> To solve the issue of too much insecurity in our community, we request the government to extend a police post in this community so that community members and their properties are well protected.

AGREEING

After the group discussion, the community members came back to the main meeting and each group presented its findings as shown above. The participants agreed on what has been presented to be the most pressing problems in their community and requested the consultant to consider all that had been presented for the good of their community.

After all that, the community members had questions and requests which needed clear responses from the consultant;

Other Concerns:

No	Issues	Response
	when are we going to be paid because we got other places where we plan to go to but we need money to deposit on them such that they are not take by other people	compensation is a process and we are different groups on the project for example valuers, sociologists, surveyors and many more who have different activities and speed in doing work then remember government things are in steps which needs some time so I can't say when or when but we are working as much as we can to see that we compensate you people
	I have one acre of land, but during survey the land was divided into two parts and it's the biggest part which was taken by UNRA so the remaining apart is too small and useless because even a toilet can't fit there. My question is can't I sell it to you and I go at once?	currently it may not be taken now because the emphasis now is on the corridor, but may be after the process it may be reconsidered and taken later, so kindly lets be patient a little till when the project starts and UNRA officials will be passing in all communities to see such injurious affections.
	Last time we were given a ½ of a cup of maize and the government officials made us sign and even took us photos but truthfully how can you make a mature man like me walk from my home to the community center just for ½ cup of maize? This caused confusion even in our families because women quarreled that how could we also accept to pick them so this time we kindly request you to consider us well and follow the things which you will send to us because we don't trust local leaders who favor their friends and family members only. Allow us to form groups which will manage our things when they come mostly for the youths and it will also be easy for you to make a follow ups.	

CONCLUSION

The chairperson thanked the team for the good work done and his community members for their patience from the start of the discussion till the end and their positive contribution. He requested

UNRA to carry out fair/ right valuation during compensation considering that now prices for the materials are ever increasing and he officially closed the meeting.

<ul style="list-style-type: none"> National and Buganda anthem Opening prayer Opening remarks by the chairperson Opening Remarks by the Consultant Community members raising their issues Consultant response to the issues raise A.O.B Closing remarks
Introductions
<ul style="list-style-type: none"> The national Anthem and Buganda anthem were led by the Mbuya 1 Chairperson. The opening prayer was led by Sheikh who recited Suratil Alfatiha. The chairperson opened the meeting by introducing his executive and thanked everyone for coming. His executive included the secretary for defense for zone 1, secretary for women affairs and secretary for defense for zone Two
Consultant's remarks

The project consultant welcomed and thanked the community members for coming. Explained the purpose of the meeting and the meeting was for both the PAPs and the remaining community members

The consultant also informed the community members that Valuers will be coming to value their properties with assistance of the local leaders.

The consultant also briefly told them about the validation process and cautioned them to get all the necessary documents like National IDs, letters of administration, land titles among others as well as to have active bank accounts

The consultant also informed about the social economic team that ended the census successfully and informed that those who missed should register and there is always comeback

The consultant also informed that whoever affected will be compensated.

The consultant also told them the immediate purpose of the meeting was to inform them about the ADB Project. ADB suggested that those people remaining in the project area (where the new road will be constructed) should also benefit from the KJE project. The purpose of the meeting therefore was the community members to identify projects of their choice.

Group Presentation

The members were asked to divide themselves into small groups for easy identification of their issues and the following were formed:

- ✓ Youth group
- ✓ Women
- ✓ People with Disabilities(PWDs)
- ✓ General group (where most men fell).

These groups were tasked to come with projects that will help their members. The groups went into their respective groups to identify issues that affect them and presented them the rest of the members after 30 minutes.

a. PWDs

- ✓ They wanted the project that will create jobs for them
- ✓ They needed spring wells because most the shallow wells get contaminated during the rainy season
- ✓ Wanted government aided schools as there is no any single school in the Mbuya. Children walk long distance to Kiswa which puts them in danger crossing numerous roads and kidnap
- ✓ They also wanted government aided hospital. In the whole of Mbuya II there is no any hospital yet it has many police stations.
- ✓ They also requested for wheelchairs

b. General Group (Mostly Men)

- ✓ They requested for government aided school or seed schools
- ✓ Work on drainage to minimize flooding in the area
- ✓ Wanted government hospitals, they informed the consultant that they have 3.5 acres of land where such hospital can be constructed
- ✓ Wanted public market
- ✓ Wanted VIP latrines
- ✓ Wanted safe and clean water
- ✓ Wanted recreation centres for children and the old ones
- ✓ Solar road lighting to reduce on iron bar men

c. Youth

- ✓ Apart from what has been mentioned by men and PWDs groups they youth wanted
- ✓ Washing bays
- ✓ Craft and music centres to polish their skills
- ✓ Construct boda boda stages
- ✓ Public market
- ✓ Youth SACCOs

d. Women

- ✓ Ground nuts miller
- ✓ Tailoring schools
- ✓ Candle making machine
- ✓ Soap making machine

Consultant's remarks to the issues raised

The consultant thanked the presenters for their good work. Informed them that their issues will be considered. The issues raised were ranked in terms of fluency as follows

- I. Drainage channels
- II. Government aided schools
- III. Government hospital
- IV. Public markets

V.	Safer water
VI.	Public toilets
VII.	Solar road lighting
VIII.	Financial empowerment
A.O.B	
<ul style="list-style-type: none"> The community members informed the consultant they would not like to work with division leaders on the proposed projects because they have failed very many projects which would have benefited the community members. The consultant informed the community members that it is impossible to implement a project in the area without the district and division heads because they are the project implementers and monitors The community members wanted to know when the valuers are coming. They were informed that currently they are working in congested areas and soon they will be coming The community members wanted the tenants to be compensated as well, but the consultant informed that currently it is impossible but through their respective landlords, they will be given three months free of charge as they sort themselves. The communities wanted jobs during the road construction and the consultant told them that 30% of the labour force will be coming from the local area The community members were worried about being paid in cheques because they disturb them. The consultant informed them that amount below 200,000 will be paid in cash and above will be through bank transfers to their respective bank accounts 	
CLOSING REMARKS	
<ul style="list-style-type: none"> The meeting ended with a prayer by the leader of the Mbuya anointed church. It ended at 12:47pm

PRESENTATION OF THE LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF MUTUNGO 1 AND 2 NAKAWA DIVISION- KAMPALA DISTRICT

AGENDA

2. Opening prayer and anthems.
2. Remarks from the local leader
3. Remarks from consultant
4. Group formation
5. Discussion and Prioritizing
6. Closure

Attendees

Attendance List attached

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by a volunteer member of the community, and there after The National and Buganda anthems were sung.	Chairperson Mutungo 1 and 2
2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the people and also asked the UNRA team for introductions which was done	Mutungo 1 –Ms Nalweyiso Agnes
3.	PRESENTATION BY THE CONSULTANT The consultant welcomed the people and thanked them for being patient and cooperative. She noted that like any other big project, KJE has steps to be followed before the actual construction. She reminded the community that these steps are a requirement and also necessary for effective project implementation.	Sophia ASHABA- Sociologist

It was noted that one of such processes is the livelihood restoration program which seeks to know the issues in the community and the desired community projects.

A brief about the livelihood restoration plan was presented in order to help the people that have been affected by the project directly and indirectly plan accordingly

She further explained that the budget for the Livelihood is independent and they should not get worried that they are going to deduct from their compensation package- a thought held true by some.

The Sociologist then requested that there was need for the community to split in the different focus groups and discuss some of the issues that needed to be dealt with, as a matter of urgency, and as away of restoring livelihood once the project is established and also prioritize them according to the ones that need urgency.

Questions that arose from the remarks.

- We would like to know about the update of the project before we go ahead with the benefits associated because we need to plan.
- We suggest that you first deal with compensation before you deal with project benefits.
- What we want to know is the process of valuation and compensation.
- We thought that this project would be done in four years but we are so tired of waiting.
- One man from kasese requested that since some of the PAPS work from far, these meetings should be planned so that the people can plan for themselves properly.
- If I don't want cash, can you build a house for me for resettlement?
- Incase of an emergency, who do I talk to?
- There was also an issue of property tax introduced by Kcca and yet the people have been valued already, how will this be treated?
- Another lady said that the legal department of UNRA should deal with the court issues and cases so that people are paid.
- The chairperson requested UNRA to at least talk to the banks for the people who had loans so that the

	<p>pressure is reduced because the moment it marked their property, it lost value.</p> <p>Remarks from UNRA Representative</p> <p>Henry in his remarks, gave a brief update about the project in regard to compensation where he informed the community that the payment is coming but requested the PAPs to be patient since there are steps to follow and other issues in regard to land to sort out.</p> <p>Mr Juuko in his remarks told the people that the law required certain things to be done before compensation. And accordingly, livelihood restoration program was mandatory. There is no escape, we must deal with it.</p> <p>He also told the people that he was going to contact the chief government valuers about the property tax which was demanded by KCCA and he would give them feedback.</p> <p>He further informed the members that UNRA was willing to help the special case PAPs like schools and said they would be given special consideration such a longer grace period than the others.</p>

4	<p>GROUP FORMATION</p> <p>The community agreed on the most pressing problem to the community and the ranking, was the most pressing came first as discussed below.</p> <p>THE WOMEN FGD</p> <ol style="list-style-type: none"> 1. We need a good hospital in this village. We also need community-based health centres to help mothers, the needy and vulnerable who cannot afford hospital bills and move long distances. 2. Feeder roads that connect to markets, hospitals and schools should be constructed. 3. We need a government school because not all of us can afford private schools and since some schools are also going to be affected by the road like this very one we are meeting from, Clever Juinor school. 4. We need a vocational training centres to help us with skills like tailoring, hair dressing, and modern agriculture. <p>THE MEN FGD</p> <ol style="list-style-type: none"> 1. UNRA should buy an equivalent size of land from nearby places and re construct affected schools and markets so that these services remain in the area. 2. Access roads are needed for the people who will remain in this area. 3. Those indirectly affected by the project should also be compensated. 4. In case of meetings, people should be informed in time at least seven days prior through telephone calls and sms for proper mobilization and planning because we have work to do. 5. If Unra is not sure of the timeline of this project, let it allow the PAPS to develop their properties. When its ready, then a new valuation can be done than blocking people from any development for over four years now. 6. We were informed that the valuation report is valid for only one year. We are now waiting for new valuations. 7. During the project works, let the local people be considered first for both casual and technical work. 	<p>Women</p> <p>Women</p> <p>Men</p>

	<ol style="list-style-type: none"> 1. We need recreational centers like play grounds for football and netball so that we sharpen and also discover our talents. 2. Create as many access roads to the main road as possible for easy movement and access to businesses and homes. 3. All services destroyed during construction should be replaced such as water supply and electricity. 4. Build the markets that will be cut off from people's access and provide for their accessibility. <p>THE VULNERABLE AND ELDERLY</p> <ol style="list-style-type: none"> 1. Build good and decent public toilets that cater for the disabled. 2. Build very good water channels along the KJE road and also outside this road. 3. To build the worship centres that the project will destroy. 4. Provide employment for the locals who need jobs. 5. We need a hospital in this area. 6. Build recreational and vocational centers. 7. Restore the environmental eco system. 	<p>YOUTH</p> <p>Vulnerable</p>
5.	<p>.CLOSURE:</p> <p>The meeting was officially closed by the Chairperson Mutungo zone 1 Ms Nalweyiso Agnes who thanked the members for coming and being cooperative. At 13:10hrs.</p>	<p>Chairpersons Zones 1 and 2.</p>

2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the people and also asked the other leaders to introduce themselves which was done. He said that a report was needed by the donors concerning the livelihood restoration program in the affected areas and that's the reason the consultants had come.	Mutungo 9 and 10 chairpersons -John Mayanja -Muky.Lwanga
3.	PRESENTATION BY THE CONSULTANT The consultant welcomed the people and thanked them for turning up in	Consultant MS.Sophia

	<p>big numbers. She further gave a background of the purpose of the meeting- Livelihood Restoration Planning which is a component within the project that is required by the project donors.</p> <p>She explained to the people that this would be done in form of groups of youth, men, women, and the vulnerable because much as they stay in the same area, they have some different challenges.</p> <p>The people asked a few questions and made some inquiries of which some were:</p> <ul style="list-style-type: none"> • One local wanted to know the possibility of changing his land agreement documents to another person's name? • One woman raised her concern in regard to if her husband has very many wives and on the affected land and she invested her personal money, yet the man has put all the other women to share on compensation, how will she be treated? • There was another issue raised by the landlords concerning the tenants running away from the houses in the right of way without paying, which issue has halted business on the side of the Landlords and hence requesting UNRA to come in and address it as soon as possible. 	Ashaba
	GROUP FORMATION	All
4	<p>Below are the issues that came from the group discussions.</p> <p>NOTE::The community agreed on the most pressing problem to the community and the ranking, was the most pressing came first as discussed below.</p> <p>THE ELDERLY VULNERABLE FGD</p> <ol style="list-style-type: none"> 1 The elderly requested to be relocated to a much more convenient place near to where they have been, so that the can easily access their work places. <p>THE MEN FGD</p> <ol style="list-style-type: none"> 1 Poor drainage system. 2 Spring well (free water) will be affected by the project. How shall we get this free water again? 3 There is a big problem of insecurity. 4 Shall we have access roads to the main road on either side? 5 We need government schools, hospital and market 6 The road reserves should favor the community. Barriers should be avoided. 7 During construction, the local community should be give 1st priority for jobs. 8 Provide flyovers in the busy centers 9 The road reserve should be final to avoid future extension and inconveniences. 10 The government should help the community to modernize their buildings to suite the standards of the road. 	<p>Elderly and vulnerable</p> <p>Men</p>

	<p>11 We need public toilets that are standard.</p> <p>12 We need street lights and cameras</p> <p>THE WOMEN FGD</p> <ol style="list-style-type: none"> 1. There is an urgent need for government aided infrastructure like hospitals, schools and access roads from the southern by pass. 2. Making it possible for the residents remaining to economically use the road for business beyond the road reserve by removing barriers. 3. We expect flyovers on this road. 4. We would like to know whether payment can be made to any bank account. 5. We also need security assurance like street lights during and after building the road. 6. Construction of proper drainage systems. 7. UNRA should emphasize the issue of having a joint account for the marrieds since the men have not taken serious note of it. 8. There was an issue of tenants refusing to pay rent for the houses that are already marked and in the right of way. Is there away UNRA can help address Some houses with that are already marked and are in the right of way the tenants refused to pay, so will unra pay us that money on compensation? 9. During construction of roads, insecurity increases , will you provide security for those remaining in the area? <p>THE YOUTH FGD</p> <ol style="list-style-type: none"> 1. Provide us with employment opportunities on the project. 2. Provide us with mindset changing and empowering programs so that our businesses are helped. 3. Build recreational centers where we can exploit, discover and utilize our talents. 	<p>Women</p> <p>Youths</p>

Missing PAPs Register; Attached

Start time and objectives of the meeting
<ul style="list-style-type: none"> Identifying and prioritizing beneficial community projects for the remaining community The meeting commenced at 10:47 am.
Agenda items: <ul style="list-style-type: none"> Opening prayer Communication from the chair Communication from the Consultant Discussion Consultant response issues from the discussion A.O.B Closing Remarks
Introductions
<ul style="list-style-type: none"> The meeting began with deputy chairperson welcoming the members. He led in singing the national and Buganda Anthem. The pastor led the prayer
Consultant's remarks
<p>The consultant thanked the community members for coming. He informed that Valuers will be coming. The consultant informed that those who missed the census exercise should register with the UNRA team then they will be communicating. The consultant also informed and assured the PAPS that they will be compensated. She cautioned them to have necessary documents like sale agreements, land titles, letters of administration, national identity cards among others.</p> <p>The consultant told members to open up bank accounts in any commercial bank of their choice not sacco or microfinances. She briefly talked about the previous engagements of the surveyors and the social economic team. She told those who had missed the census exercise should register with the UNRA team. She said soon valuers will be coming so they shouldn't lose hope. And that money will be transferred to their accounts unless the amount is below 200,000shs. The consultant went ahead and informed the community that African</p>

Development Bank (ADB) is interested in helping the remaining the community. So the ADB team sent a team to find out which are those projects that will benefit their communities where KSB/KJE road will pass. From this point members were asked to divide themselves into four groups that is, men, women, youth and the vulnerable.

Group Presentation

Men:

- ✓ public market because we have none.
- ✓ we need a fly over since it will be a highway so we shall use that to cross.
- ✓ Construction of a playground.
- ✓ Need churches schools clinics.
- ✓ Need public toilets because people here do open fecal disposal
- ✓ Grinding mills to help the community with their produce.
- ✓ Need our children to get jobs in the project not employing outsiders.
- ✓ Should work on the feeder roads so that the whole community can feel the development.
- ✓ Connecting routes like taxi stages
- ✓ Another football ground.

Women :

- ✓ School
- ✓ Market but also starting capital.
- ✓ Training women in hand skills.
- ✓ Water stand pipes.
- ✓ Hospital because what we have is for the mentally disableds.

Youth:

- ✓ Technical institutions
- ✓ Markets
- ✓ Public toilets
- ✓ Play ground
- ✓ Feeder roads
- ✓ Saccos so that youth can borrow money at a low interest rate

- ✓ Need to be employed in the project.
- ✓ Garbage dumping site.

Consultant's remarks to the issues raised

The consultant took over the floor for the ranking of the projects according to what the community needs most. They came up with this list.

1. Public market
2. Vocational training centre
3. Hospital
4. Public toilets
5. Safe water
6. Microfinance
7. Playground.

The consultant talked about jobs for the community and told them that the contractor by law is supposed to employ 30% of human resource coming from the community. But only those who will be able and qualify to be employed. So she told them that it was time they checked on their qualifications.

A.O.B

At this point the consultant welcomed questions from the members.

- Where will ADB get the space for constructing the proposed projects?
- When are the surveyors coming?
- What if Valuers come and I am not around what happens?
- Why is it that some houses are not marked yet they are in the middle of the affected houses?
- What happens to those who already buy valued properties?
- Lastly what happens to the small pieces of land where you can't even do anything from there?

From this point the consultant responded that it's the community to decide where the project shall be located. That surveyors and valuers will be coming soon and will be moving together. That incase one wasn't around she said that valuers spend a long time in an area so the missed PAP can always work with the local leaders and find where the valuers are. And she assured the members that as long as one is in the road corridor , that person shall be compensated. The consultant also cautioned members not to sell or buy already valued property that incase its sold then even the valuation documents should be given to the buyer. Then for the case of small pieces of land she said that those will be handled by the engineers according to what they find out.

CLOSING REMARKS

- After responding the consultant thanked members and the area chairperson thanked the team for always laboring to sensitise them. The pastor closed the meeting with the prayer.
- Meeting ended at 12:33hrs.

4. Group formation
5. Agreeing
6. Closing

Attendees

List of Attendance is attached.

NO	ACTIVITY	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by the Parish Priest of Dandira parish church	Dandira Parish Priest
2.	REMARKS FROM THE LOCAL LEADER The chairperson of Dandira village welcomed the dear visitors and thanked them for coming; she requested her community members to be patient, participate well and ask all the necessary questions to the visitors. She opened the discussion and welcomed the visitor team.	chairperson Dandila village (Mrs. Lukia)
3.	PRESENTATION The consultant welcomed the community members and thanked them for turning up for the discussion. The Team made self-introductions and the Community followed suite.	Consultant (Mrs. Kavuma Esther)

	<p>She made a brief introduction and background about the meeting including the objective of the project, funders and the livelihood restoration planning. she stressed the need for the livelihood Restoration planning</p> <p>She informed the community members that the Kampala-Jinja express highway is one of the biggest projects currently in Uganda and it's funded by the world bank which is so much concerned about people and their entire livelihood aspect. That's why all steps are followed to ensure proper planning and this is where she requested the community members never to get tired of attending UNRA project meetings.</p> <p>She informed the community members that this project is funded by the European union and African Development Bank. For every projected to be funded by the abovementioned funders, there are some terms and conditions which must be followed to secure funding and one of them is that, all affected people and communities must be left at the same standard/level where the project found them or go up but not down so we want to see such communities growing. Even though some parts are taken but the remaining part should be used profitably.</p> <p>She further informed them that there is need to find ways how people may be helped to realize these developments.</p> <p>She clarified that such projects have slots for such programs for helping those affected and the communities restore their livelihood.</p> <p>She suggested that those issues are mentioned, prioritized and the solutions forged to help in solving the challenges.</p> <p>She suggested the community to divide into groups depending on sex and age, which the community members agreed to and groups of women, elders and youths were created because of the different needs and challenges of the different groups.</p>	
--	--	--

4.

All

No	Name	Question	Response
	Nalongo Robinah	have you ever done livelihood restoration plan anywhere or you starting with us and if you're starting with us why have you gone that far; hope UNRA is not making us happy for nothing?	<p>Like I said in the beginning that this road is funded by the European union and African development bank which have terms and conditions to be followed. KJE is one of the biggest road projects in Uganda and it is a Public-Private Partnership project where so many people are going to be affected so we have to mitigate the negative impacts and one of them is to try to restore people's livelihood.</p> <p>To other roads, some were funded by the Ugandan government, not so many people were affected like on KJE and most of these roads were existing but KJE is a new road and affecting many people.</p>
		In the initial phase people's houses were affected but now things have changed and there are totally new people affected with their properties affected. Why did it happen like so?	I am not so much in road design but that happens due to change of design of the road. A lot of things happen and forces the designers to change that's why some people are removed and others are included.
	Kayemba Godfrey	About the programs of helping our communities, are you going to start them now or you will wait for the project to start?	In most cases such programs come along with the project so they are likely to start when the project has started.

WOMEN'S GROUP
The following is the list of problems which affects the community women at large.
1. Poverty

2. Water- is very far and the nearest water stands have to be paid for yet people are poor and cannot afford to pay for the water Also tap water is not reliable.
3. Schools fees – men don't care about the children it's women who struggle with our children.
4. We have no market center- we plant our things but we have no place to sell them from, markets are too far from here.
5. Insecurity- Animals, birds and other agricultural products are stolen from the gardens and home. Most youths do mine sand, and these mining areas have also been affected by the project and have lost the jobs so they have resorted to stealing.
6. Unemployment- we lack capital to start up small businesses as women.

After listing the problems, women ranked them from the most pressing one to the least pressing problem as below.

PROBLEM	RANK
Unemployment	1
Poverty	2
Lack of market center	3
Water	4
Insecurity	5
School fees	6

Women suggested the possible solutions for the above mentioned and ranked community problems as below;

Table Showing the Community Problems, Rank and Possible Solutions

PROBLEMS	RANK	SOLUTIONS
Unemployment	1	<ul style="list-style-type: none"> ▪ The communities SACCOs we have are of high rate interests so we request the government to put a strict law on these high loan interest rates so that we borrow loans and get capital for small businesses.
Poverty	2	<ul style="list-style-type: none"> ▪ We request the government the sensitize us more on vocational skills such that we begin us our businesses at our homes. ▪ We request for financial support in the small businesses we have such that they expand. Government SACCOs can be put in place without loan interest rates. ▪ We request the government to supply us with animals and poultry so that we concentrate in livestock.
Lack of market center	3	<ul style="list-style-type: none"> • We request for a joint market for both villages and it should be for all that's to

		say men, women and youths because we are all farmers.	
Water	4	<ul style="list-style-type: none"> We need free, reliable and safe water in the community. So we need boreholes to each village 	
Insecurity	5	<ul style="list-style-type: none"> Youths should be given jobs to keep them busy and earn a living. <ul style="list-style-type: none"> The government should find another place for youths to collect their sand from and get more customers 	
School fees	6	<ul style="list-style-type: none"> UNRA should consider us as women on the project, in case of any job opportunity we should be called such that we earn money and pay for our children school fees. We should be helped on the above so that we start business and get money for school fees. 	

MEN'S GROUP

The Men's' group identified, prioritized and gave solutions as below;

Identification

- Capital – where by men have so many business ideas but we lack capital to put them in place.
- Water – water is very far which makes our wives and children walk long distances in search of water.
- Both affected and none affected community men will be affected.
- Unemployment- which keeps us poor
- School fees –since we have no jobs we can't afford school fees for children and women think we just refuse to pay.

Ranking:

The table below shows the ranked community problems according to men.

PROBLEMS	RANK
Water	1
Unemployment	2
School fees	3
Both affected and none affected community men will be affected.	4
Capital	5

Men suggested the possible solutions for the above mentioned problems and requested UNRA and the government at large to consider them so much because the all community and families stands on them as men.

PROBLEMS	RANK	SOLUTIONS
Water	1	<ul style="list-style-type: none"> We request for boreholes in our community.
Unemployment	2	<ul style="list-style-type: none"> The government can help us with capital and we start making bricks.

		<ul style="list-style-type: none">• We request for government support in agriculture and livestock rearing through supplying us animals and agricultural seeds.
School fees	3	<ul style="list-style-type: none">• Once the government supports us in farming and animal rearing we shall be able to get school fees for our children.
Both affected and none affected community men will be affected.	4	<ul style="list-style-type: none">▪ We request UNRA to follows us when the project starts mostly those ones who will go away and this can be easily done through registering all the affected people in SACCOs to ensure proper livelihood restoration.
Capital	5	<ul style="list-style-type: none">▪ We request UNRA to compensate us well and in time so that we can acquire fertile land for agricultural.▪ We want to be sensitized on how to do vocational skills so that we start up small businesses which doesn't acquire much capital.

YOUTHS GROUP

Youths also gave a list of community problems which affects them together and they are as below;

1. Health center- there is no government hospital in our community they are very far from here, in this community we have clinics and they also lack good health services like drugs and qualified health workers.
2. Unemployment –we have no jobs as youths even our places where we have been collecting sand from are affected by the project.
3. Insecurity –we have no security in this community which makes us fear to move at night from our places of work back home.
4. Education –in this community we only have one government primary school which is also of low standard yet we have so many going children.
5. Water – we have few water points in the community and they are too crowded.
6. Discrimination –government employs its people for example on Katosi road, UNRA employed only its people and community natives were left out.
7. Lack of capital - we have no capital to start up our own businesses as youths.
8. Poor access roads –this community has poor connecting roads which makes transport difficult.

After generating the list, the ranked these community problems from the most pressing to the least pressing problem as the table below illustrates.

PROBLEMS	RANKED
Capital	1
Unemployment	2

	<table><tr><td>Insecurity</td><td>3</td></tr><tr><td>Education</td><td>4</td></tr><tr><td>water</td><td>5</td></tr><tr><td>Poor access roads</td><td>6</td></tr><tr><td>Health center</td><td>7</td></tr></table>	Insecurity	3	Education	4	water	5	Poor access roads	6	Health center	7

5	<p>AGREEING</p> <p>The community members came back from the discussion in their respective groups and presented their work to other groups. However, the community members had questions and requests to make to the consultant and they went as below;</p> <p>Woman leader, she requested UNRA to employ their children on the project when it starts because they know the community norms and culture so this</p>	All																								

	<p>will reduce on the social issues which may arise due to poor behaved workers and above all most of these children are educated and hardworking.</p> <p>Consultant, UNRA has no problem with employing your children but the contract has a time frame which he/she follows but you find that local labor/workers are lazy and they don't take work serious since they know they are in their own community, they come late and always have excuses to miss work. That's why the Contractors usually come with their workers who are ready to work, so please as I report back to UNRA what you have said, also talk to your children to be serious when offered work.</p> <p>QN; contactors work in different parts of the country and whenever they go, they move with their own trained people for example SBI and ROKO company. So am asking how will the youths be employed yet the contractor has his/her own people.</p> <p>Consultant, that's what I have said, the contactors have been training their own people because local labor do not want to work which affects their time frame but it can be changed provided you also change.</p>	
--	--	--

CLOSURE

The chairperson of Lweza village thanked the UNRA/Consultant team for their coming and the community members' at large and their participation and promised continued cooperation till the completion of the project. He officially closed the meeting.

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF KYUNGU VILLAGE IN NSUBE PARISH, MUKONO DISTRICT ON 05TH /04/2018

AGENDA

1. Opening prayer
2. Remarks from the local leader
3. Presentation
4. Group formation
5. Agreeing
6. Closing

Attendees

Attendance list attached

NO	ACTION	PARTICIPANT
1.	OPENING PRAYER The chairperson led the opening prayer	Chairperson
2	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the UNRA team and the community members, she apologized for the poor turning up of community members and she informed the UNRA team that her people are fed up with UNRA's endless meetings, they just want to receive their compensation and go away so that's the reason why they haven't come. However, she opened the meeting well and promised to take back whatever has been discussed here to those one who didn't attend.	Chairperson
3	PRESENTATION The consultant welcomed the community members and apologized for the endless meetings but informed them that they are for better preparations of the community as regards the project. She introduced herself together with the team she moved with to the community members, she informed	Consultant (Mrs. Kavuma Esther)

	<p>them that the team comes from UNRA and the main reason for the visit is to do a livelihood restoration plan.</p> <p>She informed the community members that the Kampala-Jinja Express Highway is one of the biggest projects currently in Uganda and it's funded by the European Union and African Development Bank the which is so much concerned about people and their entire livelihood. That's why all steps are followed to ensure proper planning and this is where she requested the community members never to get tired of attending UNRA project meetings because each meeting is handling a different aspect of the project and which is vital.</p> <p>She informed them that for every projected to be funded by the above mentioned funders, there are some terms and conditions which must be followed to secure funds and one of them is that, all affected people and communities must be left on the same standard where the project found them, or go up but not down, so we want to see such communities growing. She also mentioned that when a project comes in the community, people are affected individually and communally but we had an earlier team which was talking to you individually, so now we want to look at the problem which affects the entire community and find a solution for them. She clarified that the project budgets for such programs which may help the community members restore back their livelihood.</p> <p>She explained to the meeting that to get the best out of the community we work in groups as we target the different groups of people and with experience it has been shown that different groups have different problems and therefore even come up with different solutions and different priorities and therefore requested them to divide in groups.</p> <p>However, after discussion the community decided they will work together as a community rather than splitting into groups.</p>	
4	<p>GROUP DISCUSSION</p> <p>The community came up with the list of activities done for cater for their livelihood and included the following;</p> <ol style="list-style-type: none"> 1. Agriculture – they plant all food and cash crops for example maize, beans, sugarcane, fruits, greens, cassava, potatoes among others. 2. Brick lying –both women and men 3. Stone quarrying – both men and women 4. Sanding mining- mostly men and they get this sand from the swamps 5. Industrial work- they work in nearby industries for example flower industry called Oasis nursery limited however it's also affected by the project and it takes both men and women, cooking oil industry. 6. Businesses- we have different businesses around for example retail shops, bars and restaurants <p>After generating the list of activities done in the community, the community members ranked them from the most done to the least done activity as the table below illustrates it.</p>	

ILLUSTRATION FOR THE RANKED COMMUNITY ACTIVITY

ACTIVITY	RANK
Agriculture	1
Brick lying	2
Sand mining	3
Stone quarrying	4
Industries	5
Businesses	6

After the above activity, the community members went ahead and listed the community problems which affects them in order of priority i.e. from the most pressing to the least pressing problem and later suggested the possible solutions as the table below illustrates;

PROBLEM	RANK	SOLUTION
Poverty	1	<ul style="list-style-type: none">➤ We request UNRA to construct for us a modern standard market along KJE road such that we get what to do and overcome poverty.➤ We request the government to support us financially such that we start up small businesses like bakery and poultry. This will help in fighting of poverty mostly in women.➤ We request for vocational skills development mostly in youths for example train them in welding, building, mechanics.➤ Sensitization on how to start up different jobs with less capital.
Market	2	<ul style="list-style-type: none">➤ We request the government to establish for us a modern market specifically for Kyungu village where we can sell our agricultural products.
Exhausted land	3	<ul style="list-style-type: none">➤ We request the government to sensitize and advise us on how to do modern farming. (Training in modern farming methods)➤ We request the government to supply us with good seeds, fertilizers and modern irrigation tools such that we improve on our agricultural system.

CLOSURE

The chairperson thanked the UNRA team for coming and the community members at large for their wonderful participation, she gave the closing prayer.

  EARTH SYSTEMS Environment • Water • Sustainability	Livelihood Restoration Planning for Mutungo 11&12 for the KJE PPP Phase 1 ESIA and RAP Update	
	DATE	5th April, 2018
	VENUE	Samanya Church
	MEETING START	14:30hrs
	MINUTES BY	
	MEETING VENUE COORDINATES	GPS: 469 36N0458819 UTM 0034582

Missing PAPs Register; Attached

Start time and objectives of the meeting
<ul style="list-style-type: none"> Identifying and prioritizing beneficial community projects for the remaining community The meeting commenced at 14:30 pm
Agenda items: <ul style="list-style-type: none"> Opening prayer Communication from the chair Issues arising and group presentations Response from the consultant A.O.B Closing remarks
Introductions
<ul style="list-style-type: none"> Members were welcomed by chairperson Mutungo 12 and prayer was led by one of the members. The national and Buganda anthems were sang respectively led by the chairperson. The chairperson continued welcoming members and thanked them for attending in large numbers however much it was on short notice. After the chairperson invited chairperson for zone 11 to say hello to the members.
Consultant's remarks
<p>From that point the chairperson invited the consultant to introduce the UNRA team and move on with the meeting.</p> <p>Dr. Assimwe the consultant thanked members for attending in large numbers and cautioned them never to give up. She took members briefly through the KSB/KJE projects. After she introduced the purpose of the meeting explaining that the developing partners that is ADB would like to develop the life styles of these communities by implementing projects that will benefit the entire community.</p> <p>The consultant also cautioned members affected by the project to prepare necessary documents and even open up bank accounts from any commercial bank of their choice. She also reminded those PAPS who missed the census exercise to register with them and keep in touch with the local leaders. The consultant went ahead and told members that ADB would</p>

like to develop these communities where the road will be passing to benefit the remaining community.

Members were told to form 4 groups of youth, men, women and the vulnerable. It was from point this point that the meeting got disorganized, members complaining that they didn't come to know about projects all they wanted was to know when they would be getting their money. Most of the members got furious however much the consultant tried to explain to them the purpose of the meeting but they could not listen. The chairpersons tried to calm down members but they were not paying attention. The meeting wasted like 30minutes without anyone listening to the other.

It was from this point that the chairperson with the help of some pastor asked members who weren't interested in the meeting to quietly march out and leave those who would like to participate.

Group Presentation

Members refused to divide themselves and said that they will participate as one group, and after they came up with the following projects:

- ✓ Drainage channels since during construction water floods a lot
- ✓ Schools both primary and secondary
- ✓ Public hospital
- ✓ Community centre
- ✓ Public toilets
- ✓ Play ground because the one available shall be affected by the road.
- ✓ Vocational training
- ✓ Street lighting
- ✓ Capital for the youth like machines for making pavers.

Consultant's remarks to the issues raised

After the consultant took over the floor for the ranking exercise. And members ranked the projects as follows:

1. Drainage channels
2. Schools
3. Community center
4. Hospital
5. Vocational institute.

The consultant thanked members for participating and informed them that the contractor by law is supposed to get 30% of human resource from within the community. After she thanked members for their patience and welcomed questions.

A.O.B

- Members asked questions like how long will they be given after payments before demolishing their structures
- Why is it that in other affected areas such developmental projects won't be put up, why only Mutungo
- There was a concern of members not being able to acquire loans since their properties have been marked
- Another concern was that tenants no longer want to pay rent claiming that those houses will be demolished soon.
- Then another concern was that with a community centre they can also have a public toilet because a community center comes with a public toilet.

The consultant answered that people should be patient because after valuation its quite a long process before they are told their amount to be compensated . She informed members that they are given 6 months after compensation to sort themselves out before they are demolished

About tenants she said that they won't be compensated but since their landlords will be compensated they are supposed to give 3 months in advance for free to the tenants as they also look for where to go.

The consultant also cautioned leaders to always make correct communication instead of members coming without knowing the purpose of the meeting which raises their expectations.

CLOSING REMARKS

- From that point the meeting closed down by the chairperson and he thanked members

Attendees information

- Members attended: 47 members.

Question	Response									
According to the way we see your KJE design, it's like the access roads are going to be a closed so what are we going to do as a community?	The design takes into consideration the existing roads. For those who have been along Entebbe express I hope the existing access roads are either below or above the Entebbe express, so the same will be considered on this road.									
Am from this community and I wasn't affected by KJE but I was affected by SGR so am I in the wrong place?	No you're not because we need your ideas and the livelihood restoration plan targets the individuals as well as the whole community, not only those affected but the entire community.									
Some of the people are going to shift so how will they benefit from the livelihood restoration plan?	You have stayed here for so long, you have relatives and friends who are not going to shift so you may come back and seek ideas for example agricultural ideas and use even communal facilities like health									

		centers however we still have another programs which targets those ones who will go away so still you will benefit.	
	some of us have plots along KJE which are not affected but we were told that it will be hard and impossible to enter this highway because it will be fenced. So am asking shall we be allowed to put a standard businesses let's say supermarket alongside the highway or we won't be allowed at all?	It is true the road will be fenced off and such businesses have specific places where they have been designed along the highway, but not every person would put up a supermarket. So I think people would apply to operate such businesses at the stop overs which I think you may to apply for. But we shall get to know the details with time.	
	<p>When the community members were convinced, they went ahead with the process of explaining the most done activities in the community and the challenges/problems faced while doing them and they are illustrated as below;</p> <ol style="list-style-type: none"> 1. Agriculture –this is the main activity in this community however community members lack good seeds which results into poor yields. 2. Livestock –the majority keeps animals like cattle, goats, pigs and then poultry but they lack proper and good animals' feeds because the most sold food is of poor quality and sometimes expired. 3. Brick laying –this is mostly for youths who uses their land which is now affected by the project so it will be hard for them to get another land for bricking making. 4. Sanding mining-this activity is also done by community youths and it's the main source of income to many youths here but the places where they have been collecting their sand from is affected by the project. 5. Offer labor services- this is where people go to farms and dig for others in order to earn a living and this activity is done by both male and female however it has little payments yet work is too much. 6. Industrial work- people work in industries like wheat flour, coffee, maize mill, and brewery and flower industries. Most of these industries are in the neighboring village called "Kyungu" village. 7. Stone quarrying- the major problem is that youths still crush stones manually which destroys their hands and slows down the work. 8. Rentals –the most problem we have is UNRA who marked our buildings so some tenants move out without paying and others avoid marked houses which causes a big lot to us the landlords. 9. Business-most of our businesses are not booming because we have no electricity and others can afford starting up big businesses but they all need electricity to run so this affects us and the entire community so much. <p>The community members clustered together some of the above activities depending on the category of people who participates in it so much. later</p>		

after that they ranked these activities starting with the most done activity to the least one as below;

CLUSTERED ACTIVITIES	RANKED
Agriculture and livestock	1
Brick lying, stone quarrying and sand mining	2
Industrial work and offer labor services	3
Businesses and rentals	4

The community members suggested the possible solutions for the above mentioned problems faced in doing their activities in the community and they are as illustrated below;

CLUSTERED ACTIVITIES	RANK	SOLUTIONS
Agriculture and livestock	1	<ul style="list-style-type: none"> • We need to be sensitized on how to farm in small places and yield much for example greenhouse farming. • Here the area is swampy, so we need water pumps to pump water from these swampy areas to people's gardens as a way of irrigating their plantations for better yields. • We need good and fast growing seeds for example beans, maize, tomatoes and banana steams to improve commercial farming. • Sensitize us on how to keep animals and poultry in cages and small places since most of us are to remain with small pieces of land. • We need solar for lighting mostly in poultry. • We request the government to supply us with exotic cattle from Kenya because they are kept from small places. • Most of us have fish ponds and they are affected so we request UNRA to help us with its trucks to dig deeper ponds for us in our remaining or new places such

			<p>that we rear many fish in small places.</p> <ul style="list-style-type: none"> • We request the government to reduce on the costs of the animal and poultry feeds for example pellet chicken food and big pig for piggery such that we feed well our animals and poultry well. • We request the government to supply us with modern machines to be used in both agriculture and livestock for example in poultry we need hatching machines and in agriculture we need modern granary and silos to keep our agricultural products for long till when the fertile and profitable market season comes. 	
--	--	--	--	--

Brick lying, stone quarrying and sand mining	2	<ul style="list-style-type: none">• We request the government to get another place where the youths can collect their sand from.• The youths should have trained on how to do metal fabrication and carpentry such that they divert from sand mining, brick lying and stone quarrying since they are affected to fabrication and carpentry.• Proper compensation should be done in time, so that youths look for another land which is suitable for brick lying and sand mining.• Capital is needed to buy plots of quarries so that we can earn more.• We request for modern machines which can break, crush stones and fasten the work for example back hoe machine and stone crusher and this will still stop human injuries during manual stone crushing.
Industrial work and offer labor services	3	<ul style="list-style-type: none">• We need electricity in the area such for industrial growth so that other than agriculture other may work in industries.
Businesses and rentals	4	<ul style="list-style-type: none">• The government should build vocational schools in this community to trains in our youths in skills development salon work, tailoring, carpentry and welding so that they create their own jobs.• We need electricity such that businesses like welding and salons grow and employ people.• We request the government to construct rental houses for the elders in their own land such that they collect money out of them month for a living since they can't work.
The chairperson requested the government to start pensioning the elders of this community since they are too old to work and the entire community supported the chairperson's suggestion		

Consultant, she informed the community members that all their suggestions and requests are well noted down and they will be presented to the Bosses.

After the above exercise, the community members went ahead and discussed the problems which affects the entire community, ranked them and suggested the possible solutions for them as shown below;

1. Health center-the health centers are very far from this community and the nearest is 6KM away however the Kabaka gave us a health center 2 with low standards of health services and its doesn't work at night and weekends. Its 2Km away from here.
2. Community playground- we have no place for community games and gathering.
3. Electricity- we have no electricity which affects our businesses.
4. No government or private primary school- in Nsube
5. Water-we have a lot of running waters.
6. Insecurity-we have no police station in our community.

They ranked the above problems starting with the most pressing to the least problem as below.

PROBLEMS	RANK
Health center	1
Electricity	2
Insecurity	3
No government schools	4
Water	5
Community playground	6

The community members suggested for the possible solutions of the ranked problems above as illustrated below;

PROBLEMS	RANK	SOLUTIONS
Health center	1	<ul style="list-style-type: none"> We request the government to build for us a Health Center 111 with good health facilities and workers.
Electricity	2	<ul style="list-style-type: none"> We request the government to give us transformers such that we connect our houses and factories to power We request the government to supply us powerful solar such that we begin businesses in our community.
Insecurity	3	<ul style="list-style-type: none"> We need to be trained in community policing
No government primary schools	4	<ul style="list-style-type: none"> We request the government to build for us a primary school in Namumira parish.

	Water	5	<ul style="list-style-type: none"> The Government should provide the sewage line so that we can be able to use the water borne toilets being that our area has a high water table. 	
	Community playground	6	<ul style="list-style-type: none"> We request the government to build for us a modernized playground with toilets; <ul style="list-style-type: none"> ✓ this will help the community to increase its revenue through hiring this place for functions. ✓ promote the youth and children's their sports talents. 	
5.	AGREEING The community members agreed on the discussed above issues and requested the consultant to present them to the concerned authorities. The Consultant thanked the community members for their participation and requested for their cooperation till the end of the project.			All
6	CLOSURE The chairperson thanked the community members for their participation and requested the UNRA officials to quicken the compensation process because people have over waited. He thanked the consultant for the great work done and he closed the meeting.			All

6. Closing

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer session was respected by everyone around and it was let by one of the community member.	Miss Namayega Jane
2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the Consultants and the community members as well, he apologized for the poor turn up of the community members but he informed the consultant that its morning and working hours so the majority had gone in the gardens however the few around will take the information to the rest. He mentioned another challenge that the community had not yet got the surveyors to demarcate the road corridor, so until then, the people are not so active about the project meeting because they are have not known how they will be affected. He officially opened the meeting.	Chairperson (Mr. Mate Johnson)
3.	PRESENTATION	Consultant

	<p>The consultant welcomed the community members and apologized for the endless meetings but informed them that they are for better preparations of the community as regards the project. She introduced herself together with the team she moved with to the community members, she informed them that the team comes from UNRA and the main reason for the visit is to do a livelihood restoration plan.</p> <p>She informed the community members that the Kampala-Jinja Express Highway is one of the biggest projects currently in Uganda and it's funded by the European Union and African Development Bank the which is so much concerned about people and their entire livelihood. That's why all steps are followed to ensure proper planning and this is where she requested the community members never to get tired of attending UNRA project meetings because each meeting is handling a different aspect of the project and which is vital.</p> <p>She informed them that for every project to be funded by the above mentioned funders, there are some terms and conditions which must be followed to secure funds and one of them is that, all affected people and communities must be left on the same standard where the project found them, or go up but not down, so we want to see such communities growing.</p> <p>She also mentioned that when a project comes in the community, people are affected individually and communally but we had an earlier team which was talking to you individually, so now we want to look at the problem which affects the entire community and find a solution for them. She clarified that the project budgets for such programs which may help the community members restore back their livelihood.</p> <p>She explained to the meeting that to get the best out of the community we work in groups as we target the different groups of people and with experience it has been shown that different groups have different problems and therefore even come up with different solutions and different priorities and therefore requested them to divide in groups.</p> <p>However, after presentation the community decided they will work together as a community rather than splitting into groups.</p>	(Mrs. Kavuma Esther)
4.	<p>GROUP FORMATION</p> <p>The community members requested the consultant to discuss together not in groups since they were few and the consultant agreed to that.</p> <p>The community members listed all the main activities done in this community and how they can be helped to enhance these activities so that they can be restored if affected by the project. They are as follows;</p> <ol style="list-style-type: none"> 1. Agriculture-the community grows different crops like cassava, beans, matooke and many more for both subsistence and commercial however we have a problem of expired pesticides which causes poor agricultural yields. 2. Livestock –we rear different animals like piggery, cattle keeping, goats and poultry however we lack market where to sell our products. 	All

	<div>3. Sand mining- we have some mining places here and others we min from far and collects the sand here however some of the sand collecting places are affected by the project.</div> <div>4. Brick making- we do brick making from our homes and this work is mostly done by the youths.</div> <p>The activities were listed in order according to the most activity done to the least one and later the community members suggested the possible solutions for the challenges while doing these activities.</p> <table><tr><th>ACTIVITY</th><th>RANK</th><th>SOLUTIONS</th></tr><tr><td>Agriculture</td><td>1</td><td><div><div></div><div><ul style="list-style-type: none">We request UNRA to plant fruit trees along the sides of the roads such that our environment is conserved so that we there is an effect as regards better yields for the agricultural yields.We request the government to introduce for us a machine which checks and screens out the expired, poor sprays and pesticides for both animals and plants or to put up policies that do not allow expired and fake drugs to be imported or produced in Uganda.We request the government to restore back our butcher (Lufula) at Kyetume so that we can have jobs, sale of our agricultural products and other related developments in the area brought about by thesuch that we get manure for plants like matooke to ensure better yields.We request the government to improve on the security of this community such that our agricultural products are safe in the garden.</div></div></td></tr><tr><td>Livestock</td><td>2</td><td><div><div></div><div><ul style="list-style-type: none">We request the government for the machine which checks for proper and good animal drugs.We request the government to restore back our butcher “Kyetume Lufula” which was taken in 1984 because its land, water tanks, electricity and slaughter houses are still there. This butcher will help us get a market for our animals.</div></div></td></tr><tr><td>Sand mining</td><td>3</td><td><div><div></div><div><ul style="list-style-type: none">We request the government to get for us other places where we can collect our sand from.We request UNRA to employ our youths such that they earn from the project instead of sand mining.</div></div></td></tr><tr><td>Brick making</td><td>4</td><td><div><div></div><div><ul style="list-style-type: none">We request for fair and timely compensation such that we buy land for brick making.</div></div></td></tr></table>	ACTIVITY	RANK	SOLUTIONS	Agriculture	1	<div><div></div><div><ul style="list-style-type: none">We request UNRA to plant fruit trees along the sides of the roads such that our environment is conserved so that we there is an effect as regards better yields for the agricultural yields.We request the government to introduce for us a machine which checks and screens out the expired, poor sprays and pesticides for both animals and plants or to put up policies that do not allow expired and fake drugs to be imported or produced in Uganda.We request the government to restore back our butcher (Lufula) at Kyetume so that we can have jobs, sale of our agricultural products and other related developments in the area brought about by thesuch that we get manure for plants like matooke to ensure better yields.We request the government to improve on the security of this community such that our agricultural products are safe in the garden.</div></div>	Livestock	2	<div><div></div><div><ul style="list-style-type: none">We request the government for the machine which checks for proper and good animal drugs.We request the government to restore back our butcher “Kyetume Lufula” which was taken in 1984 because its land, water tanks, electricity and slaughter houses are still there. 5.	<div>AGREEING</div> <p>The community members agreed on the above mentioned problems and solutions concerning the activities on which their livelihoods depend.</p>	All															

Appt from that they mentioned the problems affecting their community explained common community problems which affects them, and requested the project to work on these challenges and presented them below indicating the problems, prioritized and given a solution.;

1. Health- we have one private hospital called CBXC and it's very expensive the majority can't afford the services offered.
2. No community center- we lack a place where we meet for community discussions
3. Insecurity –we have a lot of thieves here who takes our cattle, goats and poultry that's we no longer keep animals here, we have a very poor police station which has one motorcycle and it doesn't enable them to monitor the entire community in case of any serious problem.
4. Unemployment-most of our youths here are jobless which makes them to indulge in bad habits and practices like theft, drug abuse and related risk behaviors etc.

The community members ranked the above problems from the most pressing problem to the least pressing one as the table below,

ILLUSTRATION FOR THE RANKED COMMUNITY PROBLEMS

PROBLEMS	RANK
Health	1
Insecurity	2
Unemployment	3
Community center	4

After ranking the community problems, the community members generated the possible solution as illustrated below;

PROBLEMS	RANK	SOLUTIONS
Health	1	<ul style="list-style-type: none"> We request for Government aided Health Center being affordable for everyone in the community that's to say the poor and the rich.
Insecurity	2	<ul style="list-style-type: none"> We request for a Police Station/Post with quality services and also increase on the number of policemen on this police post Policemen should be facilitated with transport means, (motorcycle and vehicle) for proper monitoring of the community.
Unemployment	3	<ul style="list-style-type: none"> We request the government to restore back our butcher (Kyetume Lufula) such that our youths employed there.
Community center	4	<ul style="list-style-type: none"> We request for the government to construct for us a community center where we can meet as a community and use it for other community related functions.

	<p>CONCERN</p> <p>The community members informed the consultant that the butcher (Kyetume Lufula) has 50 acres of land and they requested the government to deduct a small part it for the playground because they have so many schools in the community but they lack a playground which can be used by the schools for recreational and health purposes promoting the children's talents in football, netball and other sports.</p> <p>Consultant, she informed the community members that all their issues and concerns are well written down and they will be presented well to the concerned authorities.</p>	
--	--	--

CLOSURE

The consultant thanked the community members for their participation and she handed over the meeting to the chairperson.

The chairperson also thanked the UNRA team for the great work done and the community for their r participation. He officially closed the meeting.

Missing PAPs Register; Attached

Start time and objectives of the meeting
<ul style="list-style-type: none"> Identifying and prioritizing beneficial community projects for the remaining community The meeting commenced at 11:00 am.
Agenda items:
<ul style="list-style-type: none"> Opening prayer Communication from the chair Issues arising (the meeting) Response from the consultant A.O.B Closing remarks
Introductions
<ul style="list-style-type: none"> Meeting started with a prayer from the chairperson of Nsimbe kassi after he thanked members for attending. Then the national and Buganda anthem were sang respectively led by a one "musajja wakabaka". The chairperson invited the UNRA team and again thanked members for attending on short notice. The consultant welcomed members and explained to them that mostly they needed the remaining community most but still the affected persons were also free to engage in the meeting. The consultant explained that ADB was concerned with the remaining communities where these roads are going to pass because they were doing really badly. So ADB suggested that some beneficial projects should be put up so that the remaining community should also enjoy the road project. So they suggested that members should come up with these projects because its them that know what they want.
Consultant's remarks
<p>The consultant cautioned members to keep with the topic and assured members who were affected by the road that they will be compensated. She explained to them that after this exercise the team will go to the upper leaders like the divisions and ministries to find out what plans they have for these communities so as not to put up the same projects.</p> <p>The consultant asked members to divide themselves into 4 groups of men, women, youth and the vulnerable so as for each group to come up with their own projects.</p>
Group Presentation

This move of group formation was not welcomed by members sighting that they all had the same challenges as people of Nakawa. The area councilor Musimenta Noeline suggested that they would participate as one group. The councilor also said that whichever stage those projects reach, they should always consult the locals. She also urged UNRA team and the developing partners to always be vigilant because the upper leadership like divisions and ministries have a system of sabotaging community projects.

So with such cases the members suggested that such consultations and meetings should be held with both KCCA officials and the locals so as not to sabotage the projects. These were some of the suggested projects:

1. Residential houses based on condominium system. This was because the area remaining not affected was very small moreover KCCA doesn't allow single strolled buildings anymore in and around city centre.
2. Social utilities like churches, mosques
3. The remaining community needs land tittles because KCCA refused to offer them saying that they are in road reserve
4. Shopping arcades or malls
5. Parking facilities so that people can park their cars then proceed to the city.

That's how members ranked their projects according to what they prefer most.

A.O.B

At this point one of the members said that many people were left out during the census exercise and he wondered what they would do.

Another concern was that PAPs should be compensated fairly

The consultant told members that those who missed census exercise should come and register and wait to be contacted.

During this meeting the consulting team sighted indifferences within this community and KCCA. Members insisted that they don't trust KCCA not even once.

CLOSING REMARKS

- The meeting was closed with a prayer from the chairperson . he again thanked members and he again confirmed that they have no trust in KCCA So which ever stage reached the locals should always be informed.
- The meeting was closed at 12:15 hrs

Attendees information

- Members attended: 49 members.

Question	Response									
Does this livelihood restoration plan target the entire community or it targets the project affected persons only?	It targets the project affected persons and the entire affected community to ensure that this community and its people remains or goes up the standard where the project found this community and its people.									
Some people are going to go away so how will they benefit from this livelihood restoration plan?	both will benefit because we have programs of following up those ones who will go away and those ones who will stay however the majority won't go so far so still they will utilize these services or seek ideas from those ones who will stay.									
Is UNRA going to shift us or we shall shift ourselves?	in Uganda people don't like physical replacement apart from a very few who asks for it and the vulnerable ones like the aged, disabled among others. So in most cases you have a									

	choice either to look for it yourself or you inform UNRA that you want them to give you land. Also the disturbance allowance which is added onto your compensation package will cater for the transport wherever you want to go.													
<p>NB: The community members suggested and requested the consultant to consider the two group i.e. those who are going to completely move away from Galabi and those who shall stay.</p> <p>a) THE ONES WHO WILL GO; suggestions included,</p> <ol style="list-style-type: none">1. Whoever goes away should be given money from the budget of the livelihood restoration plan and he/she decides how to restore their livelihoods2. We request UNRA to solve the community problems which we may find in the new places where we are going to. For example, UNRA brings water close to us. <p>b) THE ONES WHO WILL STAY</p> <p>For the community members who shall stay, the community identified the community problems and explained them as below;</p> <ol style="list-style-type: none">1. Health center- there are no government Health facilities within reach; and they either have to go to Mukono Health centre IV (16 Km away) of Kawolo-Lugazi Health Centre Iv (15Km) away from Galabi.2. Water-we have few water points in this community and most of them are affected by the project.3. Community halls- There are community meeting facilities in the area.4. SACCOs-the SACCOs around have very little money which doesn't help us.5. Market- There is no market to serve the community although they are far from the known market areas of Mukono town and Lugazi of about 15-16 Km from Galabi. <p>Later, the above explained problems were ranked from the most to the least pressing problem and possible solutions were suggested by the community members as illustrated in the table below;</p> <table><tr><th>RANKED</th><th>PROBLEMS</th><th>SOLUTIONS</th></tr><tr><td>1</td><td>Health center</td><td><ul style="list-style-type: none">• We request the government to build a Health C facility.</td></tr><tr><td>2</td><td>Market</td><td><ul style="list-style-type: none">• We request for a standard market in this comm sale of the community product, thus boosting agriculture.</td></tr><tr><td>3</td><td>Community hall</td><td><ul style="list-style-type: none">• We request the government to build a state of standard community hall .</td></tr></table>			RANKED	PROBLEMS	SOLUTIONS	1	Health center	<ul style="list-style-type: none">• We request the government to build a Health C facility.	2	Market	<ul style="list-style-type: none">• We request for a standard market in this comm sale of the community product, thus boosting agriculture.	3	Community hall	<ul style="list-style-type: none">• We request the government to build a state of standard community hall .
RANKED	PROBLEMS	SOLUTIONS												
1	Health center	<ul style="list-style-type: none">• We request the government to build a Health C facility.												
2	Market	<ul style="list-style-type: none">• We request for a standard market in this comm sale of the community product, thus boosting agriculture.												
3	Community hall	<ul style="list-style-type: none">• We request the government to build a state of standard community hall .												

	4	Water	<ul style="list-style-type: none">We request for the construction of boreholes in the community.									
	5	SACCOs	<ul style="list-style-type: none">We request the government to support our community existing SACCOs financially such that we borrow money and get capital to inject into the businesses.									
5.	AGREEING The community members agreed on the above community issues and the suggested solutions for both groups, however they had concerns and questions which they presented to the consultant; Concerns Presented by the Community Members <table><tr><th>Question/Concern</th><th>Response</th></tr><tr><td>we request the government to buy the very old people soap monthly because this side pension hasn't reached</td><td></td></tr><tr><td>Can you assure us that the project design won't change again?</td><td>Due to some issues the project design changed but now I believe it's the last design.</td></tr><tr><td>When are you coming back to pay us, because we want to know whether we should plant on these plot or not?</td><td>Please plant seasonal crops like beans, maize because even after payment you will be given some time and you will be able to harvest the seasonal crops but don't plant perennial crops.</td></tr></table> The consultant thanked the community members for their turning up and full participation in the meeting, she assured them that every affected person will be compensated for it's just a matter of being patient a little. The consultant handed the meeting back to the chairperson.			Question/Concern	Response	we request the government to buy the very old people soap monthly because this side pension hasn't reached		Can you assure us that the project design won't change again?	Due to some issues the project design changed but now I believe it's the last design.	When are you coming back to pay us, because we want to know whether we should plant on these plot or not?	Please plant seasonal crops like beans, maize because even after payment you will be given some time and you will be able to harvest the seasonal crops but don't plant perennial crops.	All
Question/Concern	Response											
we request the government to buy the very old people soap monthly because this side pension hasn't reached												
Can you assure us that the project design won't change again?	Due to some issues the project design changed but now I believe it's the last design.											
When are you coming back to pay us, because we want to know whether we should plant on these plot or not?	Please plant seasonal crops like beans, maize because even after payment you will be given some time and you will be able to harvest the seasonal crops but don't plant perennial crops.											
	CLOSURE The chairperson thanked the consultant and the community members for turning up for the meeting and all the ideas that they have shared with the consultant's team. He requested the team to present all the issues presented. He officially closed the meeting.

IN MUKONO DISTRICT ON 09TH /04/2018**

AGENDA

1. Opening prayer
2. Remarks from the local leader
3. Presentation
4. Group formation
5. Agreeing
6. Closing

Attendees

Attendance List Attached

NO	ACTION	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by the community member	Mr. Mugaga Ronald
2.	REMARKS FROM THE CHAIRMAN LCI The chairperson welcomed the community members and thanked them for attending the meeting yet it is challenging season of being in the gardens. He welcomed the consultancy team and introduced the team to the community members; he informed the consultants that the community members have a number of questions which they are seeking answers for. The chairperson requested the people to be calm, participate in everything and ask as many questions as possible and he officially opened the meeting.	Mr. Wankoye David
3.	PRESENTATION The consultant welcomed the community members and apologized for the number of meetings they have attended related to project, but informed them that these meetings are for preparations of the community for the project. She introduced herself together with the team she was working with to the community members, informed them that the main purpose for	Consultant (Mrs. Kavuma Esther)

	<p>the meeting was to come up with programs/projects that will be considered for the livelihood restoration planning.</p> <p>She informed the community members that the Kampala-Jinja express highway is one of the biggest projects currently to be implemented in Uganda and it's funded by the European Union and African Development Bank, of which the funders are concerned about restoration of the people's livelihood and the community at large. That's why all steps are followed to ensure proper planning and this is where she requested the community members never to get tired of attending UNRA project meetings.</p> <p>She further informed the community members that the above mentioned funders, have terms and conditions which must be followed to secure funds and one of them is that, all affected people and communities must be left on the same level where the project found them, or go up but not down so we want to see such communities growing. Even though some parts are taken but the remaining part should be developed.</p> <p>She also elaborated that when a project is introduced in the community, people are affected individually and communally, but we had a team which was talking to you individually but we also have a team that addresses you as a community and hope we shall have solutions to the issues that we are shall discuss.</p> <p>She clarified that the funds that will be used for the livelihood programs will not in any way affect or be part of their compensation packages, because the project budgets for such programs of livelihood restoration.</p> <p>She informed them how the exercise would be done; in that we should have groups of youth, women, men and elderly if there are there; this is so because each category have issues and their needs and how they are implemented sometimes is totally different. In those groupings, we shall mention the problems, rank them and then find solutions to those problems.</p> <p>She requested them to move into the groups where they belong; i.e. women, men, youth and the elderly if they there. Then come back in the central place and present what we have done in the groups.</p>					
4.	<p><u>GROUP FORMATION AND DISCUSSION</u></p> <p>Groups of women Youth and men were formed. However, before discussion in those groups questions related to the exercise and other project related questions were asked and included the following.</p> <table><tr><th>Question</th><th>Response</th></tr><tr><td>In this community we have the disabled persons however they haven't come here but they are affected by the project. So am asking won't you need their views and ideas in this exercise?</td><td>we need their views and ideas so much but since they are not here we have nothing to do so we request you to discuss for them also what will help them to</td></tr></table>	Question	Response	In this community we have the disabled persons however they haven't come here but they are affected by the project. So am asking won't you need their views and ideas in this exercise?	we need their views and ideas so much but since they are not here we have nothing to do so we request you to discuss for them also what will help them to	All
Question	Response					
In this community we have the disabled persons however they haven't come here but they are affected by the project. So am asking won't you need their views and ideas in this exercise?	we need their views and ideas so much but since they are not here we have nothing to do so we request you to discuss for them also what will help them to					

		improve their livelihood as the disabled one.	
	we are from different parts of the village, affected differently and at a different standard of living because we don't different jobs or activities to earn a living so why don't you ask us individually?	we had a team which was talking to you individually and am sure they reached everyone here but now we are looking at the jobs done in the entire community and problems affecting the community as well, so if we go person per person it is time consuming yet we are trying to fasten the process and we won't get what exactly affects the community. So let's discus together and generate the possible solutions as one community.	

DISCUSSION OF GROUP WORK

Women's Group

The women engage in a number of activities which are faced with a number of challenges that form a basis for the problems which may be increased by the project and therefore need intervention to work on these challenges so that their livelihoods are restored.

The following is the presentation.

ACTIVITY	PROBLEM FACED WHILE WORKING
Agriculture and livestock	<ul style="list-style-type: none">➤ Unstable weather, sometimes it's too sunny and other times it's too rainy which affects their yields.➤ Some of the community members who keep animals for free range; they move around, eat and destroy crops in the in the gardens.➤ It's very expensive for us to transport our agricultural yields from gardens to home and from there to market.➤ We lack market for our agricultural products.➤ We have a problem of pests and diseases in both agriculture and animals.➤ There is insecurity in the community where by thieves steal our foods from the gardens, animals and poultry.➤ Animal feeds are very scarce and expensive, this makes us feed them locally hence have poor and low breeds of animals.➤ Veterinary doctors' gives us expired drugs for our animals and pesticides for our plants which affects our yields and a times leads to death of our animals.➤ We also face a problem of expensive labor in case you need help in the gardens.

	Brick making	<ul style="list-style-type: none">➤ We invest in much since we are ladies we can't do some activities in brick making for example "Okupanga tanuru"., setting the bricks burning.➤ We face a problem of unstable weather.➤ The men we call to help us in counting the bricks from "Tanuru" (Piling the bricks burning) for sale cheats us since they know we are ladies we don't know how to count them.➤ We face a problem of expensive raw-materials used in this brick lying activity for example firewood and brick covers (Ebivera).				
	Businesses	<ul style="list-style-type: none">➤ We lack capital to expand our small businesses as women.➤ We also have a problem of price fluctuation which affects our profits so much.➤ We face a problem of transporting our products from the source (where you have bought them) to the market. This is so costly.➤ We have debtors who completely refuse to pay and this affects the business so much.				
	Tree planting	<ul style="list-style-type: none">➤ Animals eat our trees when they are still young.➤ Some type of soil is not suitable for particular tree spices to grow.➤ During dry seasons, some people do bush burning and in the process our trees are burnt.				
	Fetching water	<ul style="list-style-type: none">➤ You can get a contract of supplying building site water, but in most cases they don't want to pay us yet we supply them water at a very low price (400 per jerry can).➤ Since we are women, we face a problem of chest pain because these jericans of water are too many and heavy for us yet some do this work when they are pregnant.➤ During rainy season we don't work because they harvest rain water.➤ We have few water points here and during working hours they are all crowded which slows down our work for example you end up supplying 30 jerry canes instead of 100.				
	Service providers (hiring out tents, plates and saucepans on parties)	<ul style="list-style-type: none">➤ Some people whom we hire our things steal them.➤ We also have a problem of competition since many women here do this kind of work.➤ Destruction of our materials for example some people over burn our saucepans, even when you wash and scrub them they don't go back to the normal.				
After listing and explaining all the problems and challenges faced in work, women discussed and came up with the possible solutions to ensure that their livelihood is improved as illustrated below;						
<table><tr><td>RANKED</td><td>PROBLEMS</td><td>SOLUTIONS</td></tr></table>				RANKED	PROBLEMS	SOLUTIONS
RANKED	PROBLEMS	SOLUTIONS				

	1	Agriculture and livestock	<ul style="list-style-type: none"> • We need pumps to pump rain water and improve our irrigation system. • The government should improve on the type of Pesticides manufactured. • The government should give us capital such that we hire labor in our gardens. • The government should provide one qualified person in each community to help us check the animal drugs and pesticides such that we avoid the expired ones. • We request the government to sensitize us on how to do modern farming such that we earn more from small places. • The government should build for us a standard market where we can sell our agricultural products. • UNRA should maintain for us the connecting roads to ensure easy movement of our agricultural products from gardens to the selling places. 	
	2	Brick making	<ul style="list-style-type: none"> • We request the government to give us startup capital “Entandikwa” as women so that we buy raw-materials like brick covers. • We need water pumps to pump water from its source to the brick making site. 	
	3	Business	<ul style="list-style-type: none"> • We request the government to give us capital such that we expand our small businesses. • We request the government to reduce on the loan interest rates such that we all access these loans as a way of getting capital. 	
	4	Tree planting	<ul style="list-style-type: none"> • We request the government to provide us improved tree species which grows fast and resistant to pests. • The government should provide for us free tree seedlings. 	
	5	Fetching water	<ul style="list-style-type: none"> • We request to be considered for the water sources including; boreholes, taps and protected springs. • The government should employ us such that we divert from fetching water to other jobs. • The government should reduce on the business tax so that we begin shops. • We have our women groups which we request the government to support but 	

			the support should come direct to us not pass through the local leader.																		
6	Service providers(hiring out tents, plates and saucepans)	<ul style="list-style-type: none">• The government should help to monitor quality of what is produce like producing quality saucepans, plates and tent chairs.• The government should provide us with a police station where we report people who steal our things like plates.																			
<p><u>Youths Group</u></p> <p>The youths of this community mostly do business and they are specialized in produce.</p> <p>Their main problem is capital to expand their business and to start up new businesses.</p> <p><u>Men’s Group</u></p> <p>Men presented their problems faced in doing work, started with the most pressing problem to the least pressing one and later suggested the possible solutions for as illustrated in the table below;</p> <table><tr><th>RANKED</th><th>PROBLEMS</th><th>SOLUTIONS</th></tr><tr><td>1</td><td>Agriculture</td><td><ul style="list-style-type: none">• UNRA should let us know the time frame in which we are going to be paid in so that we plan well what to plant and when to harvest since we grow different plants like sugarcanes, greens, trees, and more food crops. This will help us restore back our agricultural life in time.</td></tr><tr><td>2</td><td>Livestock</td><td><ul style="list-style-type: none">• We request UNRA to compensate us well and in time such that we transport our animals like cattle, goats and poultry earlier to new place and this will save them from dying.</td></tr><tr><td>3</td><td>Brick making</td><td><ul style="list-style-type: none">• We need good compensation such that we look for another land suitable for brick lying.</td></tr><tr><td>4</td><td>Rental houses</td><td><ul style="list-style-type: none">• We request UNRA if possible to do physical replacement for our affected rentals.• Proper valuation and in time payments such that we replace our houses mostly rentals.</td></tr><tr><td>5</td><td>Businesses</td><td><ul style="list-style-type: none">• We request UNRA to build for us markets and shopping malls for rent at a cheaper price such that our businesses go on.</td></tr></table>				RANKED	PROBLEMS	SOLUTIONS	1	Agriculture	<ul style="list-style-type: none">• UNRA should let us know the time frame in which we are going to be paid in so that we plan well what to plant and when to harvest since we grow different plants like sugarcanes, greens, trees, and more food crops. This will help us restore back our agricultural life in time.	2	Livestock	<ul style="list-style-type: none">• We request UNRA to compensate us well and in time such that we transport our animals like cattle, goats and poultry earlier to new place and this will save them from dying.	3	Brick making	<ul style="list-style-type: none">• We need good compensation such that we look for another land suitable for brick lying.	4	Rental houses	<ul style="list-style-type: none">• We request UNRA if possible to do physical replacement for our affected rentals.• Proper valuation and in time payments such that we replace our houses mostly rentals.	5	Businesses	<ul style="list-style-type: none">• We request UNRA to build for us markets and shopping malls for rent at a cheaper price such that our businesses go on.
RANKED	PROBLEMS	SOLUTIONS																			
1	Agriculture	<ul style="list-style-type: none">• UNRA should let us know the time frame in which we are going to be paid in so that we plan well what to plant and when to harvest since we grow different plants like sugarcanes, greens, trees, and more food crops. This will help us restore back our agricultural life in time.																			
2	Livestock	<ul style="list-style-type: none">• We request UNRA to compensate us well and in time such that we transport our animals like cattle, goats and poultry earlier to new place and this will save them from dying.																			
3	Brick making	<ul style="list-style-type: none">• We need good compensation such that we look for another land suitable for brick lying.																			
4	Rental houses	<ul style="list-style-type: none">• We request UNRA if possible to do physical replacement for our affected rentals.• Proper valuation and in time payments such that we replace our houses mostly rentals.																			
5	Businesses	<ul style="list-style-type: none">• We request UNRA to build for us markets and shopping malls for rent at a cheaper price such that our businesses go on.																			
5	<p><u>AGREEING</u></p> <p>Each group as categorized presented their discussions as shown above and the entire community agreed on them however the community members had concerns and requests to make from UNRA as discussed below;</p>																				

	<ol style="list-style-type: none"> 1. Access Roads-Community members requested UNRA to work on the community access roads as they are working on KJE to enable them move and transport their products. 2. Water bodies- most of the water points are going to be affected by the project so they requested UNRA to provide sources of income like, protected springs since its safe water is safe and free (no payment) for everyone. 3. Schools- the entire community has no government primary school and the private ones are also very expensive so they requested the government to build schools. 4. The community members requested UNRA to inform them earlier next time for the meeting such that all the people attends 5. For those who will stay, we request UNRA after the six months of compensation to give us a disturbance fee because noise, dust and contaminated water will be too much here. 6. We over attend endless UNRA meetings yet we come from far and we are always informed late so we request UNRA to provide for us transport allowance and drinks at least for very meeting. <p>Consultant, she thanked the community members for participating and assured them that all their concerns, requests and issues are well written down and they will be presented to the people concerned. She handed back the meeting to the chairperson.</p>	
--	---	--

CLOSURE

The chairperson thanked the UNRA officials for the great work done and asked them to handle all the community members well during compensation because most of the community members are affected and they are going to begin afresh sine most of their land had been taken by the project. He later thanked his people for participation and closed the meeting.

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF NANGWA AND KIWUGO VILLAGES IN NAMUYENJE PARISH MUKONO DISTRICT ON 10TH /04/2018

AGENDA

1. Opening prayer
2. Remarks from the local leader
3. Presentation
4. Group formation
5. Agreeing
6. Closing

Attendees

Attendance List attached

NO	ACTION	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by one of the community members from Kiwugo village	Mr. Jjuuko Godfrey
2.	REMARKS FROM THE LOCAL LEADER The chairperson of Nangwa village welcomed all the community members and the UNRA team as well. He assured all people security while in his village and requested the community members to participate because all the preparations are for the good of the community. He officially opened the meeting and invited the consultants to take over.	Chairperson Nangwa village (Mr. Lubega Moses)
3.	PRESENTATION The consultant welcomed the community members and apologized for the endless meetings but informed them that they are for better preparations of the community as regards the project. She introduced herself together with the team she moved with to the community members, she informed them that the team comes from UNRA and the main reason for the visit is to do a livelihood restoration plan.	Consultant Mrs. Kavuma Esther

	<p>She informed the community members that the Kampala-Jinja Express Highway is one of the biggest projects currently in Uganda and it's funded by the European Union and African Development Bank the which is so much concerned about people and their entire livelihood. That's why all steps are followed to ensure proper planning and this is where she requested the community members never to get tired of attending UNRA project meetings because each meeting is handling a different aspect of the project and which is vital.</p> <p>She informed them that for every projected to be funded by the above mentioned funders, there are some terms and conditions which must be followed to secure funds and one of them is that, all affected people and communities must be left on the same standard where the project found them, or go up but not down, so we want to see such communities growing. She also mentioned that when a project comes in the community, people are affected individually and communally but we had an earlier team which was talking to you individually, so now we want to look at the problem which affects the entire community and find a solution for them. She clarified that the project budgets for such programs which may help the community members restore back their livelihood.</p> <p>She explained to the meeting that to get the best out of the community we work in groups as we target the different groups of people and with experience it has been shown that different groups have different problems and therefore even come up with different solutions and different priorities and therefore requested them to divide in groups.</p> <p>However, after discussion the community decided they will work together as a community rather than splitting into groups.</p>	
4.	<p>GROUP FORMATION/DISCUSSION</p> <p>The community members requested the consultant to discuss together as a community not in groups such that they think and generate possible solutions together as one community.</p> <p>The consultant granted their wish and they discussed together and presented their community problems as below;</p> <ol style="list-style-type: none"> 1. Health centers- the health centers are very far from here the nearest are in Mukono town and Seeta Nazigo. The Namuyenje Health Center III has poor structures, no drugs, expired drugs and the nearby clinics are very expensive the majority of the community cannot afford the treatment cost. 2. Water and electricity- in Kiwugo village there is no electricity and water in some areas of Nangwa and no water and power in Kiwugo. The available water points are affected by the project. 3. Insecurity- due to poverty and unemployed people, there is excessive stealing of people's properties and killing of community members. 4. Lack of government secondary school- both villages lack secondary schools for both private and government, there is only one private secondary school and it's very expensive so this contributes to high levels of dropouts in the community. 	

5. Poverty-we don't have businesses and the few we have are very poor which keeps the community in poverty. The factories around pays little money (4000) per day which can't sustain a person with his/her family.

The community members ranked the above mentioned problems and gave the possible solutions for each of them as illustrated below;

RANKED	PROBLEMS	SOLUTIONS
1	Health center	❖ We request the government to build for us a good structured of Health Center III facilitated with drugs and qualified health workers.
2	Poverty	<ul style="list-style-type: none"> ❖ Some women keep animals like goats, cattle and poultry then other have small businesses like kiosks so they need financial support to improve what they are doing. ❖ Youths needs Boda Bodas such that they are sure of a daily income. ❖ Our land has been taken where we have been practicing agriculture and rearing animals from so we request the government to sensitize us on how to do modern farming and animal rearing on small pieces of land. This will help us overcome poverty. ❖ We request the government to support the community projects like piggery and poultry. ❖ We request the government to provide incentives on animal drugs and pesticides such that we improve our agriculture and livestock for example if the animal drug is 10,000/= the government pays 2000/= and we buy it at 8000/=. ❖ The government should set a standard payment for the minimum wage so that the factories do not exploit the workers from these factories (especially the Chinese workers); this will help us more what is enough for personal and family sustainability.
3	Lack of government secondary schools	❖ We request the government to build for us good Secondary school to serve the communities in these areas
4	Insecurity	❖ The government should train the youths in vocational development skills like mechanic, carpentry and salon to enable them create their own businesses.

			<ul style="list-style-type: none">❖ We request for a police post in Nangwa village since we have so many factories.														
	5	Water and electricity	<ul style="list-style-type: none">❖ We request for piped water however in Nangwa we have tap water already so we just want it to be extended from Nangwa to Kiwugo.❖ For electricity in Kiwugo we totally don't have and in Nangwa we just need extension of poles up to Muwonge zone.														
5.	<p>AGREEING</p> <p>The community members agreed upon the discussed issues and requested the consultant to present them well as discussed to the authorities in UNRA. However, the community members had some questions which they asked and the consultant as below;</p> <table><tr><th>Question</th><th>Response</th></tr><tr><td>We are going to die of hunger because we fear to plant crops. So when are you going to pay us?</td><td>Compensation is a process so am not sure of when the payments will be done but its being worked on. However, you can go ahead and plant seasonal crops because even when you're paid you will be given time to harvest your crops.</td></tr><tr><td>The new road passes through the middle of the community so how will we connect to the next village?</td><td>In most cases the design of the highway doesn't affect the existing roads, it either passes down or up the existing road so you will be able to move freely from one village to another.</td></tr><tr><td>Will there be any transport allowance for those who will be shifting?</td><td>we have what we call disturbance allowance on top of compensation and the disturbance allowance caters for that. It's either 30 or 15% depending on the time given to shift</td></tr><tr><td>Assuming the project passes through my grave yard and I loss someone after valuation what should I do</td><td>The graves were considered and the number of graves at the particular time of counting were considered, If you burry after valuation that means that grave won't be paid for so you either burry elsewhere or you burry there and transfer it together with the valued ones using the money for the compensated ones.</td></tr><tr><td>My name is Adikin Florence Deborah and my entire land was taken where I have been farming from so am asking how will I benefit from the livelihood restoration plan?</td><td>You will be catered for in that category, and when the right time comes, the UNRA officials will be moving around to identify such people so don't worry every affected person will be helped.</td></tr></table>				Question	Response	We are going to die of hunger because we fear to plant crops. So when are you going to pay us?	Compensation is a process so am not sure of when the payments will be done but its being worked on. However, you can go ahead and plant seasonal crops because even when you're paid you will be given time to harvest your crops.	The new road passes through the middle of the community so how will we connect to the next village?	In most cases the design of the highway doesn't affect the existing roads, it either passes down or up the existing road so you will be able to move freely from one village to another.	Will there be any transport allowance for those who will be shifting?	we have what we call disturbance allowance on top of compensation and the disturbance allowance caters for that. It's either 30 or 15% depending on the time given to shift	Assuming the project passes through my grave yard and I loss someone after valuation what should I do	The graves were considered and the number of graves at the particular time of counting were considered, If you burry after valuation that means that grave won't be paid for so you either burry elsewhere or you burry there and transfer it together with the valued ones using the money for the compensated ones.	My name is Adikin Florence Deborah and my entire land was taken where I have been farming from so am asking how will I benefit from the livelihood restoration plan?	You will be catered for in that category, and when the right time comes, the UNRA officials will be moving around to identify such people so don't worry every affected person will be helped.	
Question	Response																
We are going to die of hunger because we fear to plant crops. So when are you going to pay us?	Compensation is a process so am not sure of when the payments will be done but its being worked on. However, you can go ahead and plant seasonal crops because even when you're paid you will be given time to harvest your crops.																
The new road passes through the middle of the community so how will we connect to the next village?	In most cases the design of the highway doesn't affect the existing roads, it either passes down or up the existing road so you will be able to move freely from one village to another.																
Will there be any transport allowance for those who will be shifting?	we have what we call disturbance allowance on top of compensation and the disturbance allowance caters for that. It's either 30 or 15% depending on the time given to shift																
Assuming the project passes through my grave yard and I loss someone after valuation what should I do	The graves were considered and the number of graves at the particular time of counting were considered, If you burry after valuation that means that grave won't be paid for so you either burry elsewhere or you burry there and transfer it together with the valued ones using the money for the compensated ones.																
My name is Adikin Florence Deborah and my entire land was taken where I have been farming from so am asking how will I benefit from the livelihood restoration plan?	You will be catered for in that category, and when the right time comes, the UNRA officials will be moving around to identify such people so don't worry every affected person will be helped.																

	<p>Lastly the Kiwugo community members requested the consultant next time to meet them separately and from their village because the distance from their village up to Nangwa is too long for them.</p> <p>The Consultant, thanked the community members for turning up in big numbers and for their participation in the discussion and requested them to stay patient and calm till the end of all the project activities.</p>	

CLOSURE

The chairperson thanked the consultant for the work done and both communities at large for their participation, He requested the community members to attend all the meetings till the day everyone will be compensated. The chairperson officially closed the meeting I.

<ul style="list-style-type: none"> CHAIRPERSON: Okumu Charles V/CHAIRPERSON: Begombe James Francis
Agenda items: <ul style="list-style-type: none"> Opening remarks Discussion A.O.B Closing remarks
Opening remarks
<ul style="list-style-type: none"> Meeting started with the chairperson welcoming members and thanked them for attending. Second the prayer was led by one of the members. Then Uganda and Buganda anthems were sung respectively. Opening Remarks The chairperson once again welcomed members and cautioned them of maximum participation because the meeting of their advantage. He first informed members what transpired from the previous meeting they had held with UNRA officials. In that meeting market leaders were suggesting redesigning the road so that the market wouldn't be affected. But the chairperson informed members that UNRA team said that they couldn't change the road. During that same meeting, UNRA rescheduled another meeting with market leaders so that they could sit down together look at the designs of the road and see how they can go about it. After that communication the chairperson invited the consultant to take over the floor.
Consultant's remarks
The consultant Dr Asiimwe asked her team to introduce themselves and briefly hit on the KJE project. The consultant told members the purpose of the meeting. Sighting that African

Development Bank (ADB) being part of the donors felt like helping the communities where the road will be passing. And that it was those very communities who were to come up with beneficial projects according to what they feel they are challenged with.

The market being such a very big community with over 20000 vendors, the consultant with the advice from the chairperson of the market decided to hold this engagement with the leaders of zones within the market.

Group Presentation

The consultant told members that they were to come up with projects they think will benefit their communities. And after as a group they were to prioritize what is needed most and rank them. And the consultant told members to divide themselves into 4 groups of youth, men women, and the vulnerable. But members suggested that they would participate as a group but they would give projects according to the 4 categories mentioned above.

1. Youth

- ✓ Kibirige Julius one of the youth suggested building for them a new market first before they think of evicting them.
- ✓ Public toilet because one of them is getting affected
- ✓ Recreational centre for the youth.
- ✓ Processing factories within the market to help them add value to their produce, like juice making machines and constructing cold rooms for meat and fruits
- ✓ A play ground because they usually hold annual football tournament and they don't have a play ground.

2. Women

- ✓ Day care centre and kindergarten because as women they have kids yet they wake up early in the morning around 4am to come to the market
- ✓ Public market
- ✓ Technical training to gain hand skills
- ✓ A clinic within a market to help working mothers to monitor their kids without missing work
- ✓ A local taxi park to transport their customers to and from the market.
- ✓ Flyovers through which their customers and themselves could cross such a busy road.
- ✓ Clean and safe water all over the market and running all the time.

3. Men:

- ✓ Public modern market

- ✓ Public toilet
- ✓ Taxi stages should be reinstated
- ✓ Ample parking space for the market dwellers.

4. Vulnerable:

- ✓ special consideration during the compensation process because life is harder with them compared to others
- ✓ access routes for the disabled and elderly with the new market like constructing ramps
- ✓ specialized public toilets for the disabled and elderly
- ✓ a gazetted place for the disabled in the new market

Priority ranking

Members all agreed on a public modern market which had the following:

- daycare and kindergarten
- clinic
- public toilets with running water
- ramps and rails for the vulnerable
- recreational hall
- underground parking
- market should be paved because it normally gets muddy when it rains
- A new plan should be agreed by the Nakawa market leaders.

A.O.B

- Yikoba Nasser, one of the members showed concern where would the people be passing because he heard that the road shall be fenced. So he requested for a look at the design of the road if possible.
- Hamis another member suggested that the new market proposal should be given to KCCA so as they include it in the plan.
- James Francis requested that whenever there are interventions about the new market, traders and their leaders should be part of the team so as to put in their submissions as stakeholders.

<ul style="list-style-type: none"> Kibirige Julius showed concern of such projects of markets not being implemented like the case with Ntinda market which hasn't been constructed up to then. Yet they claim all funds are there. So he cautioned the donors to do away with any obstructions.
CLOSING REMARKS
<ul style="list-style-type: none"> Chairperson thanked members for their participation and he thanked the consultation team for endeavouring to always consult them about market issues. He also promised to always being available in case he is needed. The meeting ended at 13:22hrs with a closing prayer.

Attendance List attached

NO	ACTIVITIES	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by one of the community members and a member of the seventh day church.	Mr. Bisaso William
2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the community members and thanked them for attending the meeting; she asked for their effective participation and requested them to ask necessary questions because the consultant has all the answers. She officially opened the meeting.	Chairperson (Mrs. Aleper speciozer)
3.	PRESENTATION The consultant welcomed the community members and apologized for the number of meetings they have attended related to project, but informed them that these meetings are for preparations of the community for the project. She introduced herself together with the team she was working with to the community members, informed them that the main purpose for the meeting was to come up with programs/projects that will be considered for the livelihood restoration planning.	Consultant (Mrs. Kavuma Esther)

	<p>She informed the community members that the Kampala-Jinja express highway is one of the biggest projects currently to be implemented in Uganda and it's funded by the European Union and African Development Bank, of which the funders are concerned about restoration of the people's livelihood and the community at large. That's why all steps are followed to ensure proper planning and this is where she requested the community members never to get tired of attending UNRA project meetings.</p> <p>She further informed the community members that the above mentioned funders, have terms and conditions which must be followed to secure funds and one of them is that, all affected people and communities must be left on the same level where the project found them, or go up but not down so we want to see such communities growing. Even though some parts are taken but the remaining part should be developed.</p> <p>She also elaborated that when a project is introduced in the community, people are affected individually and communally, but we had a team which was talking to you individually but we also have a team that addresses you as a community and hope we shall have solutions to the issues that we are shall discuss.</p> <p>She clarified that the funds that will be used for the livelihood programs will not in any way affect or be part of their compensation packages, because the project budgets for such programs of livelihood restoration.</p> <p>She informed them how the exercise would be done; in that we should have groups of youth, women, men and elderly if there are there; this is so because each category have different issues and their needs and how they are implemented sometimes is totally different. In those groupings, we shall mention the problems, rank them and then find solutions to those problems.</p> <p>She requested them to move into the groups where they belong; i.e. women, men, youth and the elderly if they there. Then come back in the central place and present what we have done in the groups.</p>	
4.	<p>GROUP FORMATION</p> <p>The community members accepted and divided into four groups; the elderly, women, men and the youths. The following are the presentations from each group:</p> <p><u>Women's Group</u></p> <p>The women listed and explained their problems as follows;</p> <ol style="list-style-type: none"> 1. No government schools- the community has no government school for both primary and secondary. They only have private expensive schools which are also few and therefore not affordable a number of the community members. 2. Health center- the health centers are very far from the community and the nearest is 5 miles away and for example women may go into labor any time of the day. 	All

3. Water- the community has no free water sources but only piped water which has to be paid for, and a number of community members dare not able to pay for the piped water.
4. Unemployment-as women we lack capital for the expansion of our small businesses.
5. Electricity-in some of the areas, there is no power which limits development like setting up of some cottage industries, saloons etc

The women prioritized the above problems starting from the most to the least pressing problem and suggested the possible solutions for them as illustrated in the table below;

PRIORITY	PROBLEMS	SOLUTIONS
1	No government schools	<ul style="list-style-type: none"> We request the government to build both primary and secondary schools in Bukasa community.
2	Health centers	<ul style="list-style-type: none"> We request for a Health Centre IV facility well stocked with drugs and health workers .
3	Unemployment	<ul style="list-style-type: none"> We request UNRA to give the first priority as women when it comes to employment opportunity on the project because we can do different works for example cooking for workers etc. We request the government to train us in vocational developmental skills like hair dressing and tailoring such that we create our own jobs. We request the government to give us “Entandikwa” as women such that we begin businesses and support our small businesses financially so that they expand and we earn more as women
4	Water	<ul style="list-style-type: none"> We request for free clean and accessible water in the community i.e. at least 2 boreholes in Bukasa village.
5	Electricity	<ul style="list-style-type: none"> We request for the extension of Rural electrification line under Rural Electrification Agency in Bukasa village.

The Elderly Group

The elders discussed the common problems affecting them entirely, listed them, prioritized them starting with the most to the least pressing one and later gave the possible solutions for them as illustrated below;

PRIORITY	PROBLEMS	SOLUTIONS
1	Health center	<ul style="list-style-type: none"> Since we are aged, we need a nearby health center for regular medical check-ups. So we request for a health center III in our community with standard health services.
2	Water	<ul style="list-style-type: none"> We request for protected springs because they are accessible by everyone in the community and are free of charge.
3	walk over	<ul style="list-style-type: none"> The main road is very busy and we the aged find it hard to walk, so we request for better walk over/Fly over aside the main road.
4	Electricity	<ul style="list-style-type: none"> We request the government to extend power to all the parts of the community.
5	Insecurity	<ul style="list-style-type: none"> We request for a police station in our community such that we and our properties are well protected.
6	Poor environment	<ul style="list-style-type: none"> The environment is already bad and then the project has affected most of our forests so we request UNRA to supply us trees so that we re-afforest rate. We request UNRA to plant trees alongside the road so that we protect our environment.
7	Poor farming	<ul style="list-style-type: none"> Request for sensitization on the modern farming methods Training the community on how to utilize small places for agriculture and yield much.
8	Market	<ul style="list-style-type: none"> We request the government to build standard market where we can buy and sell goods.

The Youth's Group
The community youths also discussed their community issues, listed them down in order of priority starting with the most to the least pressing issue and later gave the possible solution for each problem as illustrated in the table below;

PRIORITY	PROBLEMS	SOLUTIONS
1	Unemployment	<ul style="list-style-type: none"> We request the government to replace our butcher "Lufula" such that youths get employed there. We request UNRA to employ us on the project when it starts so that we

			<p>get capital and start businesses as youths.</p> <ul style="list-style-type: none"> • We request the government to give us small loans as youths so that we look after our animals well for sell and we pay later when we have also go some interest out of it. 	
	2	Health centers	<ul style="list-style-type: none"> • We request a Health facility to provide health services to the community 	
	3	Schools	<ul style="list-style-type: none"> • Most of the parents around are poor since they are unemployed, so we request the government to give our children Bursaries. • We request the government to build for us schools both for primary and secondary here in Bukasa village. 	
	4	Agriculture and livestock	<ul style="list-style-type: none"> • The majority of the people in the area are farmers growing crops like tomatoes and greens for sale and more food crops like beans, maize, among others so government should: <ul style="list-style-type: none"> ✓ Stop importation and manufacturing of fake drugs and pesticides ✓ The government should restore back the butcher "Lufula" so that we get market for our animals and manure for our agricultural plants like Banana plantations. 	
	5	Water	<ul style="list-style-type: none"> • Here water is very far from the community, so we request for more taps for those ones who can afford the payments and then boreholes for the rest who can't afford tap payments. 	
	6	Insecurity	<ul style="list-style-type: none"> • When KJE project starts, it will bring more thieves from Kampala to our community so we request for more security on our lives and properties in our area. 	
	7	Poor sanitation and cleanness	<ul style="list-style-type: none"> • We have very few public toilets in the community so we request the government to build for us public urinals and toilets as this area tend to be urbanized. • The community lacks a proper place for waste disposal. We request the government to either build for us 	

			such a place or give us trucks to collect rubbish from the community.															
	8	Market	<ul style="list-style-type: none">We request the government to replace our butcher “Lufula” since it was our main market .															
	9	Lack of vocational skills	<ul style="list-style-type: none">We request the government to train us in vocational development skills like welding, building, tailoring, hair making and many more so that we gain skills of creating our own jobs as youths.															
	10	Lack of Companies	<ul style="list-style-type: none">We request the government to start up factories and companies this side so that youths are employed for example the government can put a branch of Darling company in Bukasa village for job creation.															
	<p><u>Men’s Group</u></p> <p>Men discussed and presented their community issues, well ranked in order from the most to the least pressing problem together with the possible solutions for each problem as shown below;</p> <table><tr><th>PRIORITY</th><th>PROBLEMS</th><th>SOLUTIONS</th></tr><tr><td>1</td><td>Health center</td><td><ul style="list-style-type: none">In most cases it’s us men who struggles at night to take the women to the hospital while in labor pains and here the health centers are very far. So we request for a well-facilitated Health centre in the Community.</td></tr><tr><td>2</td><td>Tree cutting</td><td><ul style="list-style-type: none">This project has affected all our forests, so we request UNRA to supply us free tree seedlings such that we replace the ones cut to avoid drought and soil erosion in our community therefore environmental restoration.</td></tr><tr><td>3</td><td>Water</td><td><ul style="list-style-type: none">In this community water is very far and a few near water points are affected by KJE so we request for boreholes as a replacement for what is going to be lost.</td></tr><tr><td>4</td><td>Access roads</td><td><ul style="list-style-type: none">We want UNRA to leave our access roads open during the construction of KJE.</td></tr></table>			PRIORITY	PROBLEMS	SOLUTIONS	1	Health center	<ul style="list-style-type: none">In most cases it’s us men who struggles at night to take the women to the hospital while in labor pains and here the health centers are very far. 4	Access roads	<ul style="list-style-type: none">We want UNRA to leave our access roads open during the construction of KJE.																
5.	<p>AGREEING</p> <p>After the group discussions, the community members came back to the main meeting and each group presented as shown above and they all agreed on what has been discussed however they had a few questions as below;</p> <table><tr><th>Question</th><th>Response</th></tr></table>			Question	Response													
Question	Response																	

	<p>all groups have mentioned different problems so how will you identify the most pressing problem for the community and how will it be solved?</p>	<p>we look at the common problems raised from all the groups and follow the right procedures including the consultation of other stakeholders about it for example the sub-county, however, some help comes when it's specifically targeting a particular group of people in the community for example employment opportunity can come to solve the problem of poverty in the community but when its targeting the youths only.</p>	
	<p>The Consultant thanked the community members for their participation towards the success of this meeting and the livelihood restoration planning. She informed the community members that they shouldn't worry about the issue of the access roads because the design for KJE puts into consideration all the existing roads.</p> <p>She thanked the chairperson and handed the meeting back to the chairperson for closure.</p>		
6.	<p>CLOSURE</p> <p>The chairperson thanked the consultant for the great work she has done and requested UNRA through her to fasten the compensation process because people have over waited and they want to plan their shifting early enough. She thanked the community members for their participation and later closed the meeting.</p>

NAMUGONGO DIVISION- WAKISO DISTRICT ON 19TH /04/2018**

AGENDA

4. Opening prayer
2. Remarks from the local leader
3. Remarks from consultant
4. Group formation
5. Discussion and Prioritizing
6. Closure

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by the chairperson of Namboole.	Mwiima GEOFREY
2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the people and also asked the other leaders to introduce themselves which was done. He also thanked the people for turning up. He welcomed the consultant and team to the area and asked them to introduce themselves to the community.	Chairperson Mwiima GEOFREY
3.	PRESENTATION by the Consultant The consultant and her team introduced themselves. Ms. Sophia thanked the people for turning up every time they are called upon and for being interested in government programs. She told the people that the previous exercise of census was not	Consultant (Ms. Sophia Ashaba)

	<p>effectively handled due to poor mobilization and the rain which disrupted the process. She further informed them that that's why they are back to effectively carry out the census of all the farmers and also do a livelihood restoration program.</p> <p>Some of the issues that arose were:</p> <ul style="list-style-type: none"> • One lady Nasabu Kabugo, said that she was on railway land which she bought in 1996. Ever since UNRA came, other people in this community started abusing and cutting our plants and gardens. Most of the crops have been destroyed. What will I do because now I even can't show evidence of those crops and plants? • A one Musinguzi Arafat, said "for us the real owner of the land died and when UNRA came like 5 years ago, we were not there and we don't stay around this place? How do we get helped? • For us people told us to go away from the land that it's for UNRA and we went away, how do we get helped? • Some other lady said that in some meeting with Unra they were told that there are some crops which they don't compensate like maize, sweet potatoes, beans, cassava, etc and yet she goes through a lot to plant them, harvest them and interestingly these plants when I harvest, I sell and have been able to get school fees for my children. How shall we really be treated? • We have very many scattered pieces whose size we don't know. How do we go about this? <p>Reaction from the consultant.</p> <ul style="list-style-type: none"> • She asked Ms Kabugo if she had reported the case to the leaders or even police. The consultant advised that such cases are supposed to be reported first to the chairperson and then later to police but UNRA doesnot handle them. • She also encouraged the community not to just believe any rumors. If UNRA needs to communicate anything, it will be communicated through the right channels. She availed them the contacts of KJE project and told them in case of any questions about the project, they should just call and confirm and she further advised the community to always attend meetings organised by UNRA and the chairperson to get first hand information and get advised on what is supposed to be done but not to depend on baseless hearsay. 	
4	GROUP FORMATION	All
	<p>THE ELDERLY FGD ACCORDING TO PRIORITY</p> <p>1. Help us with the rubbish people who put the rubbish in our</p>	Elderly women

	<p>gardens and cows which destroy our crops.</p> <ol style="list-style-type: none"> 2. There are very many thieves who steal our crops and there is no where we can report. We used to report to Namboole management and they said we should be arrested because we are scoters. We therefore need security or a police post here in the valley. 3. We need job opportunities on the project like eating places and any other work we can do. 4. We need street lights on the road. <p>MEN FGD ACCORDING TO PRIORITY</p> <ol style="list-style-type: none"> 1. We need a gazetted agricultural land where we can continue farming. 2. We need a government secondary school to complement the primary. 3. We also need financial help for our local Sacco's and other projects. 4. Employment opportunities for the local youth on the project. 5. Health Centre since the existing one is far from this place. 6. A vocational school where our children, wives and youth can gain various skills. 7. Sports academy that's public for the younger generation. <p>WOMEN FGD ACCORDING TO PRIORITY</p> <ol style="list-style-type: none"> 1. We need another gazette place where we can do our agriculture. 2. Parking lot where we can sell our things from and get some money. 3. Small shopping mall. 4. We need to do some business there like restaurants and other eating places on this high way. 	<p>Men</p> <p>Women</p>
5.	CLOSURE: The meeting was closed by the chairperson who led in the closing prayer.	Mwiima Geofrey

A LIVELIHOOD RESTORATION PLAN FOR THE COMMUNITY MEMBERS OF BANDA B1 NAKAWA DIVISION- KAMPALA DISTRICT ON 19TH /04/2018

AGENDA

1. Opening prayer
2. Remarks from the local leader
3. Remarks from consultant
4. Group formation
5. Discussion and Prioritizing
6. Closure

Attendees

Attendance List attached.

NO	ITEM	PERSON RESPONSIBLE
1.	OPENING PRAYER The opening prayer was led by pastor Alele George.	Alele Goerge
2.	REMARKS FROM THE LOCAL LEADER The chairperson welcomed the people and also asked the visitors to introduce themselves which was done.	Chairman Banda B1 -Moto Moro JOHN
3.	PRESENTATION by the Consultant She welcomed the people and asked which language they were most comfortable with and they said it was English. She told them that the main reason for the meeting was for the livelihood restoration program which was one of the requirements of the funders. And so the communities had	Consultant Sophia Ashaba

to look out for their most pressing need as agreed from the various groupings.

She gave an opportunity to anyone who hadn't understood the reason for the meeting.

On gentleman requested that as a community they should be given time to sit down and agree so that they would bring the feedback to the consultant.

Ms Sophia rather requested the community to brainstorm the likely livelihood programs since the quorum was enough and that those present will represent those that are not around are staying in the same community, they knew the needs and can ably represent those who are absent, which the community agreed to.

Some of the issues that came up were:

- Another gentleman said that “we request that the progress of this project be quickened because most of our activities are on a standstill, our houses no longer have tenants, the children have left affected schools, banks are demanding their interest and many others.
- There was another concern of whether there was going to be a revaluation given the fact that some people were valued a year ago and with current the standards of living the property value is now high compared to the last time valued. The consultant Ms Sophia informed them that the valuers will value them again and that the communication will come through the chairperson on when they will be back.
- Another issue raised was in regard to land grabbing and ownership of which the consultant informed the responsible parties to go through their area chairpersons and first sort out those issues in preparation to compensation. She further informed them that UNRA is not responsible to

	handle such cases, and later alerted that some of those issues delay compensation.	
4	GROUP FORMATION	All
	<p>THE YOUTH FGD ACCORDING TO PRIORITY</p> <ol style="list-style-type: none"> 1. We want the project to provide us with jobs. 2. We have different groups so if we can be helped and supported financially or do for us a project. 3. We need a police post in this area because of the insecurity. 4. We would like to have stages and bus stop places for buses and taxis along the road with stage shelters and on these stage shelters the youth should be allowed to operate some small businesses and also boda-boda on these stages should be allowed. 5. Reconstruct our source of water which will be destroyed by the project and also work on the water drainage system. 6. Modern market 7. We need a public toilet. 8. We also need good public schools. 1. We also need a recreational center where we can discover and exploit our talents. 2. We need flyovers on the KJE road. <p>THE MEN FGD ACCORDING TO PRIORITY</p> <ol style="list-style-type: none"> 1. The school in the neighborhood (cream land) is affected by the project, can we have it relocated within this community? 2. Access road from Acholi quarters to the main road should be put in consideration. 3. Construct for us other water points since the existing one will be destroyed. 4. We need a local market area since some of those areas will be destroyed. 5. Make a provision to rebuild worship centers that are affected. 	<p>Youths</p> <p>Men</p> <p>Women</p>

	<p>6. We also need a health center within this community.</p> <p>THE WOMEN FGD ACCORDING TO PRIORITY</p> <ol style="list-style-type: none"> 1. A project that will generate money for the women. 2. We need a public market. 3. We need a health center' 4. We need public tap with constant tapped water. 5. We need government schools primary, secondary, vocational and for adult education. 6. Put in more electric poles. 7. Provide garbage containers. 8. We need jobs on the project even after the project even if it's sweeping. 9. We need support for elderly women and the widows, 10. Our number is too big, we need a parish. 	
5.	<p>. CLOSURE</p> <p>The meeting closed at 16:00hrs with a closing prayer led by Alele George</p>	Alele George

Question/Comment	Responses (UNRA)
5) Member 1 Members ask about large interchange area.	Raymond replies that the interchange needs to be big to cater for high speed volumes.
6) Member 2 A member of the meeting asked about pedestrian crossings along the expressway	Raymond mentioned that these crossings shall be underpasses and there shall be access roads as well.
7) Member 3 A member gives an example of Angola where on a similar road the government evicted people along the expressway for private investments	Raymond replied to this by mentioning how sensitization is on-going and there is hope that that won't be the case in Uganda as well Raymond mentioned how Chainage 33 is where the rest area shall be. And this is at Sezibwa Falls
8) Member 4 A member asked for an update on Kasokoso and Kinawataka areas	Monica then mentioned in interest of time for Patrick (KJE Project Manager), Cities Alliance makes their presentation first then we address those two areas afterwards
Julian (Cities Alliance) presentation	
<ol style="list-style-type: none"> He introduces Cities Alliance and gives their background. He mentions global lessons he has learned along the way These being key lessons moving forward He mentions how there is a need to establish a global best practice. By linking the road development to a broader in situ-slum upgrading. And having a programme of investments into those communities. In exchange for rapid relocation from road reserves, UNRA can work with Cities Alliance to negotiate with communities on how to relocate them to upgraded urban communities. For example, satellite cities. Julian then presented pictorial evidence of previous upgrades of slums in Alexandra, Johannesburg, South Africa and in Alagados, Bahia, Brazil.

CITIES ALLIANCE (Follow up meeting)
Date: 16th March 2018

Introduction

- Introductions by members

14) Julian (Head of Programmes, Citi Alliance)

Asked about what safe guards are being applied in Uganda.

- He mentioned a need for a broader strategy required for funding.
- One strategy being for how to relocate and compensate people. Another strategy for the broader community.
- He then mentioned how EU is a member of Cities Alliance and have funded a lot of their projects.
- He asked the team to come up with a broad base strategy.
- To have a backup plan for PAPs who will be worse off after being relocated.
- He mentions that a concept note needs to be designed for EU to fund the project.
- Focus on people who are going to battle the relocation.
- And identify different types of communities and their safe guards. And work out a strategy for them.
- He outlines the 5 frames/headings of the Concept Note as:
 - Governance; existing institutional structure.
 - Citizenship; who are the people being affected.
 - Services; basic services needed like drainage for example.
 - Economy; an Economic Programme that can enable people to recognize benefit of living along the expressway.
 - Environment; how shall it be affected.

15) Edgar (Atacama Consulting)

Mentions that we are going by the IFC standards.

- He mentions that we must make sure livelihood restoration is achieved and that there shall be ongoing monitoring and evaluation.
- He then mentioned how Phase 1 of the census is done and currently data is being input into Survey CTO.
- About 7,700 structures have been surveyed so far.
- And that inventory of loss is being done by the UNRA team.
- Edgar describes the different categories of people being affected and their potential needs.
- The focus though being primarily on vulnerable people.

- Hence the concept note shall specifically address vulnerable people then the wider community at large

16) Julian (Head of Programmes, Citi Alliance)

- Julian has tasked the team to put together a concept note in 6 weeks' time.
- See how we are going to meet IFC standards in partnership with Cities Alliance.
- Julian emphasizes that we need to establish a structure to deal with this issue.
- Not a proposal but simply an objective, target and broad frame.
- Land audit for a resettlement plan being key.
- After which EU can sign off on the programme and give funding.
- He mentions that there is a need to interact with National Housing Authority and find out what land is out there and explore the different options.
- There is a need to establish a mechanism to make this happen.
- He mentioned that EU and AFD promised to back the programme. Though they won't sign off safe guards unless a programme is set out.
- And a reference of the concept note needs to appear in the phase 1 report.

17) Edgar (Atacama)

- Edgar is going to organize a meeting between Nigel Murphy and Sam Mabala (Commissioner of Urban Development, Ministry of Works)
- Edgar mentioned that in about 2 weeks' time the team shall go back to the communities to engage the PAPs on the livelihood restoration plan.
- Edgar suggested creating a smaller footprint for the Nakawa Market vendors, like a tall structure.
- He also suggested microfinance schemes for PAPs, either as clusters or inject capital to grow their businesses.
- There is a possibility of developing the land in between SGR and KJE.
- Low cost housing, but only after current income is increased to afford these and pay over time.
- Improving sanitation was another suggestion from Edgar.
- He also mentioned that UNRA wrote to the Ministry of Defence asking about the veteran's livelihood restoration plan.
- Edgar to share programmes that the consultants have come up with

18) Frederic (ACTogether Uganda)

Suggested improving the services of people affected in the surrounding community.

19) Edgar (Atacama)

Edgar mentioned that we are looking into how other projects affect this area (Kasakoso & Kinawataka) and KJE is affecting them as well

20) Sam

Sam points out that National Housing Authority suggested a few areas that could be pockets for resettlement. And hence an opportunity for low cost housing (Satellite City) there though funding is required.

He mentions that we need to engage National Housing Authority in the discussion, to know how much of their land is being taken up by KJE

21) Joe Muturi (Slum Dwellers International)

Joe mentioned that market vendors need to be consulted first, so that structures created for them are what they can work with.

- That accessibility is key to such establishments.
- And that there is a need to engage the community further to meet their needs.
- Livelihood Restoration engagement in 2 weeks' time at communities can be used to gather more information for the concept note and programmes.

22) Sam

Sam mentioned that the meeting with National Housing Authority will primarily address relocation and income generating activities for PAPs

23) Edgar (Atacama)

Edgar gave an example of roadside nurseries and how they can generate income for people selling them along KJE

24) Joe Muturi (Slum Dwellers International)

Joe mentioned that for livelihood engagements it might be easier to engage groups/associations of PAPs rather than individuals

25) Edgar (Atacama)

Edgar mentioned that we need to think about the HIV/AIDS hotspots not increasing because of KJE. And creating noise barriers for both KJE and SGR

26) Sam

Sam suggested committees to be formulated to steer and implement these programmes

Agreements from the meeting

- ACTogether to share previous reports on Kinawataka and Kasakoso with Atacama.
- Atacama to also share latest findings with the team.
- ACTogether to come up with Citizenship write up, Atacama to share environmental findings and Economy to be written by all for the concept note.
- All agreed that KCCA needs to be brought on board to know their development plans for the affected areas
- Cities Alliance to share structure for concept note and clearly specify different roles. And by next week, begin populating it.
- Proposed meeting with National Housing Authority tentatively on Monday 26th March 2018 at 10 am at the Commissioner's Office. Nigel Murphy to be informed about this meeting.

- Sam to confirm with National Housing Authority about meeting. Then send out invitations.
- Slum Dwellers International to come up with alternatives to relocating people.
- Next week, exchange of information shall happen.
- Closing Remarks from Sam Mabala.
- End of Meeting.

C.4.5 Schedule of Government Consultation Meetings

THE SCHEDULE OF GOVERNMENT CONSULTATIONS FOR LIVELIHOOD RESTORATION		
S/No	Type	Date of Meetings
1	Buganda Land Board	14 th April 2018
2	Ministry of Defence and Veteran Affairs-MODVA	17 th May 2018

C.4.6 Meeting Minutes with Government entities

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Stakeholder Consultation Meeting with Buganda Land Board at their Head Office in Mengo, Kampala, for the KJE PPP ESIA and RAP Update	
	DATE	14 th April, 2018
	VENUE	Buganda Land Board
	MEETING START	1015hrs
	MINUTES BY	Peter Atukwatsibwe

Attendance Register: See appendix

TEXT
<p>The Meeting Commenced at 1015 hours.</p> <p>Mr. Kizito Bashir Juma, Head Physical Planning, Surveying and Research at Buganda Land Board (BLB), chaired the meeting.</p>
<p>Agenda items:</p> <ul style="list-style-type: none"> • Prayer • Welcome remarks from the chairperson (Mr. Kizito Bashir Juma); • Self-introductions for all the members present; • KJE Project Overview presentation by the Consultant (Atacama Consulting); • Discussions; • Closing remarks by the chairperson; and • Close of meeting.
Welcome remarks from the chairperson (Mr. Kizito Bashir Juma)
<ul style="list-style-type: none"> • The chairperson welcomed the team from UNRA and Atacama Consulting to BLB and was glad the meeting was taking place to enable sharing of experience from Environmental and Social Impact Assessment (ESIA) and Resettlement Action Plan (RAP) activities for KJE project. He mentioned the Chairman Buganda land Board was held in the meeting somewhere else but would join in shortly.
Self-introductions for all members present
<ul style="list-style-type: none"> • Members in attendance introduced themselves by name and organisation they were representing.
KJE Project Overview presentation

<ul style="list-style-type: none"> Edgar Mugisha, an environmental consultant with Atacama Consulting gave the opening remarks and Denis Kyongera an environmental consultant with Atacama Consulting made an overview presentation about the Kampala Jinja Expressway Public-Private Partnership Project (KJE). 	
Experience sharing and remarks session of the meeting	
Remark/ Question	Responses
6) Mr. Male D Kyawalabye (Chairman BLB)	Edgar Mugisha
<ul style="list-style-type: none"> How much of the Buganda Kingdom Land (under custody of BLB) is being affected by the KJE Project since we have over 20 square kilometres of land along that entire project stretch. 	<ul style="list-style-type: none"> We are not yet certain of how much kingdom land is affected however BLB could provide us with the shape-files of Buganda Kingdom land under its custody such that we can map out the actual affected land. We the consultants, UNRA Surveyors and BLB Surveyors should be able to meet and ascertain the actual size of the affected land.
<ul style="list-style-type: none"> The RAP Team (UNRA and Consultant) should come to BLB when they are ready to Value and promptly compensate the affected land. We are reluctant to release our land titles to UNRA Surveyors to enable them cut off the affected piece of land without assurance of a quick compensation process. We have had incidences where our land titles have been held for almost a year and yet there are other projects and People on land who would like to use the same land titles. Otherwise land acquisition is a standard process which we know very well and we are willing to cooperate. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> This has been noted. UNRA has since improved the land acquisition process especially on the KJE project but at times it is delayed by the land wrangles and law suits. UNRA has subdivided the KJE Right of Way into sub-section/volumes that will be assessed and compensated at different time other than waiting to assess the entire route before compensation which causes the delays.
7) Mr Kizito Bashir Juma	Edgar Mugisha
<ul style="list-style-type: none"> There should be a concept of GREEN in the design of the road. The Road reserves should be vegetated to enhance aesthetic view and environmental conservation. 	<p>This is one of the interests of the consultants and AfDB. Land scaping along the way will be done and the funders are willing to fund a Green corridor concept along the road. A large section of the roads will also be built on stilts and this will preserve the ecosystem underneath re-vegetation plan will be prepared and implemented as part of the KJE project</p> <p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA has also got into collaboration with other stakeholders and made a program called Green Right of Way (GROW). UNRA acquired land from National Forestry Authority (NFA) where they will grow trees in ex-situ and transplant grown trees to the project areas. If Buganda has tree species that are culturally representative, they

	<p>should bring the ideas on board to be incorporated in the plan.</p> <p>UNRA also has a proposal to put a green park along this road and would be glad if BLB could provide unencumbered land for this initiative.</p>
<ul style="list-style-type: none"> Stakeholder engagements usually happen during Project Planning however no such engagements are undertaken once the project construction starts and yet there are a number of grievances that arise during the construction of the project. Will the Environmental and social consultant be part of the construction team to ensure that the environmental recommendations are implemented and people's grievances are collected and addressed? 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> The presence of the consultant in the implementation phase depends on the procurement process of UNRA and the Project financiers.
<ul style="list-style-type: none"> The time lag between valuation and compensation is usually very long. There should be a factor of time included in the asset inventory such that in case of delay a certain percentage is added onto the initial assessed value of the assets. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA is paying PAPs 4 months after evaluation. UNRA is also abiding to a new legislation where money will be increased by 15% per year for any delay in compensation caused by UNRA.
<ul style="list-style-type: none"> Why shouldn't UNRA also compensate the orphan land (small piece of land left after acquiring the Right of way that may not be usable by the affected person). There have been instances where people are left with small pieces of lands that are of no use to them. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> Land for Land is being considered as a form of compensation to minimise cases of loss of productivity. UNRA is also compensating close to 90% of the land that remains and is unusable due to the project's right of way and after this the PAPs are free to even further sell the land to their neighbours who can annex it to theirs.
<ul style="list-style-type: none"> The Project affected Persons (PAPS) should not be asked to leave before compensation. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA has changed its methods in the land acquisition process by improving its communication. In this case UNRA is issuing formal eviction notices after adequate compensation. However there are instances beyond UNRA where people especially tenants evict themselves just from hear say, without any eviction notice issued by UNRA. UNRA is also avoiding raising down buildings of people that are not meant to be affected. UNRA has developed a special formula to cater for schools, hospitals and big business owners who are losing business location.

<ul style="list-style-type: none"> We are aware the road alignment will pass in Kireka where we have a king's Palace. How will the palace be affected? If not affected, how far is the road from the King's palace? The serenity of the king's residence is important to the kingdom. The road design within the vicinity of the Kabaka's residence's should ensure it has no black spot because culturally the king (Kabaka) does not see a corpse. 	<p>David Kalanzi</p> <ul style="list-style-type: none"> Different cultural sites in Buganda have been identified and mapped out and this includes the Kabaka's palaces in Banda and Kireka.
8) Barnabas Ndawula	Seguya Henry Kizito
<ul style="list-style-type: none"> UNRA should work closely with all major stakeholders such as Buganda Kingdom in handling the ESIA and RAP since a big portion of the project outline, if not all, lies within the Buganda kingdom. The kingdom clearly understands the behaviour and issues of its people and the Kingdom is also good at mobilising. We are willing to give acknowledgeable forms/letters to all Kibanja tenants on kingdom land as we have done before and we could also assist in verification of the rightful owners of plots. 	<p>Yes, Buganda should be engaged all through the ESIA and RAP process.</p>
9) Simon Kabogoza	Seguya Henry Kizito
<ul style="list-style-type: none"> Are there any plans to follow up on the project affected persons after compensation to ensure their livelihoods are maintained as indicated in the presentation? 	<p>UNRA has developed a Monitoring and Evaluation framework where they will have two components that is a rapid assessment and a detailed assessment. In the rapid assessment, tracing of the PAPs happens after 1 month of payment to assess people that have misused the money, those that are failing to find land and those that are failing to settle in. In the detailed assessment, UNRA will trace the PAPs after 6 months of payment, and here they will be able to know which PAPs have had their livelihoods improved, those that have declined and then trace back to the livelihood plan. UNRA is also required by IFC to follow up and account for every PAP.</p>
<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> The assessment is also mapping out other cultural sites such as shrines, tombs and some of these are privately owned. The assessment process is therefore having a challenge differentiating between a genuine site and one that is not. We therefore request for assistance from Buganda Kingdom in this regard. 	<p>Kabogoza Simon</p> <ul style="list-style-type: none"> The consultants and UNRA should liase with Buganda Heritage and Tourism board and the Ministry of culture of Buganda to get information regarding the different cultural sites and also to help the assessors identify the genuine sites and also identify those that could have been left out by the assessment process.

<ul style="list-style-type: none"> Are there any cultural sites belonging to the Buganda kingdom that are likely to be affected by the project? 	David Kalanzi <ul style="list-style-type: none"> Different cultural sites in Buganda have been identified and mapped out and this includes the Kabaka's palaces in Banda and Kireka.
<ul style="list-style-type: none"> The project schedule should be designed in such a way that the PAPs are quickly and adequately compensated after evaluation and ample time given to them as well to allow them to relocate and settle in the new location. 	Edgar Mugisha <ul style="list-style-type: none"> As per IFC performance standards PAPs should not be evicted before being adequately compensated, therefore it is not expected to happen with this project.
10) Rehema Nanvuma W	Edgar Mugisha
<ul style="list-style-type: none"> Have you started the implementation of the project? Has the verification exercise been completed especially for the stretch between Kampala and Namagunga? 	<ul style="list-style-type: none"> We are still in the RAP planning phase, once it is approved then implementation will take kick off. However there are some isolated incidents such as in Volume 1, where UNRA had to come and take action by giving the PAPs some money to avoid it being taken back as issues are being sorted. Regarding the verification exercise, disclosures have to take place, census is taken, PAPs are approached, interviewed and coordinates of their property taken. We ensure that there is an asset attached to every PAP and this has to be intermarried with the Inventory loss.
<ul style="list-style-type: none"> As big land owners, we would like to get the project strip maps to allow us determine how much of Buganda land is being affected along the entire stretch. 	<ul style="list-style-type: none"> Yes, strip maps will be shared as part of the disclosure process.
<ul style="list-style-type: none"> You have talked about selection of resettlement sites where there can be Land for Land compensation. As BLB we embrace this and would like to participate in the process. What will be the requirements? 	<ul style="list-style-type: none"> Special attention regarding resettlement is being given to vulnerable groups that have to be resettled such as those in Kasokoso. From the strip maps obtained in 2002, most land in Kasokoso was agricultural land but people have since grabbed the land and settled there. According to requirements by the lenders these people are also going to be compensated because their livelihoods must be restored. Consultations are ongoing with key stake holders such as National Housing which is looking at low cost housing for the affected people. BLB should also come on board as a key stake holder and be a partner since the Kingdom's people are

	being affected and the King would love to see his subjects resettled.
Mr. Mugaya Denis	
<ul style="list-style-type: none"> I don't know the mandate of the consultant but you need to pay special attention to land under public assets and some of the public assets themselves because some of the public land previous taken by the Central government has been returned to the Buganda Kingdom since 2013 and is now under the stewardship of the BLB. 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> The consultant is mandated to carry out RAP planning phase, verification phase and implementation. The report from RAP process will be available on the AfDB website for 120 days from 1st/06/2018 and there will also be an opportunity for a public hearing after the process.
<ul style="list-style-type: none"> It should also be noted that some of the issues related to land are political a case in point is Kasokoso area where you may find some obstacles. This is where public relations is very important and the kingdom would help since the kingdom owns some land in this area and people listen us, however we can only get involved if there is a good strategy for the affected people. We wouldn't want to taint our image. 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> Among the contested areas is Kasokoso and with this UNRA is having ongoing discussions with National Housing to construct cheap housing in house for house compensation for those interested. Land for Land is being done for the PAPs that are interested in this form of compensation.
Denis Bugaya	
<ul style="list-style-type: none"> Some of the land being captured as public land has since been returned to Buganda. This is because a lot of public land in Buganda has been under government for a long time, and therefore the verification process must have captured it as public land yet this land has since been transferred back to Buganda. How are you going to handle delays related to approval of valuation reports? The Chief Government Valuer's (CGV) office is understaffed. The delayed approval will in turn affected prompt compensation of the affected people. 	<p>Edgar Mugisha</p> <ul style="list-style-type: none"> This is key to note and as consultants we will need to liase with BLB surveyors to check in the inventory and know which land has since been transferred back to Buganda and therefore is not public land. <p>Denis Bagaya</p> <p>There consultants should provide us with strip maps as earlier requested and our team of surveyors can ascertain which formerly regarded as public land has since been returned to BLB.</p>
<ul style="list-style-type: none"> There are a number of people who have land agreements in wetlands. How are you going to handle these? 	<p>Seguya Henry Kizito</p> <ul style="list-style-type: none"> UNRA is working in tripartite form together with Atacama and Earth Systems and challenges of the Ghost PAPs will be dealt with.

<ul style="list-style-type: none"> How are you handling the Mutungo issue? There is an ongoing court suit between the royal family and Kasaasa challenging the registration process of the Land title under Kasaasa (Landowner). We are aware the Kasaasa master Land title has subdivisions of land titles and some of the affected people could have presented these land titles to UNRA. The land titles may look genuine but once the court case regarding the ownership of master land title is decided, this will affect all other land titles under these subdivisions. UNRA is likely to do double compensation if the affected people with land titles under these subdivisions are paid. If UNRA verifies that all the titles of the subdivisions emanated from the mother land title, as BLB we advise UNRA to halt the compensation process 	<ul style="list-style-type: none"> UNRA has met the conflicting parties and is hopeful that something will be agreed upon. UNRA had also started the compensation process for the people with legitimate milo titles as it awaits the court verdict. However, following this advice I will meet with our technical team and make a decision on the matter.
CLOSURE: The meeting was closed at 1220hours

  <p>EARTH SYSTEMS Environment • Water • Sustainability</p> 	Stakeholder Consultation Meeting with the Commissioner, Veteran Affairs (Ministry of Defence and Veteran Affairs-MODVA) for the KJE PPP ESIA and RAP Update	
	DATE	17 th May, 2018
	VENUE	Ministry of Defence and Veteran Affairs Headquarters, Mbuya
	MEETING START	0820 hrs.
	MINUTES BY	Edmond Twinobusingye

Attendance Register: Attached

TEXT
The Meeting Commenced at 0820 hours.
Agenda items: <ul style="list-style-type: none"> – Welcome remarks from the commissioner-Veteran affairs – Self-introductions by members present – KJE Project Overview presentation by Denis Kyongera – Background to Veteran issues in Uganda – Question and Answer Session – Close of meeting.
Welcome remarks from the commissioner-Veteran affairs,
<ul style="list-style-type: none"> • The commissioner-Veteran affairs, Mr. Mike Mabonga Wambi welcomed the team from Atacama Consulting.
Self-introductions by members present
<ul style="list-style-type: none"> • Members in attendance introduced themselves by Name and Organisation they were representing.
KJE Project Overview presentation
<ul style="list-style-type: none"> • Denis Kyongera, a Consultant at Atacama Consulting gave an overview presentation about the Environmental and Social Impact Assessment process and the Resettlement Action Plan for the Kampala Jinja Expressway Project.
Background to Veteran issues in Uganda
<ul style="list-style-type: none"> – The Commissioner-Veteran affairs, Mr. Mike Mabonga Wambi provided a brief synopsis to issues of military veterans in Uganda as follows;

- Able-bodied Ugandans who had little to no education background were enlisted for World War II and on return; they were given a small package to retire on. These constituted the first batch of army veterans in Uganda.
- Post-independence, the turbulent political atmosphere in Uganda meant that one group of soldiers would oust another and hence there was no proper retirement plan for former soldiers. Majority of the soldiers in the rag tag rebel groups had little to no education background and hence could not have a meaningful life out of the forces.
- First, forward, in 1986 when the current government seized power, it was deemed that part of the political solution to rehabilitating former rebels and soldiers was to integrate them in the national army. However, in 1992, development partners requested that Uganda downsizes the army and as a result, 36000 soldiers were laid off without any gratuity or terminal benefits. Most of these settled in present day Kasokoso that used to be a wetland, Wakaliga and Bukasa areas. These veterans, many of whom are yet to receive their pension and gratuity are financially vulnerable with no strong economic base. It is good that this project has engaged them to get to know their issues. Solutions being designed should be empathetic of the current predicament of veterans.

Question/Comments and Answer session of the meeting

Question/Comment	Responses
21) Arthur Kanya (MODVA) The livelihood restoration aspect of the KJE Project ties in well with what the Ministry of Defence and veteran affairs is doing for army veterans. The ministry is looking at restoration of livelihoods of veterans by capacity building to include skills transfer, starting cooperatives to ensure that they become self-reliant and to create financial inclusion. The Ministry could support the project in this area.	Noted.
For the aspect of relocation, are you looking at cash compensation or locating a suitable piece of land to resettle those that will be displaced by the project?	Edgar (Atacama Consulting) Government, in looking at cost saving would buy the idea of locating available land, where say the veterans can be resettled. It would be better if cash compensation is channelled to the ministry of Defence to put up low cost residences for the veterans. This would come after UNRA and the ministry of Defence engage the veterans and sell the idea to them. Putting up the housing units can co-opt labour services of the project-affected veterans. Cities alliance has also come on board with ideas that can be taken up in this regard.
22) Commissioner, Veteran affairs (MODVA) Resettlement in the army entails psychological rehabilitation of former soldiers to cope with civilian life in the community outside the army.	Noted.

<p>Other aspects of resettlement at the ministry involve;</p> <ul style="list-style-type: none"> – Skilling soldiers to enable them eke out a living through vocational training. – Rehabilitation of wounded soldiers that have been laid off to enable them engage in activities that economically empower them. <p>Veterans have to be handled well because they are militarily trained and yet have diverse challenges and could pose a risk to security if they are ignored.</p>	
<p>It is good that the veterans have been engaged in the execution of this project however, more sensitisation is still needed and the ministry can use its political leverage to assist in popularizing this project.</p>	<p>Noted.</p>
<p>The veterans could also be enlisted to be part of the construction work that does not require specialized skills.</p>	
<p>23) Arthur (MODVA)</p> <p>The option of acquiring an alternative piece of land and building low cost housing units to resettle the veterans would be a good option. What does this entail?</p>	<p>Denis (Atacama Consulting)</p> <p>During the census survey, respondents were asked whether they would prefer cash compensation or physical relocation. Most of them preferred cash compensation. The challenge with this in wetland areas like Kasokoso, is that compensation cannot be made for a wetland. This project conforms to international standards hence if this group of veterans can be classified as vulnerable people they would need to be resettled. However, a suitable piece of land in a close radius to the city would have to be sought given that these people are urban and have sources of income close to the city.</p>
<p>24) Denis (Atacama Consulting)</p> <p>We would like to understand if the ministry of Defence and veteran affairs or the UPDF- Uganda People's Defence Force could have land that could be used to resettle the veterans out of the project area.</p>	<p>Commissioner, Veteran affairs (MODVA)</p> <p>The Uganda land commission and Buganda land Board would be more helpful in identifying land that can be leased for a long time for this purpose.</p>
<p>25) Arthur (MODVA)</p> <p>In physically resettling project affected people out of the project area, do you only construct a house for them? Do you cater for their lost sources of income and livelihood?</p>	<p>Edgar (Atacama Consulting)</p> <p>The livelihood component is key in this project. The areas to be selected for resettlement will be assessed for linkages that ensure that project affected people do not lose out on sources of income and livelihood.</p>

<p>26) Edgar (Atacama Consulting)</p> <p>In terms of releases of terminal benefits to the veterans by the line ministry, what is the outlook in this regard?</p>	<p>Commissioner, Veteran affairs (MODVA)</p> <p>There is a backlog in terms of payment of terminal benefits to beneficiaries. However, government through the ministry of defence and veteran affairs has come up with an idea that has been bought at the highest level. It entails sourcing for money outside the budget such that the current backlog is cleared in two phased releases. However, the ministry has made some savings in this quarter and will pay close to 2000 veterans out of the 79000 that have to be paid. This adds to the desperation of the veterans. Many that were laid off in 1992 have not been paid off. Some settled in Kasokoso and hence eviction from the project area there will add to their misery. This should be handled with care.</p>
<p>27) Denis (Atacama Consulting)</p> <p>As part of the project, the communities in the project areas are supposed to identify which community/livelihood projects could be picked on for funding by donors. Can you guide in this regard?</p>	<p>Commissioner, Veteran affairs (MODVA)</p> <p>We already have ideas in this regard that we can use for benchmarking to guide veterans in the project area in selecting a viable income/livelihood project (s). Some of the veterans in the Elgon and Rwenzori regions have gone into fish farming while others have collaborated with the Uganda Wildlife Authority to set up apiary projects in the National Park as a way of improving their livelihoods. Others in northern Uganda have taken to dairy farming, fruit processing and growing. We could pick lessons from all these.</p>
<p>28) Commissioner, Veteran affairs (MODVA)</p> <p>The idea of asking project communities to identify priority livelihood projects that could be taken on for funding by donors is an innovative one. However, for our case, it is vital that the number of veterans that will be affected by the KJE project is ascertained and where they will be resettled so that their terminal benefits once processed, will find them in a better state. In this way, they will cooperate with the project.</p>	<p>Edgar (Atacama Consulting)</p> <p>The challenges of finding terminal benefits for the veterans notwithstanding, there are programs that can come in now to make sure that the veterans can be engaged in income generating ventures as they wait for terminal benefits to come through. The road project will need labour and as such, the skilling programs by the Ministry of Defence should go on. Financial literacy campaigns should be conducted to enable veterans manage their compensation and terminal benefits.</p>
<p>29) Edgar (Atacama Consulting)</p> <p>The lenders have made it clear that the livelihood restoration component has to come out clearly in this project. As a result we have engaged communities and line ministries in this regard to ensure that this component is covered.</p>	<p>Arthur (MODVA)</p> <p>Livelihood restoration is what touches core in veteran affairs. The issue is how to uplift the livelihoods/living standards of the veterans and hence the livelihood component of the KJE Project speaks well to this aspiration.</p>
<p>30) Edgar (Atacama Consulting)</p>	<p>Commissioner, Veteran affairs (MODVA)</p>

Project impact assessment reports will be displayed on the African Development Bank website for a period of 120 days starting 1 st June 2018 so that people can read and provide input. There will be a public hearing and members of the public will be invited to make submissions	This has been noted.
CLOSURE: The meeting was closed at 0932 hours
